Care Instructions

Most metal outdoor furniture is finished with paint, varnish, or powder coating to prevent rust. While aluminum doesn't rust—it can oxidize (causes pitting & dulls the finish). So maintaining your furniture will extend its life & make it easier to clean.

- Wash all frames with a solution of mild soap (like dish soap) and water.
- Rinse with clean water and dry with a soft absorbent cloth towel to remove buildup of dirt particles.
- **DO NOT** clean with abrasive materials or solvents to avoid scratching or damaging your set.
- Frames can be treated with a liquid wax for maximum protection against UV rays and/or salty, damp air.
- Store furniture in an upright position to prevent water building up in frames, as this will cause corrosion and freeze damage in cold climates.
- Consider covering your furniture when not in use for long periods of time (and during bouts of inclement weather).
