

Data Cabling Intern

Full job description

We are seeking interns to support our team leads in the installation of network cabling, fiber optics, and various network-related equipment, including network switches, wireless access points, IP-based speakers/clocks, and IP security cameras.

These positions are temporary full-time roles from May to September, with potential opportunities for part-time work extending into the fall.

EXPERIENCE:

- Knowledge and ability to work while making safety the number one priority is a must!

RESPONSIBILITIES:

- Install CAT 6 cabling
- Mount face plates on surface mount boxes correctly
- Build closets (mount and install backboards, cross connects, racks, patch panels, fibre optic and hardware)
- Route cable through data centres, buildings and workstations
- Test, and verify network drops
- Will perform all other duties as required by team leads

QUALIFICATIONS:

- Excellent people skills, communication skills and self-management skills
- Honesty, integrity and a genuine desire to help

- Creative in completing a task
- Must have a strong commitment to safety
- Must be physically fit, including ability to safely lift heavy objects and tools
- Must be well organized and be able to work well individually and as part of a team
- Must possess a valid Ontario driver's license and have a clean background check

WORK ENVIRONMENT:

- Will set up and work safely in any work environment
- Will work in all weather conditions, day, night, or weekends with possible overnight stays
