Testimonial : Navyansh Malhotra

Navyansh was employed as an Intern at HOPE Technik from 21 October 2019 to 01 November 2019. He is attached to Special Project Team (T2).

Navyansh is always willing to learn new things. He is able to multitask effectively and is able to handle a high-volume workload. He is also very adaptable and always able to understand a completely new and different task problem at a relatively fast rate. He is a fast learner and hence able to apply it on the task given.

Navyansh is a dedicated, hardworking and enthusiastic person with an endearing personality. He holds a considerable amount of experience within the team and has very good working relationship with his colleagues.

Navyansh leaves us to continue his education. We wish him good luck and a very bright future.

Yours sincerely,

Holden Ngoh
People & Culture Manager

Letter of Commendation – Navyansh Malhotra

Navyansh has a strong sense of responsibility and determination towards the project he is assigned to. His speed and efficiency in producing creative deliverables is unparalleled. He gets along well with colleagues – both on a professional level in collaborating with them on the Chat bot project as well as on a personal level in a social setting.

Navyansh's achievement was creating a chat bot for Wilhelmsen Ships Service Marine Products division. The chat bot was developed to allow for easier and faster response time to the day to day technical queries that customers or internal personnel ask for. The chat bot is now part of the new customer journey which Wilhelmsen Ships Service Marine Products division will embark on in the near future

In Wilhelmsen Ships Service and we are extremely appreciative of his contributions towards this project.

Sincerely,

Sachin Gupta

Ref: Navyansh Malhotra

Dear Sir/Madam,

I have known Navyansh Malhotra since he joined TTS in Year 8. I have supported him pastorally by being his form tutor, and academically by teaching him Computer Science.

Navyansh is an enthusiastic and skilled Computer Scientist who demonstrates an excellent understanding of subject material confidently. He has been programming for many years both as part of his academic studies and as a hobby. This is evident from the variety of independent Arduino projects he has worked on, from building Drones to the latest where he is building a Robotic Arm. He has not only been a role model for his peers, but also as a Computer Science teacher, I get to learn lot of new things from him.

Navyansh participates and actively encourages peers to attend hackathons; in fact, his team was a 2019 Hackathon winner at TTS. Alongside his studies, he has delivered coaching to his younger peers related to Canadian & Beaver Computing Competitions. He has a particular interest in adding code to mechanical products, a collection of which can be viewed in his online portfolio www.navyansh.com/portfolio

The A-Level Computer Science syllabus is challenging and broad, covering a wide variety of practical and theoretical concepts. Navyansh has a dedicated attitude to his studies, completing all his work within deadlines set, making detailed and thorough notes to consolidate his learning throughout the year. Equally confident across all the theoretical topics he was able to shine in a recent Von Neuman computer architecture project where he was able to present his detailed and comprehensive knowledge through an AR app.

I strongly and whole heartedly recommend Navyansh to an undergraduate degree in Engineering and to further take on independent project work, and internships in the industry. He is an asset not to be missed!

Sincerely,
Mr Praanot Kokkate
Computer Science Specialist
