ABOUT THE WORKSHOP

This unique 1 day course is rooted in the **Indian Spiritual Wisdom** tradition and validated by scientific measurements. It awakens us to the **Core** truth of existence that humans are not stand alone computer systems existing independently and insulated from everyone and everything else.

Instead they are part of a huge **Network** we call the '**Spirituo System**'. This will work as a catalyst to achieve an orbital shift in our perception of **Reality** and also in our current global perspective to an '**Enlightened World View**'. This impacts not only our own individual lives but also the future of all stake holders - **Creation**, businesses including the **Purpose, Priorities** and **Processes** of business.

The inspiration is to help link the destiny of individual, corporate and other businesses with the larger goal of human life in the '**Vision of Oneness**' of the entire **Existence**.

WHO IS THIS WORKSHOP FOR?

The current workshop is designed for CEOs, Leaders and Wisdom Masters propelling the destiny of humanity in this century.

The **Objective** is to help trigger awareness and awakening to realise, internalise and practice the role of '**Boardroom Consciousness**'. Through gaining this knowledge and guidance, we can convert Corporations into '**Conscious Corporates**' and business Enterprises into '**Enlightened Enterprises**'.
