## A modern aesthetic with permeable properties

The ultimate sustainable driveway option with no additional drainage required and no need for planning permission. Drivesett Argent Priora is designed to enable rainwater to percolate directly into the ground below, without overloading the drains, thereby reducing flood risk. With all the design appeal of a contemporary granite-look it is available with a range of co-ordinating, walling and edging features.

### ! IMPORTANT LAYING INFORMATION

The Priora Sustainable Drainage System (SuDS) has been specifically designed to manage heavy rainfall. New and replacement driveways are exempt from planning requirements when they use SuDS. See pg 128 for additional notes on legislation and installation guidelines. Full installation guides can be downloaded from our website or contact Group Technical Services on 0333 220 2730.

## A versatile permeable solution with an aged and authentic look

Drivesett Tegula Priora has been designed to manage heavy rainfall in a sustainable way, with surface water passing through into the ground below. As a result, there is no need for planning permission or any additional drainage. Drivesett Tegula is renowned for its lasting high quality look, whilst featuring an elegant time-worn appearance.

## A patented permeable driveway solution

The affordable permeable driveway solution, available in a range of attractive and popular colour options to enhance every home. Driveline Priora manages driveway drainage by allowing surface water to pass through the joints directly into the ground below, therefore not overloading the drains and reducing flood risk. Due to this, no planning permission or additional drainage is required.
