

Fixing Our Education System

Education: Finally, we Common-Sense Americans need to **fix our public education system**. Fixing education (resulting in smarter and **WISER** young Americans) will help fix our other problems from **runaway wokeness** to **fiscal irresponsibility**. This means putting **COMPETITION** in and pulling the **TEACHERS' UNIONS** out. To do this we need to **FUND THE STUDENT**, not the school.

COMPETITION is the **KEY** to fixing Education. Competition makes individuals better at whatever activity they are competing in. It makes manufacturing companies produce **higher quality** goods at **lower** costs. The explanation for this is **SO STRAIGHTFORWARD** even Joe Biden could understand this...

...I have a few **PREDICTIONS**. Under a **FUND THE STUDENT** system, the schools will get much better at teaching reading, writing, math, and science. All the parents I know (and, yes, I do know some who vote Democrat) prefer their kids to master reading, writing, math

and science over the latest “woke” precepts. Schools that stubbornly continue to place **Intersectionality** over **Algebra** will **wither on the vine**. Woke indoctrination efforts across the board will wane and eventually disappear. The public-school teachers’ unions, which prioritize social activism over children’s education, will be **relegated** to the **ASH HEAP OF HISTORY**.

America’s primary schools’ emphasis on math and science in the 1940s and 1950s enabled us to **TRAVEL TO THE MOON AND BACK** in 1969. Who knows? Maybe a renewed emphasis on math and science will enable us to finally capture the power of the Sun here on Earth. A future team of **BRILLIANT** Nuclear Physicists and Engineers who finally figure out how to harness **NUCLEAR FUSION** would unleash a power source that puts all other power sources to shame. We’re talking **LIMITLESS, CHEAP, POLLUTION-FREE** energy here, Folks. It all **STARTS** with **EFFECTIVELY** teaching **MATH** in our nation’s **ELEMENTARY SCHOOLS**.

Now for the cherry on the **FUND THE STUDENT** sundae? Not only will we get a **stronger** and **more competitive** workforce? We will get **smarter** and **WISER** young Americans. Wiser voters beget wiser politicians. **Open borders** combined with a **welfare state**? **No Dice, Joey B.!** *or any future version of old Joe*. Biological males on women’s swim teams? **NOPE!** The Federal Government (and state and local governments as well) must live within its means? **YES!**

And, arguably best of all? Our younger Americans will no longer be subject to the NEA/AFT's woke and anti-American BS. They'll relearn **APPRECIATION** for the fact that they were born in the United States! Like the **GREATEST GENERATION** before them, they will see that although the United States of America is not perfect (nothing manmade is) - **IT IS THE GREATEST BASTION AND DEFENDER OF LIBERTY AND FREEDOM IN THE HISTORY OF THE WORLD!**
