1. ELIGIBLE KARTS AND EQUIPMENT

1.1 General:

The Promoter reserves the right to make changes to the products provided to the Entrants such as, but not limited to oil, tires, fuel, etc. Any change will be communicated in advance, when possible or by the “Special Event Regulations.”

1.2 Classes Structure

Class	Age	Weight	Engine	Rear Width	Other
Micro Rok	7/10	230 lbs.	Mini Rok	MAX 1100mm	Fixed gear 10/75 or 11/82, Exhaust restrictor.
Mini Rok	9/13	245 lbs.	Mini Rok	MAX 1100mm	
Junior Rok VLR	12/15	310 lbs.	Rok VLR	MAX 1400	
Senior Rok VLR	15+	350 lbs.	Rok VLR	MAX 1400	
Master Rok VLR	32+	380 lbs.	Rok VLR	MAX 1400	+190 lbs body weight
Junior Rok	12/15	320 lbs.	Rok GP	MAX 1400	Exhaust restrictor.
Senior Rok	15+	355 lbs.	Rok GP	MAX 1400	
Master Rok	32+	390 lbs.	Rok GP	MAX 1400	+ 190 lbs body weight
Shifter Rok Senior	15+	395 lbs.	Rok Shifter	MAX 1400	
Shifter Rok Master	32+	410 lbs.	Rok Shifter	MAX 1400	+ 190 lbs body weight

1.3 Engines

Engine Claim Rule

Any engines taking part in a ROK Cup Promoted event, can be purchased by any competitor taking part in the event. The competitor must be registered for the event and in the same class, and only at the end of the event. ROK Cup Promotions, or its affiliated promoters have the first rights of refusal on any claim and can claim any engine at anytime. The fee is retail price of the engine plus \$500 (Five Hundred) claim fee. The claimed party will receive the claim fee and a new engine from ROK CUP or the affiliated promotor. The claimant will receive the complete engine package as they would with a new purchase. Refusal to sell will result in disqualification from the event, loss of all championship points, and the competitor will NOT be allowed to compete in any ROK CUP event for 12 (twelve) consecutive months.

All Claim fees MUST be paid in full in the form of US dollars, cash ONLY, form and cash must be returned to ROK CUP Promotions admin or the affiliated promotor.

Tech officials are required to return the engine back to its factory settings (carburetor settings, ignition settings), before delivering to the new owner. Claim will be kept anonymous

- 1.3.1** Rok Cup USA is restricted to Vortex ROK engines (respecting the Homologation Fiche) **ONLY**. See www.rokcupusa.com for relative Homologations files.
- 1.3.2** Engines **MUST** be run as supplied by the manufacturer. No modification or components substitution is allowed, unless otherwise specified in the "Special Event Regulations."
- 1.3.3** Rok Cup USA Technical Officials have the right to inspect any engine or any part at any time during the Event and without any particular reason.
- 1.3.4** Rok Cup USA Technical Officials have the right to request, at any time during the Event and without any particular reason, to have competitors exchange parts of the engine (i.e. but not limited to clutch, exhaust, carburetor, coil, wiring loom, ignition, fuel, etc.) with an identical part provided free of charge by Vortex or Rok Cup Promotions LLC.
- 1.3.5** Refusal to submit to inspection and/or exchange of parts, will result in disqualification from the Event.
- 1.3.6** Rok Cup USA Technical Officials have the right to requests that the Drivers, at any time during the Event and without any particular reason, demonstrate on-board engine starting. **Not valid for Shifter Rok.**
- 1.3.7** When engine sealing is declared for the Event, this must be done before qualifying.
- 1.3.8** When engine sealing is not declared, conventional marking of engines will be done after qualifying.
- 1.3.9** Each driver will be allowed to use two engines per race.
- 1.3.10** If engines need to be repaired the Entrant or his/her mechanic must take all necessary steps to replace damage parts, within the Tech Area and in presence of a Tech Official. In this instance, the Driver will retain his/her current position for the next competitive event.
- 1.3.11** The Entrant, if they are unable to take all necessary steps to repair or replace damaged parts in the engine, will be allowed to replace the damaged engine with a new engine for competition. A "CHANGE OF MATERIAL" form must also be filled and presented to the Technical Director. However, in this instance, the Driver will be required to start from the back of the field during the next competitive event.
- If the entrant has declared a second engine for the Event, they will be allowed to use the second without penalty.

1.4 Chassis

- 1.4.1** Rok Cup USA is **OPEN** to any chassis with either the current CIK/FIA homologation or the CIK/FIA homologation of the previous period (including brakes and bodywork) and in compliance with the CIK/FIA Technical Regulations. Chassis approved by major US karting sanctioning bodies for asphalt sprint racing are acceptable. Each Driver will be entitled to submit one (1) chassis for the event, changing chassis between drivers is forbidden.
- 1.4.2** The following parts **MUST** be safely secured with wire, circlips, snap ring, nylocks or metal lock nuts.
- Brake pedal to chassis.
 - Brake rods (both ends).
 - Master cylinder to chassis.
 - Brake caliper to chassis spindle (Shifters **ONLY**).
 - Brake calipers to spindle.
 - Brake disc to brake hub (metal lock nuts only).

-Weights up to 5lbs single 8mm bolt; over 5lbs require two (2) 8mm bolts (must be double nutted), 35mm minimum diameter aluminum or steel washers should be utilized to prevent the seat from breaking. Weight must be white in color and must contain the kart number.

-Steering column to chassis.

-Steering wheel hub.

-Steering wheel hub to steering column.

-Tie rods at both ends.

-Kingpins.

-Spindle to wheels.

-Throttle pedal to chassis.

1.4.3 Maximum diameter for rear axle is 50mm, 1,9 mm minimum thickness. Maximum diameter for Micro/Mini Rok rear axle is 30mm. Rear axle **MUST** be in magnetic steel.

1.4.4 Bumpers are required front, rear, and side protection. Front and side bumpers **MUST** be made of magnetic steel, rear bumpers **MUST** be plastic. For all categories, they **MUST** be homologated with the bodyworks.

1.4.5 The Floor Pan **MUST** be made of rigid material, and it must span from the central strut of the chassis frame to the front rail of the chassis frame. **MUST** be laterally edged to prevent the Driver's feet sliding off the floor pan. **ONLY** fixation holes allowed. **ONLY** one hole of maximum 35mm allowed for steering column access.

1.4.6 Bodywork **MUST** have valid CIK/FIA homologation. Body work must be run as supplied, and in good working condition no (holes, rips, tears) no modifications are allowed. Rear bumper minimum width (Mini 1040) (all others 1340). At no time shall the rear tire break the plain of the rear bumper.

1.4.7 Transmission **MUST** be only to the rear wheels. Any kind of differential is prohibited.

1.4.8 Chain guard is required. Full protection totally covering front and rear sprockets and chain is mandatory, **shifters require rear coverage.**

1.4.9 Any kind of suspension device or suspension system is prohibited.

1.4.10 Brakes **MUST** have valid CIK/FIA homologation. Brakes approved by major US karting sanctioning bodies are acceptable.

1.4.11 Carbon brake pads are **NOT** allowed.

1.4.12 Any kind of carbon/carbon braking system is prohibited.

1.4.13 Steering **MUST** be controlled by a steering wheel Steering Hub: Option 1-Standard hub (no angle), Option 2-One angled hub, Option 3-One angled hub with one angled spacer. Angles may not be achieved with washers.

1.4.14 The main rim of the steering wheel **MUST** be steel or aluminum. Steering column **MUST** be magnetic steel.

1.4.15 Seat **MUST** be designed to prevent the driver from moving to the sides or front when cornering or braking. Seats supports **MUST** be mounted by using nuts, bolts, and a metal or aluminum washer with a minimum diameter of 35mm and 1,5mm thickness to eliminate seat supports break through.

1.4.16 Both pedals **MUST NOT** protrude forward of the chassis (including the bumpers) and **MUST** be mounted in front of the master cylinder. Brake pedal **MUST** have a double linkage to the master cylinder. Accelerator pedal **MUST** be equipped with a return spring.

1.4.17 When chassis sealing is declared for the Event, this must be done before qualifying. When chassis sealing is not declared, conventional marking of chassis will be done after qualifying.

1.4.18 It is forbidden to replace the chassis during the Event. Each Driver will be allowed to use one chassis per race. If the chassis is damaged beyond repair during the Event, the chassis may be replaced if and only if the Rok Cup USA Technical Officials check and provide their permission. A "CHANGE OF MATERIAL" form must also be filled and presented to the Technical Director.

1.4.19 The replacement chassis **MUST** be of the same manufacturer and model.

Push Back Bumpers

CIK Push Back Bumper Systems are required for the following ROK Cup USA classes:

- ROK Micro
- ROK Mini
- ROK Junior
- ROK Senior
- ROK Master
- Junior 100cc
- Senior 100cc
- Master 100cc

Refer to the following CIK drawings for the technical specs of the CIK Pushback Bumper System.

[Drawing 2d.pdf](#)

[Drawing 2c.pdf](#)

The use of the following homologated items are mandatory for ROK Cup USA Competition:

- Front Fairing must be a CIK Homologated Front Fairing
- Mounting Fairing Hardware must be a homologated front fairing mounting kit of the bodywork homologation period 2015 - 2020.

The front nose must be affixed to the kart with the CIK-stamped Front Fairing Mounting Kit, with the stamped arrow facing up. It must be possible for the front fairing to move freely back in the direction of the chassis without any obstruction from any part that may restrict movement. Any mechanical work or other intervention to maximize the friction of the front bumpers is strictly forbidden.

- Drivers must enter the official grid area with the front “PBB” fairing detached from their kart.
- The Driver, or mechanic, must attach the front “PBB” fairing without the use of tools and under the supervision of the ROK Cup USA Grid Officials.
- Zip ties may be used to hold the clamp to the metal bumper portion but shall not hold the clamp from opening.
- The Grid Official has the right to inspect the front “PBB” fairing for modification or excessive wear and the compliance is determined by the ROK Cup USA Officials.
- There must be a clearance at all points between the front bumpers, (upper and lower tubes), and the front fairing of 27mm, (1.063 inches) at all times.

The front fairing must be in the correct position at all times during competitive elements, (see CIK Technical drawings 2c and 2d). Should a driver or other person put back in place a front fairing that was not correctly positioned before the driver crosses the scales and reports to Tech, the driver will be disqualified from that competitive element.

CIK Push Back Bumper Penalties

The black flag with an orange disc **will not** be shown to a driver if a drivers front “PBB” fairing is no longer in the correct position.

If the front “PBB” fairing is no longer in the correct position after the race with one side pushed in, a warning will be imposed automatically to the driver.

If the front “PBB” fairing is no longer in the correct position after the race with both sides pushed in, a time penalty of **5 seconds** will be imposed automatically to the driver. The penalty may not be protested or appealed.

The front fairing must be in the correct position at all times during competitive elements, (see CIK Technical drawings 2c and 2d). Should a driver or other person put back in place a front fairing that was not correctly positioned before the driver crosses the scales and reports to Tech, the driver **will be** disqualified from that competitive session.

1.5 Tires

1.5.1 Rok Cup USA is restricted to **LeVanto Tires ONLY**, unless otherwise indicated. The following tires are allowed:

Slick tires: LeVanto RWT 4,5/10,0 -----5 + 7,1/11,0 -----5

Rain tires: Bridgestone YLP 4,0/10,0 -----5 + 6,0/11,0 -----5

For reasons of unforeseen circumstances, at the sole discretion of Rok Cup Promotions LLC, a different brand, compound or size of tire could be declared for a specific event and/or for a specific class.

1.5.2 The maximum exterior diameter of the front wheel is 280mm. The maximum exterior diameter of the rear wheel is 300mm. The maximum width of the front wheel is 135mm. The maximum width of a rear wheel is 215mm. For Micro/Mini Rok class, the maximum exterior diameter of the front and rear wheels is 280mm and the maximum width of the front and rear wheels is 135mm.

1.5.3 Any kind of tire treatment or modification is forbidden. Heating or warming tires in the pits and/or pre grid is **FORBIDDEN**.

1.5.4 At the sole decision of the Race Director and/or Rok Cup Promotions, Tires Parc Fermè (Tire Farm) can be imposed.

1.5.5 Drivers are forbidden from replacing tires during the Event. Tire allocations will be determined by the event organizer. These will be the only tires approved for the Event unless the Race Director announces the allowance of extra tires due to safety reasons.

1.5.6 All rain or dry tires must be submitted for marking and/or scanned at tire desk, if requested, and **ONLY** at designated time as per the event schedule and further announcements.

1.5.7 All official event tires dry and wet must have bar codes.

1.6 Oil

1.6.1 is restricted to Motul Grand Prix 2 T **ONLY**.

1.7 Fuel

1.7.1 is restricted to SUNOCO SUPREME 112.

1.7.2 Fuel/oil is the **ONLY** combination allowed.

1.7.3 Rok Cup USA Technical Officials have the right to perform any kind of fuel tests to any competitor at any time during the Event and without any particular reason.

1.7.4 Fuel test will be carried out by comparison. The Entrant will declare the type of percentage used if requested by Rok Cup USA Technical Officials.

1.7.5 Fuel Test Procedure will be determined by Technical Officials.

1.7.6 Failure to pass fuel test will result in Event disqualification.

1.7.7 Results of fuel tests are final.

1.7.8 Rok Cup Promotions LLC reserves the right to prosecute to the full extent of the law any competitor found to be using any EPA---listed known cancer---causing products.

1.7.9 At the sole decision of the Race Director and/or Rok Cup Promotions LLC, Fuel Parc Fermè can be imposed.

1.8 Miscellaneous

1.8.1 Composite materials are banned, except for the seat, floor pan and chain guard.

1.8.2 Data acquisition devices capable of recording and displaying data **ONLY** are allowed.

1.8.3 Any system capable of modifying fuel ratio mixtures, traction, throttle, ignition timing, etc. is forbidden.

1.8.4 All drivers may utilize a maximum of two cameras. All cameras must be **tethered**, cannot be mounted higher than the steering wheel, cannot be mounted to helmets, side pods, front spoiler at any time. Cameras must be clearly marked with drivers name and contact phone number

1.8.5 If the mounting of any device is considered dangerous by Rok Cup USA Technical Officials, the Rok Cup USA Technical Officials may request that such devices be removed.

1.8.6 Communication to/from Driver and/or data acquisition devices via radio/telemetry or any other system is forbidden.

1.8.7 No fluid spillage of any kind on the tarmac is allowed at any time. Catch bottles are highly recommended. Fluid spillage of any kind will result in a black flag.

1.8.8 Transponders should be located as per CIK/ABM positioning: On back of seat at a height of 25cm +/- -- 5cm from tarmac, with no obstructions.

1.8.9 Transponders will be MANDATORY as stated on the schedule. It is the responsibility of the Driver to ensure the transponder is properly mounted. If the transponder is not operable in any competitive session, the Driver will start from the rear of the field for the next competitive event.

1.8.10 No lighting of any kind may be added to any kart for any official or unofficial on track session. The illumination of any data screen must be as supplied by the manufacturer and may not be altered in any way.

1.8.11 Numbers: Racing numbers **MUST** be displayed on all four sides of the kart. Numbers **MUST** be easily readable and in block style. Yellow background and black number is highly recommended.

Micro Rok	1---99
Mini Rok	100---199
Junior VLR	800---899
Senior Rok VLR	900---999
Master Rok VLR	700---799
Junior Rok	200---299
Senior Rok	300---399
Master Rok	600 - 699
Shifter Rok	400 - 499
Shifter Master Rok	500 - 599

2. TECHNICAL APPENDIX

MINI ROK

1. Fuel System:

- a. All fuel system components must be utilized as supplied.
- b. No additional components are permitted.
- c. Any fuel filter, if utilized, must be placed between the fuel tank and the original fuel pump.
- d. Vent tubes are optional, but fittings must remain in carburetor.
- e. Fuel Pump must be mounted to the engine.
- f. A "Y" or "T" can be installed in the fuel line between the fuel pump and fuel inlet to the carburetor to facilitate the installation of a return line to the fuel tank. The "Y" or "T" must have the same inside diameters for all 3 connections.

2. Carburetor:

- a. Dell'Orto PHBG 18 BS.
- b. The only allowed changes to the Dell'Orto PHBG 18 BS carburetor are main jet and needle clip position. Any other change or modification is not allowed.
- c. Only OEM Dell'Orto parts are allowed and must be of the same type and size as originally supplied.
- d. All jets must be original Dell'Orto jets.
- e. Stamped numbers on parts DO NOT guarantee the accuracy of the part.
- f. Standard Dell'Orto PHBG 18 BS Set Up:
 - Slide: #40
 - Needle: W23

- Outer pilot: #60
- Inner pilot: #50
- Emulsion tube: 266AN
- Floats: 4gm
- Maximum venturi size: 18mm.

3. Air Box:

- a. Foam air filter insert is optional.
- b. Air box clamps **MUST** be tight.
- c. Air box must not contain any additional holes.
- d. No external form of air ducts forcing air inside of air box is permitted.
- e. Air box must be secured completely after each track event otherwise last place position is given.
- f. Plastic protection under rain conditions is allowed.

4. Coil:

- a. Must be mounted to the engine.
- b. Must use coil wire as supplied.

5. Wiring Harness:

- a. Must use all components as supplied.
- b. No additional components are permitted.
- c. Must use original buttons.
- d. If any wire is damaged or cut, wire coupling can be used to repair cut wire area only.
- e. Replacing the ends of the harness is acceptable with similar part.
- f. Additional grounds are allowed.

6. Battery:

- a. Battery must be of the same physical dimensions as the supplied battery.
- b. Battery must fit inside supplied battery box.
- c. Battery box must be attached to the frame.
- d. A secondary battery is allowed to power data systems only: Mychron, Unipro, Alfano, etc.

7. Spark Plug:

- a. Only the following plugs allowed:
 - i. NGK B/BR EG heat range is open.
 - ii. Must be original and no modification is allowed. (Changing the spark plug gap is allowed).
- b. Original supplied spark plug washer or head temperature gauge sender must be in place.
- c. Spark Plug Cap must be as supplied.

8. Exhaust Pipe:

- a. No treatment of any kind.
- b. No sand blasting is allowed.
- c. No form of thermo wrapping is allowed.
- d. Internal dimensions may not be altered because of rust.
- e. No modifications to silencer end cap.
- f. No major likings.
- g. Exhaust temperature sensor:
 - i. One exhaust temperature sensor is allowed.
 - ii. One hole only can be drilled on the exhaust pipe for sensor.
 - iii. No specific location is required for the exhaust temperature sensor.
 - iv. Any hole not being used must be completely plugged if exhaust sensor is not being used.

v. Exhaust **MUST** remain intact, as provided by the manufacturer. No cracks and/or welding is permitted.

9. Exhaust Header:

- a. As per Homologation File.
- b. Headers cannot be cracked or leaking.
- c. A go-no go gauge will be used to control headers. It is allowed to clean the restrictor headers with scotch-brite or solvent.

10. Clutch:

- a. Clutch components **MUST** not contain significant amounts of any kind of oil or grease.
- b. It is mandatory to use the cover provided by Vortex of the clutch bell.

11. Ignition Timing:

- a. Standard (3mm.) +/-1 mm.

12. External Modifications:

- a. Any modification clearly not called out inside this document is not to be taken as legally acceptable.

13. Chassis

- a. Wheelbase 900mm or 950mm **ONLY**.

14. Vortex

- a. **Engine sprocket:** Vortex 10T or 11T only.

MICRO ROK

All rules, regulations, sizes and measures as per Mini Rok except for:

- 1. **Rear Gear:** 10/75 or 11/82
- 2. **Exhaust:** Restrictor as per Homologation File.

VLR ROK

1. Fuel System:

- a. All fuel system components must be utilized as supplied.
- b. No additional components are permitted.
- c. Any fuel filter must be fixed between the carburetor and the fuel tank, and no additional component are permitted.

2. Carburetor:

- a. The only allowed Tillotson HW-38A .
- b. Replacement parts must be of the same type and size as originally supplied.

3. Air Box:

- a. Foam air filter insert is optional.
- b. Air box clamps **MUST** be tight.
- c. Air box must not contain any additional holes.
- d. No external form of air ducts forcing air inside of air box is permitted.
- e. Air box must be secured completely after each track event otherwise last place position is given.

f. Plastic protection under rain conditions is allowed.

4. Coil:

- a. Must be mounted to the engine.
- b. Must use coil wire as supplied.

5. Wiring Harness:

- a. Must use all components as supplied.
- b. No additional components are permitted.
- c. Must use original buttons.
- d. If any wire is damaged or cut, wire coupling can be used to repair cut wire area only.
- e. Replacing the ends of the harness is acceptable with similar part.
- f. Additional grounds are allowed.

6. Battery:

- a. Battery must be of the same physical dimensions as the supplied battery.
- b. Battery must fit inside supplied battery box.
- c. Battery box must be attached to the frame.
- d. A secondary battery is allowed to power data systems only: Mychron, Unipro, Alfano, etc.

7. Spark Plug:

- a. Only the following plugs allowed:
 - i. NGK B/BR EG heat range is open.
 - ii. Must be original and no modification is allowed. (Changing the spark plug gap is allowed).
- b. Original supplied spark plug washer or head temperature gauge sender must be in place.
- c. Spark Plug Cap must be as supplied.

8. Exhaust Pipe:

- a. No treatment of any kind.
- b. No sand blasting is allowed.
- c. No form of thermo wrapping is allowed.
- d. Internal dimensions may not be altered because of rust.
- e. No modifications to silencer end cap.
- f. No major likings.
- g. Exhaust temperature sensor:
 - i. One exhaust temperature sensor is allowed.
 - ii. One hole only can be drilled on the exhaust pipe for sensor.
 - iii. No specific location is required for the exhaust temperature sensor.
 - iv. Any hole not being used must be completely plugged if exhaust sensor is not being used.
 - v. Exhaust **MUST** remain intact, as provided by the manufacturer. No cracks and/or welding is permitted.

9. Exhaust Header:

- a. As per Homologation File.
- b. Headers cannot be cracked or leaking.
- c. A go-no go gauge will be used to control headers. It is allowed to clean the restrictor headers with scotch-brite or solvent.

10. Clutch:

- a. Clutch components **MUST** not contain significant amounts of any kind of oil or grease.
- b. It is mandatory to use the cover provided by Vortex of the clutch bell.

11. Ignition Timing:

- a. Ignition timing non-tech.

12. External Modifications:

- a. Any modification clearly not called out inside this document is not to be taken as legally acceptable.

13. Vortex

- a. **Engine sprocket:** Vortex 10T, 11T, 12T, 13T.
- b. Cylinder base gasket thickness is non-tech and could be changed to adjust the port timing.
- c. Copper head gasket to adjust squish is allowed, thickness is non-tech.
- d. The shape of the combustion chamber must be original.

VLR JUNIOR ROK

All rules, regulations, sizes and measures as per VLR Rok except for:

1. **Exhaust:** Restrictor as per Homologation File.

ROK GP Junior – Senior – Master

1. Fuel System:

- a. All fuel system components must be utilized as supplied.
- b. No additional components are permitted.
- c. Any fuel filter, if utilized, must be placed between the fuel tank and the original fuel pump.
- d. Vent tubes are optional, but fittings must remain in carburetor.
- e. Fuel Pump must be mounted to the engine.
- f. A plastic “Y” or “T” can be installed in the fuel line between the fuel pump and fuel inlet to the carburetor to facilitate the installation of a return line to the fuel tank. The “Y” or “T” must have the same inside diameters for all 3 connections.

2. Carburetor:

- a. Dell’Orto VSH 30.
- b. The only allowed changes to the Dell’Orto VSH 30 carburetor are main jet and needle clip position. Any other change or modification is not allowed.
- c. Carburetor airbox clamps must be used as supplied.
- d. Only OEM Dell’Orto parts are allowed and must be of the same type and size as originally supplied.
- e. All jets must be original Dell’Orto jets.
- f. Stamped numbers on parts DO NOT guarantee the accuracy of the part.
- g. Standard Dell’Orto VSH 30 Set Up:
 - Slide: #40
 - Needle: K33
 - Outer pilot: #60
 - Inner pilot: CD1 (B45 also allowed).

- Emulsion tube: DP268
- Floats: 4gm
- Maximum venturi size: 30mm

3. Air Box

- a. Foam air filter insert is optional.
- b. Air box must not contain any additional holes.
- c. No external form of air ducts forcing air inside of air box is permitted.
- d. Air box must be secured completely after each track event otherwise last place position is given.
- e. Air box clamps **MUST** be tight.
- f. Unused end of carburetor socket may be trimmed away to where it intersects the slotted hub.
- g. Plastic protection under rain conditions is allowed.

4. Coil:

- a. Must be mounted to the engine.
- b. Must use coil wire as supplied.

5. Wiring Harness:

- a. Must use all components as supplied.
- b. No additional components are permitted.
- c. Must use original buttons.
- d. If any wire is damaged or cut, wire coupling can be used to repair cut wire area only.
- e. Replacing the ends of the harness is acceptable with similar part.
- f. Additional grounds are allowed

6. Battery:

- a. Battery must be of the same physical dimensions as the supplied battery.
- b. Battery must fit inside supplied battery box.
- c. Battery box must be attached to the frame.
- d. A secondary battery is allowed to power data systems only: Mychron, Unipro, Alfano, etc.

7. Spark Plug:

- a. Only the following plugs allowed:
 - i. NGK B/BR EG heat range is open.
 - ii. Must be original and no modification is allowed. (Changing the spark plug gap is allowed).
- b. Original supplied spark plug washer or head temperature gauge sender must be in place.
- c. Spark Plug Cap must be as supplied.

8. Exhaust Pipe:

- a. No treatment of any kind.
- b. No sand blasting is allowed.
- c. No form of thermo wrapping is allowed.
- d. Internal dimensions may not be altered because of rust.
- e. No modifications to silencer end cap.
- f. No major leaks.
- g. Exhaust temperature sensor:
 - i. One exhaust temperature sensor is allowed.
 - ii. One hole only can be drilled on the exhaust pipe for sensor.
 - iii. No specific location is required for the exhaust temperature sensor.

- iv. Any hole not being used must be completely plugged if exhaust sensor is not being used.

9. Exhaust Header:

- a. As per Homologation File.
- b. Restrictor JUNIOR ROK as per Homologation File.
- c. Headers cannot be cracked or leaking.
- d. A go-no go gauge will be used to control restrictor headers. It is allowed to clean the restrictor headers with scotch brite and solvents.

10. Clutch:

- a. Clutch components **MUST** not contain significant amounts of any kind of oil or grease.
- b. It is mandatory to use the cover provided by Vortex of the clutch bell.

11. Ignition Timing:

- a. Standard (3 mm.) +/-1 mm.

12. External Modifications:

- a. Any modification clearly not called out inside this document is not to be taken as legally acceptable.

13. Cooling System:

- a. Must be original as supplied.
 - i. Minor welding is allowed to cover up small holes.
 - ii. Additional metal mounting brackets may be used to secure Radiator.
 - iii. All radiators **MUST** be mounted on the left side of the driver and placed above the chassis frame. Supplementary radiators, if needed, may be mounted either on the left or right side.
- b. Water hoses:
 - i. Original and after market hoses are acceptable.
 - ii. It is not mandatory to use thermostat but if used must be OTK W866.
 - iii. If not using thermostat, only allowed split is for a water temperature sensor.Water cooled engines will be allowed to use Hot Head water heating system

14. Water Pump:

- a. **ONLY** one water pump may be used
- b. External water pump **MUST** be located on the traverse tube of the chassis under the seat.
- c. The water pump must be belt-driven by the axle, and may not be electrically powered in any way, shape, or form.
- d. Non Glycol additives are allowed for lubrication

15. Reeds

- a. **ONLY** Vortex supplied reeds allowed.

16. Power Valve:

- a. No-adjustable style only
- b. Only new style short power valve caps are legal. Part#W10172/GP

ROK SHIFTER

1. Fuel System:

- a. All fuel system components must be utilized as supplied.
- b. No additional components are permitted.
- c. Any fuel filter, if utilized, must be placed between the fuel tank and the original fuel pump.
- d. Vent tubes are optional, but fittings must remain in carburetor.
- e. Fuel Pump must be mounted to the engine.
- f. A plastic "Y" or "T" can be installed in the fuel line between the fuel pump and fuel inlet to the carburetor to facilitate the installation of a return line to the fuel tank. The "Y" or "T" must have the same inside diameters for all 3 connections.

2. Carburetor:

- a. Dell'Orto VSH 30
- b. The only allowed changes to the Dell'Orto VSH 30 carburetor are main jet and needle clip position. Any other change or modification is not allowed.
- c. All original parts must be in the carburetor and remain stock.
- d. Only OEM Dell'Orto parts are allowed and must be of the same type and size as originally supplied.
- e. Stamped numbers on parts DO NOT guarantee the accuracy of the part.
- f. Standard Dell'Orto VSH 30 Set Up:
 - Slide: #40
 - Needle: K98
 - Outer pilot: #60
 - Inner pilot: B45 (B46/47/48/49/50 also allowed)
 - Emulsion tube: ONLY DQ268
 - Floats: 4gm
 - Maximum venturi size: 30mm
 - 250 or 300 needle seat

3. Air Box

- a. Foam air filter insert is optional.
- b. Air box must not contain any additional holes.
- c. No external form of air ducts forcing air inside of air box is permitted.
- d. Air box must be secured completely after each track event otherwise last place position is given.
- e. Air box clamps must be tight.
- f. Plastic protection under rain conditions is allowed.
- g. Unused end of carburetor socket may be trimmed away to where it intersects the slotted hub.

4. Coil:

- a. Must be mounted to the engine.
- b. Must use coil wire as supplied.

5. Spark Plug:

- a. Only the following plugs allowed:
 - i. NGK B/BR EG heat range is open.
 - ii. Must be original and no modification is allowed. (Changing the spark plug gap is allowed).
- b. Original supplied spark plug washer or head temperature gauge sender must be in place.
- c. Spark Plug Cap must be as supplied.

6. Exhaust Pipe:

- a. No treatment of any kind.
- b. No sand blasting is allowed.
- c. No form of thermo wrapping is allowed.
- d. Internal dimensions may not be altered because of rust.
- e. No major leaking.
- f. Exhaust temperature sensor:
 - i. One exhaust temperature sensor is allowed.
 - ii. One hole only can be drilled on the exhaust pipe for sensor.
 - iii. No specific location is required for the exhaust temperature sensor.
 - iv. Any hole not being used must be completely plugged if exhaust sensor is not being used.

7. Exhaust Silencer:

- a. No treatment of any kind.
- b. No sand blasting is allowed.
- c. No form of thermo wrapping is allowed.
- d. Internal dimensions may not be altered because of rust.
- e. Cannot be cracked or leaking.
- f. Packing must be in place and in good condition

8. Ignition Timing:

- a. Standard (1,5mm.) +/-1 mm.

9. External Modifications:

- a. Any modification clearly not called out inside this document is not to be taken as legally acceptable.

10. Cooling System:

- a. Radiator height maximum 50cm from the top of the Radiator excluding the cap and overflow hose to the track service.
- b. Water hoses:
- c. Original and after market hoses are acceptable.
- d. Non Glycol additives are allowed for lubrication.

Water cooled engines will be allowed to use HotHead water heating system

11. Water Pump:

- a. **ONLY** one water pump may be used.
- b. External water pump **MUST** be located on the traverse tube of the chassis under the seat.
- c. The water pump must be belt-driven by the axle, and may not be electrically powered in any way, shape, or form.

12. Engine Mount:

- a. The engine mount for the shifter does not have to be as supplied, but it must be of similar dimensions, construction, and material as the supplied motor mount.

15. Reeds

- a. **ONLY** Vortex supplied reeds allowed.

PROCEDURE FOR CHECKING THE COMBUSTION CHAMBER VOLUME

(CC) PROCEDURE

1. Have the engine disassembled from the chassis; unless otherwise directed by technical director
2. Wait until the engine is at ambient temperature (obligation for the organizer to supply special cooling fans);
3. Remove the spark plug (check the 18.5mm dimension)
4. Insert a certified CIK CC tool in place of the spark plug, the insert must be fixed on the head in the same way as the 18.5 mm spark plug.
5. Place the piston at the top dead center
6. Make sure the engine is level
7. With a laboratory burette with graduated scale (mechanical grade A or electronic) fill the combustion chamber with OIL type: "MARVEL MISTERY OIL", until the liquid verges on the upper edge of the insert.
8. The volume measured then must be that established by Vortex engine Fiche
9. In case of discrepancy of the measured value, the procedure will be conducted one additional time

(Squish) PROCEDURE

1. Remove the spark plug
2. Use approved solder (Kester, Solid Core Part#14-5050-062 1.5mm)
3. Insert solder parallel to the wrist pin, must touch the cylinder wall
4. Roll the engine by hand over top dead center to squish solder
5. Measure solder with digital caliper
6. The volume measured then must be that established by Vortex engine Fiche
7. In case of discrepancy of the measured value, the same procedure will be conducted one additional time, on the side directly opposite of the first procedure
8. The average of both sides will determine final measurement

ENGINE DISTRIBUTION MEASURING GAUGE.

For all Rok categories where control is foreseen, the angle of discharge, suction, decanting and jumping must be measured with a thickness of 0.20 mm, having a width of 5 mm (as per drawing).

The reading is performed using a digital display with an encoder measuring device, or with a graduated disk with a minimum diameter of 200 mm.

MINI ROK ENGINE INTAKE GAP CONTROL

<p>1</p>	<p>2</p>
<p>TURN CLOCKWISE AND LIFT THE PISTON TO ALLOW THE INSERTION OF THE FEELER GAUGE AGAINST THE LOWER EXHAUST EDGE.</p>	<p>TURN COUNTERCLOCKWISE AND LOWER THE PISTON UNTIL IT MEETS THE GAUGE RESTING AT THE EXHAUST EDGE, AT THIS STAGE SET THE SCALE ON THE POSITION OF 0 DEGREES.</p>
<p>3</p>	<p>4</p>
<p>RELEASE THE FEELER GAUGE AND TURNING COUNTERCLOCKWISE LOWER THE PISTON TO ALLOW THE INSERTION OF THE FEELER UNDER THE UPPER EDGE OF THE EXHAUST.</p>	<p>TURN CLOCKWISE TO LIFT THE PISTON UNTIL IT MEETS THE FEELER GAUGE RESTING AT THE EXHAUST EDGE. AT THIS STAGE CHECK THAT THE EDGE OF DISPLACEMENTS OF THE VERNIER MATCH NOT LESS THAN 31 DEGREES.</p>

VLR PORT GAUGE

By inserting the reference port gauge in the cylinder, after having positioned it correctly, the Technical Officer will be able, at the technical scrutineering, to detect any irregularities.

CLUTCH TECHNICAL CONTROL

The following clutch controls are allowed for all motorized classes with **ROK GP** engines:

- from a standstill in the pre-race and at the end of the race, in order to check the first advance of the clutch at 4000rpm (after checking the overall mass); the clutch must be in direct drive at 100% at the minimum of 5000 rpm in all conditions.

The following clutch controls are allowed for all motorized classes with **VLR ROK** engines:

- from a standstill in the pre-race and at the end of the race, in order to check the first advance of the clutch at 3500rpm (after checking the overall mass); the clutch must be in direct drive at 100% at the minimum of 4000 rpm in all conditions.

The following clutch controls are allowed for all motorized classes with **MICRO and MINI ROK** engines:

- from a standstill in the pre-race and at the end of the race, in order to check the first advance of the clutch at 3500rpm (after checking the overall mass); the clutch must be in direct drive at 100% at the minimum of 4000 rpm in all conditions.

TECHNICAL OFFICIER

The technical procedures for checking the engine and / or any other detail must be carried out only by Race Officials designated by **ROK CUP USA** for the event, in compliance with what is indicated in the TECHNICAL RULE BOOK; for any complaints and / or appeals we refer to what is indicated in this regard by the SPORTING RULE LS BOOK.

TECHNICAL APPAREL

1. ONLY Helmets with the following minimum standards are allowed:
Snell: K or M2010 (exp 20/12/21); SA2010 (exp 20/12/21); SAH2010 (exp 20/12/21); CMS or CMR 2016 (exp 20/12/26); SA 2015 20/12/26
SFI: 24.1/2010 (youth helmet/exp 12/20/21); 31.1/2010 (exp 12/20/21); 41.1/2010 (exp 12/20/24)
FIA: 8859---2015 (exp 20/12/25); 8860---2010 (exp 20/12/21);
2. Racing Suits Overalls: mandatory, with a current CIK/FIA valid homologation ONLY.
3. Gloves: for racing purposes with a high degree of abrasion resistance.
4. Footwear: MUST cover full ankle and MUST be designed and manufactured for racing purposes.
5. Neck Protection: mandatory for Micro Rok, Mini Rok and Junior Rok. Loss or lack of neck protection during practice, qualification, heats, pre---final, and/or final will result in a black flag.
6. Chest Protection is required for all drivers in Micro/Mini classes and is highly recommended for drivers in all classes. SFI, CIK, FIA certification is required.
