

The Common-Sense Take on COVID

While the Democrats were busy impeaching Trump for Biden's corruption a new threat was emerging in Wuhan, China in the form of what has become known as the **COVID Virus**. Whether COVID was the result of Chinese Communist Party (CCP) **malice (i.e., designed as a BIOWEAPON)**, or just **incompetence**, is unclear. It is unlikely to ever be completely clear as the CCP is determined to **block** any legitimate investigation into COVID's exact origin. What is fairly clear is that the COVID virus emerged from a government-run lab in Wuhan in late 2019 and quickly spread throughout the Wuhan area. What is **quite clear** is that the CCP did everything it could to prevent COVID from spreading throughout China but did **very little** to inform the rest of the world of COVID's extreme contagiousness and even less to prevent COVID from escaping China's borders.

A reasonable explanation for this is that the CCP figured that if China was being **hobbled** by COVID, then China's rivals, primarily the U.S., needed to be **hobbled** by COVID as well. Also, the CCP undoubtedly figured that spreading COVID to the U.S. would do damage to the **biggest threat** to China's economic and military aspirations, **President Donald Trump**. The fact that China's long-time friend and ally, **Joe Biden**, had emerged as Trump's opponent in the 2020 Election was the **icing on the COVID cake** for the CCP. In other words, even if COVID's creation and release from the Wuhan lab was

not malicious, how the CCP managed its spread cannot be dismissed as merely careless. It was **strategically malicious** and **the CCP needs to be held accountable** (*financially for a start*) **for the COVID Pandemic.**

Of note, China has amassed a **multi-trillion dollar trade surplus** with the United States since 2001 when Joe Biden helped usher them into the World Trade Organization (WTO). With their **excess U.S. dollars**, CCP-related Chinese firms have been purchasing **farmland** and other **real estate** in the United States. The upside to this? These assets can be **seized** by us down the road to achieve some of the aforementioned accountability for COVID. However, to accomplish this will require a U.S. President who is **competent, determined, courageous**, and (*quite obviously*) **unbeholden** to the Chinese Communist Party.

Another upside? A new **COMPETENT** and **ETHICAL** U.S. President (aka Biden's replacement) could **rally the world** around holding the Chinese Communist Party **ACCOUNTABLE** for COVID. Stepping up the global pressure on the CCP would also help the freedom-loving **Chinese People** in Hong Kong, Taiwan, and Mainland China as they look to eventually **relegate** the CCP to the **ASH HEAP OF HISTORY.**
