

TURNOUTS

#4 Unweathered turnout

Our Turnouts are built with the same nickel silver rail as our track, then glued to laser cut, stained wood ties. They can be ordered preweathered like our track and are modified to be DCC friendly by isolating the frog. We build standard turnouts from #4 to #10, #4, 5 and 6 wyes, double slips, 3-way and various curved turnouts. All our turnouts are available in Code 70, 83, and 100 rail. The standard RP-110 wheels will work fine on all our Code 70 turnouts.

#6 3-way blade turnout

#10 turnout
