**DISTRICT NO. 6:** (Voting place, High School), BEGINNING at the corner formed by the intersection of the Northerly line of Washington Avenue with the Westerly line of Pershing Avenue; running thence (1) Westerly along Washington Avenue to Linden Street; thence (2) Southerly, along Linden Street to Carteret Avenue; thence (3) Northwesterly, along Carteret Avenue to Fillmore Avenue; thence (4) Northerly, along Fillmore Avenue and continuing in a straight line to the Southern line of lands of the Mexican Petroleum Corporation; thence (5) Easterly, along said line of lands to the Westerly line of lands of the Brady Tract; thence (6) Southerly, along said line of lands to the Northerly line of lands of the Conlon Tract; thence (7) Easterly, along said Northerly line of said tract to Washington Avenue; thence (8) Southerly, along Washington Avenue to the Northerly line of lands of the Hermann Tract; thence (9) Easterly, along the Northerly line of said lands to Noe's Creek; thence (10) still Easterly, along the several courses of said creek to Pershing Avenue; and thence (11) Southerly, along Pershing Avenue to the place of Beginning.

**DISTRICT NO. 7:** (Voting place, Nathan Hale School), BEGINNING at the intersection of Noe's Creek and Pershing Avenue; running thence (1) in a Westerly direction along the said creek to the Northerly line of the Hermann Tract; thence (2) still Westerly along the Northerly line of said tract to Washington Avenue; thence (3) Northerly, along Washington Avenue to the Northerly line of the Conlon Tract; thence (4) Westerly, along the Northerly line of said tract to the Westerly line of the Brady Tract; thence (5) Northerly, along the Westerly line of said tract to the Southern line of property belonging to the Mexican Petroleum Company; thence (6) Westerly, along the Southern line of said property to the Central Railroad of New Jersey; thence (7) Northeasterly along the lands of said railroad to Roosevelt Avenue; thence (8) Easterly and Southeasterly along said Roosevelt Avenue to Pershing Avenue; and thence (9) Southerly along Pershing Avenue to the place of Beginning.

**DISTRICT NO. 8:** (Voting place, Nathan Hale School), BEGINNING at the intersection of the Northerly line of Roosevelt Avenue and the Westerly line of Charles Street; running thence (1) Northerly, along the Westerly line of Charles Street and continuing in a straight line to a point in the Rahway River where Deep Creek enters into same; thence (2) in a general Westerly direction along the several courses of Rahway River to the Westerly boundary line of the Borough of Carteret; thence (3) in a general Southerly direction along the Westerly boundary line of the Borough of Carteret and also the Borough of Carteret and Jersey along Blair Road to the New Jersey Terminal Railroad Company; thence (4) Easterly along the New Jersey Terminal Railroad Company to the Central Railroad Company; thence (5) Northerly along the Central Railroad Company to Roosevelt Avenue; and thence (6) Easterly and Southwesterly, along Roosevelt Avenue to the place of Beginning.

**LEGAL NOTICE**

PURSUANT to an act entitled "An Act for the better protection of garage keepers and automobile repair men, Laws of 1915, C. 312, page 556 with all the supplements and amendments thereto" notice is hereby given to Nick Paul, last known owner and to whomsoever else may lay claim of motor vehicle, motor #342848, serial #275896, said car being an Essex Coach, that the said car will be sold at public auction on the 17th day of November, 1927, by Morris Hertz, an automobile repair-man residing in the Borough of Carteret, County of Middlesex and State of New Jersey and the proceeds of said sale shall be applied to the payment of a lien now held for repairs by the aforesaid Morris Hertz, said lien being in the amount of three hundred forty dollars (\$340.00) together with interest and costs and expenses of such sale.

MORRIS HERTZ.

**Rays Have Similarity**

There is no difference in principle between Hertzian rays and gamma rays of radium. Hertzian waves are usually polarized and, of course, have a very much greater wave length—furthermore, they arise from mass movements of electricity, while gamma rays arise from vibrations of single electrons.

**NEW JERSEY WEEKLY INDUSTRIAL REVIEW**

Business progress during the past few months, as reflected in wage and employment statistics, inspires confidence rather than apprehension, National industrial conference board.

Edgewater—Fire Engine No. 2 repaired and replaced in service.  
Somerville—Fairgrounds tract here will be subdivided immediately and offered for sale.  
Piscataway—Work under way building \$3,000,000 gas plant for Public Service Gas & Electric Company on Collier property at Silver Lake.

Perth Amboy—Ace Foundry Company of 176 Smith street incorporates with capital of \$100,000.  
Riverside—Holt Box Factory on Taylor street being painted.  
Middletown—Concrete being laid on Tyndall road from crossroads at New Monmouth to town brook near Middletown village.

Port Monmouth—County Gas Company installing pipe under Port Monmouth road.  
Woodcliff Lake—Work begun on permanent improvement of Glen road.

Montvale—Sidewalk building progressing rapidly, one side finished from state line to railroad station.  
Atlantic City—Convention of New Jersey State Firemen's Association held here September 22-24.  
Holland—New Jersey Power & Light Company building electric power station on Delaware River at Holland.

Mount Holly—William H. Horstmann Company to open new knitting mill here to be in full operation by January 1.  
Belmar—Construction of first section of \$2,500,000 shore resort relief highway will start within a few weeks.

Boundbrook—Work under way building section of New Jersey turnpike at Findern, and part of Millstone road from turnpike to Raritan River.  
Morrisville—New Jersey & Pennsylvania Traction Company repairs bridge over canal at Pennsylvania avenue and Union street.

Ocean City—City Commissioners considering erection of building to store city equipment.  
Bridgeton—Machinery received for new drycleaning plant of Manz Brothers & Smith Inc., at Pearl and Bank streets.

Hightstown—Work on \$40,000 new fire department headquarters progressing rapidly.  
Burlington—New street name signs placed throughout city.

Merchantville—Temple Lutheran Church of North Merchantville plans to build new structure soon.  
Merchantville—Local post office will be enlarged.  
Columbus—Movement under way

to establish national bank in Columbus.  
Weehawken—Huge drydock may be built in New Jersey probably here sufficiently large to accommodate largest vessels.

Lavallette—City council votes to sell electric lighting system for \$20,000.  
Riverside—First National Bank opens for business in fine new home.  
Haddonfield—Contract let for erection of ornamental lighting standards on Kings Highway from West Jersey & Seashore Railroad eastward to Potter street.

Mount Holly—Old trolley rails being removed from Main and Washington street and brick will be relaid.  
Camden—All road work on Malaga cut-off nearly completed.  
Glassboro—Work being rushed to completion on new dormitory building of Glassboro Normal school.

Millville—Large new glass factory to employ 3 eight-hour shifts being completed by Whitall-Tatum Company at Millville.  
Chews—Work will begin soon on new bridge over Big Timber Creek at Chews Landing.  
Paulsboro—Work of filling in causeway at Paulsboro for State Highway department nearing completion.

Merchantville—Woodbine and Myrtle avenues to be paved with concrete from West End to Poplar avenues.  
Trenton—\$400,000 addition to be erected to St. Francis Hospital on Hamilton avenue.  
Riverton—Contract let for laying curbs and sidewalks in borough.

Riverton—Cinnaminson National Bank erecting new home on Main street here.  
Port Monmouth—\$83,900 contract let for construction of hospital.  
New Brunswick—Old building at Neilson and Albany streets to be replaced with \$200,000 modern two-story office building.

Vineland—Cornerstone laid for new Vineland high school.  
Wildwood—Work on North Wildwood's new boardwalk progressing rapidly.  
Freehold—Concrete sidewalks being laid in Kiawa avenue.

Marlton—New Hale fire truck for Marlton Fire Company received.  
Blackwood—Princeton avenue from Harvey's corner to Black avenue given coat of stone and tar.  
Wildwood—New fire house to be erected at 15th and Central avenue; work on new sewage disposal plant at North Wildwood to begin soon.

**PUBLIC SERVICE TELEPHONE SYSTEM**

That approximately 75,000 telephone calls of all classes are handled in a single day over the private exchanges of the operating companies of Public Service is one of a number of interesting facts brought out in a feature article in the November 1 issue of Public Service News by Frank J. Davis, superintendent of telephones for Public Service.

Public Service has thirty-three independent telephone exchanges, located at various points throughout the State. Connected to these exchanges are 275 central office trunks, 135 tie lines aggregating 1,500 miles, and 2,500 telephone extension stations. In addition there are 500 telephones connected to the outside exchanges of the New Jersey Telephone Company. There is a staff of 146 operators not including the men who operate the local dispatching exchanges of the electric generation department.

In addition to the general exchanges Public Service has a number of exchanges of special types, i. e. dial exchanges at Kearny and Essex stations, load dispatching exchanges of electric generation department in the Newark Terminal Building and in Burlington, and telephone order receiving systems in the commercial offices in Newark, Jersey City, West New York, Paterson, Passaic, Trenton and Camden.

"Public Service maintains one of the largest and most efficient private telephone systems in the country", Mr. Davis writes. "Extending from Northern Bergen County to Gloucester County in South Jersey it affords means of quick communication throughout Public Service territory in New Jersey, with private lines to New York and Philadelphia as well. It contains almost every modern type of equipment and apparatus for private branch exchange service that is known in the telephone industry.

"To keep pace with the rapid expansion of our companies practically eighty per cent of our entire telephone system, within three years, was either completely replaced with new equipment and circuits, or extensions and improvements were made in keeping with the latest developments in the art of telephony. All of our equipment and circuits are leased from the telephone company, and the system is integral with the Bell System."

**RUTGERS PRESIDENT ASKS STATE SUPPORT**

Dr. John M. Thomas, president of Rutgers University, speaking before the Kiwanis Club of Trenton this week, declared that the future of the State University of New Jersey rests fairly in the hands of the State Legislature.

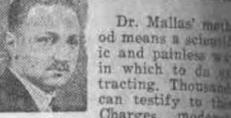

"If the State does not wish us at Rutgers to go ahead as a State institution," he said, "let the Legislature tell us so, and we will return to our original status and program as a private college and shut our doors to the thousands of young people who are eager for educational opportunity; but if the State wants us to continue, it should not require the services and withhold the means for rendering it."

"Such support as has been accorded to the University has come from the railroad taxes," he continued, "and as appropriations from this fund have been distributed among various institutions and agencies, the proportion left for distribution to

the counties for school purposes has diminished. This has brought forth criticism on the University and many citizens have gotten the impression that a part of the direct tax for school purposes and even local taxes have been in some way diverted to the State University. Of course this has never been true.

"The most important step which New Jersey can now take in education is to remove this cause of misunderstanding between friends of the public schools and the friends of higher education."

**PAINLESS EXTRACTIONS**

Dr. Mallas' method means a scientific and painless way in which to do extracting. Thousands can testify to this. Charges moderate for all dental work.

Fillings, Bridges and Crowns Inserted Most Painless

Free Examination and Advice Anytime SEE ME FIRST!

What I Have to Offer  
Our well appointed and thoroughly modern offices enable us to perform any kind of dental work with ease and comfort to the patient and at the same time do it as quickly as is consistent with good work.

**Around the Home-maker's Clock with Electricity**

The Kelvinator (electrically cooled refrigerator) may be purchased on our easy payment terms—a small sum down and

17 months to pay

There is nothing in the Thor to injure the finest fabrics. The washing is done inside the Thor cylinder. Hot soapy water pours through its smooth perforations as the cylinder revolves and reverses. The dirt is loosened gently and washed out.

FOR generations the housekeeper's art has been shown at Thanksgiving celebrations. Her best linens have been spread, her culinary skill demonstrated in the delicious food she has served.

Today's housekeeper escapes the heavy work of preparation which her grandmother had, although her home may be filled with guests and her entertainments many. She calls upon electricity for every task throughout her day.

In order to avoid the last minute rush she makes all possible preparations beforehand, storing the food in her electrically cooled refrigerator. Its dry cold atmosphere preserves delicate viands and other perishable foods for days. Her finest table linen and sheets and towels are snow-white because of the careful washing they receive in the Thor electric washer, while the Thor electric ironer gives them a gloss and finish which hand ironing can not give.

**Reminders**

- Two way sockets are required if a light and an appliance are to operate on the same electric outlet.
- Several rooms are sometimes darkened when a fuse blows out. Keep extra fuses on hand to avoid inconvenience.
- The merest flick of the fingers turns a light on or off if it is connected with a tumbler switch.

Easy payment terms on Thor electric washer or ironer. \$5 down, eighteen months to pay.

COUNCIL MINUTES

A regular meeting of the Council of the Borough of Carteret was held in Council Chamber on Monday, October 17, 1927, at eight o'clock p. m.

The minutes of previous meeting, October 3rd, 1927, were approved as printed on motion by Ellis and Andres.

On motion by Ellis and Andres the rules were suspended to take up the opening of bids on bonds. The advertisement for same was then read, and the following bids were opened: Barr Brothers & Co. 14 Wall Street, New York \$286,000 \$287,967.70

On motion by Ellis and Andres the above resolution was presented by Ellis: BE IT AND IS HEREBY RESOLVED that the bid of Elizabethport Banking Co. be retained for 285 one thousand Borough bonds on their bid of \$287,580.10, and that checks of the unsuccessful bidders be returned.

A letter was read from the Public Service Transportation Co. in reference to their taking over the Perth Amboy-Carteret route, and the liability insurance on these buses, accompanied by a sworn statement of its financial ability to carry its own insurance as provided by law.

On motion by Ellis and Ellis the rules were suspended to take up the reading of bills, and all bills found correct and properly audited were ordered paid, all voting yea on roll call.

Finance. Councilman Ellis and Andres then asked that bid for bonds of the Elizabethport Banking Co. be laid over until next Monday, October 24, 1927.

Streets & Roads. Andres spoke of the condition of Grant and Gantz avenues used as a detour during the building of the new road, which was to have been repaired by the United Construction & Supply Co. The Clerk was instructed to write them asking that they repair these roads at once. He also spoke of ashes wanted on Edgar street. On motion by Ellis and Coughlin this was turned over to the Street & Road Committee with power to act.

Police. Progress. Fire & Water. Progress. Lights. Progress. Bldgs. & Grounds. Progress. Poor. Progress. Law. Progress.

That the Mayor and Clerk sign Improvement Note No. 158 for \$1,334.77, to pay for sidewalks and curbs on Harris street, between Pershing avenue and Leick avenue.

Coughlin then spoke of the proposition on the ballots ticket, that he didn't think same should go on; that it was very selfish and unbecom- ing. D'Zurilla and Brown thought the same. Ellis said he thought it was all right. Andres raised a question on same. Coughlin then presented the following resolution:

BE IT RESOLVED by the Mayor and Borough Council of the Borough of Carteret, that a certain resolution adopted September 19th, 1927 at a regular meeting of the Mayor and Borough Council of the Borough of Carteret, requiring F. Wm. Hilker, Clerk of Middlesex County, to print upon the Official Ballot on November 8, 1927, a proposition entitled, "Shall the provisions of Article 6, etc.", be and the same is hereby rescinded and of no avail and that a copy of this resolution be sent to the said F. Wm. Hilker, County Clerk of Middlesex County, notifying him of the action taken on the part of the Mayor and Borough Council.

On motion by Coughlin and D'Zurilla same was adopted, Councilmen voting as follows: Andres, yes; Brown, yes; Coughlin, yes; D'Zurilla, yes; Ellis, no. Motion was made and seconded that we adjourn to meet Saturday, October 22nd, at 2 o'clock p. m., at the Borough Hall. The Clerk was instructed to write all members of Council to this effect. Louis Vonah was then heard asking that ashes be placed on crossings from Mary street down. Mo-

tion by Coughlin and D'Zurilla that this be put up to the Street & Road Committee, with power to act. Vonah then complained of water on sidewalk in front of his property, claiming that he had had same surveyed and that he was 4 1/2" below grade. There was some talk on this matter by Andres, Coughlin, Ellis and the Mayor. It was agreed that the Council would look into this matter on Saturday. Andres spoke of water on Holly street. This will also be looked into.

An adjourned meeting of the Council of the Borough of Carteret was held in Council Chamber on Monday, October 24th, 1927, at eight o'clock p. m.

Present: Mayor Thomas J. Mulvihill, Councilmen Andres, Brown, Coughlin, D'Zurilla; absent, Ellis, Vonah. Business of meeting—awarding bonds.

On motion by Vonah and Brown the above resolution was adopted, all voting yea on roll call. The Mayor then read the following letter addressed to Attorney Strem- lau: UNITED STATES MORTGAGE & TRUST COMPANY Fifty Five Cedar Street, New York October 19, 1927

For your information we beg to advise the \$827,000 Public Improvement Bonds of the Borough of Carteret, New Jersey, are now ready for execution, and if you will advise us the time and place most convenient for the officials to sign same we will be governed accordingly.

The Clerk was instructed to communicate with Caldwell & Raymond, have bonds brought here for the Collector's signature and make arrangements for other officials to sign. The Clerk was also instructed to have copy of resolution awarding bid for bonds sent to the Elizabethport Banking Co. by mail.

Clarence Slugg of East Rahway was then heard on sewer contractor blocking driveway; also on delay of policeman arriving on call for same. Motion by Andres and Vonah that when we adjourn, we do so at the call of the chair.

On motion by Vonah and Andres to adjourn was carried.

An adjourned meeting of the Council of the Borough of Carteret was held in Council Chamber, on Wednesday, November 2, 1927, at eight o'clock p. m.

Business transacted—talking over location for septic tank at East Rahway. The Mayor then appointed the following assessment committee for sidewalks and curbs: Harris street, Mrs. Teats, Mike Claus, William Riedle. Emerson street, John Beach, Steve Chaloka, Alex Kish. Longfellow street, Mrs. Teats, Mike Claus, William Riedle. Locust street, Adam Roszanski, Steve Fabian.

On motion the above appointments were confirmed, all voting yea on roll call, on each taken separately. There was talk on the option taken on property at East Rahway for tank. On motion by Vonah and Brown, Engineer Mitchell was instructed to go on with the plans figuring on septic tank location. All voting yea on roll call it was so ordered.

Motion by Vonah and Andres that communications be read. The following communication was then read: "THE WOMAN'S CLUB Carteret, N. J.

October 17, 1927 To the Hon. Mayor & Council, Borough of Carteret. We take this means of thanking you for your kindness in planting the Christmas Tree in front of the Memorial Building.

The following communication was then read: "CITY OF NEW YORK Board of Estimate and Apportionment Office of the Secretary Municipal Building October 25, 1927

At the meeting of the Board of Estimate and Apportionment on October 20, 1927, your communication suggesting that co-operative arrangement be effected between the forces of Metropolitan New Jersey and Metropolitan New York, to bring under control the extermination of mosquitoes originating in the salt marshes of Staten Island, was ordered filed, and the Secretary was directed to notify you that an appropriation of \$25,000 has been allowed the Health Department in the budget of the City of New York for the year 1928 for mosquito extermination in the Borough of Richmond.

Very truly yours, (Sgd) Joseph F. Higgins, Assistant Secretary. On motion by Vonah and Andres the above communication was ordered filed.

The Clerk was instructed to write the Board of Freeholders, attention of Mr. Vandenberg, praising the work of digging ditch on the Mexican Petroleum Company's property by the Middlesex County Mosquito Extermination Commission, on motion by Andres and Ellis.

Motion by Andres and Ellis that the rules be suspended to take up the reading of bills, and all bills found correct and properly audited were ordered paid, all voting yea on roll call. Motion by Andres and Vonah that when we adjourn we do so to meet again November 7th, 1927, at seven o'clock p. m., Clerk to notify all members of council to this effect. Motion to adjourn was carried.

COMMISSION ENLISTS AID FOR SURVEY OF N. J. Beginning Monday, November 14, and with the co-operation of a number of religious, educational, civic and fraternal officials and agencies, the New Jersey State Commission for Crippled Children will make a survey to locate every cripple in the state to the end that steps may be taken to minister to his or her needs, whether educational, vocational or medical.

Special effort is to be made to locate and place on definite record every crippled child, from birth to sixteen years of age. To accomplish this the public, private and parochial schools have been enlisted in the movement. The public school co-operation begins with Dr. Charles H. Elliott, State Commissioner of Education, and extends all through the educational institutions, with direction centralized in the various school principals.

Through other channels include hospitals, municipal departments and philanthropic agencies, the effort will be to enroll the name of every

cripple unable, because of age or other conditions, to attend school. The special purpose of this census is to ascertain if any of these cripples can in any way be assisted through vocational training in New Jersey or elsewhere. In this connection, Commissioner of Institutions and Agencies Ellis and his associates are rendering special aid.

Those assisting in the general census-taking of the cripples include Bishop Walsh and other Diocesan officers of the Catholic Diocese of Trenton and Newark, priests and clergymen of all denominations, the motion picture owners of New Jersey who will display slides in theatres throughout the state, Rotarians, Kiwanians, Lions and members of other luncheon clubs, Masons, Elks, Moose, Odd Fellows, Shriners and members of other fraternal organizations, the Knights of Columbus, the State Association of Police Chiefs, Disabled Veterans, Parent Teachers' Association, American Legion and its auxiliary, the State Medical Societies and hundreds of individual doctors, insurance agents and welfare workers.

The clergymen are to do most of their work on Sunday, November 13, when they will open the census-taking campaign with announcements from their pulpits, in which the people of their congregations will be asked to co-operate to the extent of locating cripples who would not otherwise be enrolled.

It is hoped through these various individuals and agencies to cover the entire state within six days concluding the canvassing and tabulation by Saturday, November 19.

Once the census facts are available the Commission will immediately proceed with the preparation of a report to the next Legislature with recommendations as to how the state may work for relief of crippled children. The scope covered by the Commission, and its census will take in all forms of physical and mental affliction, including blindness or defective vision, as well as lameness.

The Crippled Children's Commission, appointed by Governor Moore, consists of Joseph G. Buch, of Trenton, chairman; David C. Bowen, of Asbury Park; William C. Cope, of Newark; John E. Gill, of Trenton; Senator Morgan F. Larson, of Perth Amboy; Assemblyman Thomas W. Muir, of Plainfield; and Albert Schurr, of Newark. Chairman Buch is known the country over as the founder of the Elks' movement for the treatment of crippled children. He started this work in New Jersey and it has since spread to all parts of the

United States. Mr. Bowen is director of the State Board of Health. Mr. Cope represents the Rotary Clubs of the state, and Mr. Gill the Kiwanis

organizations. Senator Larson and Assemblyman Muir are representatives of the Legislature. Mr. Schurr represents the Mystic Shriners who

have already launched crippled children's movements of considerable magnitude, including the building of a nationwide chain of hospitals.

Making Your Telephone More and More Useful

EFFECTIVE research and development aid along both technical and administrative lines, is essential to the improvement of any service.

Such aid is assured to the New Jersey Bell Telephone Company through two great organizations—the American Telephone & Telegraph Company and the Bell Telephone Laboratories, Inc.

The technical and business development forces of these two companies are considered the finest of their kind in the world. They have produced most of the great advances in Telephony from the first instrument, switchboard and cable, through thousands of inventions leading to the means for talking across continents and oceans.

Today they have more than 2200 scientists and other experts working to improve all phases of telephone communication.

Each new device and practice they perfect is furnished to our Company and to every other Bell System organization. Each improvement thus becomes standard for all parts of the nation-wide Bell System, and your service is made better whether you wish to talk across the street or state or to the most remote section of our country.

Career of Service and Profit Before the Nation's Advertising Men

By FRANCIS H. SISSON, New York Financier.

In nearly every decade there are men who believe the country has reached a saturation point and who fear that they will find trouble in maintaining their volume of business in the face of growing competition.

There lies before advertising and advertising men not only the opportunity for service and profit but the clear call to duty. There rests upon business and industrial leaders of the world the distinct responsibility to state and explain the facts and principles upon which national and international business progress must be built.

A large and constantly increasing reading public seeks eagerly to know, and it is the mission of the publicist to inform and advise them through all the mediums at his command.

Time to End Sanctimoniousness Too Long Associated With Religion

By REV. HARRY EMERSON FOSDICK, New York.

We must grant that there are plenty of things associated with religion that deserve to be snuffed at. They are a weariness, and we would better confess it.

There, for example, is a kind of sanctimoniousness which has commonly been associated with religion. Oliver Wendell Holmes said that he might well have become a minister if he had not known a minister who looked and talked so like an undertaker.

We may be sure that any force which so puts a man in a morally reasonable universe with adequate spiritual resources to live by and a unified personality to live with, will issue in goodness, and that is not to be snuffed at.

Religion is terrific in its power. When it goes right it is the most beneficent force in civilization. When it goes wrong it can devastate a civilization more cruelly than an unharnessed river.

Too Many Philanthropies and Charities Working Injury to Character

By W. H. LANGSHAW, New England Manufacturer.

Riches are not essential to happiness. The majority of children are far more happy than most of us millionaires. The children have the whole secret of life's happiness. They know how to enjoy the simple things of life.

I do not believe in philanthropies or charities. Both tend to beggar. England always was a proud land and her people always have been proud, but enough injury has been done by the dole to make it almost as great a sorrow as the loss of her hundreds and thousands of lives.

The unwilling workers of this generation are the result of paternalism. Nothing is worse than paternalism, either in the lives of people or in the functioning of the government.

Boys and girls are made to go to school who do not wish to, but they want to work. When that is their desire, it should be granted. Not all the race is intended to be educated. Only a small percentage can use it.

United States Seeks to Eliminate European Influence From Western Hemisphere

By DR. DAVID P. BARROWS, California Educator.

THE United States has no imperialistic tendencies in her attitude on South America, but seeks to eliminate European influence from the western hemisphere and to help the country to develop.

The test is that this country has not sought to "divide and rule," according to the custom devised by the Romans and followed by many colonizing powers, but has aided in actually developing and strengthening the countries of the New World.

Actions classed as interventions have frequently been taken by this country more to prevent European actions of a similar nature than for any other reason.

The spread of American capital and enterprise to Latin-America cannot be prevented, but may be directed and possibly controlled. This flow of capital from the United States to the South already approaches \$500,000,000 annually.

Even dollar diplomacy need not menace the political or economic freedom of Latin-America. Development within the United States was at one time largely financed by foreign capital, chiefly British, and we welcomed this assistance with the idea that eventually we would be in a position to buy out the investment of the foreigner, which we subsequently did.

The Mexican oil situation will soon settle itself. American and British capital, enterprise and even the trained technical men developed in Mexico are being shifted now to Colombia and Venezuela, where more promising fields and more favorable regulations await them.

Latin-American countries are numerous, and when one decides not to welcome American capital, it will seek another. The mission of capital should be of benefit both to the country in which it is invested and the investing country.

There is such an agitation about flying and its possibilities that we may as well order steel helmets to ward off the discards from the picnic lunch basket.

Turks sacrificed a flock of 100 sheep in the dedication of a new railroad the other day, preferring for some reason not to wait until they got on the tracks.

She is a perfectly average young thing if she has 17 embroidered luncheon sets tucked away in the hope chest, and lunches on tuna sandwiches in a pharmacy.

Another delightful pursuit in this highly specialized age would be an exclusive photographer of total eclipses which last 30 seconds and happen every year or two.

The difference between a genius and an everyday artist is that the former cannot perform unless the north light happens to be just exactly right, and it almost never is.

When air travel is the regular thing who will take the place of the small boys along the way who jerk their thumbs over their shoulders as indicating their desire for a lift?

Barbank's First Triumph

When only 24 years old Burbank produced the famous Burbank potato through selection among Early Rose seedlings. This was his first contribution.

Help Hinders Musicians

If 94 per cent of the young hopefuls whom fond parents consider embryonic Paderewskis drop by the wayside before the third grade is reached, the fault lies mainly with those same fond parents, in the opinion of Nancy Armstrong, writing in the Musical Observer.

Miss Armstrong points out that, as the parents usually expect some results after the first few lessons, the child is often taught pieces simply by rote. She says: "The longer a child is taught by imitation the more difficult it is to teach him to read music, as he has learned that he can play without bothering about the notes, and the attention remains where it was at first focused, on the hands and keys, and much less time is required to undo this and train him to watch the notes and gain the touch system."

Seismologists say that every great earthquake causes pulsations which extend for thousands of miles in all directions on the globe, and one eminent authority has likened such pulsations to the long, long swells that sweep across the ocean. Not long ago an attempt was made to measure the height and length of waves of an earthquake that occurred in Greece, the pulsations of which were perceived by the aid of a specially constructed pendulum at Birmingham, England.

Mother camps have solved the problem of a vacation for home women, especially those who live on farms and in small towns. Montana started the idea five years ago and last year had eight camps where tired mothers could—and did—go for a few days of entire rest away from their families, among quiet and beautiful surroundings. These camps are financed by women's clubs and by the extension service of state colleges, so that the expense to those taking advantage of them is very slight.

The latest attraction for tourists in Switzerland is aerial taxi service to the summits of the Alpine peaks. The toilsome ascent of the Matterhorn and Mont Blanc, which formerly occupied days, can now be accomplished in a few minutes without danger and without exertion. But that isn't all. Every class is sedulously catered to. For those who dislike the feverish hurry of a flight or the peril of a climb, there is another alternative. Geologists tell us the Alps are crumbling down and will eventually descend to the level of the valley. Tourists desiring to see their tops, and having plenty of time and patience, remarks Elmer C. Adams in the Detroit News, can simply sit at the bottom and wait.

One of the needs of our time is to have the simple faith of our fathers poured into a Twentieth century mold, writes Merle Crowell in the American Magazine. We need the old-fashioned religion—but dressed in a free and flowing robe and not in the strait jacket in which the bigots would encase it. We need more people who can say, "Our Father Who Art in Heaven," and really believe it.

Eloping with his sweetheart, an Indiana man was just about to cross the state line into Illinois when the engine sputtered and died and the irate father caught up with the party. The miss in the auto missed getting married by a miss in the engine and the girl is no Mrs.

Every time Flippie Flapper half way decides to be the same kind of a modest and shy little girl grandma says she was she looks at what grandma got in the way of a husband and calls up her sheik for a joy ride and petting party.

Lindbergh says that whenever he jumps from a plane he crosses his legs so he won't straddle a fence in landing. He is more than a diplomat—he is the forerunner of sincerity in politics.

We cannot imagine why the expression "clean getaway" was invented, unless it originally meant checking out with the hotel's towels.

Stone sidewalks popularized the rubber heel. If city noises increase they may produce the rubber ear stopper.

The Word "Coward"

The word "coward" is derived from the habit of animals of dropping their tails between their legs when frightened, according to an answered question in Liberty. The English word comes from the old French "coe," meaning tail, derived from the Latin "cauda."

Do You Know?

Questions—14

- 1—What president was elected by the house of representatives? 2—Where did the United States flag first fly in the face of an enemy, and when? 3—What causes a lump in a person's throat? 4—What is the hottest place in the United States? 5—Who is the British open golf champion? 6—What composer was not only a master of dramatic music, but was himself a dramatist of great genius? 7—Which continent, in proportion to area, has the longest coast line? 8—Who wrote a famous diary in shorthand, which was not deciphered for a hundred years? 9—Who said: "Look! There is Jackson standing like a stone wall?" 10—In what country is most of the diamond cutting done?

Answers—14

- 1—John Quincy Adams. 2—Fort Schuyler, New York, 1777. 3—Sudden emotion causes the muscles of the throat to work upward, pressing against the windpipe, and causing one to feel as if there was a lump in the throat. 4—Death valley in California. 5—R. T. Jones, Jr., of Atlanta, Ga. 6—Wagner. 7—Europe. 8—Samuel Pepys. 9—General Bee of the Confederate army. 10—Belgium.

Rats Made Immune to Pneumonia Germs

New York.—Experiments in immunization against pneumonia by the feeding of acid-killed pneumonia germs are being watched with interest by the New York city department of health, according to Dr. William H. Park, director of the bureau of laboratories.

Although the health department is taking no part in the experiments, it is following carefully the work being done by Dr. Victor Ross of Bloomfield, N. J.

With rats for the subjects the experiments have proved successful. The rats were fed pneumonia germs which had been killed by hydrochloric acid. They reacted by building up a resistance to the dead germs, which, it was found, was sufficient to immunize them against injections of living pneumonia germs. It was established further that the age of the rats was no factor in their ability to build up a resistance. Both adult and young rats were used in the experiments and young rats and old alike were made immune.

Because of the success with the rats the experiments will be carried a step nearer the human race and will next be made on monkeys.

Man Sealed in Glass

Southend-on-Sea, England.—Ricardo Sacco is claimed to have completed a fast of 50 days' duration. Sacco, who has something of a reputation as a faster in Great Britain, was sealed in a cabinet of wood and glass at the Casino here. It is asserted that he subsisted on six bottles of lemonade daily. He lost 80 pounds in weight and is almost too weak to move. His first meal consisted of chicken broth.

Rainbow During Darkness

A rainbow at night is an unusual phenomenon, but not what should be called a rare phenomenon. It only requires a shower with bright moon light on it when the moon is not too high in the heavens.

Life of Ants

Ants live from eight to ten years, as a general rule, although specimens in captivity have been known to reach the age of fifteen.

Take Seal Census in Pacific Waters

San Francisco.—Fate of the hair seal and sea lion along the California coast depends on a census now being taken.

If, as the fishermen contend, the animals are increasing rapidly, the state fish and game commission may permit them to be slain in such numbers as will hold their population stationary. Many fishermen regard these sea animals as rivals.

Deputy Paul Bonnot is supervising the investigation, which will take two years. At the outset he has reported finding several rookeries not previously recorded. His observations will cover coastal waters from Mexico to Oregon, the latter state already having declared the seal a menace to fishing and employed a hunter to exterminate the animal.

Sun, Moon and Stars

The sun lights this world from without, shines in at a window, and the moon is like a lamp within an apartment. It shines for us. The stars themselves make a more visible, and hence a nearer and more domestic, roof at night. Stars broods us and has not left our arms of thought to be hatched by the sun. We feel her heat and see her body darkening over us. Our thoughts are not dissipated but come back to us like an echo.—Thoreau.

Toast to Leisure

"A toast, fellows!" exclaimed the hobo, lifting his tomato can. "Happy to be holidays! Bless de hull, de hundred an' sixty-five of 'em!"—Change.

Possibly

An English scientist has evolved a scheme for hatching eggs more than three months old. If successful it may greatly reduce the storage of strictly fresh unhusked omelets.

We recommend this paint because Grease Spots, Finger Prints, Pencil Marks, Soot, can be washed off any Velour Finished Wall. Includes illustration of a woman painting a wall and a can of Devco paint.

**Republicans Look For Victory**

(Continued from page 1)

icularly the East Highway section, since it will facilitate and encourage the building of new industries along the Rahway River. Due to Republican efforts and influence, water mains are about to be laid from Oak Tree, to the East Highway section and the Boulevard. The efforts and accomplishments of the Republican party in this section proves its principle to further and encourage the growth and development of the Borough of Carteret.

The general progress of the borough during the Republican administration has been marvelous. Many new factories have been established, employing a large number of men and women, since this administration came into power. These concerns have confidence in Carteret and its management, and additional industries are being encouraged to locate here to enjoy the natural advantages which Carteret has to offer. Homes to the value of over \$991,600 were erected in the past two years. To the Mayor and Council, and the splendid organization they have built around them, belongs the credit for the splendid condition of the borough today. They always have the interest of the people of Carteret at heart. They have accomplished the wonderful things that have been done in Carteret. The record and service of the men affiliated with the Republican organization is known to all the people of this borough, and it is to the best interests of the citizens of Carteret to vote for men who are pledged to support the Republican principles of efficiency, economy and progress.

All candidates endorsed by the Republican party are further pledged to unselfishly give their time for the interests and welfare of this borough.

A vote for the candidates on the Republican ticket is a vote for continued progress and prosperity.

Vote the straight Republican ticket, the first column on the ballot.

**CARTERET HIGH SCHOOL OCTOBER HONOR ROLL**

The following pupils of the Carteret High school have maintained an average of 90 per cent or above in all major subjects for the first six weeks of school, and have reserved a place on the school Honor Roll.

Gussie Zier, Blanche Ziemba, Alice Barker, Floryce Brown, Saul Brown, Mary Faust, Ruth Grohman, Marie Gaydos, Melvin Cohen.

The honorable mention pupils, averaging 80 to 90 per cent in all major subjects, are as follows:

Edith Kathe, Meyer Rosenblum, Lillian Roth, Elsie Shuck, Louis Varsadi, Helen Daniels, Jennie Axelrad, Evelyn Springer, Edna Albrecht, Edna Bradford, Edna Brown, Mary Dorn, George Glass, Anna Proskura, Anna Chamra, Grace Duncan, Sylvia Chingchin, Marion Kelly, Emil Blaukopf, Sarah Mittleman, Harry Weinstein, Hyman Rosenblum, Helen Mausner, Hazel Maltreder, Catherine Malanchak, Sylvia Fisher, Stanley Gulan, Fannie Mausner, Beatrice Roth, Genevieve Clark, Dorothy Venook, Helen Sitarz, Barbara Babies, Mary Diedrick, Mary Ivan, Frank Jurick, Gertrude Armour, Carlton Gerig, Gladys Gerig, Mary Crech, Ruth Monk, Joseph Morgan, Dea Papi, Anna Daszkowska, Anna Lukach, Anna Trosko, Ruth Zier, Eugene Keratt, Christian Dick, John Kubicka, Frank Krimin, Casimire Lesczyk, Victoria McNeill, Helen Szabo, Pauline Zabel.

**SCHOOL NOTES**

The public schools of Carteret have an enviable record for the attendance of the pupils. Last month, September, 1882 pupils were present in school every day and had no tardy marks. The good work was continued for the month of October with the result that 1187 pupils had perfect attendance.

The local schools will be closed Tuesday, November 8, Election Day, and Friday, November 11, Armistice Day.

The New Jersey State Teachers Convention will be held at Atlantic City November 10, 11, and 12.

The following local teachers will attend the convention:

Miss B. V. Hermann, Miss Catherine Harman, Miss A. D. Scott, Miss E. Kahn, Miss A. Richards, Miss E. Keller, Mrs. E. Daze, Miss S. Ulman, Miss A. Gunderson, Miss M. Donohue.

The week of November 7 to November 13 will be observed throughout the country as American Education week. The purpose of this week is to acquaint the public with the actual work of the schools, with their ideals, their achievements, and their needs. That this purpose may be accomplished, a program has been worked out by the American Legion and the National Education Association. Monday, November 7 will be observed as "Health Day", Tuesday November 8 as "Home and School Day", Wednesday November 9, "Know Your School Day", Thursday November 10, "School Opportunity Day", Friday November 11, "Armistice and Citizenship Day", Saturday November 12, "Community Day", Sunday November 13 "For God and Country Day."

**COURT CARTERET PLANS SERIES OF SOCIAL EVENTS**

The members of Court Carteret No. 48, Foresters of America, plan for a big session at their November 22 meeting at Odd Fellows' Hall. A social session is to be held, the principal speaker for the evening will be William J. Lawlor, the subjects will be on "Thanksgiving". A social program is being arranged by the entertainment committee. A record crowd of members is expected at this session.

Chief Ranger Edward Schultz has scheduled of Foresteric social. Entertainments the first meeting in December will be taken up by a euchre, and at the following meeting will be featured a debate the subject to be announced at the next meeting. It is the plan of Mr. Schultz to have something new at each meeting for the benefit and pleasure of the members. Several candidates will be elected at the next meeting, and the committee on drive for members will set plans for a big drive for new members.

The November meeting will not be held, due to that date being election day, and a legal holiday.

**ROSARY SOCIETY EUCHRE**

A very pleasant afternoon was spent by the women at the weekly Euchre held at St. Joseph's auditorium. The prize winners were: Mrs. Koeppler, Mrs. Leo Coughlin, Mrs. George Bakke, Mrs. Arthur McNally, Mrs. Hannah McNally, Mrs. Thomas Larkin, Mrs. E. Jamison, Mrs. Hugh Jones, Mrs. Frederic Colton, Mrs. Mary Armour Mrs. T. Brandon, Mrs. Olga Adams, Mrs. Davis, Mrs. Charles A. Brady, Mrs. John Ruckriegel, Mrs. Morton LeVan, Mrs. G. T. Gaudet, and Mrs. C. Jamison won the dark horse prize.

**STATE DIVISION OF A. A. U. W. TO MEET IN NEWARK**

The first annual meeting of the New Jersey State Division of the American Association of University Women will be held on Saturday, November 12, at the Y. W. C. A., 53 Washington street, Newark. The morning session at eleven o'clock will be devoted to business reports from the various committees, plans for the coming year and other routine business.

Luncheon will be served at one o'clock. Dr. Esther Caubin, recently appointed secretary of the Committee on International Relations, will speak on "The University Woman as a Citizen of the World". Dr. Caubin was a delegate to the Council of the International Federation of University Women in Vienna. Miss Elizabeth Kirkbride, Director of the North Atlantic Section, will speak on the work of the A. A. U. W. with special emphasis on the work of the State Division. A representative from New Jersey College for Women will tell of the work of that institution. Another interesting feature will be the presence of several students from International House, who will bring greetings from the university women of their respective countries.

Reservations for the luncheon (\$1.25 each) should be made before November 9 through Mrs. Raymond Gurley, 601 Park avenue, East Orange.

**Card of Thanks**

The Catholic Daughters of St. Joseph's Church wish to thank the parishoners and friends, who donated prizes and helped the success of their Euchre last Friday evening.

Signed  
Mrs. John Adams,  
Chairlady.

**Building & Loan Elect Officers**

At a meeting held on Tuesday evening, November 1st, the election of the officers and directors of the Tax Payers Building & Loan Association was held at the office of the association at 572 Roosevelt avenue. The following officers were elected of the association.

President, Thomas J. Mulvihill; vice-president, Bernard Kahn; secre-

tary, Rev. Charles Vincze; treasurer, Rev. Carl Krepper; solicitor, Abraham D. Glass.

Directors are as follows: Louis Chodasch, John Kendzersky, Louis B. Nagy, Rev. Charles Vincze, Dr. H. L. Strandberg, Joseph Galvaneck, Jacob Weiss, John Ginda, Bernard Kahn, Thomas J. Mulvihill, Rev. Carl Krepper, and Maurice Spewak.

The auditors elected are as follows: Felix Szymborski, William

Greenwald, and John H. Nevill.

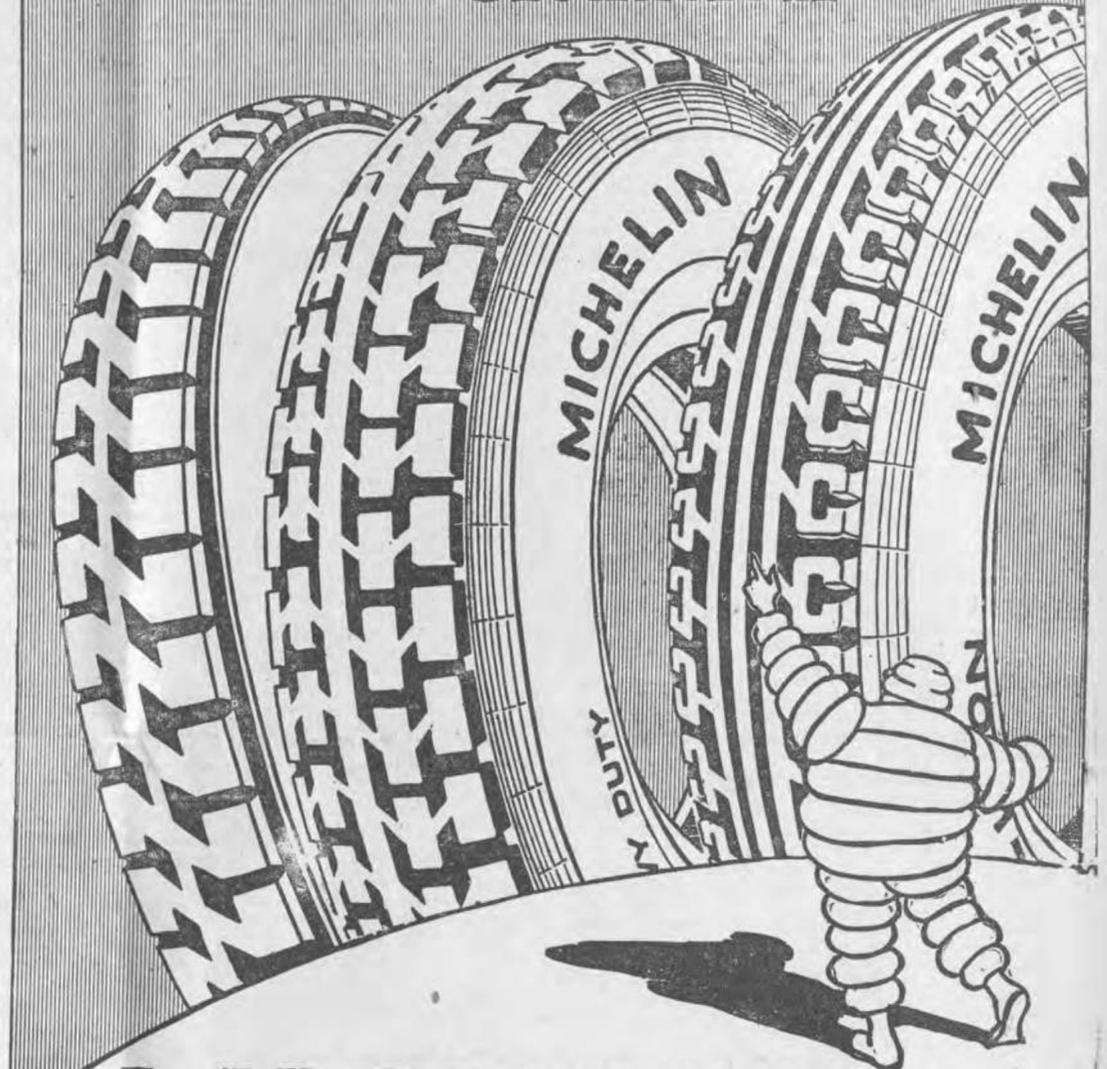

Considerable enthusiasm and spirit was shown by the members at this meeting and share selling campaign was inaugurated and the association was launched with very much spirit and with every expression of confidence by the members.

Mrs. Charles Burke and daughter, Audrey, of Newark, spent Wednesday here with relatives.

Mrs. I. Zimmerman of Longfellow street is spending a few weeks in Newark with relatives for a vacation, and for a much needed rest. A sister of Mrs. Zimmerman was buried on Wednesday, which had its effect, and cast a shadow of gloom over her.

William Coughlin of Seton Hall spent a few days with his parents, Councilman and Mrs. Edward J. Coughlin.

**Real Facts on the present tire situation**

**MICHELIN TIRES & TUBES**

You are practically certain to get more mileage by changing to Michelins

Both this year and last, written reports (secured from several thousand motorists picked at random from the great army who are trying out Michelin Tires) showed that more than 80 out of every 100 motorists who changed to Michelins secured more mileage by the change—and only 9 out of every 100 secured less mileage.

This increase in mileage averages 36%

Records covering millions of miles prove that Michelins go 36% farther than the average tire. That means 4,000 or 5,000 miles extra per tire.

The finest construction thruout

Only the best of the world's materials are used in Michelin Tires. For instance, Michelin rubber comes from selected plantations and costs 2c more per pound than the market price. Moreover, the most ad-

vanced design and manufacture are employed thruout the tire. For example, Michelin has pioneered in the development of high-twist fabric; and Michelin Tires have always been made of rubber-saturated fabric, now widely advertised.

You don't pay for Michelin's extra mileage

Tho they are better, Michelin Tires cost no more than standard tires. That is possible because, unlike other manufacturers, Michelin concentrates on making only one grade—the best—and thus is able to produce the highest quality more economic.

Michelin Ring-shaped Tubes are also supreme

Because Michelin Tubes are made ring-shaped, instead of being made straight like other tubes, they fit better and outlast all others. And because they are compounded with a special kind of antimony, they keep the casing as much as 20° cooler, thus increasing its life considerably.

**Michelin Tires and Tubes Cost No More**

	Casings	Tubes
30 x 3 3/4 regular	\$8.65	\$1.85
30 x 3 3/4 oversize	10.80	2.25
29 x 4-40 universal	9.60	2.45

We carry a full line of Michelin Balloons, Oversize Cords, Heavy Duty Cords and Ring-shaped Tubes, all at prices just as attractive as the above.

COAST GRIDDERS ARE VERSATILE

Football Squad Recruited From Many Sports.

Athletes at the University of California generally are proficient in more than one sport, leading one to surmise that athletes are born and not developed, although there are instances too numerous to mention at Berkeley where men started in only one sport and were unable to make the squads in another activity.

Basket ball players at California show an aptitude for football, especially in the wing and back field positions where one of the main requirements is an ability to handle the football, both receiving and passing. This factor is one of basket ball's essential requirements and the combination finds five of the Pacific coast champion quintet on the football squad.

Track has contributed six men to the football squad, while Capt. Frank Ribbel of the boxing team is a formidable representative of the leather pushers. The track men playing football include Russell Ewing, sprinter; Frank Fitz, high jumper; John Kabeitz and Irving Marcus, broad jumpers; Irvine Phillips and Elmer Gerken, weight men.

Basket ball has donated Paul (Dutch) Clymer, quarterback; Jim Dougery, end; and Eisan, another quarter. Thornton and Werdel, two likely sophomores, starred for the freshmen in the hurdles last spring.

Baseball players, as a rule, especially if they are good, appear to pass up football, but are found in other nonconflicting sports. Risk of slight limb hurts which might end their careers on the diamond are against baseball men in football.

Players of 14 States on Haskell Grid Team

Fourteen states are represented on the Haskell Indian football aggregation for 1927, a list prepared by the coaching staff shows. Oklahoma heads the list with seventeen, more than three times as many as Wisconsin, its nearest rival, with five. Four squad members have given North Dakota as their place of residence. Montana, Idaho, Minnesota and Michigan have two braves out for practice. Washington, Utah, Nevada, Nebraska, South Dakota, Iowa and North Carolina are the other states represented with one each.

Twenty tribes have warriors out for practice. Eight Cherokeees, seven Chippewas, five Creeks, three Onedias, two Sioux, Bannocks, Caddos and Winnebagos, one Gros Ventre, Yakima, Ute-Shoshone, Menominee, Bannock-Shoshone, Omaha, Delaware Pawnee, Pianze, Assiniboine and Kiowa are out for letters.

Forty-two players have reported to Coach John Thomas and his assistants, John Levi and Egbert Ward, both former Haskell players.

Health Is Better Than Wealth, States Staggs

Coach Alonzo Staggs, the "grand old man" of the University of Chicago, does not want to live to be more than eighty years old unless he can live "well and to capacity."

He made the statement in an address to the Collegiate club of Chicago in which he declared that health and not wealth is the achievement of the greatest success in life.

"I am sixty-five years old," Coach Staggs said, "and I am an exception to the accepted rules of life that 35 men out of every 100 never reach that age and that 54 out of 100 who do are unable to support themselves."

Bosses His Idol

Dan Howley, as manager of the Boston Browns, has a man working for him who was his boyhood hero. As a small boy Howley used to get nickels by "standing room only" space, and use it to sit, not stand, in right field at Boston, 12 miles from his home. Buck Freeman, a noted home-run hitter, was then the Boston right fielder. Today Freeman is a scout for the club Howley is managing.

Woman Golf Champ

Photo shows Mrs. Miriam Burns Horn of Kansas City, Mo., driving during final match of women's national golf championship in which she defeated Maureen Orcutt for the title.

Warning

Never be an unexpected guest to be taken home to dinner by the husband if you can help it. Every wife likes at least an hour's warning.

Pick Burial Place Carefully

In choosing a burial place the Chinese exercise the greatest care, for it is believed that the choice affects the happiness and prosperity of the surviving relatives.

CARTERET F. C. IS VICTOR OVER P. A.

Local Club Represented By Stars Trounce Perth Amboy 6-5—Another Game Next Week

With a line-up composed largely of big league players, the Carteret Field Club on Sunday defeated Perth Amboy's representative ball team by a score 6 to 5. The game was played on Karitan field in Perth Amboy and was the ninth of a series between the two teams. Of the nine games Carteret has won seven. Another game is slated for next Sunday on the same field. Last Sunday's game drew a crowd of 2,000 fans probably half of them from Carteret.

Rubé Walberg, of the Philadelphia Athletics, pitched for Carteret. Wallie Schang, of St. Louis, formerly of the Yankees, was on the receiving end. Jim Dykes, of the Athletics played short for Carteret. George Burns, of the Cleveland Indians, played at first. Ounie Carroll, of the Detroit Tigers and formerly of the Holy Cross was in left field. Among the regular players on the Carteret team were Captain "Kiggie" Coplan, Frank Bruggy, Erny Sabo and Pete Burnett. The Perth Amboy lineup included several big time ball players also.

The rivalry between the two teams has been bitter for years but reached a new peak this season. The attendance for the last three games has set a record for baseball in Middlesex County.

The score:

Score by innings table showing runs, hits, and errors for Carteret and Perth Amboy across nine innings.

Still in Use

Robert Bell, a Philadelphia typesetter, printed a law book in 1771 that is still in use in the library at Livermore, Calif.

Sporting Squibs

Tommy Armour and Johnny Farrell are friendly enemies on the links.

Marty Callaghan, star Seattle outfielder, has been sold to Cincinnati.

More than \$26,000,000 worth of golf balls were sold in the United States in 1926.

Knute Rockne started the 1927 football season at Notre Dame with seventeen letter men.

My Sullivan, the Minneapolis welterweight, has never been heard to swear. My goodness!

There is a rumor abroad that "Bo" McMillin may quit his post at Geneva College after this season.

Jake Slagle, Princeton's great back last season, is an assistant coach at his alma mater this year.

Herb Joesting, Minnesota all-American fullback, hopes to again acquire that distinction this year.

From 1901 to 1905 Fielding H. "Hurry Up" Yost's Michigan footballers never lost a single game.

The Philadelphia National league baseball team will train next spring at Winter Haven, Fla., officials of the club announce.

All members of the University of Tennessee football squad are required to wear their headgear in practice by a strict edict of Coach Major Neyland.

The annual rugby football game between Oxford and Cambridge is announced for December 13 at Twickenham.

John L. Sullivan held the heavyweight boxing championship longer than any other fighter—from 1882 to 1892.

Walter Johnson of Washington is one of the few prominent pitchers to accomplish the feat of striking out three pinch hitters in succession.

"Tiger" Flowers and his manager, Walk Miller, estimate that they have traveled over 200,000 miles throughout the United States, Mexico, Cuba and Canada in order to appear in bouts arranged for the former.

Gretchen Allen, a seventeen-year-old swimmer from Florida, has 52 medals and 12 ribbons for finishing first place in various water competitions. Numerous second and third-prize trophies grace her collection.

Mlle. Suzanne Lenglen, the French tennis professional, has been barred from competitions during next year's Olympic games.

It is proposed to form an international federation governing lacrosse, embracing all the countries in which the game is played, for the purpose of codifying the rules.

Irwin Brame, right-handed pitcher now with Jersey City of the International league, has been purchased by the Pittsburgh Pirates.

Ceylon, India, has several first-class golf courses. The rich planters spend large sums of money on their construction and upkeep.

The Women's Athletic Federation of Canada has ruled that no girl under sixteen years of age may compete for the Dominion at the next Olympic games.

Question of Longevity of Swimmers Big Problem

The longevity of racing swimmers often is cause for comment, but hitherto the belief has prevailed that contestants lost some of their sprinting speed after entering the thirties, even though able, if they took care of themselves, to do as well, or better, over the middle and long distance stretches. It is of special interest, therefore, that Honolulu's famous champion, Duke Kahanamoku, now thirty-eight, swam the fastest 100 yards of his brilliant career shortly before his recent departure for Hawaii, thrashing the century in 52 3-5 seconds in the 100-foot pool of the Los Angeles A. C.

Al Shealy, young right-handed pitcher, has been sold by the St. Paul American association club to the New York Americans.

Guy Aubrey, a pacer, recently broke the track record which had stood since 1900 at Franklin, Ind., by turning in the fast time of 2:09 1/2.

The University of Southern California will have a 175-piece band which will perform at all important football games this fall.

Adolph Stemig, pitcher for Burlington in the Mississippi Valley league, has been sold to the Minneapolis club of the American association.

Eddie Wells, leading pitcher in the Southern association, and outfielders "Babe" Ganzel, Jack Kloza and "Butch" Simmons, have been sold to the Washington American league club.

Long-distance swimming is one of the new sports which is becoming popular throughout the United States. No fewer than 12 cities are holding marathon swimming races this season.

Al Tyson, former New York Giant outfielder, and one of the strong supporters of the pennant-winning International team of Buffalo, has been sold to the Brooklyn Nationals for \$20,000.

The Memphis Southern association baseball club has sold Lloyd Brown, a left-handed pitcher, to the Washingtons for a cash consideration and in exchange for Pitcher Thomas and Catcher Berger.

Incensed at a decision by Umpire Bob Countryman, Pitcher Karpp, of the Shreveport club, hurled his glove at the official, who was standing near second base. The throw was perfect, knocking off the ump's cap.

The Philadelphia National league ball club announced the purchase of Pitcher Russell Miller of the Syracuse International league team and Pitcher June F. Green of the Portsmouth (Va.) league team.

Charley Root, star right-hand twirler of the Chicago Cubs, was strictly a southpaw in his boyhood, but was prevailed upon to change by a school teacher. He still does many things with his left hand.

Some Aged Golfers

Members of the United States Seniors' Golf association assembled at Rye, N. Y., for their three days' tournament at the Apawamis club. Their ages range from fifty-five to ninety, according to report, but the highest acknowledged age seems to be eighty-six. The photograph shows Horace L. Hotchkiss, octogenarian golfer and founder of the United States Seniors' Golf association.

Poet Changed Birthday

James Hogg, the famous poet shepherd of Ettrick, was born in the month of November and changed his birthday to that of Robert Burns, January 25.

Artificial Earthquakes Tell Where to Drill for Oil

New York.—The sun of that romantic oil-hunting pioneer, the "wild-catter," has set. Science, by creating artificial earthquakes and recording their results on the delicately accurate seismograph, has found a way of locating new oil fields which will almost eliminate one of the heaviest expenses of oil production.

This is the prediction of Floyd L. Darrow, who, in St. Nicholas, explains the recent successful oil-finding tests made by geologists in the gulf coast oil field by means of dynamite and the seismograph.

Pointing out that one out of four wells drilled last year proved to be a dry hole, Mr. Darrow estimates the amount lost in the 7,965 dry holes sunk in America last year at nearly \$250,000,000.

"Most of the oil in that territory is found under salt domes, overlain with alluvial, or river-deposited, sediments," he explains. "The prospector explodes dynamite on the surface of the ground near the suspected location of such a dome. The waves from the shock radiate outward in all directions.

"Seismographs record these waves. If these waves enter a medium of different density from the alluvial deposits, such as a salt dome, the seismographs instantly announce it by a change in the character of the waves recorded.

"As a result of many tests engineers are able to make blue prints of a region giving a complete picture of the strata of the underground region, and telling where to drill and where not to drill."

**NEWARK THEATRES**

**Shubert Theatre**

"Earl Carroll Vanities", America's greatest revue, with the original New York cast and production, is coming to the Shubert Theatre in Newark for one week only, starting Monday, November 7th, with matinee Wednesday and Saturday. The final performance will be Saturday, November 12th. This is the newest and latest edition of "Vanities", the scenic production is massive and complete and requires four cars for transport. The company of one hundred people is featuring the one and only team of Moran and Mack, the premier black-face comedians, Julius Tannen, Broadway's favorite jester and "Wise-Cracker", Johnny Dooley, the famous de luxe comedian and eccentric, Dorothy Knapp, the world's most beautiful girl Noman Frescott, the world's foremost mind reader and master of concentration, Brian McDonald, the lyric tenor, three noted beauties—Isabelle Mohr, the prima donna Frances Marchant the exquisite girl featured in the sketches, and Maxine Stone, the amazing whirlwind dancer—Cliff Crane, Charles Stone, Bebe Stanton, "Miss Wheeling", prize winner at the latest Atlantic City Beauty Contest of 1927. Sixty "Vanity" beauties, among whom are some of the most beautiful girls in the world grace the "Vanities" with their fluffy presence and twenty-four Foster Girls contribute remarkable new dance numbers and circus stunts on the climbing ropes and flying rings.

A smart assemblage of stellar comedians, famous beauties, artists' models, and sensational innovations and novelties, this season's "Vanities" contains many popular song numbers and delightful melodies such as "Wro D'ye Love", "Hugs and Kisses", "Alabama Stomp" and "In the Twilight".

In the search for novelties the spectacular was not overlooked by Mr. Carroll as will be seen in such gorgeous scenic effects as "The Silver Chandelier", which introduces some of the most beautiful girls in the world, grouped around and suspended from this dazzling and glittering chandelier; "Climbing the Ladder of Love", in which 74 girls climb up out of sight on a huge ladder, extending completely across the stage; "The Glass Finale", "The Mirror of Vanities", which shows "64 Visions of Vanities". This scene is constructed entirely of mosaic glass and is costumed entirely in white silk covered with ornaments made of Mosaic glass, rhinestones and brilliants and is entirely original with Earl Carroll and has never before been seen on any stage.

"The Bells of the Belfry" introduces the 24 Foster Girls in their marvelous rope climbing act from the stage to the Belfry Bells above, where they disport themselves on the ropes and flying rings in acts never before seen outside the circus.

Many comedy sketches are interspersed throughout the performance among which are "The Rock Pile", and "Locomotive No. 13" by Moran and Mack, "On The Job", and "Rhubarb" by Johnny Dooley, "The Tree of Knowledge" by Julius Tannen and Norman Frescott, and "The Glow Worm" by all the comedy stars.

Beauty is always dominant in "Vanities" and Earl Carroll is masterful in his resource; he displays the most exquisite taste in grouping, posing and lighting the beauty of the feminine figure. The 33 scenes of "Vanities" move smoothly and rapidly and surprise follows surprise so often that the audience is kept on the qui vive.

The music and lyrics are by Grace Henry and Morris Hamilton, additional song numbers by Ray Klages and Jesse Greer, dances and ensembles by David Bennett, stage settings by A. Vimnera of Paris, and executed by Karl O. Amend. The art and technical direction is by Bernard Lohmuller. The music is played by an augmented orchestra.

The entire production was staged under the personal direction of Earl Carroll.

**Miner's Empire Theatre.**

Melodrama comes to Miner's Empire theatre next week commencing Sunday matinee, November 6, when the ever welcome and thrilling "Kongo" will be the attraction. When seen on the Scribner "Wheel" last season, the first time at popular prices, its stay in every theatre could have been prolonged indefinitely, so great was the demand for seats. That is the reason it is "repeating" this year, "Kongo" tells of the world old lust for vengeance. Its relating is brutal, raw, cruel, merciless, intensely human, dramatic, thrilling and sustaining suspense is its keynote. The action takes place in a trader's store in the Belgian Congo. The trader known to the natives as "Dead Legs", has been crippled in England by a surgeon, who accept this means to steal his patient's wife. The victim goes to "Darkest Africa" and there, by means of his practicing "witchcraft" rules the natives with a rod of iron, and the whites by the cruel Kafir stock whip, wielded from his wheeled invalid chair, from which he never can move. Comes to the Belgian Congo, the surgeon who operated; also a girl, who the victim thinks is the child of his enemy. The accomplishment of his revenge, terrible and hideously cruel, thrilling fascinates the audiences and makes Flint one of the outstanding figures of the drama today. In the cast are John Murray, as Flint; D. J. Hamilton, as Dr. Craig; Jeanette Duval, as the girl; Ray Mack, Dixie Simmons, Denis O'Brien, Clarence Redd, Augustus Golden Alfred Kay, and Blanche Harris. Week beginning Sunday, November 13, Tommy "Bozo" Snyder.

**Loews State Theatre**

With the bill both vaudeville and pictures devoted to the collegian and college life and with several novelties added to the bill to further appeal to the college man and girl, Manager William Phillips of Loews State has designated next week as Loews Collegiate week.

Every effort has been made to secure a show that will appeal to the collegian, extra novelties have been secured, pictures of local football and basket ball teams will be shown on the screen and extra attention has been given to the musical end of the programme, college songs and the latest numbers from the Broadway musicals will predominate in the musical end of the bill.

On the screen is Marion Davies' latest picture, "The Fair Co-Ed", a picture that will appeal to the heart

of every college man and woman, every high school boy and girl.

Heading the vaudeville bill on this interesting programme is Jimmie Savo and Joan Frawza, late stars of Artists and Models in a neat dancing and singing act entitled "Slow Motion", Savo is a very clever comedian as the star of several musical shows and is well known along Broadway and Loew patrons are in for a real treat with this clever comic on the bill.

The four Diamonds are another headline act that has been secured for Loews Collegiate Week, of special appeal to the college boy and girl this clever dancing quartette is going to make a tremendous hit with Loew theatre goers.

Lou Miller and Alice Bradford are presenting their own clever novelty entitled "A Harmonious Occasion."

The Joe Mandis Trio are offering a sensational acrobatic act that carries not a few thrills.

Another act on the bill that is sure to please is Sharon-Stephen and Co. in their domestic comedy, "They Never Change", with Della Bordeaux and Mabella Meignon, a little offering involving a man, a wife and a song.

The Metro News with the latest news pictures will close the bill.

**Mosque Theatre.**

Waring's Pennsylvanians, the Collegiate Orchestra Incomparable, and "Breakfast at Sunrise", with Constance Talmadge are the feature stage and screen attractions for the week commencing Saturday, Novem-

ber 5, at the Mosque Theatre, Newark, "The Show Place of New Jersey". A French cocktail with a delightful hangover is a fitting way to describe "Breakfast at Sunrise" which comes from the First National studios. Waring's Pennsylvanians, as every syncopator lover knows, holds the honor of being one of the best stage bands now appearing before the American public.

Those who love farce comedy will find Connie as funny as ever. Don Alvarado is the new leading man for the star. Bryant Washburn, Alice White, Marie Dressler, Paulette Goddard and Albert Gran are in the surrounding cast.

Waring's Pennsylvanians are well known to all lovers of modern music. They have successfully appeared at the Mosque on several occasions and there were always demands from patrons to hold them over for a second week. This was impossible for the orchestra is well booked into the season. The Mosque management is delighted to announce the return of this splendid musical unit.

From the hottest of the hot, blatant "wow" jazz to the latest popular numbers and musical comedy hits, the Pennsylvanians will offer a program of musical diversities that is sure to meet the requirements of all syncopation lovers. The orchestra always has some new feature. Tom Waring, soloist, will render new songs while the orchestra itself will be heard in choral numbers which are the delight of all who hear them.

The overture, played by the Mosque Grand Orchestra, conducted by

Robert B. Griesenbeck; the Mosque Review of Events and several delightful short subjects complete this interesting entertainment at the Newark playhouse.

**Broad Street Theatre**

The Newark engagement of the much discussed melodrama "New York", will take place at the Broad Street Theatre during the week beginning, November 7th. Isaiah Leebove, a New York lawyer, is producing the piece which deals with the parole system of New York State.

Ruth Shepley and George MacQuarrie are co-featured in this gripping attraction and the story deals with the machinations of the Law which seeks to protect the victim of circumstances and which results in her untimely ruin.

"New York" has created a greater furore than any theatrical production of recent seasons. It is the work of Samuel Ruskin Golding and marks the debut of Mr. Leebove into the ranks of big time producers.

"New York" boasts of one of the best casts of any dramatic piece to appear in Newark this season and in addition to Ruth Shepley and George MacQuarrie the players include Ruth Mason, George Drury Hart, John M. Sullivan, John D. Seymour, Mabel Acker and 30 others. It was staged by the author Samuel Ruskin Golding.

An extra matinee will be given on Tuesday, Election Day, in addition to the regular Wednesday and Saturday bargain matinees.

Advertising brings quick results.

**Hay Crop Goes Uncut Because of Low Price**

Groveland, N. Y.—Hay fields throughout the Genesee valley will go uncut this year unless the market gets stronger. Growers have gone on strike at the opening offers of \$7 to \$9 a ton for medium-quality hay. Hundreds of acres of uncut hay are to be seen throughout the valley.

Hay buyers, warned by the 15,000,000 drop in the number of horses, as shown by the United States horse census, are declining to "hold the bag" for the growers. Growers say that the price offered is so low that they won't cut any more hay.

**Pays \$4 Debt With \$40**

**After Wait of 45 Years**

Peekskill, N. Y.—A forty-five-year-old debt was settled here recently when David Nightingale, who left this city for California in 1882, returned to pay John Dyckman, a retired shoe dealer, for a pair of shoes he had bought two weeks before his departure. Nightingale insisted on paying \$4, which was the price of the shoes, plus interest to date. The debt was settled, after much calculation, with the payment of \$40.

**White-Crowned Sparrow**

"Next to the meadowlark, no doubt, most people will vote the white-crowned sparrow the most fascinating singer of the Northwest. Often through the darkest night in the Virginia creeper or honeysuckle around the porch he utters his plaintive song—seemingly to say . . . 'Sweet, sweet, listen to me, won't you?'"—William Rogers-Lord.

# ANNOUNCEMENT

## Roosevelt Building & Loan Association

In line with our usual progressive policy we have modernized our system. We are now a Non-Serial Short Term Association---like those in the larger cities.

- One can pay any time---no back dues to pay.
- We mature in about six and one-half years.
- 25c per share per week is the price and one can pay monthly.
- Full profits paid on withdrawals.
- Subscriptions are now invited.
- Interest begins from first payment.
- Passbooks will show profits each year.

Money makes money and periodic savings with interest compounding piles up into a very large sum in a very short time. Building and Loan Associations combine ABSOLUTE Safety with LARGE Earnings.

COMING EVENTS

Mask Ball to be given by The Ladies Auxiliary of the Brotherhood of Israel at Sharkey and Halls Auditorium on Thanksgiving Eve, November 23.

The Third Annual Dance will be held by the Portuguese Sporting Club, Inc., at the Falcon's Hall at 106 Central avenue on November 12, 1927. The club's orchestra will furnish the music for the evening. The following committee will take charge of the affair: Augusto Gil, Augusto Soares, Agostinho Grilo. Ladies free and refreshments will be served.

The Second Annual Dance will be given by the Latin Sporting Club on Saturday evening, November 5, at the St. Elias Auditorium on High street and Romanowski street. Music will be furnished by the Latin Sporting Club.

St. Joseph's Parent Teachers Association will hold a food sale Saturday, November 5, at Bradley's Pharmacy, Washington avenue.

The regular weekly Card Party will be held at St. Joseph's Hall next Thursday afternoon.

FOOD SALE

A food sale will be held Saturday afternoon at Bradley's Drug store under the auspices of the Parent Teachers of St. Joseph's Parochial school.

The next regular meeting of the Parent Teachers of St. Joseph's school will be held on Friday evening, November 11, at the school auditorium.

HALLOWE'EN PARTY

A Hallowe'en party was tendered the Sunday school children of The Sacred Heart Church on Monday evening, by the Misses Helen D'Zurilla, and Anna Medvetz. Refreshments were served by the hostesses and a general good time was enjoyed by all.

Joseph Lefkowitz of Bayonne is spending a few days at the home of his brother, E. Lefkowitz, at Pershing avenue.

Mr. and Mrs. Thomas Currie spent Saturday and Sunday at the Traymore, in Atlantic City.

Miss Loretta Walsh of Bloomfield spent Wednesday visiting relatives in the borough.

SEE WHAT PRICE GLORY AT SPEWAKS' RITZ.

CHAUTAUQUA FEATURES

On Thursday, November 10, at the High School auditorium an expectant audience will have the opportunity to see a play that has made a name for itself on the Broadway stage—"The Easy Mark".

It is a comedy of life in an ordinary middle-west town, with ordinary folks, placed in extraordinary situations, and portrayed by a master hand at comedy.

The love story running through the play is tangled with fortunes of a likable but easy young man and a fake oil well. An old veterinarian, who blames his hard times on Henry Ford's success, furnishes merely one of the many amusing side-plays.

It is an evening of fun, unlimited by any restrictions as to age, sex or previous condition of servitude. At the afterno performance Paul J. Barnaby, entertains in many ways with pianologues, crayon sketches, cartoons, rag pictures and impersonations.

A truly versatile man, Mr. Barnaby comes highly recommended from a long series of successes. He is one of the few men to have a personal letter of recommendation from the late Leland T. Powers, head of the School of Expression, founded under his name, where Mr. Barnaby studied. Mr. Barnaby's work has made him well known as an entertainer and the committee is confident that both young and old will thoroughly enjoy the program.

John E. Donovan and Howard Burns were Perth Amboy visitors last Saturday.

E. Lefkowitz of Pershing avenue spent Wednesday in Bayonne on business.

Thomas D. Cheret is a Bayonne visitor today.

Mrs. Hugh Jones of Cooke avenue has returned home, after spending a week with relatives in Philadelphia, Pa.

Mrs. McGregor of Atlantic avenue, is leaving for Venice, California, where she is to spend some time with her niece Mrs. L. Cooper.

Mr. B. J. McNeil of Washington avenue was a Newark visitor yesterday.

Brilliant Gem

A stone which has a color disperses even greater than that of the diamond is olive, or demantol. A bright green variety comes to us from west of the Ural mountains. Olive has a brilliant luster, but it is rather soft.

CHRISTMAS CHEER FUND RE-ORGANIZED

The first meeting of the Carteret Christmas Cheer Fund was held at the Legion rooms, at the Borough Hall on Tuesday, October 25th, 1927 for the purposes of electing officers. The following officers were re-elected. Thomas Jakeway, chairman; Frank Haury, secretary; Edward A. Strack, treasurer; Edward J. Walsh and Elmer E. Brown, publicity committee.

The chairman called a meeting of the fund which was held at the Legion rooms, at the Borough Hall, Tuesday, November 1st, 1927. Letters were forwarded to various organizations for the purpose of having them join in the activity of the fund for the coming Yuletide. It was suggested that a committee be appointed from each organization for the purpose of attending a regular open meeting to be held by the fund on November 22, 1927 at the Legion rooms.

The committee has also decided that they will start a drive for funds in order to carry on the activity of distribution among the poor of the Borough of moneys and foodstuffs. The committee trust that those who have been so generous for the years past will be kind enough to forward their checks to Edward A. Strack, treasurer of the fund, Roosevelt avenue, Carteret, New Jersey.

The report of last year shows that there was the sum of \$984.00 collected of which there was disbursed among the poor and needy, \$851.00 during Christmas and at various other times during the year. There were approximately sixty four cases reported to the committee, fifty four of which received the attention of the fund and received moneys, food and clothing.

Cypsy Language Universal

Romany is the language spoken by the gypsies. It is said that a careful examination shows that Romany is closely allied to that ancient language of the Middle East, the Sanscrit. The language of true gypsies in every land is nearly alike and gypsies from widely separated countries can understand one another.

Up-to-Date Lamb

A long-legged sheep in the Himalayas is able to run forty miles an hour. That's the kind of little lamb to follow Mary nowadays.

Forests Are Losing

After 300 years of settlement, approximately 2,500,000 acres, or nearly one-half of the surface land of New Hampshire, have been cleared of forests.

Classes at 10:45 A. M.

Reforestation

Two thousand trees are added each year to the forest established several years ago by Cold Brook public school in the town of Russia, Herkimer county, N. Y. School forests are exempt from taxation in New York state, and many schools are acquiring tracts of land to be wooded by pupils.—School Life.

Neckromance

"Necks have withstood improvement for a long time but they are slowly but surely being taken into hand," says a writer in the Woman's Home Companion. "All of which reminds me that there will soon be very few neglected areas to write about."

PRETTY BLONDE VAMPS INDIANS

Alaskan Tribe Had Never Seen One Until Flapper Showed Up.

Los Angeles, Calif.—After a summer's adventuring in the uncharted land and waters of Alaska and the Bering sea, Miss Beth Curtis, daughter of Edward S. Curtis, photographer, writer and owner of the Curtis-Biltmore studios, has returned to Los Angeles with her friend, Miss June McNichol of Nome, Alaska.  
Miss Curtis accompanied her father on the Far North trip, where he is doing research work among the Eskimos to complete a 20-volume effort on American Indians and Eskimos. Their journey took them to Nunivak island in the Bering sea, 250 miles south of Nome, far out of the beaten steamer track, where they obtained interesting data on the Eskimo inhabitants of the secluded spot.

Traveled Alone.

Miss McNichol's adventure came while she was journeying to join Miss Curtis' party when she, a slight and attractive girl, traveled alone with two native guides over the perilous and desolate portage from Unalakleet, on the Bering sea, to Kaltag, on the Yukon river.

Miss McNichol was on the long hike of 90 miles for five days, walking across the marshy portage, wearing hip rubber boots and heavy netting about her face to ward off the vicious attacks of the huge northern mosquitoes. She was, for a time, feared lost in the Arctic swamp.

Miss Curtis' adventure began when her father and their party embarked from Nome in a small boat and were tossed on the Bering sea for days. Arriving at Nunivak island after the dangerous journey in the boat, Miss Curtis and her father discovered a colony of Eskimos governing themselves in an ancient manner and living as their ancestors have lived, apparently for hundreds of years, on the tiny island in the icy, watery waste of the Bering sea.

Followed Everywhere.

Miss Curtis, a striking blonde, was the first woman with hair of that color on the island and created considerable interest among the natives. They curiously followed her everywhere she went.

The natives, she said, are governed by a chief who proves his prowess as a hunter and fisherman. The men and women live in separate sections of the island village, and prior to a hunting, fishing or sealing trip, no woman is allowed to approach the habitation of the men.

After Mr. Curtis obtained data on the Eskimos, Miss Curtis flew from Nome to Kaltag, where she picked up Miss McNichol in the wilderness out-

post and traveled from there to Fairbanks and then southward. Miss McNichol leaves again shortly to spend the winter at her home in Nome, and will be "frozen in" until the middle of next June.

Finds Ruins of English Gold Rush in 1576

Chicago.—Mute reminders of an almost forgotten gold rush of 350 years ago, which came to naught, but in which Queen Elizabeth and many of England's wealthy noblemen were involved, have been found in the frozen North by the Rawson-MacMillan Arctic expedition of the Field museum, William Duncan Strong, anthropologist of the expedition, reported to the museum.

The report stated that the explorers discovered the ruins of the house, mining pits and improvised shanty of Sir Martin Frohisher, who, between 1570 and 1573, led three expeditions, two for gold, into the regions of Labrador and Bullin Land. After digging in the ruins, fragments of brick, plaster, coal and porcelain were unearthed by Doctor Strong, which he said undoubtedly were indisputable proof that the ruins are of European and not native habitations.

Soap Cures Blindness

St. Joseph, Mo.—Carl Sears is able to see out of his left eye now after having been blind 30 years. Recently Sears was washing his face and soap-suds got into his left eye. He washed out the soap, to find the useless eye as good as ever.

Bad News Speeds

A good report lingers on its way, but an ill one flies straight to where it can do the most harm.—Abbe Lacordaire.

### 5,000,000 MEMBERS GOAL OF RED CROSS ANNUAL ROLL CALL

#### Need of Expansion Due to Excessive Demands for Disaster Relief and Other Services.

A Red Cross membership of 5,000,000 in the United States will be sought this year during the Eleventh Annual Roll Call, November 11 to 24, Chairman John Barton Payne announced following completion of a study of the demands which the past year made on all branches of the Red Cross organization.

He stressed particularly the increasing demands of disaster relief as pointing to the need for an increased membership to aid in carrying the growing responsibility in this field.

"For several years our membership has remained at a little more than 3,000,000 adults," he said. "We are proud of this membership. It is a body of our choice spirits, but there are many more of like spirit who should be counted in this Roll Call. We need at least 5,000,000 adult members. We are obliged to draw annually upon our reserves, and the demands upon it increase each year. Our Roll Call funds should meet our normal needs and add something to our reserves for the great disasters. We must have a large reserve. No one can tell when a situation may arise when this reserve will be essential to the lives of thousands.

"The Red Cross cannot wait to raise funds," Judge Payne declared. "Action prompt, instant, is its life. Instant action means the lives of many. It must be strong, it must be ready; this means a large reserve."

Total expenditures of the American Red Cross in the fiscal year to June 30 last in all fields amounted to \$16,139,348.60, of which \$11,360,348.60 represented the National Organization's appropriations and \$4,779,000 the cost to the Red Cross local chapters. Included in this total was a disaster relief, for which \$8,216,893.31 had actually been expended to the close of the year. This does not cover expenditures which continued to be made in the Mississippi Valley flood, or in other disasters originating during the fiscal year but whose operations extended over into the current period.

Service to disabled veterans, another outstanding demand on the organization, called for \$2,930,223.86, and service to men of the Regular Army and Navy, \$507,832.30. Maintenance of an enrolled Nurses' Reserve, from which the needs of disaster service and other emergencies are met, and which numbers more than 45,000 nurses totalled \$45,348.52. For the Public Health Nursing program, a nationwide activity of the Red Cross, \$901,068.99 was expended. Other services contributing to health and well-being included instruction in Home Hygiene and Care of the Sick, for which \$165,330.16 was spent; Nutrition instruction, which teaches thousands annually correct food principles in relation to health, \$171,370.73; First Aid and Life Saving, a service which is actually curtailing accident and water casualties, \$354,730.06; Junior Red Cross, the children's branch of Red Cross activity, and one of the most unique organizations in the world, \$582,434.23.

Other Red Cross Chapter activities, including Home Service to civilians amounted to \$1,220,000; while other national domestic operations required \$236,147.17.

An outstanding American contribution to the rest of the world is Red Cross assistance in foreign disasters, which the report shows, called for \$256,962 to the end of the fiscal year. Activities under the League of Red Cross Societies, Junior Red Cross foreign projects, assistance to American insular chapters, and other foreign and insular work completed the demands on the total appropriation for the year.

These expenditures were cited by Chairman Payne as emphasizing the need for a growing membership and increased income.

#### Red Cross Nurses Aid In Every Great Disaster

Two major disasters, the Florida hurricane and the Mississippi flood, required the services of Red Cross nurses in large numbers over a long period of time in the past year.

In the Florida storm, service of 350 nurses is recorded. It is estimated that about 100 others assisted in the first few days as volunteers. The total number of nurses in the Mississippi valley flood was approximately 200. In every major disaster the services of Red Cross nurses are needed, lending added importance to the enrolled reserve which now numbers more than 45,000 Red Cross nurses. These nurses are available for any emergency, though they are on duty in hospitals and in private practice. They constitute the reserve of the Army and Navy nurse corps in time of war.

Besides emergency duty, Red Cross nurses assisted materially in many local services, Chapter reports to National Headquarters indicate. The Eleventh Annual Roll Call of the Red Cross, from November 11 to 24, it is pointed out, is an opportunity for everyone to become identified with the Red Cross.

**George Eliot's Face**  
George Eliot was lacking in physical charm. Professor Boyesen said that if you could imagine a "very sad horse" you would see her face clearly. —William Lyon Phelps in Scribner's Magazine.

**Sateen's Innovation**  
Records do not tell in what year sateen was first manufactured. It is first mentioned in English literature in 1878 in "Barlow's History and Principles of Weaving."

#### Appreciates Service of Casualty Company

Woodbridge, Nov. 9, 1927  
The Commonwealth Casualty Co.,  
210-12 South 5th St.  
Philadelphia, P. A.  
Gentlemen:

I herewith beg to acknowledge receipt of your check for \$125.00, One Hundred Twenty-five Dollars, for disability benefits—35 days.

This is the first time in my life that I received something for almost nothing.

Thanks to the Commonwealth Casualty Company and also thanks to Mr. Carl Laster, your General Agent who, through his continued persistence that I bought your Contract for health and accident.

Never before, having experienced any sickness nor accident, I did not realize the necessity of carrying this policy nor did I stop to consider the obligation I owe to my wife and children as the supporter of my family.

Well when Mr. Laster proposed your policy to me as a protection for my family in case of my disability and presented its wonderful merits I thought I would have to pay about \$100 a year for such protection and I immediately lost interest because I could not afford, as I thought, such a luxury, but when he told me that for all that protection the cost would only be Ten Dollars a year I could hardly believe it less than three cents a day—To make a long story short I bought that policy and put it away together with my other papers and I really forgot about owning a health and accident policy.

I was enjoying the best of health and attending to my business in my regular routine way.

Then, out of a clear sky on August 25th, 1927, while delivering an order for a customer a car shot by and hit me.

That bump was only trivial as compared to some of the serious accidents which occurs every day, yet I was disabled five weeks and during that time I was unable to attend my work.

Then I first realized how important it is for every man to carry protection.

I now say that any married man who does not carry insurance to protect his family in case of sickness or accident commits a neglect toward his family and shows that he is unfaithful toward his family's wants.

I have learned my lesson and am glad to give my experience to those men who do not carry protection.

For less than three cents a day I can never afford to be without such protection.

Again gentlemen I want to thank you.

HARRY ZELMAN,  
Merchant 330 Fulton St.  
Adv. Woodbridge, N. J.

#### SIGNPOSTS WILL GUIDE AVIATORS

Letters Six Feet High Are Recommended.

Washington.—Not long hence the aviator who is flying over strange territory will be able to "find" himself by glancing down at the roofs of the cities over which he is passing.

He will look for aerial signposts. These will consist of huge letters on the roofs of the city's large buildings spelling out its name. Installation of these signposts is expected to begin soon in some of the large cities.

Specifications and instructions have been prepared by the aeronautics branch of the Commerce department, and these have been sent out to chambers of commerce in cities throughout the country.

"With air travel developing more rapidly than the installation of aids to aerial navigation, the marking of cities is without doubt the most immediately important aid to aviation," a statement issued by the department said.

Roofs on which the signposts are placed should be preferably of tile, shingle, tin or other metal, or of slate. A simple block letter in chrome yellow with a dull black background should be used. If the roof has a slope of over 30 degrees, the sign should be painted on both sides.

The name of the city should be spelled out, with an arrow pointing in the direction of the city's airport.

The width of letters such as "M" or "W" should equal two-thirds their height, with other letters in proportion. A spacing of one-fourth the height should be used between letters. The letters should be not less than six feet in height, preferably as large as possible. Letters less than six feet high cannot be seen at a great height.

Where gravel or pitch roofs offer the best location, wooden letters may be elevated above the roof or the sign may be painted on a dull black background formed of wood raised on legs above the roof proper. Where raised letters alone are used, the gravel roof beneath should be so treated as to give a darker ground than the gray of the gravel.

It is of primary importance that the names be lighted at night. Ordinary flood lights may be employed, the number depending on the area to be illuminated and type of flood light used.

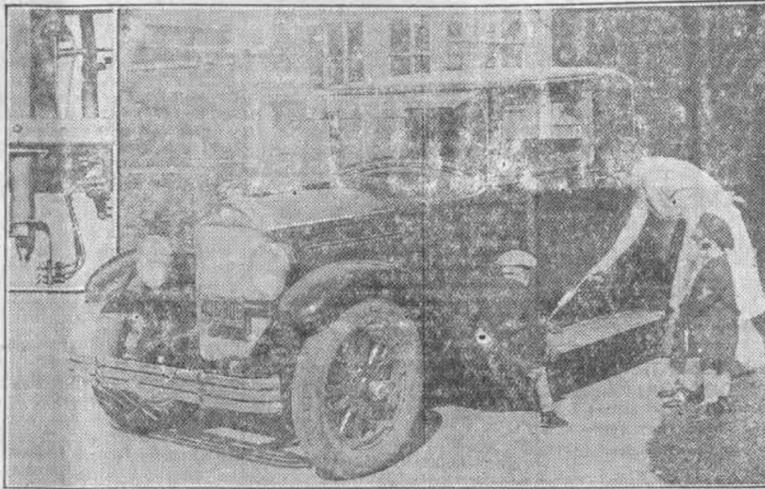

#### Gospel Truth

Simpler living, deeper joy in worthwhile things of life, courage to say and do what is best for you individually—all these make for contentment, self-respect, and high thinking. "As a man thinketh in his heart, so is he," a gospel truth.—Grit.

#### Wise Old Proverb

"Pray devoutly, but hammer stoutly," says an old proverb. There's more than wit and wisdom in the old saw; there's religion and good logic also. When you lift your heart in prayer, don't forget to lift your arm.—Youth's Companion.

#### Buick Lubrication-Easy and Positive

The ease with which Buick for 1928 may be greased is one of its outstanding features. There is no need of crawling under the car, for inaccessible chassis points are reached with grease gun through trapdoors in running board apron, as shown here. Inset shows portion of chassis with cluster of grease connections and extensions which make possible this refinement. Rear end connections are similarly extended.

#### Artificial Earthquakes Tell Where to Drill for Oil

New York.—The sun of that romantic oil-hunting pioneer, the "wild-catter," has set. Science, by creating artificial earthquakes and recording their results on the delicately accurate seismograph, has found a way of locating new oil fields which will almost eliminate one of the heaviest expenses of oil production.

This is the prediction of Floyd L. Darrow, who, in St. Nicholas, explains the recent successful oil-finding tests made by geologists in the Gulf coast oil field by means of dynamite and the seismograph.

Pointing out that one out of four wells drilled last year proved to be a dry hole, Mr. Darrow estimates the amount lost in the 7,965 dry holes sunk in America last year at nearly \$250,000,000.

"Most of the oil in that territory is found under salt domes, overlain with alluvial, or river-deposited, sediments," he explains. "The prospector explodes dynamite on the surface of the ground near the suspected location of such a dome. The waves from the shock radiate outward in all directions.

"Seismographs record these waves. If these waves enter a medium of different density from the alluvial deposits, such as a salt dome, the seismographs instantly announce it by a change in the character of the waves recorded.

"As a result of many tests engineers are able to make blue prints of a region giving a complete picture of the strata of the underground region, and telling where to drill and where not to drill."

#### Rich Coal Deposits

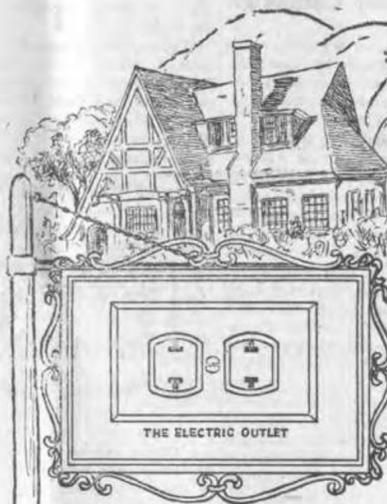

The bureau of mines says that the thickest coal seam in the world is the Fortuna mine, near Cologne, which is 100 meters, or 330 feet, thick. The thickest seam in the United States of high-grade coal is in the Mammoth seam, near Wilkesbarre, Pa. This seam is 50 feet thick, some folds running as high as 60 to 80 feet.

#### Middle-Age Superstition

During the Middle ages it was believed by scientists that beasts went mad by looking at a certain star in the east on the twenty-first day of the month.

#### Burden to Sinner

A guilty conscience is like a whirlpool, drawing in all to itself which would otherwise pass by.—Fuller.

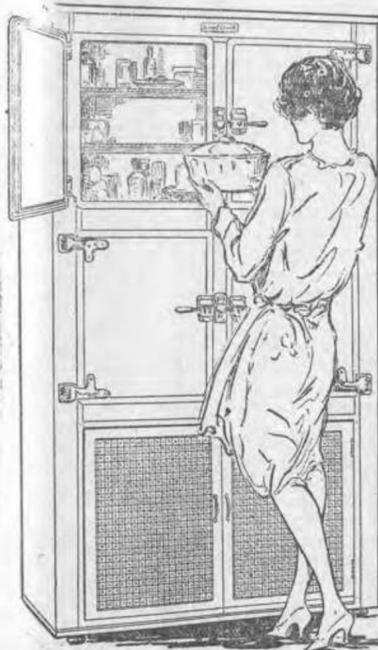

## The Electric Outlet is the Sign of Service

PLUG in the appliance and immediately the electric current responds and sets the appliance to work. The outlet is the sign of faithful service waiting for a command to serve you.

Each make of appliance which Public Service sells has been tested at the Company's testing laboratory. It receives the approval of experts before it is offered to a purchaser. The experience and knowledge of our trained service organization is placed at your command.

A divided payment plan has been arranged to permit you to use appliances while you pay for them.

Prepare Now!  
**KELVINATOR**  
Keeps Foods  
Fresh

Many of the good things made for holiday celebrations may be kept in the electric refrigerator. Here a dry cold atmosphere will keep the most perishable foods fresh for days at a time.

**INDIANS OF BOLIVIA RELATED TO INCAS**

**Aymaras Conquered by a Once Powerful Race.**

Washington.—The Indian revolt in Bolivia, South America, is being carried on by a people closely related to the ancient Incas of the Andean highlands, whose civilization, before the coming of the Spanish conquerors, was one of the most highly developed in the New World. A bulletin from the National Geographic society tells of these highlanders and their past glories.

The Indians of Bolivia are Aymaras," says the bulletin, "while the direct descendants of the Incas, in Peru, are known as Quichuas. The old Incas, at the height of their power, conquered the Aymaras of their day, but the Aymara land around Lake Titicaca was the holy land of the Incas, because they looked upon it as the origin of both their civilization and their blood. Because of this relationship the Aymaras received special privileges over the vassals of the Incas. The full-blood Bolivian Indians of today therefore may be looked upon as representatives of the race from which the great Incan civilization sprang.

**Have Little to Do With Whites.**

The Bolivian Aymaras and the Peruvian Quichuas are much alike in appearance and characteristics. Those of the highlands of both countries have developed huge chests in the rarefied air. Their active life of climbing has given them extra strong leg muscles. Both have dark reddish complexions, broad faces and black eyes. They are a sullen people, having little to do with the whites and apparently resenting their intrusion.

More than 50 per cent of the inhabitants of Bolivia are full-blood Aymaras, while nearly 30 per cent are of mixed blood, the so-called "Cholas." The Cholas and the whites live for the most part in La Paz, the capital of Bolivia, and the other sizeable towns. The village populations are almost wholly Indian, and large numbers of Indians also live on the agricultural estates and the grazing lands, working usually for white owners.

**Wear Few Clothes.**

Although it is bitterly cold on the wind-swept, bleak upland plains of Bolivia, the natives wear little clothes, most of them going bare-legged. They seem intent, however, on keeping their heads warm, and beneath their hats men wear woolen skull caps. They live chiefly on frozen potatoes and dried goat meat.

The great mass of the Indian population of Bolivia is illiterate. Many of the Indians cannot speak Spanish, and some who understand the language pretend ignorance to avoid contacts with the whites.

Yet the ancestors of these people produced great cities which give evidence of a high degree of culture. One of the most remarkable of the Inca cities was Machu Picchu, a city of refuge where Inca civilization was kept alive during many centuries. The ruins of this city, hidden in almost inaccessible mountain fastnesses, were discovered by a National Geographic society expedition in 1912.

The most famous pre-Incan ruins are those of Tiwanaco in Bolivia, not far from Lake Titicaca. These are believed to be the remains of buildings constructed by the ancestors of the Aymaras. The walls, still standing, are composed of huge stones set without mortar. The stones were dressed so well by their ancient masons that they are in perfect contact and have remained as placed hundreds of years ago."

**Official Listening in Approved in France**

Paris.—Government employees listen in on presumably private telephone conversations in France, but not from curiosity. They merely want to be sure that the telephone is working all right. They seldom sit in on an entire conversation, contenting themselves with sufficient snatches to show whether the communication is clear. From the many complaints one bears it may be assumed they are more easily satisfied with the clarity of the line than the ordinary subscriber.

When the royalist leader, Leon Daudet, was released from prison by a trick telephone call, it was explained by the embarrassed government that the inspectors who listen in on telephone conversations were at luncheon at the time.

This aroused the League of the Rights of Man. They wrote to the minister of commerce to inquire whether telephone conversations were no longer secret. The minister explained that they were, but that in each exchange was an "observation table," whose occupants cut into conversations to test the quality of the service.

**Find Rubber Tree Growing in His Yard**

Orange, Texas.—The only rubber tree in Texas has been discovered here. The owner started to cut it down, but observed that it was of unusual type. Neighbors recalled that a late owner of the place set out the plant many years ago. The tree now is a foot in diameter and in a thriving condition.

**Speed of Glaciers**

The speed of glaciers varies from an inch a day to several feet a day, some few moving as fast as 100 feet a day, according to an answered question in Liberty.

**Glow Worms**

Glow worms have a keen sense of hearing, says a scientist who has just completed a series of tests of the crawlers.

**JOIN!**

**Yesterday Today Always**  
**The GREATEST MOTHER**

**RED CROSS FLOOD RELIEF IN SOUTH COSTS \$17,000,000**

**Greatest Disaster of History but One of 111 Operations in Year of Calamity.**

Tornadoes headed the list of disasters which struck the United States in the past year, the report of Red Cross relief operations for the year ending June 30, showing 29 great storms. Floods were second on the list, 24 being recorded for the same period.

This record does not include the St. Louis tornado which occurred in the current fiscal year, as did a number of other storms and disasters since, in which the Red Cross provided relief.

Included in the list of 111 disasters covered by the record of the past year's relief operations of the Red Cross, are earthquakes, explosions, mine disasters, a cloudburst, a hail-storm, fires, floods, hurricanes, a railroad wreck, a scarlet fever epidemic, typhoid epidemic, tornadoes, and a typhoon. The latter occurred in the Philippines, but is included in the operations at home. In all, the Red Cross extended its services in 77 major disasters in the United States and in 20 abroad, including a hurricane over Havana, Cuba, and the Isle of Pines, one in the Bahamas, and others through various West Indian regions, fire in Porto Rico, another in Haiti, earthquakes in Armenia, Japan and Albania, floods in Jugo Slavia and Mexico.

The organization conducted refugee relief operations in Syria, Bulgaria and China, the latter largely due to factional wars fought over various parts of China the past year.

The two outstanding disasters at home were the Florida hurricane and

the Mississippi Valley flood. Rehabilitation operations of the latter disaster are still in progress under the Red Cross. A national appeal for funds was made in both disasters, resulting in contributions for relief amounting to more than \$20,000,000.

The Mississippi flood is the outstanding disaster in the whole history of the Red Cross disaster relief service. In this one catastrophe the organization raised through subscriptions by the people of the country and foreign nations approximately \$17,000,000 for relief use. Aided by this fund it fed, clothed, sheltered or otherwise assisted more than 500,000 human beings, fed and cared for approximately 200,000 head of livestock and established 149 refugee camps. The flood inundated approximately 20,000 square miles and affected 174 counties in eight states. Some 339,000 homeless persons were sheltered in Red Cross camps. When the emergency was at its height the Red Cross was serving more than a million meals a day.

So vast was the work imposed on the Red Cross and allied agencies conducting rehabilitation that this phase of the flood relief task is expected to extend well into the coming year. Up to September 15, 104,441 families in the flood zone had been given rehabilitation assistance by the Red Cross, and 1,700,000 acres of flooded crop land in seven States had been replanted with Red Cross aid. There had been expended or committed for expenditure in connection with this relief and rehabilitation work a total of \$15,660,000.

The appeal for a nation-wide membership increased to 5,000,000 adult members, it was pointed out, is based on the realization that demands on Red Cross service such as occasioned by disaster relief are increasing each year. For that reason special importance is lent to the Eleventh Annual Roll Call of the organization, to be held from Armistice Day, November 11, to Thanksgiving, November 24, during which this membership will be built up.

**U. S. IMPROVES ON WEAPONS FOR WAR**

**Important Advances Made Over Arms of 1917.**

Washington.—New weapons far superior to those used by the American army during the World war have been developed by the ordnance branch of the War department. Predominant characteristics of the new weapons over the old are increased ranges, heavier projectiles and greater mobility.

While the United States has not progressed so far as European armies, especially England, in the mechanization of its fighting equipment, inquiry reveals unusually important advances in the development of new artillery weapons. Examination of the new weapons discloses that in case of another emergency, the American army will at least have weapons perfected which can be rushed into production with full confidence that they will function efficiently on the battle field.

Two outstanding examples in the artillery weapons are the 75-millimeter gun and the 75-millimeter pack howitzer. Other improved weapons include a new 155-millimeter or 6-inch field gun and the 75-millimeter pack split trail, an improved 37-millimeter infantry weapon, a new trench mortar, two new 3-inch anti-aircraft guns and a 14-inch howitzer.

Artillerymen are confident that the new 75-millimeter gun developed in this country since the war is destined to make the smaller caliber field gun a more efficient weapon. The American 75, while weighing slightly more than the famous French 75-millimeter field gun, used so widely during the

war, has a much greater range and a wider field of fire. Where the old weapon had a maximum range of 9200 yards, the new American rifle fires a 15-pound projectile a distance of 15,000. Its elevation, thanks to the use of a split trail, is 45 degrees, while the old weapon had an elevation of only 19 degrees.

The new American 75 will be horse-drawn and tests have shown it can be taken anywhere the old 75 could go. This gun has been adopted for army use. Companion pieces for this weapon are the new 75-millimeter pack howitzer and the recently developed 105-millimeter rifle.

The advantages of the new howitzer are that it boasts a range as great as the French 75 and is so light in weight that it can be easily transported through mountains or hilly country.

**Find Indians Raised 32 Leading Vegetables**

Washington.—According to the Department of Agriculture, the American Indian was a successful vegetable farmer.

"In the American vegetable garden," the department points out, "eight principal food products had their origin in the Indian crops existing before the advent of the white man. These include beans, corn, peppers, pumpkins, squash, tomato, potato and sweet potato."

Vegetables of Old world origin are far more numerous. The department lists 24 of importance:

Cucumbers, eggplant, muskmelon, watermelon, okra, asparagus, beets, brussels sprouts, cabbage, carrots, cauliflower, celery, kale and collard, kohlrabi, leek, lettuce, onion, parsley, parsnip, peas, radish, salsify, spinach and turnip.

**Lost Frisco Records Turn Up in Lima, Peru**

San Francisco.—The Examiner says a large number of manuscripts believed to be official records of the city of San Francisco which have been missing for more than a half century have been found in Lima, Peru.

The find was made known here by Senorita Noval Beneditti, who is teaching in a convent in San Francisco. According to her story, the newspaper says, the records were about to be dumped into a river as junk when they were recognized by a passerby as possibly being of historical value. The passerby bought the wagonload of papers for \$40.

The papers are believed to be those which were carried away by Harry Meiggs, San Francisco alderman, who in 1854 absconded with \$250,000 obtained by forging city warrants. Meiggs went to Peru, where he built the Central Transandino railroad over the Andes mountains and accumulated a fortune of more than \$100,000,000. He made restitution of the sum he took away, but never returned to this country.

**Magellan First**

The first record for traveling around the world was made by Magellan, who encircled the globe between September 20, 1519, and September 8, 1522, points out an answered question in Liberty. The present record is 23 days, 14 hours, 36 minutes, and 5 seconds.

**Money in Writing**

**New Jersey Ten Years From Today**

PLANNING ahead to meet future needs is a first consideration of the management of the New Jersey Bell Telephone Company, for otherwise service ready for every demand could not be provided.

Facts of the past and present coordinated with tendencies noted by trained telephone observers, give us a reasonably accurate forecast of the service needs of coming years. Upon such a survey we are now making plans to care for New Jersey's telephone requirements in the next decade.

Today the New Jersey Bell Telephone Company serves the users of 570,000 telephones.

In 1937 our organization and system will be prepared to give satisfactory service to the users of more than 1,000,000 telephones.

Now and in the future our purpose and obligation is to provide real service at reasonable cost both within the State and to all available points beyond its borders.

Man's Work in the World Should Be Source of Satisfaction and Pleasure

By DR. LINDLEY, Chancellor University of Kansas.

Civilization has now come to be an earth conquest, and there has dawned a new humanism which proclaims that neither war nor worship nor contemplation nor the enjoyment of leisure are the chief ends of man—but the shaping of nature through human industry to realize human ideals.

Choosing of an occupation is too much by chance, the old-world tradition of following in a father's trade too often prevails, to the end that three-fourths of the men now in industry are badly placed. A man's employment should be such as will enrich rather than impoverish the personal life; it should be a source of satisfaction and pleasure.

Happiness in one's work comes from adjustment of task to aptitude. Scientific management is nothing less than the application of the arts and sciences to the problems of human industry. Chief progress in scientific management has been made in the perfecting of machine processes.

The bulk of the crude work of the world will eventually be done by machines. Plato despised labor in his day, just because it was rule of thumb, a routine, devoid of invention. Followers of Plato today, to be loyal to their high human ideals, must realize that a vast amount of creative intelligence of mankind is now engaged in industrial production and organization. This is the domain in which new human values are being wrought.

Mission of the Peacemaker Is Not Merely to End Quarrels

By MRS. R. C. DAWES, Federation Women's Clubs.

Modern biblical scholars tell us that the saying "Blessed are the peacemakers" does not refer to those who make peace between two parties who have quarreled. It means, rather, "Blessed are those who create harmonious relations." Such people prevent quarrels, instead of trying to stop them after they are begun.

So long as men have two fists and a quick temper they probably will continue to fight, but to say that because men fight, nations will always wage war, is jumping at conclusions. We are told that the next war will be so terrible that it may wipe out civilization itself. In any case it will destroy most of the people who wage it. Is it common sense to say, in the face of such a possibility, that it isn't worth while to consider other ways of adjusting difficulties between nations?

International relations to a system of highways, with the more backward nations having the poorest roads. The families of the nations are meeting on the highways of the world and nearly all of them are seeking to go about their business peacefully. Our problem is to keep the roads open and free, to prevent bloodshed when two nations meet upon them.

If the open road to peace is to be used by all the nations of the world, then every nation must have a part in its building.

Future Generations Likely to Inhabit a World Free From Plagues

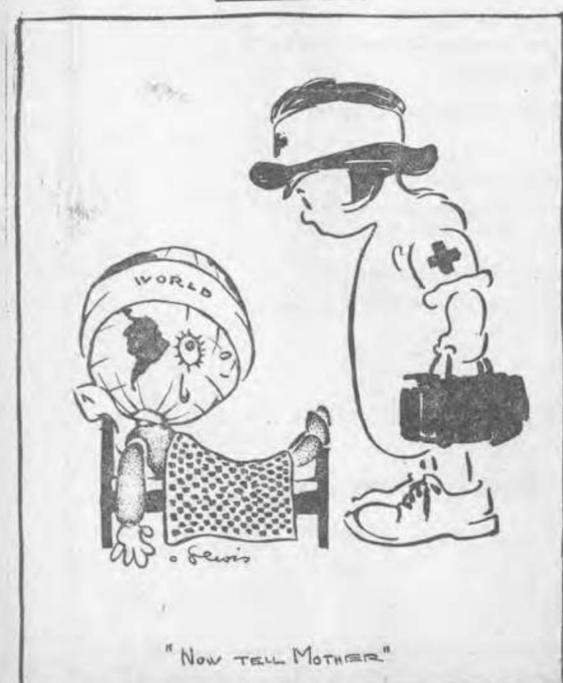

By DR. FRANK BILLINGS, Professor of Medicine.

The future of medicine will be greater in opportunity than the past has been in accomplishment. The work accomplished justifies the statement that the knowledge of the cause and means of transmission, with the use of dependable measures of prevention of most of the infectious diseases, and sanitary science could make the world free of these plagues—the captives of the hosts of death.

We cannot rest and be satisfied with acknowledgements of these splendid accomplishments, because there are still hundreds of problems to be solved which are of the greatest importance. There still are infectious diseases to be investigated and we must learn their microbic cause and find specific means for their prevention and cure.

Of these infectious diseases epidemic influenza is probably the most important, because we are ignorant of the nature of its etiologic virus. Without this knowledge we are unable to prevent its epidemic recurrence.

We have no definite knowledge of the cause of insanity or feeble-mindedness. Clinical studies of these conditions have been interesting, but not especially productive. It is believed that the problem of prevention may be solved by an intense clinical laboratory research, utilizing biochemistry, physical chemistry, and biology. Birth control and sterilization should not be adopted until the underlying problems of heredity have been thoroughly investigated.

Gave Names to Cities Albany and New York owe their names to a single circumstance. After the Dutch surrendered their North American colonies, the duke of York and Albany (afterward James II) became their proprietor. New Amsterdam became New York in his honor and Fort Orange, Albany.

New Jersey Plants Trees

State Forester Wilber of New Jersey is able to announce that residents of his state planted a million pine, spruce and fir seedlings on 1,100 unproductive acres this spring. Distribution of seedlings began in 1923; in that year 300,000 of them were set out. In the main they have done well; each year sees more land owners interested, more applicants for seedlings, more intelligent care of the plantations. Nothing better, nothing more profitable can be done with much of the land in every state than to plant it to trees. Trees pay dividends in soil enrichment, in water conservation, in protection of wild life, in cash. Trees cause posterity to rise up and bless the generation that planted them, says the New York Sun. A great deal would be forgiven the man who consistently planted trees; but the man who plants trees is not the kind of man who needs forgiveness. He leaves that for the man who requires it—the man who by carelessness, in ignorant greed or otherwise, fails to do what he can to preserve and extend the forests of the land.

South Africa needs millions of trees. They would prevent and arrest the encroachment of the desert and the gradual drying-up of the land. . . . Every year—and ever year in increasing quantity—thousands of tons of the deep fruit layer of surface soil are washed away to the sea. . . . If the country's watersheds were covered with a sufficiently dense mantle of trees, the rainfall would be stored and the flow of the rivers regulated, says the Johannesburg Times. The surface soil, instead of being washed away, would be gently and consistently moistened. Without the assistance of private enterprise, and, above all, without the co-operation of every farmer in the country, the best efforts of the forestry department must be like trying to sweep back the desert with a broom.

Once when John Ruskin and Thomas Carlyle were discussing the literature of their day, the latter said to his companion: "Can you tell me why it is that works on subjects of vital interest to the race, splendidly written by men of profound scholarship, command scarcely sufficient sale to pay the cost of publishing; while trashy novels, false to history, false to philosophy and false to the facts of human experience, and altogether lacking in literary merit, will sell by scores of thousands?" After a short pause, Ruskin replied: "There is but one explanation of that fact, but the explanation is all-sufficient; the novel has love in it—and the other has not."

In considering the future of the automobile business it is well to remember that this great industry begins each year with an assured basic market of from 2,500,000 to 3,000,000 cars which represent replacement sales. Nearly 50 per cent of the automobiles sold in this country today replace old ones. This replacement business is expected to reach 75 per cent within the next five years. It is a sound part of the business, manufacturers believing it easier to sell to the owner of a car than to sell to the beginner his first automobile, just as it is easier to sell shoes to shoe-wearing peoples than to sell them to Hottentots.

The church of England has approved the new Book of Common Prayer, the vote of the assembly being 517 to 133, the preponderance showing that the changes in the ritual are regarded by many as having merit. Nevertheless, it is not proposed to make the new book authoritative. It is permitted to be used, but any congregation which wishes to do so may continue use of the old version.

A New York woman had an artist paint her picture, but insisted at the end that she was "not as stout as that." She caused the artist to make the picture thinner, which he did, and charged his client \$7,000 for criticizing his art. The jury has awarded him \$4,500. It is a question whether the lady gets anything out of it save advertisement of her avoirdupois.

An eastern railroad plans to put in service engines painted in gaudy colors. This will give a further thrill to grade-crossing daredevils in automobiles. They will have a choice of colors, and can bet on the red, the yellow or the green as the one that will knock them into kingdom come.

It's a fine thing to be editor of a paper or magazine and not be asked to write anything for it or be compelled to read it. Yet, while being independent of fathering the child, the distinction may be dear-born.

One of the things that the proof reader wishes that the world knew and understood: that the 26 letters of our alphabet can be transposed 620,448,401,733,230,439,396,000 times.

What ever became of the old-fashioned tough bulldog, like Tige in the Buster Brown comies?

WAR WORK NOT AT END FOR RED CROSS

Demands for Service to Disabled Veterans Last Year Cost Nearly \$3,000,000.

Expenditure of \$2,930,223.86 for services to disabled veterans, and of \$507,832.30 for service to men of the Regular Army and Navy, were outstanding details of the Red Cross appropriations for the past year's activities, and are cited by Chairman John Barton Payne as the continuing importance of this phase of the organization's responsibilities nine years after the end of the war. Of the total expended for disabled veterans, the National Organization contributed \$1,161,223.86, and the local Red Cross Chapters \$1,769,000. The service to men of the regular forces was shared by the National Organization with an appropriation of \$507,832.30, and by the local Chapters with \$290,000. During the year the Red Cross as a whole contributed materially to the success of the Government efforts to have every veteran re-instated or convert his war-time insurance before the final time limit expired. Chapters worked in cooperation with local veterans' bodies to assist former service men with their insurance papers, and the application routine, many Chapters keeping open headquarters up to the expiration of the final moment at midnight. Under local Chapters of the Red Cross, assistance to ex-service men in filing claims for disability and adjusted compensation, securing hospital care for disabled veterans, preparation of social histories for use in treatment of men in government hospitals, assistance in securing proper guardians for veterans adjudged incompetent to administer their affairs, rendering reports on home conditions of service men applying for discharge because of dependency, and many other forms of aid are a part of the Red Cross duty to these men. An interesting detail reveals the fact that prosecution of ex-service men's claims is becoming increasingly difficult as they grow more involved with each year that passes since the war. The number of death claims is growing constantly, in addition to the fact that there is a steady increase in the number of claims referred to various branches of the Red Cross concerned with assistance to veterans, for aid in bringing them to a close. During the past year, National Headquarters estimated that the Red Cross assisted veterans and service men with cases involving total awards of \$558,681, for disability and death compensation, revival of insurance, adjusted compensation, pensions, medical and burial reimbursements, etc. Red Cross representatives are on duty with the Army and Navy both in home and foreign garrisons, and contact is maintained in the hospitals and other centers where assistance to these men and women may be needed. Such Red Cross service, it is emphasized, covers only the fields where regular governmental provisions do not apply, and is designed to supplement these benefits of the Government.

It was emphasized that this particular activity of the Red Cross is one of the strongest appeals for the increased membership, which will be asked of the country during the annual enrollment from November 11 to 24.

The Eleventh Annual Roll Call of the American Red Cross, during which new membership is invited, will be held this year from November 11 to 24.

Another record has been broken. A frog stowed itself in an airplane at Pensacola and was discovered when the machine landed at Macon. This is the greatest known hop of any frog, beating the notorious jump of the frog of Calaveras county.

Europe has never tried to understand baseball and America has never developed an overwhelming interest in some of the leading games of foreign nations. Aviation, however, appeals universally, not only to sporting interest, but to a sense of utility.

Members of the Women's Bureau of the District of Columbia police department recently completed the Red Cross first aid course. This is perhaps the first women's group of the kind to be awarded the special first aid arm insignia by the American Red Cross in token of completion of the training. The Red Cross in the past year qualified 24,812 persons in first aid and awarded certificates to members of police and fire departments, industrial groups and utilities employees all over the United States.

Capital's Police Women Stand High in First Aid

A fishing worm in the hand is worth 5 cents at a summer fishing resort.

The next men to break into the millionaire class will be those selling airplane stock.

One fly can carry 8,000,000 germs, but he doesn't always take the trouble to do it.

"Probably," says Beachy Mayme, "the wild waves are wild because so many bathing beauties avoid their caps."

"HerCardboard Lover" At the Broad Theatre

Jeanne Eagels, starring in "Her Cardboard over" at the Broad Street Theatre is seen in a characterization altogether different from any she has assumed in recent years. Her Cardboard over adapted from the French success of Jacques Daval by Valerie Wynyat, and P. G. Woodhouse, is presented by Gilbert Miller and A. H. Woods.

In the role of Simon Lagores, chic Parisienne, Miss Eagle is the center of a comedy of the eternal triangle, which has two ne wangles; a husband who is not a husband, and a "Cardboard Lover." It is a love story told in dialogue as keen as a rapier, set against the background of fashionable Biarritz and Paris.

COUNCIL MINUTES

The following part of the Council minutes contain corrections of errors made in the publication of the minutes in last weeks issue.

UNITED STATES MORTGAGE & TRUST COMPANY Fifty Five Cedar Street, New York, October 19, 1927

Mr. Emil Stremiau, Borough Attorney, Carteret, N. J. Re; Carteret, N. J. Dear Sir:

For your information we beg to advise the \$287,000 Public Improvement Bonds of the Borough of Carteret, New Jersey, are now ready for execution, and if you will advise us the time and place most convenient for the officials to sign same we will be governed accordingly.

Awaiting your advices, we are, Very truly yours, T. W. B. Middleton, Assistant Secretary.

In the appointments of the sidewalk commission for Locust St., the name of Frank Goedski was omitted.

Restoring Faded Writing

Faded writing may be restored in the following manner: Lay the paper flat and dampen it evenly with cold water. Brush over the writing with a camel's hair brush dipped in a solution of ammonia, and the writing will appear plain and readable. Fresh applications are necessary on ordinary writing paper.

Painfully True

According to Mr. Edgar Wallace, few men benefit much by their misdeeds. Still, some of those American song writers seem to be doing pretty well.—Punch, London.

Appreciated Aid

We wish to thank our many friends and neighbors for their kind assistance in the recent destruction of our home by fire.—From a Working Paper.

**CLOTH COATS ARE ENRICHED WITH EITHER FLAT OR SHAGGY FURS**

Now that unique flat pelts have entered so conspicuously into the fur mode, the season's handsomely befurmed cloth coats become a theme of fascinating interest. As to the relative style prestige of novelty flat pelts versus showy long-haired furs for trimming, the mode casts a fifty-fifty vote.

It therefore resolves itself into a matter of individual preference as to whether the new coat shall be distinguished with clever touches of calfskin, shaved lamb, spotted leopard, mole or ermine or whether it shall be lavishly collared, cuffed and bordered with tawny fox, wolf, badger, or fitch.

The models in this illustration present the subject of the fur-trimmed coat from two distinctly different angles. A very swagger type is defined by the mode to the left. For its development the stylist chooses an exquisitely fine beige duvetyne. Which

brings to mind the fact of the prominence of "classy" suede finished weaves throughout the list of fashionable cloakings.

The collar is of pale brown calfskin spotted with white, with a pocket of the same. This pocket is doubly unique in that it is equipped with a "lockite" attachment.

The other model stresses the lavishly befurmed coat type. It is said that luxuriously furred cloth wraps are proving a formidable competitor to the all-fur coat. It seems as if there is no limit to the extravagance of furs bestowed on cloth models this season. Spectacular effects are attained by positioning fur in unique ways upon sleeve and for generous collars and for unusual hemline trimmings. This novelty of fur placement together with the showiness of the fur itself is emphasized throughout cloak styling.

(©, 1927, Western Newspaper Union.)

**RED CROSS ADVANCES IN HEALTH PROTECTION**

**Record for Progress Is Made in Protecting People of Vast Flooded Section.**

Record health protective activities marked the year's service of the American Red Cross in this field. The outstanding health accomplishment was the successful conclusion of the emergency health program launched as part of the relief work in the Mississippi Valley flood. In co-operation with State and Federal health agencies, the Red Cross successfully conducted a campaign designed to prevent epidemics as a result of flood conditions.

Thousands were immunized against typhoid and smallpox, preventive measures against malaria were undertaken, and as the flood receded an intensive clean-up program was set in motion to purify water supplies, provide sanitary surroundings of rural communities and complete other health protective steps.

Beside the emergency work, the Red Cross Public Health Nursing Service developed about 100 new community nursing and health services throughout the country. Nurse instructors and others operating under the Red Cross also extended training in Home Hygiene and Care of the Sick to both adult and Junior groups, the latter in educational institutions in certain instances. Every State, Alaska, the Hawaiian Islands, the Philippines, Porto Rico, and the Virgin Islands. Home Hygiene

classes which showed a large increase.

One contribution to national health achieving a growing recognition is the nutrition instruction service, through which thousands of adults and school children are learning the proper foods for health and the fundamentals of correct food habits in relation to health. Classes include housewives, school children, foster-mothers, policemen, women having charge of homes and institutions, business girls and students in universities and colleges.

Besides these direct services for better health, the Red Cross enrolled reserves of nurses amounts to more than 45,000. These nurses are available for disaster relief service, epidemics and other serious emergencies, and are on call for duty with the Army, Navy and the Veterans' Bureau.

Red Cross health services are increasing in scope, it is pointed out, in calling attention to the forthcoming enrollment of new members in the Red Cross ranks, through whose support all Red Cross activities are made possible. The enrollment will take place from November 11 to 14.

**Junior Red Cross Army of 6,000,000 in Schools**

Members of the Junior Red Cross proved a new capacity for service during the Mississippi flood, according to reports to Red Cross National Headquarters covering their work.

This group of enthusiastic school children responded spontaneously and generously to the needs of the flood victims. An indication of the importance of this help is contained in the report that Juniors in Boston alone contributed \$7,000 to the relief fund.

Junior Red Cross members shared in reconstruction work in the Midwest tornado several years ago, after the Florida storm, and are in the post-flood operations of the Red Cross among the people in the Mississippi Valley.

Junior Red Cross has 5,322,757 members, an increase of 273,329 in the last year.

More than a million of the Junior Red Cross membership is distributed in the Philippines, Hawaii, Guam, Porto Rico, the Virgin Islands, and Alaska, and includes Indian and Eskimo children. Through the medium of the Junior Red Cross in the United States, and similar groups abroad, children all over the world are being brought into closer understanding by international correspondence carried on by classes in the schools.

The Juniors at present have nearly twice the membership of the senior organization, but in the forthcoming membership enrollment of the Red Cross, from November 11 to 14, the goal of the adult membership is 5,000,000.

A possible indirect effect of the reduction in the size of paper currency is that the banks will not have to put up new buildings that look like a state fair coliseum.

"I formed the habit of reading the paper from beginning to end," said an old man the other night, "in the days when I was a cub reporter looking for my story on the \$15 fire."

A Philadelphia man has been given a divorce because he "has been dodging dishes for 31 years." His wife's marksmanship is improving, of course, while he isn't as fast on his feet as he once was.

**Foreign Calls for Help Answered by Red Cross**

Despite the unusual requirements of relief in 77 disasters within the United States, the people of the country, through the American Red Cross, extended relief to sufferers in 20 disasters in foreign lands.

These included hurricanes in the West Indies, devastating portions of Cuba, Santo Domingo, Porto Rico, the Isle of Pines, the Bahamas, and other islands in the group; fires in Haiti and Porto Rico, floods in Mexico and Yugoslavia, earthquakes in Japan, the Azores Islands, Armenia and Albania, and refugee relief operations in Bulgaria, Syria, and China.

During the Eleventh Annual Roll Call, November 11 to 14, the American Red Cross will seek a membership of 5,000,000 to keep its disaster relief and other services constantly ready for any call.

**They Are Scarce**  
Men of courage, men of sense and men of letters are frequent; but a true gentleman is what one seldom sees.—Steele.

**Famous Frenchman**  
Peter Abelard was a famous French scholar and theologian. He secretly married Heloise, a French abbess. He died in the year 1142.

**Foreign Judges for Stock Show**

When the International Live Stock exposition is held in Chicago, November 28 to December 3, two distinguished foreigners will be there as judges. Lieut. Arnold Caddy (left), president of the Australian Red Polled Breeders' association, and one of the leading judges of many kinds of live stock in his native country, will make the official awards in the Red Polled breeding classes. Walter Biggar (right), Dalbeattie, Scotland, will assume the responsibility of officially judging all of the fat bullocks and selecting the grand champion steer.

**For Safer Hunting**

A few simple rules suggested by wardens on handling of firearms are of timely interest with the opening of the Fall hunting season.

These suggestions follow:

Don't forget to remove the shells from your gun the instant you cease hunting. We all know the reputation of the "didn't know it was loaded" gun.

Don't carry a gun in any position while hunting, that permits the muzzle to sweep the horizon. An accidental discharge may sweep a fellow hunter "beyond the horizon."

Don't lay your loaded gun on the ground. Your dog may accidentally step on the trigger and lose a master.

Don't draw a gun toward you, through a fence or through your car, muzzle first. And Don't pass it, muzzle first to any other person.

Don't lean your gun against a tree, where a passing hunter or dog might easily dislodge it. And don't lean on the gun barrel yourself. The experienced hunter always "breaks" his gun when stopping to rest.

**14 Disasters at One Time Call for Red Cross Work**

The great size of a disaster does not necessarily mean that it has the stage to itself.

The American Red Cross relief forces were impressed with this fact during the Mississippi Valley flood in recent months. While the relief forces were struggling with this greatest of all disasters in United States history, from April to June they were obliged to furnish relief in 21 other emergencies, including 11 tornadoes. In one tornado approximately 17,000 persons were assisted.

At one period the Red Cross was conducting relief operations in 14 disasters simultaneously, scattered over a wide territory.

Citing the continuity of demands on the organization's resources, Chairman John Barton Payne of the Red Cross has announced the need of 5,000,000 adult members as a result of the Roll Call, Nov. 11 to 14.

The Tenth Anniversary of America's entry into the World War in 1917, is an appropriate time to join the American Red Cross and participate through membership in its peace-time services. Join during the Annual Roll Call, November 11 to 14.

### NEWARK THEATRES

#### SHUBERT PLAYING "PEGGY ANN"

"Peggy-Ann", the delightful, and smart musical comedy, which will be seen at the Shubert Theatre, Newark, next Monday night, comes with recommendations of unprecedented popularity in New York and some of the most lovely musical numbers that have been sung and danced in many a season.

This captivating entertainment is by three young men who have come to the front with rapid strides, and are now reckoned with the foremost in their several lines of work. Herbert Fields wrote the book; the wonderfully appealing score is by Richard Rodgers and the clever lyrics are by Lorenz Hart. Since their earlier efforts, such as "The Garrick Gaities", "Dearest Enemy", and "The Girl Friend", they are quite the rage, and in "Peggy-Ann" they have combined to present what is called their masterpiece.

The attraction has been on view for a full season at the Vanderbilt Theatre in New York, and is also be-

ing given at Daly's Theatre in London. The Australian presentation will be made during the coming holiday season.

The company to appear here is the original one coming direct from its metropolitan engagement, with Helen Ford as the bright star. No word of introduction is necessary for this dainty and most charming little artist. Her many past successes and her vast army of admirers are all sufficient. She has the excellent support of Lulu McConnell and a clever band of associate artists together with a chorus of charm and distinction.

#### (Bozo) Snyder Feature At Miner's Empire

The one unique comedian in the "Land of Laughs" who has defied all imitators comes to Miner's Empire theatre next week commencing Sunday November 13, in the person of (Bozo) Snyder, as star of his own company in an offering that bristles with humor, fun and frivolity from the rise of the first curtain to the last electrifying finale.

"Boo" Snyder, has become an institution on the American stage for there is only one "Boo." Honor has been paid him as the leading pantomimist on this side of the Atlantic. Without uttering a word, he has convulsed audiences from coast to coast for many years past with a brand of fooleries that are all his own. A skilled acrobat, he not alone make those out front see the point, relies upon facial contortions to but a stamp of the foot, a turn of the hand and even a back somersault heightens his antics with the pure essence of the ridiculous.

This year he comes equipped with a new box of tricks. Scores of comicallities have been injected in this seasons offering to make it new and as highly interesting as the past. There are some of his turns which the public refuse to let him part with. The wall papering scene is a good example. "Boo" with his tricks on the ladder, with his muddle of wall paper and his buckets of paste would make a dyspeptic yearn for a good sized meal.

Sam Green, the rotund, brusque and unostentatious comedian whose jovialities in words is just as telling as "Bozo's" is in silence, will again be found at the head of a large and important list of aides-de-fun. As a foil for "Bozo's" pantomimic drolleries, Green is in a class by himself and his long association with Snyder make their team work with faultless cadence.

"Bozo" has appeared as a star under This is the second season that his own management. Those who saw his show a last year were agreed that as a producer he is on a par with himself as an artist. The

prima donna will be Beatrice Tracey with the sparkling, vivacious Fannie Palmer as the ingenue. James Brown (the straight man) with Frank Donaldson and James Smith form a vocal trio well worth hearing. Charles Judson, dancer, Harry Kelly, juvenile and Joseph Murphy complete the list of principals. Twenty-four cunning and petite choristers, gorgeous gowned; a wealth of scenery and startling and stunning effects gives promise that "Bozo" Snyder's offering is one of the aces among the Columbia Wheel this season.

#### "THE GARDEN OF ALLAH" THRILLING AND GORGEOUS

Never has the theatre going public of Newark had a chance to view a motion picture as thrilling and as beautiful as "The Garden of Allah" which opens at the oews State Theatre for a week's run on Monday.

The story is that of a Christian love against a Mohammedan background, with christianity supplying the personalities and Mohammedanism the canvas for the story.

Alice Terry plays the leading role, in which she is more beautiful and exquisite than she has ever been before. Ivan Petrovich plays opposite to Miss Terry.

Heading the vaudeville bill for the Creole Fashion Plate", assisted by Bob Hornell and Jerry Green, Norman has the reputation of always doing the bizarre and unusual, his acts always being out of the ordinary, and advance notices indicate that his act next week will bring a gasp of surprise from the audience at the opening show. Bert Walton, "The International Cynic", will present his original idea, "Reciprocity plus Retribution." Rosita will offer her beautiful revue, "A Spanish Fantasy", in song and dance with Martinez and Saville and her Valencia Beauties. Irving Edwards will uphold the comedy and of the bill in his offering which he has so aptly called "Just Young and Careless." Edwards is a very clever comedian and never fails to get his audience in a laughing mood. The six Orallys in a sensational acrobatic offering will close the vaudeville end of the program.

**Where We Get "Cobwebs"**

Cobwebs are webs spun by spiders or larva of certain insects. "Cob" is derived from an old English word meaning spider. Most of the cobwebs which hang from the ceilings of houses are made by very small spiders which are seldom seen by those living in the houses.—Pathfinder Magazine.

**What to Learn**

What man should learn is to reject all that is useless in remembrance and retain with cheerfulness all that can profit and amend.—Petrarch.

#### Giant Spider Guides U. S. Weather Observer

Macon, Mo.—P. Connor of Kansas City and the Goosebone Prophet of Washington have nothing on William C. Brown of this city as weather forecasters. Mr. Brown is the government's observer here. He also is vice president of the Security Trust company, a banking concern.

In Mr. Brown's backyard is a big, ugly spider, Bluebeard by name. By observing its work, Mr. Brown says, he has been able to determine the weather ahead for a week or ten days.

The Macon county fair management consulted Mr. Brown this year to learn whether it would have good weather at the time set for the fair. Mr. Brown found Bluebeard had been running lines up and down the fence and out to the trees.

"He never does that when it's going to rain," said Mr. Brown. "You'll have good weather all next week."

Not a drop of rain fell any day of the fair, and all the roads were good. The management made money.

Last season Bluebeard did not work for days before the week of the fair. Mr. Brown warned of bad weather. It started to rain the first day of the fair and it rained four days. The fair had to be abandoned.

The difficulty of keeping a good man down is slight compared with the difficulty of getting him down.—Boston Transcript.

#### Leaves Fortune for Home for Old Dogs

Budapest—A rich old lady, Mme. Jeanne Popelka, who lived apart from the world in a beautiful villa with 12 dogs and 20 cats, numbers of birds and monkeys, has just died. She has left the whole of her fortune, which is considerable, for the transformation of the villa into a home for old dogs. Fearing justly that her heirs would oppose her will and accuse her of madness, Mme. Popelka added a certificate of mental health to her will. In spite of this the heirs are attacking it.

#### Attacks Modern Bookbinding

If archeologists of a thousand years hence can find in the ruins of Twentieth century civilization any readable documents, they will be fortunate, says J. W. Ward, "book surgeon." The quality of modern paper, ink and glue, he insists, does not promise permanence of contemporary records.

#### Idle Threat

The man who threatens the world is always ridiculous; for the world can easily go on without him and in a short time will cease to miss him.—Samuel Johnson.

#### Katydid Destroys Oranges

One of the worst destroyers of oranges in California is that songster of the night, the katydid.

for Economical Transportation

## A car for her, too!

In thousands of American homes there are now two automobiles—"a car for her, too," so that there may be transportation for the family while "he" drives to business. And because it is so easy to drive and park... so decidedly smart and comfortable, today's Chevrolet is an outstanding favorite among women drivers everywhere. Come in! You'll be amazed to learn how little it costs to own and operate a Chevrolet.

## RED CROSS VOLUNTEER WORKERS BIG FACTOR

Broader Industry in Home Chapter and in Field Development of Disaster Service.

Volunteer industry in the American Red Cross is on an upward trend, due to the broader demand for assistance in meeting disaster relief requirements. Men and women from Red Cross Chapters in the last year exemplified by their work for disaster victims a greater activity than in any year since the end of the World War.

This service was given without stint and with the finest of spirit, according to Red Cross officials. Volunteer Red Cross workers have served by the thousands with the local Chapters in garment production, printing raised-type reading matter for the blind, in hospital service, as canteen workers and motor corps aids. Nearly all active Chapter workers are volunteers.

More than 90 per cent of the available reading material for the blind is produced by volunteer Red Cross workers. Volunteers produced 175,481 garments, 2,057,912 surgical dressings for hospital use, and 6,398 articles for emergency closets maintained by Red Cross Chapters in various communities for disaster and other emergencies. The garment production, large as it was, did not include the thousands of garments made for the Mississippi flood sufferers by volunteers. Another important volunteer service is the preparation and sending of 30,000 Christmas bags to soldiers and bluejackets on duty in foreign stations.

Approximately 250 Chapters participate in Motor Corps service, while the growing interest of volunteers in health work constitutes an additional community safeguard in emergencies when the services of regular nurses might be overtaxed.

Volunteer service will be an important factor in the forthcoming eleventh Annual Roll Call, from November 11 to 24, in enrolling the 5,000,000 membership to be sought.

### "Tail" May Precede Comet

The naval observatory says that the tail of a comet is directed away from the sun, and therefore precedes the comet when the latter is receding from the sun. It is called the "tail" on account of its appearance, regardless of whether it follows or precedes the comet.

### Ham and Egg Record Set by Lumberjack

Iron Mountain, Mich.—Lumberjack are known to have large appetites and one, Charles Smith, certainly upheld this reputation.

Smith walked into a local restaurant and wagered \$100 he could eat two dozen of eggs and a piece of ham a foot long and an inch thick. His bet was covered and Smith won. He is a husky chap, towering over six feet in height.

After he finished his meal he offered to bet \$200 more he could eat ten more eggs, but the onlookers only looked at each other and shook their heads. Smith said he was hungry when he ordered 24 eggs and ham, but not hungry enough to eat a hearty meal.

### Industrious Beavers Dam Brook, Block Road

Stony Point, N. Y.—Town authorities of Stony Point, alleging a family of industrious beavers are delaying traffic on a county highway in the St. John's section of this town, complained to Maj. W. A. Welch, chief engineer of the Palisades Interstate park system. They asserted that the beavers built and rebuilt a dam.

Five times now the road gang of workmen under Street Commissioner James Rose of Stony Point have razed the dam made by the beavers in the last two weeks, but each time the beavers rebuild the dam.

They construct it about twenty feet wide and to a height of five feet under a bridge which crosses a brook. The result is the water, dammed by the industrious animals, floods the highway.

### Cards and Dice Burned After Church Revival

Comanche, Texas.—Cards and dice from four leading stores were piled in the courthouse square and burned as the result of a revival campaign held here. A local pastor gathered the gambling paraphernalia for the bonfire and the tax collector applied the torch. Forty-eight decks of cards and 404 dice were burned. Bibles have been placed on sale where the cards and dice were offered.

Advertising brings quick results.

### Ancient Custom

According to a Dutch tradition originating in the middle ages, the first new herrings of the summer season are offered to the queen. Every year the fishing snacks compete to bring in the first catch.

### Evening Dress

### Doctor Claims CAMPHOROLE Stops Agony of Rheumatism

How the New Discovery Brings the Marvelous Secret of a N. J. Doctor to Every Suffering Man or Woman. Thousands are suffering from this horrible condition, which is mostly caused by deposits in the joints. The reason for these deposits is because the blood flows more slowly, and the little spaces in these joints where the arteries end, and the veins begin, are smaller than any part of the body. Therefore, the deposits in the blood are more liable to lodge in the joints of the shoulders, elbows, wrists, knees, ankles, toes, hands, etc.

CAMPOROLE, the new powerful penetrating treatment of Dr. Brigadelli's is rapidly absorbed in these areas and aids the joints in driving out these deposits that cause you trouble. From the first application of CAMPOROLE you will feel a soothing, healing sensation as it penetrates the tissue, going deep into the joints, easing the trouble, stimulating circulation.

SCALLOPS AND ETON JACKET  
ACHIEVE A YOUTHFUL STYLING

FASHION prescribes "youthful black" for the young modern. If you happen to be skeptical about the youthfulness of black, the girlish costume in the picture is sure to dispel all doubts on the subject. This "ducky" little ensemble so prettily posed by Laura La Plante of screen fame, is black from crown to toe, and that means pumps of black velvet, hat of black felt playing accompaniment to an adorable short-jacket suit of black kitten's-ear broadcloth.

walstines, while "stylish stouts" are hoping against hope that Madame Mode will "have a heart" when it comes to introducing this new all-black. As to the feminized soft lines which fashion so persistently demands this season, this little suit achieves just that, in direct contrast to the manish tailored jacket and skirt of yesterday. It is a question as to which most successfully courts favor with the young girl for her two-piece suit—velvet or suede finish cloth. Both materials are very popular. Some of the "best dressers" in the younger set are choosing the new "velvety" kitten's-ear broadcloth, just to be "different" from the majority.

Joe Hendry, professional golfer at the San Angelo (Texas) country club, recently set a record of "29" for nine holes and finished second round with a total of "63."

John Levi, former Haskell Indian football star and All-American full-back in 1925, has been engaged as assistant to Coach John Thomas of the Haskell team.

Many a football fan will catch a \$50 cold this fall while waving a 50-cent pennant. But what's a little thing like pneumonia if alma mater gets a touchdown?

COMING EVENTS

Mask Ball to be given by The Ladies Auxiliary of the Brotherhood of Israel at Sharkey and Halls Auditorium on Thanksgiving Eve, November 23.

The Third Annual Dance will be held by the Portuguese Sporting Club, Inc., at the Falcon's Hall at 106 Central avenue on November 12, 1927. The club's orchestra will furnish the music for the evening. The following committee will take charge of the affair: Augusto Gil, Augusto Soares, Agostinho Grilo. Ladies free and refreshments will be served.

The United workers of the Methodist Church will hold a fair on the 17th and 18th of November.

Mrs. Jennie Gallagher is spending a few weeks in Verona.

Find Aztec Mirror in Mexico Ruins

Mexico City.—How the Aztecs and Maya Indians of prehistoric Mexico "got their faces on straight" is explained by Dr. Porfirio Aguirre of the department of archeology of the Mexican National museum, who recently returned from the state of Michoacan with a seven-inch hand mirror which he found under many feet of earth. The mirror is a round disk of pyrite. The surface, which was once highly polished, is now rough and broken.

Linked Football With Crime in Old Days

London.—The official opening of the football season was held without fear of the law such as prevailed in years gone by. In the year 1314, Edward II forbade the game and in 1389 Richard II passed a new act for its suppression, while Henry IV, Henry VIII and Elizabeth all tried to stem its increasing popularity by increasing penalties. These laws were frequently enforced against delinquents and it is recorded that at Dublin in 1579, one Denis Wogan was fined £10 and jailed for a week because he kicked off at a local football game. Despite the laws, however, many games were played every year and an old record says that "thanks to the sturdy apprentices the streets of London were full of footballers."

SMART FOR COLLEGE AND SPORTS IS THE NOVELTY WOOLEN BLOUSE

A STUDY of the new modes reveals the prominence of novelty woollens in the realm of sports and utilitarian apparel. Which fact contributes directly to the attractiveness of clothes for the schoolgirl. What with the gay flannels and woolen crepes, patterned tweeds, ombre striped reps, tricolor knit effects and the like the classroom is destined to stage a scene of animated color and design this season. A smart note for fall is the two-piece flannel frock, combining solid color with patterned. The costume in the picture is the latest offering of a leading Parisian couturier. The material is beige kasha, the skirt a wrap-around of plain color and the blouse of plaid design with high neck and long sleeves. An ideal costume this for the college girl. The most intriguing item of chic in the new sports and school clothes is undoubtedly the blouse. Originality is interpreted in its every phase. For its development every cunning medium is employed from flannel and vel-

veteen to jersey and myriads of knitted effects. Color schemes for the new blouse are at once startling and fascinating. The latest flight of imagination is the blouse of tricolor stripe. That is, the knitted jumper shows horizontal stripes full eight inches deep, beginning with light shade for the top, grading to darker for the central portion, finishing with the deepest tone around the hips. The accompaniment of a simple cardigan coat and skirt of woolen which is neutral in tone accents the color glory of the blouse. Very clever sports ensembles face the tuxedo revers of the full-length coat with the same vivid knitted medium as that employed for the blouse. When one visualizes the knitted stripes in hues of yellow, red, green and navy, the effectiveness of the color scheme is most assuring. Tweed printed velveteens are also among the newer fabrics which are in evidence for the creation of the separate blouse.

**New Jersey Weekly Industrial Review**

Actual income of the People of the United States has increased at Rate of a Billion Dollars a year for the last ten years. The difference between this country and European Countries is the difference between two ideals, The Ideal of Individualism and the Ideal of Collectivism.

Keansburg—Main street and Center avenue to be paved.

Keansburg—H. G. Fowler to increase capacity of his ice plant on Creek road from 30 to 60 tons daily.

Metuchen—Davison & Risnick to erect filling station at Main street and the Highway.

North Wildwood—\$457,730 contract let for construction of sewage disposal plant here.

Somerville—20 room addition to be built to Hotel Somerset here.

Union Beach—250,000 gallon water tank for local water system nearing completion.

Somerville—Contract let for concrete curbs and sidewalks on Mid-daugh street.

Sea Isle City—Destroyed fire equipment of local and visiting fire departments to be replaced.

Millville—Work commenced on construction of new post office building here.

Trenton—Easy Washer Stores, Inc., Trenton, with capitalization of \$125,000 chartered.

Hightstown—Cornerstone laid for new fire department headquarters here.

Princeton—Bids received for curbing and guttering Clay street and macadamizing Cleveland Lane.

Morrisville—Plans making for paving Crown street.

Jersey City—Public Service Railway Company puts modern type of street cars in service on its Montgomery street line in Jersey City.

Linden—Combustible Utilities Corporation of Maine, contemplate erection of research laboratory here.

Hammononton—Work on Bellevue Avenue widening being rushed to completion.

Hammononton—"Old Fay Mansion" to be replaced with modern store and apartment building.

Hackettstown—\$50,000 contract let for construction of Sherrer Building on Main Street.

Berlin—Stamper Bus Line & Parlor De Luxe Coach Company will erect garage on Hewitt property.

Metuchen—2 new pumps to be purchased for fire department here.

Wesfield—Inspection made of local fire hazards and fire-fighting apparatus.

Atlantic City—State Poultry Association Convention recently held here.

Fair Haven—Heating plant in Borough Hall repaired.

Adelphia—New concrete road to Lakewood nearing completion.

Adelphia—Work progressing on new fire house here.

Orley Beach—Ground broken for erection of \$50,000 new hotel here.

Bridgeboro—Contract let for the painting of the Methodist Episcopal Church here.

Nutley—Chamber of Commerce will spend \$2,500 to advertise Nutley.

Ocean City—Bids received for construction of Longport-Ocean City bridge.

Hillside—New lights ordered for installation on several streets here.

Merchantville—Plans making for new municipal building here.

Morrisville—New colored school in Morrisville dedicated.

\$840,000 distributed to townships in New Jersey for constructing roads now unimproved.

Fort Lee—Improved transportation facilities for Cliffside Park and Fort Lee discussed.

Haddonfield—Widening Haddon Avenue bridge at cost of \$20,000 under consideration.

Dumont—Bids to be received for construction of new high school building here.

Dumont—New fire service truck to be purchased for this place.

Linden—New Plaza Theatre formally opened here.

Newtown—Sewage system for Newtown being urged.

Burlington—New St. Paul's R. C. Church at East Union and St. Mary streets dedicated.

Nutley—\$700,000 new high school building completed here.

Metuchen—Construction of bridge over Pennsylvania Railroad here under discussion.

Vineland—Production for 50th week at Vineland Egg laying Contest was 1821 eggs.

Atlantic Highlands—Assets of Atlantic Highlands Building & Loan Association total \$3,000,000.

Nutley—Building permits issued here for construction of several new residences and garages.

Belleville—Contract made with the Public Service Company for installation of some more powerful street lights.

Ocean City—Strand Coffee Shop making improvements.

New Egypt—Work under way constructing New Egypt-Brindle Park road in Ocean County.

Almost one-third of the deaths caused annually by fire occur in rural districts.

The people of the United States use about 25,000,000 gallons of gasoline every day.

**HATS STRESS RIVALRY BETWEEN TIARA FLARES AND RIPPLE BRIMS**

WHEN is a brim not a brim? Many a stylish felt shape gives clew to the answer by flaunting a graceful tiara flare athwart its snug-fitting crown, which a closeup view reveals as nothing more or less than the brim "that was." This game of hide-and-seek which fashionable hats are playing with their brims, presenting them in the guise of flares and flanges on the crown, accounts for a very flattering new silhouette which is at this moment prominent in the mode.

These new hats which transform brims into crown flares are proving a boon to women who cannot becomingly wear the simple unadorned now-so-modish skull types which hide ears and eyebrows and which so conscientiously follow the line of the hair at the nap of the neck.

In the instance of the little black felt hat centered in this illustration the milliner delicately snips off the narrow brim, elevating it to a position of prominence in the form of a flare bridging the crown from ear to ear.

A flare which displays a change of location for the ripple brim, the designer having cut it away from the headline, positioning it across the top crown, gives super-ehic to the model shown at the top to the right in this group. This clever hat is of honey-beige felt.

Sometimes these crown flares take

on exaggerated lines, as is instanced in the attractive model shown first in this collection of advance millinery modes. A wide flare cut from white felt is here posed on a snug-fitting black velvet toque, giving the impression of an imposing берет.

Contrasting the felt hat which glories in its brimlessness are many new ripple-brim collapsible (because of their suppleness) velvet hats. Many of these are edged with gleaming metal, most often in the form of machine stitching.

The two models shown in this picture are typical of a popular mode. The ripple brim of the one to the right is stitched with gold thread, with tiny gilt beads edging its rim. Metal ribbon ties about its crown. The other velvet hat is just such as women are choosing for their "first" hat this autumn.

JULIA BOTTOMLEY.

**Board of Education Minutes**

Minutes of the regular meeting of the Carteret Board of Education held in the High School on Wednesday evening, November 9, 1927; President Heil presiding. Roll call showed the following present, Heil, Dalrymple, Caselle, Lebowitz, Jefferys, Conrad, Brown, Schwartz and Coughlin.

The minutes of the last meeting were approved as read.

The report of the Supervising Principal for the month of October was read and upon a motion by Commissioner Coughlin, same was received and filed.

The report of the Sup. Principal for Continuation class was read and upon a motion by Com. Brown, same was received and filed.

The report of the Attendance Officer was read and upon a motion by Com. Brown same was received and filed.

The report of the school nurse was read and upon a motion by Com. Coughlin same was received and filed.

The report of the Dentist for the Clinic was read and upon a motion by Com. Coughlin same was received and filed.

The report of the District Clerk was read and upon a motion by Com. Jefferys same was received and filed.

**Lobster Feels No Pain in Hot Water Plunge**

London.—A lobster is not hurt by throwing it into boiling water any more than a telephone instrument is pained by being banged upon the floor, it is declared in an article by Dr. Harold Jackson of the Zoological department of London university.

"Pain is an entirely relative term," he says, "and except for ourselves, our near relatives, and possibly the most artificial domestic animals, it does not exist in the meaning we give the word. Pain in most lower animals acts as a sort of burglar alarm, which has no feeling of itself, but gives notice that something definite is wrong and can probably be set right by certain standardized actions.

"If animals really had the sensitive feelings that are sometimes attributed to them, what a horrible agony life in natural conditions would be for them. What nonsense it is to talk about the 'agony' of a lobster being plunged alive into boiling water!"

**Here's How Chinese Soothe Poor Author**

London.—John K. Williamson of Detroit, Mich., who is stopping in London, has received the prize rejection slip of his writing career from a firm of Chinese publishers.

"We read your manuscript with boundless delight," wrote the Chinese firm. "By the sacred ashes of our ancestors we swear that we have never dipped into a book of such overwhelming mastery. If we were to publish this book it would be impossible in the future to issue any book of a lower standard.

"As it is unthinkable that within the next 10,000 years we shall find its equal, we are, to our great regret, compelled to return this too divine work and beg you a thousand times to forgive our action."

**Iconoclasm**

We get pretty mad at the earnest, go-getting talk about modern efficiency in charity, as if the two things were compatible, but that expression, selling religion, makes us madder than anything else in this whole, wide, beautiful world, bar none, which is saying a good deal.—Ohio State Journal.

**Deadly Tree**

The cannibal tree of Australia, a giant pine-apple in appearance, is credited with power to entrap and rush to death anyone touching its leaves.

**Masculine Yearn**

The good old girls of our set labor passionately to keep that schoolboy complexion, but what we long for with an unutterable longing is that schoolboy stomach.—Ohio State Journal.

**Poisonous in Part**  
A word of warning: Many flowers are poisonous or semi-poisonous. Those of the Jaffodil, for instance, are powerfully emetic. It is not generally understood that many plants may be poisonous in one part. A striking example is the rhubarb, where only an inch or two at the top of the stem lies between the poisonous leaf and delicious fruit.

**Canners Take No Chances**  
Some canning factories practically choose the food for their raw material before it is planted. They first find the farmers who understand their business and will raise what they want in the right way. They next buy the very best seed that can be found and instruct the farmer as to the proper way to grow the seed and they see that the instructions are followed.

**Wait for the NEW FORD**

**SPEED!  
DURABILITY!  
LOW COST!**

Beautiful, low, smart lines!  
Lightning pick-up—  
Comfort!

Those are some of the features of the new Ford car. You'll know it's a truly modern car the minute you see it

**Roosevelt Motor Sales Co.**  
552 Roosevelt Ave  
Carteret

**Electricity Is One of the Greatest Aids to Housekeeping**

THE policy of Public Service is good service for customers. Thousands of Public Service people are at work, day and night, in power houses, gas plants and other properties, all over the State to assure continuous and dependable service.

Public Service is careful in its selection of the electric appliances it sells. Every make of electric labor-saver must undergo rigid tests in our laboratory before it is listed for sale.

Public Service maintains a home economics department and a lighting department to help customers with their problems in home management and to advise them of the best way to light their homes. No charge is made for these services. Telephone the Public Service Store nearest you.

You may arrange to purchase any appliance we sell on the divided payment plan. This accommodation is planned to permit you the use of the labor-saver while you pay for it.

The Thor Electric Washer is unsurpassed in providing a quick, thorough, safe means of washing all clothes and linens. Let us send you the Thor before next washday.

**\$5 Down  
18 Months to Pay**

Make your toast at the table. Serve it hot and golden brown. Toaster prices are from \$3.50 up.

Electric percolators, pot type, sell for \$6.50 and up. Handsome four-piece urn sets are priced from \$17.75 upward.

**Reminders**

It's fun to use an electric corn popper. The Excel electric popper works on any lamp socket. Sells for \$2.95.

The Emeralite is made with a special screen which gives a soft light, restful to the eyes. Public Service sells this lamp in many styles.

Avoid inconvenience. Be prepared to replace lamps as they burn out. Keep Mazda lamps on hand. Prices are from 23 cents upwards according to the wattage.

The Porta light may be fastened anywhere. Attractively finished with silk shade. Your choice of colors. Priced at \$7.85.

COUNCIL MINUTES

A regular meeting of the Council of the Borough of Carteret was held in Council Chamber on Monday, November 7, 1927, at 7 o'clock p. m.

An adjourned meeting of the Council of the Borough of Carteret was held in Council Chamber on Monday, November 14th, 1927, at 8 o'clock p. m.

A letter was read from the Board of Education asking that \$45,000 be turned over to them for school purposes.

Motion by Ellis and Brown that this be granted was carried.

A letter was read from the Mayor Reformed Church inviting the members of Council to attend services at their church Thanksgiving Day at 10:30 a. m.

Motion by Vonnah and Ellis the resolutions were adopted.

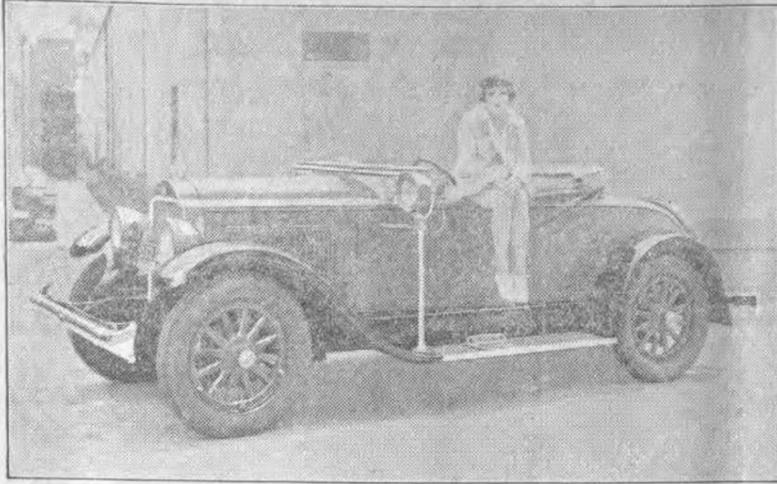

The following resolution was presented by Ellis: Resolved that in order to meet lawful expenditures for school purposes there be borrowed from the First National Bank of Carteret, N. J.

On motion by Vonnah and Coughlin the above resolution was adopted.

Screen Beauty Buys Buick

The young woman holding down this Buick Sport Roadster is Marie Prevost, famous motion picture actress. Miss Prevost is only one of many film celebrities to whom Buick ownership opens avenues of outdoor enjoyment in California.

Survey of Cripples Now in Progress

Trenton, N. J., Nov. 16.—Reports are being received at the State House to the effect that many cases of pathetic and distressing affliction are being uncovered by the canvass and survey being conducted this week under the auspices of the New Jersey Crippled Children's Commission.

Information is also being gathered relative to the condition and needs of older cripples, together with the blind, deaf and epileptic persons of the State.

With Governor Foore's hearty endorsement of the work and the earnest cooperation of school authorities and teachers throughout the State the week's survey is progressing very nicely.

It is the purpose of the Commission to secure the most complete data relative to every cripple or partially crippled person in the State, regardless of age or condition.

On motion by Vonnah and Coughlin the above resolution was adopted.

On motion by Vonnah and Coughlin the above resolution was adopted.

BEARS, WILDCATS, ELK ARE FOUND IN PENNSYLVANIA

Harrisburg, Pa.,—Pennsylvania, one of the most thickly populated states in the Union and probably the greatest industrial state of the 48, has another claim for fame, for it offers some of the best big-game hunting to be found on the North American continent.

In the forests of northeastern Pennsylvania, less than 200 miles from New York, are to be found bear, elk, deer, wildcats, an occasional mountain lion, and practically all known species of smaller game.

A few wolves and many foxes also are to be found in the thousands of acres of forest land scattered over all parts of the state.

Due to a rigid game law which forbids the shooting of does, deer have become so numerous in the last few years that the state game commission this year was forced to take action to reduce the number.

In many instances the deer became so bold during the winter and summer months that they broke down farm fences, tore down hay and straw stacks, looted gardens, and did other damage.

When the deer season opens in November thousands upon thousands of hunters, not only from Pennsylvania but from other states, enter the woods to remain until they have killed their quota, or until the 15-day open season ends.

Members of the state forestry commission estimate that there are more elk and bear in Pennsylvania than in any state east of the Rocky mountains.

Members of the state forestry commission estimate that there are more elk and bear in Pennsylvania than in any state east of the Rocky mountains.

Highway Courtesy to be Shown Tourists

Don't "Bawl out" the visiting motorist when he happens to break a local traffic rule. Instead try to tell the stranger about the regulation he violated.

This is the advice given by Niels J. Tonnesen, Chief of Police of Perth Amboy, who says that too many motorists show an intolerance for the motor tourist's violations when courtesy is absolutely essential.

"In theory, we all agree that street and highway courtesy are very desirable," says Chief Tonnesen, who is helping The Raritan Automobile Club to become a benefit to all motorists.

"If we are going to have courtesy, we may as well start in the case of the motor tourists. In every city, there are local rules designed to meet certain conditions with which the traveler could not be familiar."

"Every city boasts that it extends a welcome to the out-sider. As dwellers within the community, individuals pride themselves on their town's attitude. One good way to prove the sincerity of such a boast is to show genuine courtesy to the stranger. There is no better place to begin true hospitality."

"FLEA" 20 MINUTES CROSSING CHANNEL

Makes Dover Passage at 93 Miles an Hour.

London.—George de Gasenko crossed the English channel from Boulogne to Dover in 20 minutes in his Sea Flea, which looks like a cross between a submarine and a seaplane.

The queer craft averaged 93 miles an hour for the trip, and the inventor was so cheered by his success that he predicted a similar craft, holding 100 passengers, could easily be built to cross the Atlantic in 40 hours.

De Gasenko's craft embodies the principles of water bugs. It draws only three inches of water, although 35 feet long and 18 feet high. The hull is of mahogany two-thirds of an inch thick. With a load of fuel it weighs only 2,000 pounds.

With two small wings and an airplane propeller, the Sea Flea at low speeds skims the surface of the water, but when it approaches its maximum it almost lifts it into the air, and like a flying fish flits from the crest of one wave to the crest of another, meanwhile maintaining a perfect balance, insuring against seasickness.

In May, 1923, after several short but successful tests, De Gasenko set out from Marseilles for a trip across the Mediterranean and along the African coast, but the propeller was splintered by a heavy sea and the inventor was obliged to put in at Saltes Maries, near Arles.

De Gasenko is a native of the Ukraine, but was trained in Germany and has been carrying out his recent work in France.

Most Punctual Girl Elopes in an Airplane

Lancaster, Pa.—Mrs. Casper Dickel, Jr., has had a record-breaking career. In the same year that she completed her high school term, with an attendance record that set a new standard for this part of the country, she became the first girl in the district to elope by air.

As Miss Anna Hatz she was graduated from the Lancaster high school for girls this year, with a record of never having missed one day and never having been tardy during the 12 years since she began in the first grade.

Recently she and her fiance, Casper Dickel, Jr., took their first airplane ride. They decided to make the ride memorable in more than one way, for they told the pilot to drive them to Belaire, Md., where they were married.

Regulating Chronometers Some chronometers will keep exact time within a second a day. Some may gain or lose 15 seconds a day. If this is done regularly, the chronometer should not be regulated, since a constant rate is the main object, the variation being easily computed.

No Dobbails in Nature

The breed of animal industry says that no breed of dog is actually bobbed at birth. The old English sheep-dogs of the Shippens bred are frequently referred to as bobbed, and a few have been born bobbed. Usually the tail is cut so short that it shows the appearance of no tail at all.

Deep Chest Colds or a Raw Sore Throat END QUICKLY WHEN YOU USE CAMPHOROLE

Strepococci Coughs and Colds that do not clear up quickly, may lead to serious trouble of the Nose or Throat, such as Epiglottitis, Diphtheria and Head Necktie are caused by about 100 different bacteria or germs. You can avoid them with CAMPHOROLE, the new ideal treatment, which acts upon 125 germs, as it soothes and heals the inflamed membrane, and loosens up a Cough or Cold in the Throat or Chest. It kills the germs. Then you know how soon a nerve-racking Cough with a sticky, clinging mucus can be eased.

It's surprising how promptly it opens up clogged nostrils, and takes hold of a stubborn Cough, as it soothes and heals the sore irritated lining of the Throat, Bronchial Tubes and Chest, loosens up phlegm, stops annoying tickle in the throat. You'll then know why thousands prefer CAMPHOROLE, once you have tried it for Colds in Head, Throat and Chest, Asthma, Tonsillitis, Bronchitis and Catarrhal troubles.

"Local" Telephone Service That Reaches Two Worlds

TODAY you may telephone only to people at home or in nearby places; tomorrow you may have St. Louis or Los Angeles on the wire and the next day London, Edinburgh or Mexico City.

At your instruction, your telephone extends its service to touch two hemispheres. The instrument and the system behind it are engineered, built, maintained and developed to give the universal service which Americans have learned to expect. They know it is a powerful aid to effective action.

To give such service requires skilful coordination of methods and apparatus in and between the systems operated by companies associated in the Bell Telephone System.

New Jersey Bell Telephone workers realize their responsibility in furnishing universal service for your use and may be depended upon to do their part to make it all that you wish it to be.

NOT WHAT, BUT HOW

Every once in a while these days one is reminded that in a little while Christmas will be here. Of course the merry season is still more than a month away, but many children and grown-ups have already begun to make their plans.

To do the kind of thing that old Kris Kringle does takes a lot of planning if it is to be done well; in a manner of speaking you have to get ready for it. Not that this planning is ever hard work, even if you go at it with all your might and main; because as every boy and girl knows when you do anything to make anyone happy, it is never hard work, and the more patience and skill you have to employ in doing it, the more fun it is.

If you were to ask him face to face, Santa Claus would tell you that a lot of people miss half the fun of Christmas because they forget that it isn't what is given that counts, but how the thing is given. He would tell you that what a thing costs, or how much it shines, has nothing to do with it. What really counts is how much affection and kindness and well-wishing you put into it. It's what you are, and not what the gift is, that counts.

That's why Christmas is such a wonderful season; and that is why most people who like Santa Claus and Christmas try to plan and get ready for this great day, so that they may have most of themselves to give when that day comes.

Santa Claus never yet waited till the last minute and then scurried around and wondered what he would do about this and about that. You can guess from the stories they tell about him, and from the way he looks, that he is the kind who does things when they ought to be done—quite a while before the last minute. And in these things it is well to follow Santa's example.

THE MERRY SHOPPER

The Yuletide this year will be responsible for one of the largest bodies of eager people bent on accumulating Christmas joys for big and little folk that America has known since way back in 1914, when war clouds had gathered over Europe and the shadows had already begun to cast their sinister reflections upon the United States.

To this end the holiday may be expected to display much of the old time recognition of its distinctive appeal to the young. Its best celebration is that which gives the foremost thought to the children. It is only when this idea is enlarged and expressed that the season secures its happiest celebration. The disposition to make the season one for the indulgence of extravagant adult practices and dissipation is destructive of the real joy and meaning of the season.

The displays that greet us from shop windows serve more than a practical or commercial value for shoppers. They re-create in mature minds the eternal joy of childhood. The coming season's memories are the grown people's chief joy, or should be. No other season stirs the heart of those who are now the providers of those same joys that once were theirs. If this spirit is not confined to the mere selfish and narrow limits of those "of our own" but is expressed in making richer and fuller the lives of those who need our help. This Christmas tide will be the happiest and most useful of our lives.

"WHAT'S YOUR HURRY?"

Automobile and other street accidents have become so numerous in many cities that campaigns have been commenced to teach the public, pedestrians as well as drivers of vehicles, the wisdom of exercising care on the public streets.

Investigations of accidents on the streets have developed that a large per cent of them is avoidable; that they are the result of carelessness on the part of the driver of the vehicle or the pedestrian who is the worst sufferer when a collision occurs.

Men and women rush across the streets or between street cars and vehicles, apparently without any thought of the dangers they face in doing so. Many persons can be seen leaving a street car at the rear door and crossing the street behind the car, thereby running the risk of being struck by a car passing on the "blind" side.

Automobile drivers are not blameless in the matter. Many of them take chances in rushing across a street ahead of a street car or another automobile, all for the evident purpose of saving a few seconds, as if the saving of time justified them in running the risk of being struck.

The drivers of vehicles are blamed for many more accidents than should be charged to them. Pedestrians have a responsibility which they should not attempt to evade. It is much easier for the individual to wait a few seconds than it is for the driver of an automobile to stop to prevent striking a person who has rushed into the middle of the street in thoughtless haste.

Every person, driver or pedestrian, who uses the streets has it in his power to aid in making the streets safe for all.

There seems to be money in too many things besides working.

Every week has too many nights to stay up late on all of them.

Many a man is chiefly known for his ability to drive a hard bargain.

Figures may not lie, but statistics will back up a lot of misinformation.

Tell us your attitude toward the approach of Christmas, and we'll tell you how old you are.

What has become of the old-fashioned individual who kept an honest-to-goodness diary?

Religion Loses Cause for Existence in Conforming to the World's Ideas

By REV. HARRY EMERSON FOSDICK, Baptist, New York.

Christianity is largely on the defensive for the simple reason that Christians have conformed themselves and their message so largely to this world that they are indistinguishable from it. As a matter of fact, this generation's low morals and its low philosophy are in desperate need of a challenger, and the church should be about its business.

When religion harmonizes itself with the world and conforms itself to the status quo it loses its message, vacates its mission and surrenders its reason for existence. The glory of Christianity has been its non-conformity.

The central problem of organized Christianity is whether it has enough spiritual vigor to challenge this modern age, or, instead, is simply going to take the color-blend of popular morality and popular philosophy.

There are plenty of so-called Christians whose morality it would be difficult to distinguish from the morality of the crowd. Our democratic confidence in a majority vote makes that easy. Of course, on any fine issue the majority is sure to be wrong.

We know this and yet there is prodigious pressure in a democracy where politically it is a point of honor to respect majority decisions. We feel also that it is not so bad to conform to the general average and the majority vote. A Christianity that thus compromises with popular morality instead of challenging it has lost its reason for existence.

WHERE FLYERS ALIGHT AND CABLES RADIATE

The Azores Important Communication Center.

Washington.—When Miss Ruth Elder tried to fly across the Atlantic and dropped into the sea near the Azores she failed in her purpose but emphasized the increasing importance of the Azores as a mid-Atlantic communication center, says a bulletin from the Washington (D. C.) headquarters of the National Geographic Society.

"And within the Azores group Fayal is the most important so far as contact with the outside world is concerned. Sao Miguel is larger, and Angra, the capital on Terceira, is a better port than Horta, on Fayal.

"But Fayal is the communication hub of the Atlantic, with spokes reaching out to Europe, the two Americas, and Africa. On Fayal Island there are four cable companies, two American, one English and one German. There are more than 150 young 'news pushers,' as the dispatching operators are called, and each group has its own mess.

"Arriving at Fayal in the daytime one sees a ribbon of road around the island, and the whitewashed villages with a church for a pendant among the ivory bits that are strung along this 35-mile circular tour. Out near some detached rocks near the west end there is a lighthouse which appears at first to be a minaret. From there to Horta, the town, is a steep declivity several hundred feet high so that the road has to sweep up to avoid washing itself to death in the glistening surf.

"Amid smiling seas the Azores, from November to March, usually wear a cloud blanket so that the fine cone of Pico, which sounds like Orange Pekoe but simply means 'peak' is hidden as an approaching ship swings to the north. Pico has a separate island to itself and since Pico is an active volcano, this is as it should be.

The "Fairy Town of Horta."

"Twilight had fallen when the writer's vessel finally came alongside the fairy town of Horta, now made up of white blotches against a dark hillside with electric lights, hiding the details like the pun's candles during the change of scene in 'The Miracle.' Horta is not really a port, since it lacks a green light to complement the red one on the end of the single breakwater. So passengers land in a launch which tosses up and down in the swell and gives the folks a thrill for their money.

"A Portuguese, with wide-brimmed fuzzy hat, V-neck white sweater and sideburns, ran the launch. He took a liking to us and showed us around the town which, like a certain tower, had folded itself up with the setting of the sun.

"Horta's chief claim to fame seems to be that Mark Twain and the cable companies have honored it with their attention. Mark said something about a tiny fort here which would have to be taken back up the volcanic slopes in case of war. That was the days before the Azores were the alighting spot for transoceanic flights.

"Horta greets one with a mosaic sidewalk in the Portuguese style, and many of its buildings are faced with glistening tile so that as one walks down the street at night he seems to be threading his way along some peculiar bathroom in an old Mogul palace or a Chicago boarding house.

"The street, as we walked down it, and passed so many churches that Horta seemed to be the Bokhara of the Catholic world, was being used for sentimental purposes, for Horta has its nightly rehearsals of the balcony scene from Romeo and Juliet. The balconies are narrow and long, looking like simple bits of steel fence hung up on display.

In a Horta "Movie."

"Our side-burned mentor took us to a movie theater fronted with salmon tiles. We secured a box in the lower of three horseshoes around which the town was arranged. If the social strata maintained their same relative positions at home that they do in the theater, then the Horta palaces would be down near the sea and the lowlier and more grimy members of society up near the lava line above the main part of the town.

"From June to September the whole island of Fayal is marked out with blue-and-white hydrangea hedges and is one of the loveliest spots on earth, with sometimes smoking Pico 'Fuji-yama' in the background.

"The Azores are certainly the result of tremendous volcanic eruptions that have continued to change their physical aspect ever since their discovery in the fifteenth century. On every hand are evidences of former upheavals, from the gray lava stones that are used in the construction of houses and the building of roads to the underlying streaks of ashes that are visible in places where the surface soil has washed away, and the many cup-shaped craters and beautiful lakes on the tops of the mountains.

"Violent earthquakes have disturbed the Azores during the centuries since their discovery. The annals of the island vie with those of Italy in graphic accounts of the ever-interesting and terrible volcanic phenomena. Cities were buried, mountains disappeared and sent their ashes to unbelievable distances; islands hundreds of feet high suddenly appeared and as suddenly disappeared, and fumes of fire illuminated whole islands and their intervening waters."

Supreme Law

The Constitution of the United States together with foreign treaties and acts of congress made under its authority are the supreme law of the land.

Humane Old Chap

Anyway, Noah wasn't one of those people who go off on a trip and leave the cat behind.—Boston Transcript.

MECHANICAL MAN IS AN AMAZING DEVICE

At Command "Televox" Starts Electrical Machines.

Pittsburgh, Pa.—That the "televox," the uncannily human electrical device which answers questions and obeys commands, after being called up by telephone, soon will be in extensive use and will even prove practical for the average householder, is the promise of its inventor, Roy J. Wensley, engineer of the Westinghouse Electric and Manufacturing company.

"As the inventor explained, the conception of this machine with voice, ears and hands is at most only two months old. The "televox" is a unique specimen, a veritable Adam of its race of robots, and was fashioned hastily by its creator in less than a week.

At present, it is in its crudest and most expensive shape; even so, costing only \$1,000 for the complete device and using less electricity in operation than a standard radio. This cost can be cut to a mere fraction, says the inventor, through a process of refinement.

Device a Simple One.

As the inventor experimented with this child of his brain, it required little imagination to conceive the infinity of uses to which the "televox" can be put. Standing at an ordinary telephone in the Westinghouse building, he asked the operator for extension 290, connecting him with another telephone in the same room at which the "televox" was stationed. At the first ring of the phone bell, a lead weight lifted automatically from the receiver hook and the "televox" was ready for action. The receiver itself was stung in a frame before the microphone, but not in contact with it, and before the phone stood a loud speaker, microphone and loud speaker being respectively ear and mouth of this startling device.

The language of the "televox" is straight music, or at least musical sounds, tuning forks, pitch pipes or the human whistle being used at will by the person desirous of conversation with this nonsleeping, noneating servant. Three tones are used at present, which, by combination can take the place of a considerable vocabulary in code. As one of these tones was sounded by Mr. Wensley, it registered through the microphone as 900 frequencies a second to the "televox" at the other telephone. Stepped up through amplifiers, passed through filters and through switching connections, these vibrations turned on an electric fan and immediately buzzed back through the loud speaker to the effect that the fan was in operation.

In rapid succession the inventor turned on a light display, a vacuum cleaner, a searchlight, an electric coffee percolator and an electric heater. At will he turned one or the other of these devices off, in each instance receiving the buzzes from the "televox" which designated whether the apparatus was in operation or not.

Takes Watchman's Place.

"Televox" has been designed principally for use by power companies and the like as a substitute for watchmen. Already three devices somewhat similar are in use in offices of the War department in Washington, where they report carefully, when called up, the height of water in three District of Columbia reservoirs. Substations of electrical companies could employ them to great advantage in regulating and reporting on machines in automatic operation, said Mr. Wensley.

Any telephone may be used to call up "televox" and the regulations of the telephone companies are strictly adhered to, since there is no attachment to the phone and the range of sound used are well within human range. If, however, a person not known to "televox" calls up, the machine impressively signifies by buzzes that it is ready for action and then if none of the properly pitched tones come to it, hangs up automatically within a minute. The danger of an unauthorized person tampering with a "televox" at a power plant, by use of properly pitched tones is very slight, explained the inventor, as the necessary code combinations make operation as difficult as the opening of a safe without knowledge of the combination.

"It is theoretically possible to construct sound-sensitive relays such as employed in "televox" that will respond to spoken words," said Mr. Wensley, "and to prove this we have in the Pittsburgh laboratories a door which will open to the call of 'open sesame' and no other sound combination. Such a system is very complicated, however, and the code employed in the televox system makes many more operations possible through combination. With a "televox" the housewife will be able to cook her dinner and regulate the furnace from the club or theater by telephone, and just before returning home can turn on the lights to greet her."

Just Try It

New York.—Men are advised by Ellen Glyn to stand for no nonsense on the part of their wives. In a speech at a banquet she said: "A wife who receives a sound thrashing for a meanness loves her husband all the more."

Everything Goes

Scutari, Albania.—Albania does not look closely at the color of the visitor's money. Some is better than others, but it's all good. The money of all nations is legal tender.

A Mere Probability

Now that biologists inform us that we are on the verge of finding the source of life, there is some hope that a new motion picture plot may be discovered.—Tom Maason, in Collier's.

Conclusion of Old Age

A conclusion of old age: The more a man knows the less he is sure about.—Atchison Globe.

### Not Knute Rockne's Child

FROM the Rocky mountains westward it looks as though all good football elevens go to Hawaii when they die, or at least they hope to go there. They are football mad over in Honolulu and now it is the accepted thing that some western team shall be invited to go there every winter. The climate is against football of the snappiest brand, but that makes no difference; there is money, glory and a good time for all.

Utah has been out to the mid-Pacific isles, as have Colorado university, Washington State and Oregon and other university teams from this far western region.

A reflection of the visits is seen in the fact that good Hawaiian boys are now making their way or having their way made for them in this country. They have a mighty fine Hawaiian player on the Oregon Aggies. There is also one at Washington State and one at Whitman.

They like to play in their bare feet, these Hawaiians, and it is pretty hard to make them wear shoes. The boy at Oregon Agricultural college gets away 50-yard punts with his unshod foot and sees no reason why he should be shod.

Speaking of Hawaii, here is a story which Ike Armstrong, coach of the Utah team, tells about Knute Rockne. Knute was in Honolulu when Utah played there last winter, and he refereed the game which the Utes played against one of the island elevens, writes Lawrence Perry in the Washington Post.

Knowing Rockne's fondness for the shift, Armstrong had his backfield use the famous Notre Dame shift, and he was at pains to tell his team not to beat the ball. Knute watched the backfield in motion for a couple of plays and then suddenly began to slap on penalties. After he had imposed a total of about thirty yards he stopped the play and went to the Utah quarterback.

"Son," he said, "you may think what you're using is my child. I want to tell you that maybe I did have a child like that once, but it was sent to the reformatory."

Every one out in the West—every coach, that is to say—is thoroughly committed to the wing-back idea which Glenn Warner devised years ago. Save for California and Idaho, the writer has not seen a backfield formation which does not send out two ends to the flanks. And how they do work on the opposing ends or carry the ball on reverse plays! So far as the writer has been able to observe, however, Gil Doble is still the past master on the weak side attack.

Knute Rockne.

### Sport Notes

Already reformers are trying to take the kick out of football.

Jack Hobbs, the English cricket player, is paid \$150 a week.

Soccer, a comparatively new game in the United States, is played by 250,000 men.

The Washington club plans to release Al Schacht. Why not cut off Altrock's left arm?

It was the sixth time since 1901 for the Pirates when they won the 1927 National league pennant.

Leo P. Flynn, who managed Jack Dempsey in his last two bouts, is also manager for Dave Shade.

Winter must be just around the bend: A golf bug was seen recently digging himself into a bunker.

Peter Direct, a pacer, recently broke three track records in seven days during the meet at Caledonia, Canada.

Like "Do" McMillan, hero of the Centre victory over Harvard a few years ago, Ralph Welch of Purdue is a Texan.

An old-time baseball players' association is being formed in California. It is planned to hold an old-timers' game annually.

A swim marathon is being planned to be held in Lake Elsinore, Calif., for a prize of \$20,000. The distance will be 30 miles.

In the season of 1912 Joe Wood of the Boston Americans set up a major league pitching record by winning 34 out of 39 games.

Arthur W. Smith, the second son of Gov. Alfred E. Smith of New York, is manager of the Manhattan college cross-country team.

A Virginia football team is said to play without shoes. That's nothing. Harvard has been playing without touchdowns for years.

President Frank Scott of the Cotton States league, has announced the retention of two umpires from the 1927 staff—Levine and Black.

Prize fighting will go on, in spite of the popular assumption that by this time Tex Rickard really has more money than he knows what to do with.

Waite C. Hoyt pitched his best world series ball in 1923 against the New York Giants. He held the National leagues to two runs in 27 innings.

Retirement of Bill Clarke, for 20 years varsity baseball coach at Princeton, marks the passing of one of the outstanding figures in the college game.

Bill Whitman, who managed the Pittsfield team of the Eastern league this season, has indicated that he may manage in the Texas league next summer.

That radio announcer who, with the score tied in the last of the ninth, three on and no out, said, "Strategy now calls for a double play," had a nice voice.

Pat Crawford, third baseman of the Greenville team of the South Atlantic league, was honored with the title of "most valuable" player for his season's work.

Despite the loss of his right arm, Bob Eastwood looms as a gridiron star for Galileo high school in San Francisco. He has already made his mark as a track man.

Mr. Dempsey, the well-known essayist, says he wants three more fights under his belt before next summer. With all his writing, he doesn't seem to know that word sufficiency.

Donte Bush says the New York Yankees were the better team, and now that that's definitely settled we'll be able to go on with our work just as we have been doing all along.

Hollis Thurston, pitcher obtained by the Washington baseball club from the Chicago White Sox last winter, has been sold to the San Francisco club of the Pacific Coast league.

Irving ("Buck") Marcus, halfback on the University of California football team, for whom a set of goggles has been devised so he can wear his glasses on the field. He appears to be the only player in this country wearing spectacles on the gridiron as well as off it. The lenses are ground glass and are protected on the edge by a heavy rubber molding. Foam rubber is used as a padding and prevents any injury to Marcus' face in the event of a sharp blow on the goggles.

### Soccer Football Now Is Major College Pastime

Soccer football at last has made its appearance on the list of varsity sports at the University of Southern California. The popular pastime has been on the intramural calendar of events for several years, but on March 10 next a Trojan varsity will hook up with Stanford university on Harvard field, present training site of the varsity football team. It is expected that the Trojan officials will arrange games with colleges in the Southern conference, and that minor sports letters will be awarded the varsity players.

### Making a Base Hit

Cap'd Childs was a Baltimore boy. When the Spiders came to Baltimore his friends gave him a big floral piece. The flowers were put on one side of the field. The game broke against the Spiders at an important stage of the contest and Pat Tebeau picked up a bat and deliberately went over to the big floral piece and knocked it galley west.

"Hey, Pat, what are you doing to my flowers?" said "Faca."

"Doin' to 'em! I'm makin' the only base hit that's been made this afternoon. That's what I'm doin' to 'em."

### Modesty Brings Salary Boost

MODEST Wiley Moore! Wiley Moore, the Oklahoma farmer, who pitched the Yankees to their final world's series victory over the Pirates, was purchased from the Greenville club of the South Atlantic league last season for a moderate sum.

The big farmer boy captured the Sally league pennant for the Greenville club by winning 30 games and losing only four. The big league scouts passed him up because he was too old—he's over thirty now.

But Ed Barrow, business manager of the Yanks, thought that any pitcher who could win 30 games in a season was entitled to a job with the Yankees, writes William Hennigan in the New York World. So Moore was bought by New York.

He received a contract from the Yankees this spring. The contract read that he was to receive a salary of \$2,500 and \$5,000 if he remained with the team during the season.

Moore was used mostly as a relief pitcher in the early part of the season and saved more than one ball game for the Yankees. Then he drew his regular turn on the mound.

Two months before the season closed, Moore dragged himself over to Huggins, who was sitting peacefully on the Yankees' bench at the stadium.

He stood there for a minute or two and then finally said in his farmer-like way:

"Mr. Huggins, do you think that Colonel Ruppert would be mad if I asked him for a \$500 increase?"

"I don't think so," said the Yankee manager. "Why don't you go up to the office after the game?"

Moore finally reached the office after the game and talked to Eddie Barrow, business manager of the club.

"Mr. Barrow," began the pitcher, "I'd like to have an increase of \$500 in my contract."

Barrow was well acquainted with the pitching of Moore and talked to Colonel Ruppert about the extra \$500 that the recruit pitcher was seeking.

Did Wiley get his \$500?

The old contract that Moore had was torn up and a new one calling for a salary of \$5,000 was presented to him to sign.

### ROWING BANNER CAUSES BATTLE

### Half Dozen Big Colleges Expected to Compete.

It promises to be an open battle for the distinction of carrying the rowing banner of the United States into the Olympic eight-oared championship race next year at Amsterdam.

The United States Naval academy, in 1920, and Yale's famous eight, in 1924, represented the United States in victorious fashion. Both are expected to seek the honor again in 1928, but, from present indications, they will have much keener competition than before.

If the Olympic committee accepts the recommendations of rowing authorities to hold the tryouts a fortnight or so after the Poughkeepsie and New London regattas, probably a half dozen college crews will participate. They were held before these events in 1924.

Columbia university, which swept to brilliant triumph at Poughkeepsie last June, is especially anxious to get into the Olympics. University of Washington probably will be another contender, while University of Pennsylvania's crew hopes are expected to be revived next season under the coaching of Russell S. Callow. Harvard, victor over Yale this year for the first time since 1920, also may entertain Olympic ambitions.

Yale gained the Olympic laurels three years ago with one of the most amazingly versatile performances in rowing history. The Elis interrupted preparations for the Harvard regatta by going down to Philadelphia to win the Olympic trials, went back to New London to outrow the Crimson over four miles, and then journeyed to Paris to beat the world's best at 2,000 meters, roughly a mile and a quarter. The time was 6 minutes 33-5 seconds.

What we wonder about the Waner boys, who made 453 hits between them for Pittsburgh this season, is whether the folks used to have any trouble getting them to beat carpets.

A pastor, hit by a golf ball, is seeking \$29,000 damages, claiming that the injury has impaired his ability to whistle and sing. Many men also get this way upon being hit by the golf bug.

Speaking of the lateral pass, what ever became of the old-fashioned short-order waiter who could bowl a mug of Java 32 feet down the counter without in any wise diminishing the contents?

### His First Touchdown

Capt. Bob Reitsch of the University of Illinois football team, playing his eighth year as center, scored his first touchdown recently when he intercepted a freshman pass and ran ten yards. Bob was the best pilot in the Big Seven when he captained Rockford high and was the best center in the Big Ten last season.

### MONTANA COACH SOLE DIRECTOR

### Ott Romney of State University Plays Lone Hand.

Coach Ott Romney of Montana State university is one of the few remaining "lone hand" athletic instructors in America. Romney likes to give everything his personal attention and as a result directs four sports at Montana—football, basketball, track and baseball. He has some assistant coaches but directs and holds himself personally responsible for his school's showing in all competition.

In addition to the work already outlined, Romney attends to the executive duties connected with being director of the department of physical education. He also is assistant dean of men, president of the Bozeman Service club and finds time to deliver addresses on athletics throughout the Northwest.

Romney graduated from Montana State in 1917 and then took a year's work at Utah university. At Montana State he won letters in football, basketball, baseball, track and tennis and, to round the whole thing out, he was a member of the university debating team.

After some high school experience, Romney returned to Montana at a time when his alma mater was doing poorly in an athletic way. That was in 1923 and the teams were not making much of a showing in the Rocky Mountain conference. In the last four years and a half the Bobcats have forged rapidly to the front.

A canceled game kept Montana from qualifying for the conference championship last season in football, as it did not lose a contest. The basketball team won the conference championship last winter after a hard fight.

### Ocean's "Floor" Uneven

The floor of the ocean is seamed and broken, much as the continents are, with veritable mountain ranges, wide plateaus and tremendous valleys.

### Many Uses for Wood

There are said to be approximately 500 uses for wood in the United States. This is judged to be indication that wood will always be used in industry.

### Old-Fashioned Football Game Is Thing of Past

Hard, straight football of the old-fashioned type is disappearing and trickery is taking its place, in the opinion of Dewey Graham, Norwich university gridiron coach.

He believes that the new rules are responsible for less interesting football for the spectators, a loss of the body contact element and inferior play in several phases of the game.

"The game is more or a puzzle than a pleasure for the spectators," Graham complains. "Penalties inflicted in former years were nearly all understood by the spectators, but this year there are numerous weird rules calling for penalties that are entirely unknown to the average fan."

"The new rules tend to distract attention of players from the game. Too much is being left to the judgment of officials. Good officials are few. A great many games will be unjustly won or lost by decision of a referee, umpire or head linesman, rather than an opponent's errors or luck. The players had enough rules under the old system."

### Porto Rico Has Joined National Boxing Body

The Porto Rico boxing commission has become affiliated with the National Boxing association and will regulate the sport in that country according to the regulations of the parent body, Thomas Donahue, president of the National Boxing association, announces.

Add 1 of Porto Rico to the N. B. A. swells the total of foreign members to four in addition to France, which has a working agreement with the association, Canada, Mexico and Cuba complete the roll that includes the boxing associations of 24 states in this country.

Porto Rico was represented in the association for the first time at the opening of the annual three-day N. B. A. convention in Toledo, Ohio.

President Donahue also announced that Billy Kennedy, New Orleans lightweight, had been suspended indefinitely by the association for failure to fulfill a contract to fight at New Haven, Conn.

### Ingenious Trumpet

Because it was thought that the use of the mouth for blowing an instrument was sacrilegious, one Hindu sect invented the throat trumpet. The player hums the tune, and the vibration of the throat agitates a diaphragm of spider's web in the trumpet's mouthpiece.

"The Circus Princess" At Shubert Theatre

Without any question or doubt most ambitious musical comedy ever turned out by Messrs. Lee and J. J. Shubert is "The Circus Princess"

It is by far the largest, most pretentious and costliest of any musical ever turned out by this well-known firm of theatrical producers

In addition to all this the play has a charming love story of a daring circus performer and a lovely Princess. Its score is by the famous Emmerich Kalman

In sending "The Circus Princess" to Newark Messrs. Lee and J. J. Shubert made every endeavor to present it on the stage of the Shubert Theatre exactly as it was presented on the stage of the New York Winter Garden.

Broad Theatre Will Present New Play

"Town Hall Tonight" the latest play from the typewriter of Kenyon Nicholson, gifted young author of "The Barker," which was one of the outstanding hits of last season.

"Town Hall tonight" has been directed by Mr. Selwyn, and cast with that producer's usual sagacity.

There will be an extra holiday matinee Thanksgiving Day.

VELVET CONTRIBUTES ELEGANCE TO THE AUTUMN ENSEMBLE

Behold velvet as the fabric triumphant in the world of fashion! Velvet is solving most of the dress problems for every hour of the day as well as for evening wear.

An ensemble of chestnut brown velvet with a bronze-and-gold metal brocade blouse, such as is here pictured, is a convincing argument in favor of the luxuriousness which fashion prescribes.

Perhaps, notwithstanding its de luxe appearance, no costume registers a more convincing economy than does the velvet ensemble which includes a full-length coat which may be used as a separate wrap.

It is a "bargain" at any price. The

topcoat of velvet extending to the hemline of the velvet skirt over which it is posed is the "last word" from Paris.

Not only is the costume of black velvet highlighted by the mode, for colors are equally as prominent. Dark greens, wine shades and navy velvet ensembles present a gorgeous spectacle of lovely color.

JULIA BOTTOMLEY. (© 1927, Western Newspaper Union.)

Not a Happy Laugh

A sardonic laugh is a forced, artificial, sneering, mocking laugh. The word "sardonic" is derived from Sardinia, an island in the Mediterranean.

Telephone Takes Message

A telephone that answers itself when its owner is out has recently been invented in Sweden. In principle, the instrument is said to operate like a phonograph attached to an ordinary telephone.

"Body and Soul" to Open at Loew's

With the picturesque, mountain scenery of the Swiss Alps as a background, and some wonderful character acting by Lionel of the Barrymore family, "Body and Soul" which opens at Loew's State Theatre Monday, becomes one of the finest productions on the screen this season.

Heading the vaudeville bill will be that dancing family that have been entertaining the theatre goers for over a quarter of a century. Pat Rooney, Marion Bent and Pat Rooney, the third. It is said that the young Pat has inherited all of the dance ability of his famous granddad and for the old timers this act will be a real treat.

The Metro news and the second of the Collegiate series with George Lewis and Dorothy Gulliver, those interesting stories of College Life will close the program.

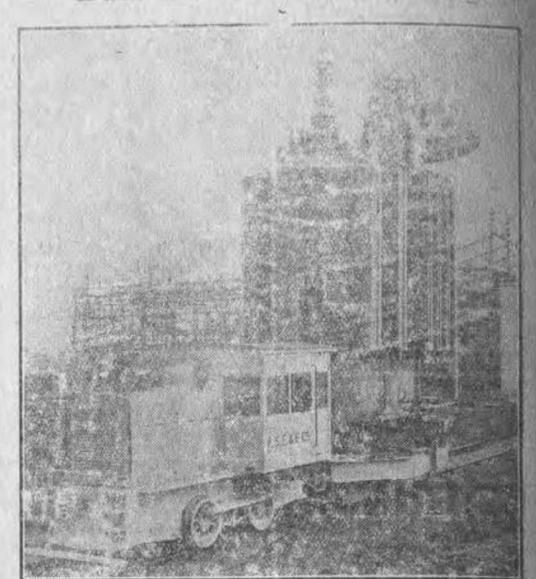

"BE HAPPY" AT MINER'S EMPIRE

There are conspicuously bright spots in "Be Happy" coming next week to entertain patrons at Miner's Empire theatre. However, the entire program is said to contain such an even compliment of highly enjoyable incidents, that to single out one act as distinctly superior to others would be a rather difficult matter.

Week of Sunday November 27—"Let's Go."

Big Transformers, Some 67 Tons in Weight, Moved With Ease By 25 Ton Gas Engine

Gasoline Engine Hauling Big Transformer at Athens

EIGHTY-FIVE ton transformers are moved about with ease by twenty-five ton gasoline engines at the Athens and Trenton Switching Stations of Public Service Electric and Gas Company.

When it is decided to replace a given transformer because it has failed or for any other reason, the transformer is disconnected and removed from its position to a special car provided for this purpose, and a spare transformer, standing always ready for use, is put in place of the disconnected transformer.

Various means were considered for moving the transformers. Both switching stations are so located that it is impossible to depend upon obtaining a locomotive from the nearby railroads.

Public Service Production Company designed and built the Athens and Trenton Switching Stations.

Not Poetic Fantasy

Carcassonne is an actual city, situated on the canal of the Midi in southern France, so the immortal poem is not entirely fanciful.

Got Names From Towns

Many dairy dishes popular in England are named after the towns which first produced them. Among them are Leamington cakes, Dundee cakes, Bath buns, Banbury cakes, Edinburgh rock, and Aylesbury ducks.

**Odd Wedding Custom**  
A smock marriage is a wedding at which the bride wears nothing but a smock or shift. Generations ago it was widely believed in New England that if a woman were married in this manner she was freed from liability for her past debts. In England it was supposed that the smock protected the bridegroom instead of the bride from creditors. —Pathfinder Magazine.

1—Retiring President G. E. Olds of Amherst college (right) greeting Arthur Stanley Pease, the new president, at the latter's inauguration. 2—Scene in Becket, Mass., typical of the destruction wrought by the New England floods. 3—Sheldon Clark, prominent Chicago sportsman and Sinclair company official, who is involved in the Fall-Sinclair jury scandal in Washington.

**NEWS REVIEW OF CURRENT EVENTS**

**Election Day Results in New York, Detroit and Elsewhere.**

By EDWARD W. PICKARD

GOV. AL SMITH'S stock as a Presidential nominee possibility, already pretty high, took quite a jump as a result of the elections in New York state. The Democratic organizations elected nearly all their candidates in the metropolitan district, but the party's biggest victory was in the vote on the nine proposed constitutional amendments. The governor opposed the sixth of these, to lengthen the term of the governor to four years and hold the state elections in Presidential years, and this was defeated by a huge majority. The other eight proposed amendments, all supported by Smith, went over by big votes. One of them raises the debt limit of New York city so that additional bonds for \$200,000,000 may be issued for new subway construction. The adoption of this was considered a personal victory for Mayor Walker.

Detroit's exciting mayoralty election resulted in the defeat of Mayor John W. Smith, an avowed enemy of prohibition, by John C. Lodge, the candidate of the Anti-Saloon league and other reform organizations on a bone dry program. However, the glee of the drys was somewhat tempered when Mr. Lodge, who had maintained alliance during the campaign, asserted that he was absolutely free from obligations and pledges, and continued:

"This wet and dry matter was dragged into the campaign. It was never an issue. We can have orderly law enforcement without asking the aid or advice of the professional drys, with the emphasis on 'professionals.' There will be positively no 'snoothing'."

In Ohio the Anti-Saloon league met with defeat when the voters rejected the Marshall bill which would place justices of the peace on a fee salary basis and thereby give them authority to hear and decide cases involving infraction of the prohibition laws.

Lovers of horse racing and those who like to bet on the ponies rejoiced in the victory of Judge F. M. D. Sampson, Republican, over J. C. W. Beckham, Democrat, for governor of Kentucky. The winner made his campaign as a friend of racing, and the loser was opposed to it, and to pari-mutuel betting, and the Kentucky Jockey club took a most active part in the fight.

Senator-elect William S. Vare of Pennsylvania scored in Philadelphia, where his campaign manager, Harry A. Mackey, was elected mayor, defeating J. Hampton Moore, Citizens' party candidate. But this may involve Mr. Vare in a new slush fund scandal, for the Citizens' party council asserts that the Vare forces expended "approximately \$1,000,000" and crowded the polls with watchers and workers, "some of whom not only intimidated voters but doled out copious allowances of \$10 notes and dispensed liquid refreshments lavishly." Wherefore the council may seek to invalidate the election.

At this writing it appears certain that James Rolph, Jr., was re-elected mayor of San Francisco, defeating James E. Power.

Indianapolis has a new mayor, who will serve until 1930, when the city manager system goes into effect. He is L. Ert Slack, former United States district attorney, and he was elected by the city council to fill the unexpired term of John Duvall, who resigned after conviction of corrupt practices. Slack at times has served as an attorney for the Klan and for the Anti-Saloon league. He is personally a dry. His friends point out that he is not a Klansman, and that his sole income has always been his legal fees.

ILL is being spattered all over the place down in Washington, where the grand jury is investigating the alleged attempts to fix the Fall-Sinclair jury or to subject the jurors to improper surveillance. William J. Burns, head of the detective agency whose operatives were employed by persons

**Reason**  
Somewhere you read: "He that cannot reason is ignorant; he that will not reason is a bigot; he that dares not reason is a slave." Try that over on your piano and see where you classify. Not one of us has a monopoly on truth. No pursuit is so important as the pursuit of facts. When you catch one, and are sure it's the real thing, don't be afraid to hold onto it.—Mobile Register.

**Phelps' Birthday**  
It has been a lifelong regret to me that I was not born on New Year's day; I should have been had not my father been a clergyman. In 1935 the first of January came on Sunday which in our house was strictly observed. Nothing secular was allowed to happen. Accordingly I arrived before dawn on Monday, January 2. It is really too bad.—Scribner's Magazine.

**OSTYAKS STILL PRIMITIVE RACE**  
**Medieval Customs Practiced by Strange People in Siberian Province.**  
Washington.—Far North radio operators report reception of station Aurora Borealis. And, according to the "listeners" at Beresov, Tobolsk province, Siberia, station AP's "program" is melodious, even if the less imaginative might merely call it "interference."

"Beresov is an isolated town of wooden huts, native dugouts, and 2,000 inhabitants on the Sosva river about 100 miles east of the Ural mountains and about as far south of the Arctic circle as the southern coast of Iceland," says a bulletin from the Washington headquarters of the National Geographic society. "Tobolsk, the nearest sizable town, and Saitkova, the nearest station of the Trans-Siberian railway, are about 400 miles south of the village."

**Land of the Ostyaks.**  
"While many Russians inhabit Beresov it is in the land of the Ostyaks, a race whose long heads, thick lips, round faces, protruding cheek bones, dark narrow eyes, smooth black hair, and yellow-gray skin, are in sharp contrast to the features of their European neighbors just across the Ural range."

"The Ostyaks are divided into small clans, each clan usually representing a family. In the winter they remain in and near the villages, but summer time finds them in the fields in their tents of birch bark and deer skin."

"Few of the clansmen can read or write and figures are almost unknown to them. The notches on a stick are to the Ostyak what the beads on a counting board are to a Chinaman. A fathom is measured by the distance between the finger tips of outstretched arms. Time is measured by the interval it takes for a pot of a certain size to boil."

"Medicine men and pagan priests held sway over the Ostyaks before the Russians conquered them. Now many are Christians (Russian orthodox) and Moslems. However, the clansmen still retain some of their old customs. In many of the huts clan images, carved out of wood and gaily painted, are still to be seen. Bleeding the sick is still a favorite cure-all and some clans insist that their children smoke tobacco to prevent sore throats and lung infections."

"The bear has always been held sacred by the Ostyaks. When they kill one, the clansmen apologize to the carcass for several days. They insist the blame for taking the bear's life is not theirs, but the Russians who sold them the guns. To swear 'by the jawbone of a bear' is as sacred as swearing on the Bible in a Christian country. For three years after the death of a clansman an image of the deceased is dressed and undressed, set up to the table, and put to bed as if a living thing. Then it is buried with the remains."

**Once Well Organized Race.**  
"Good Ostyak wives are luxuries, and the clansmen often have more than one. An ardent swain might pay ten fox pelts and a herd of deer for the girl of his choice. If he is not a matrimonial diplomat, he hires a professional go-between to bargain with the prospective bride's parents. After the ceremony, the bride settles down to her job of taking care of the home, and the reindeer herd too, if her husband is fortunate enough to have one. In her spare time she makes fine embroidery on linen, made of flax and hemp which she raises. Some of the men are skilled in wood and bone carving."

"Ostyaks seldom grow taller than 5 feet 4 inches. In the winter the numerous layers of deer skin clothing make them nearly as broad as they are tall. The reindeer is not only the chief source of clothing but also the chief means of transportation. And raw reindeer meat is one of their principal foods. Corn meal boiled with fishbones and entrails of fish soaked in oil are Ostyak delicacies."

"Old forts in the Beresov region recall the days when the Ostyaks were a well organized race that for many years staved off Russian aggression in western Siberia. Since they were conquered the race has disintegrated and through trade and intermarriage with the Russians, their language is rapidly disappearing."

**WOMAN MAKES FORTUNE IN OIL**  
**Began as Real Estate Operator Then Started Drilling.**  
Wichita, Falls, Texas.—One of the few women oil operators in the country, Mrs. Mabel Rowan of Wichita Falls, also is a successful real estate operator.

Beginning as a real estate broker in Fort Worth, Texas, several years ago, Mrs. Rowan entered the oil business in the natural course of affairs. Among the properties listed with her for sale was a large block of acreage in Reeves county. That was in the days before that section of Texas became oil-producing land.

**Drills Own Wells.**  
She acquired a large block of the Reeves county land for herself, subdivided and sold it for farming land. About the time she was ready to place the land on the market, the first oil well in that section "came in." As a result oil leases on Mrs. Rowan's land were sought by large oil companies. It was not long before she formed her own company and started drilling wells.

She went out in the oil fields, dealt with hard-boiled drilling crews, pipeliners and others, and directed her work personally. Donning overalls, she climbed derricks and sometimes assisted in pulling casing.

Not long ago she made a "location" for an oil well in Texas. The territory was "condemned" by geologists, but Mrs. Rowan's well proved to be a producer.

**Real Estate Investor.**  
Recently she invested a large part of her money in Fort Worth real estate. One lot for which she paid \$80,000 brought her an offer of \$110,000 a few weeks later.

Despite her achievements, Mrs. Rowan is still unsatisfied.

"I am working every day and sometimes nights," she says, "and expect to be doing the same thing for several years before I call myself a success."

**Norway Now Grants Divorce for 25 Cents**  
Oslo, Norway.—Oslo has a claim to fame not very widely known. It is the greatest unexploited divorce mill in the world.

The Norwegian divorce law is simple, conclusive and profound. If a man and wife don't get along and agree to separate, that's all there is to it. Divorce in Oslo, if you go about it right, needs no lawyers, no red tape and no fuss—and costs 25 cents.

A man and his wife appear before the "stiftsamtman"—that is to say, the civil representatives of the crown. They pay their kronen—a quarter—and explain that it is difficult, or impossible, or unwise, as the case may be, to continue marriage. The stiftsamtman smiles paternally, tells them to think it over for a fortnight, and then return. They wait the two weeks and come back. They are then granted a separation decree which may be operative, according to circumstances, for either one or two years. At the end of this period—during which wife and husband must live apart—divorce becomes absolute.

**Valuable Pasture Grass**  
Bermuda grass is the most important pasture grass of the South, where it shows marked preference for clayey soils. In Virginia and Maryland, where it is more troublesome as a weed than valuable as a forage, it is commonly called wire grass. Bermuda grass is the plant most used for pastures and lawns in the South.

**Time to Self-Cure**  
When you have a lot to do, but do nothing except to sit around and grumble at the world, you have been abusing your stomach. Doctors can't help you, but you can help yourself.—Ed Howe's Monthly.

**What's Wrong With This?**  
A Kansas boy was told to write a sentence on the blackboard containing the words "horse sense." He wrote: "The man forget to lock his stable door one night and he hasn't seen his horse sense."—Successful Farming

**Busy Sextons**  
Tips, rumors and lances dig the graves of millions of easy-go dollars every year.—American Magazine.

**"Deckle Edges"**  
A rough, untrimmed edge is meant by deckle edge. This is the edge left by the deckles, which are the curbs on the sides of the apron of a paper machine containing the flowing pulp, this determining the width of the paper. The deckle edge on note paper is usually an imitation of this.

# Happy Home

It is impossible to be happy in an overheated kitchen. You cannot be nappy if in constant dread of an explosion. If you use gas for cooking, you can keep the kitchen cool. You can keep yourself cool, in mind and body. Nothing is going to happen.

Nothing but quietness and comfort and ease and good cooking, that is—the best things that ever happened.

GET A GAS STOVE AND BE GLAD

WE SHALL BE HAPPY to give you any information you require as to gas and gas stoves

## PERTH AMBOY GAS LIGHT COMPANY

acting for the defense, sought to justify the actions of his men, asserting that the defense had the same right to shadow and observe jurists as the prosecution has. An apparent attempt to start a back-fire was the charge made by Burns' men that a young assistant attorney general had had improper contact with one of the jurors, but this fell through. A. Mason Day and Sheldon Clark, Sinclair company officials who were charged with directing the operations of the detectives and receiving their reports, refused to testify before the grand jury as to who actually hired and paid the investigators and what relationship existed between them and Harry Sinclair. Both Day and Clark were arrested and held under bonds. Every Burns operative who was sent to Washington for the Teapot Dome job was quizzed by the government prosecutors in the effort to establish the identity of two strangers who approached Jurors J. J. Costinette and G. P. Grenfell, as related by those two men to the grand jury.

**SEYMOUR PARKER GILBERT**, the American agent general for reparations payments, scolded the German federal states recently for their lax administration of finances, and part of the German press and public was greatly offended by what was considered dictatorial interference. Especially was Bavaria angered, and that state and Wurtemberg threatened to separate from the German republic and join Austria. It developed later that Mr. Gilbert issued his warning at the instigation of the government in Berlin to open the way to administrative reform and financial economies. Chancellor Marx planned a trip to Munich to calm down the Bavarians.

**FRANCE** has arranged for the disposal of \$75,000,000 in government 5 per cent bonds to the Swedish Match company and thus will be enabled to retire the balance of the 8 per cent Morgan loan of 1920. Financiers in Paris believe the Swedish concern expects sooner or later to get the very lucrative French match monopoly. From the start the Swedes will win important commercial advantages by the deal. The French agree to buy millions of francs worth of match-making machinery, which the Swedes alone manufacture, in the hope of trying to make a good thing out of the monopoly, the potential value of which is evident from the fact that everybody in the world wants to exploit it.

**GEN. ARNULFO GOMEZ**, Presidential candidate in Mexico, and chief of the late insurrection, was captured with a number of his supporters in the mountain region of the state of Vera Cruz by Gen. Gonzalo Escobar. Gomez and his nephew, Francisco Viscarra, were summarily tried by court-martial and executed. Later several of the military officers who had followed his fortunes were condemned and shot.

Generals Matus and Espinosa, leaders of the Yaqui Indians lately in rebellion against the Mexican government, have surrendered and with 600 of the Indians were taken to Mexico City. The Yaquis were lodged in barracks to await forced enlistment in various sections of the army. The entire tribe will be dispersed in accordance with the plans laid by General Oregon some time ago.

**COLORADO'S** coal-mine strike seems to be fizzling out, for the men have lost nearly all their leaders. Thirty of them were arrested by the state police in a concerted drive designed to put an end to illegal picketing, and though new leaders sprang up, the men appeared to have lost heart and were reported returning to work in considerable numbers. On the other hand there were stories of plots to storm the jails at Walsenburg and Pueblo and release the imprisoned agitators, and at the former place a mob of 400 strikers attacked a squad of state policemen and severely beat six National Guard officers.

**MILICENT ROGERS**, daughter of Henry H. Rogers of New York, who recently divorced Count Salm von Hoogstraeten, was married last week to Arturo Peralta Ramos of Argentina. It was reported the bride received \$500,000 from her father as a wedding gift. The couple sailed for the groom's home in South America.

**ANOTHER** wedding, of more interest in Europe, was that of Princess Anne of France, daughter of the duke of Guise, pretender to the throne of France, and Prince Amadeo Umberto, duke of Apulia and cousin of the king of Italy. The ceremony was performed in Naples and was witnessed by a brilliant gathering that included the kings of Italy and Spain and many members of the nobility.

**Washington Has Police of Almost Every Brand**  
Washington.—The visitor who is inclined to be chasty about his home town police force may find himself after visiting Washington, afflicted with something like an inferiority complex.

In addition to the metropolitan police force, the national capital has about a dozen others. There are federal park police, White House police, capitol police and separate units of police for various government departments.

There are also Department of Justice agents, prohibition agents and agents of the secret services of the Treasury and Post Office departments. And each of the various military posts in and near the city has its own police, while an organization of church members has just been formed to gather material on liquor law violations for submission to the metropolitan force.

**Expressive Phrase**  
The Virginia dynasty was the popular name given to the three Virginian Presidents—Jefferson, Madison and Monroe—who occupied the White House for nearly a quarter of a century—1801 to 1825.

**Longevity of Goldfish**  
With suitable environment and proper food, some varieties of gold fish will live 15 to 20 years.

**One-Hand Clock Been That Way 376 Years**

Castletown, Isle of Man.—A one-handed clock in the tower of Rushden castle has been that way for 376 years and does not seem to notice it.

For some reason the castle, which was once the ancient seat of kings and has written references dating to 1267, never bothered to equip the clock.

The clock is driven by a rope wound many times around a wooden cylinder with a stone at the end of the rope. The weight on the pendulum is another large stone.

**French Claim Many of "Biggest" Things**

Paris.—France really leads in many things, says a newspaper writer, who, like many Frenchmen, rather smart under the endless list of things—"the biggest in the world"—that are from time to time reported as existing in the United States.

Here are some of the things claimed for France as being the "biggest" in the world:

Tour Eiffel, the highest structure.

The Caraby viaduct, the biggest metal viaduct.

Lille de France, 42,000 tons, the biggest steamer built since the war.

The Saint Pierre de Vauvray bridge, the biggest reinforced concrete bridge.

The fastest electric train, running from Paris to Vierzon.

Le Bourget, the biggest airfield.

The biggest aviation hangars, at Orly.

The Canal de Roze, the biggest underground canal.

The 1,000,000,000 candle-power searchlight at Mount Valerien.

The 50,000-kilowatt alternating current generators, at Gennevilliers.

**Ants Not Long Lived**

The average life span of ants is from eight to ten years, although some specimens in captivity have reached the age of fifteen.

**FOR SALE SIX ROOM HOUSE**

All modern improvements, hot water heat, screened, lot 50x100, garage, hardwood floors and trim. Terms arranged to suit purchaser. Inquire—  
**Harry Morecraft**  
93 EMERSON STREET

**SPAIN GENTLE WITH WOMAN PRISONERS**

**Helps to Recall Inmates to Honest Ways.**

Madrid.—Woman criminals are not numerous in Spain, and when they do commit crimes they are looked after by the authorities almost parentally.

The women's prison for those convicted in Madrid is a spacious institution under the direction of men, but the actual guardianship of the prisoners is confined to nuns. They guide their charges with gentleness, but are strong disciplinarians when necessary.

A large percentage of those convicted of robbery are the servant girls from outlying country villages. Others have been convicted for crimes of violence against husbands and numerous unmarried women for infanticide.

Everything is done in the woman's jail to recall the inmates back to honest ways. Work is provided for prisoners conducting themselves well. They are able to earn as much as \$3 weekly at needlework and ironing.

With their earnings they may purchase food luxuries. Some of them are thus able to add sweetmeats and other tidbits to the prison ration.

One of the greatest punishments for the women is to be expelled from the workshops for misconduct and confined to their cells.

After an hour's recreation in the open courtyard each day they are permitted to converse, but not loudly.

**New Method Cleans Rusty Water Pipes**

New York.—Rust-choked iron water pipes in a 35-story New York office building have been cleared by a new acid solvent, and the vast expense of replacing the whole structure avoided. The process, worked out by F. N. Speller, E. L. Chappell and R. P. Russell of the Massachusetts Institute of Technology, is expected by engineers to become a very important factor in building management.

It has long been known that a solution of hydrochloric acid in hot water will dissolve rust, but the drawback has been that it will also dissolve iron and steel, so that it has never been considered practicable for use on a large scale. The three Massachusetts engineers, however, added an organic "inhibitor," which has the effect of preventing the acid from corroding the metal while still permitting it to attack the rust.

In order to carry out their operations with the least possible inconvenience to the tenants they divided the plumbing of the building into sections, attacking these one by one on Saturday afternoons, so that the solution could get in its work and be flushed out of the pipes before the resumption of business on Monday morning.

Advertising brings quick results.

Morning Service—11:30.

**Evangelical Lutheran Zions Church**

Rev. Carl Krepper, Pastor

Service, 9:00 A. M.

Sunday School; German and English

Classes at 10:45 A. M.

**He's Willing**

A critic says that if hats are taxed women will go without them. "They by all means tax them!" urges an excited husband.—London Opinion

**Stone Lillies Found 150,000,000 Years Old**

Stockton, Calif.—Stone lillies, dating back to the lower Devonian age of 150,000,000 years ago, are among the fossil specimens brought to the College of the Pacific by Prof. J. H. Jones, head of the geology department, from fossil quarries in Iowa, where he passed the summer.

A fossil fish tooth, 135,000,000 years old, buried in a bit of coralline limestone, which had been kicked about for 15 years in a barnyard as "just a rock," is one of the most valuable specimens now on display at the college. Many of the specimens have not yet been classified, and work during the year will be concentrated upon this.

Professor Jonte pitched his camp in a deserted section of the State capitol quarry, where he said the fossils were so thick that the party, in an hour had collected a thousand specimens, some perfect and some fragmentary, but all valuable.

**True to Form**

Bayonne, N. J.—Fred and Stanley Ruth, twins and painters, are in a hospital each with a fracture of the left ankle. They fell together 25 feet from a scaffolding.

**Scare for Wives**

Hoboken, N. J.—Three wives whom their husbands wish to be scared must appear in court. They have been taking a vacation together on the rent money.

**But They're Nice**

As often as not the doll-like maidens have sadwads in their heads.—Farm and Fireside.

**The Woman's Shop Offers**

Special selections of Hats in an assortment that is sure to please for the Festive Thanksgiving Season.

Priced Within Reach of All.

**The WOMAN'S SHOP**

RITZ THEATRE BUILDING

Carteret, N. J.

**Miners Drink Salt Water**

Miners endure the heat in the shafts more easily when salt is added to their drinking water. Excessive perspiration causes a loss of salt from the body, and replacing this loss prevents much of the exhaustion that would otherwise result.

**They're Not Bugs**

Fireflies or lightning bugs are neither flies nor bugs, says Nature Magazine. They are true beetles belonging to the family Lampyridae meaning "to shine."

**CARD OF THANKS**

I wish to express my sincere thanks to the citizens of Carteret, who voted for me on Election Day, and all those who in any way helped to make my election possible. Signed,  
**ROBERT BROWN.**

**Sad Reflection**

Alas, the public never knows how many goats have been left to bleed unheeded in the wake of the Big Success.—Toledo Blade.

### Uncle Sam Launches World's Largest Submarine

Side view of U. S. S. V-4, the largest submarine in the world, launched the other day at Portsmouth navy yard for the American navy. It is designed for maximum cruising radius and endurance, and can lay mines.

### Trust Companies Show Gain in Nearby States

Trust Company resources on June 30th exceeded \$20,480,000,000, an increase of \$1,145,300,000 for the year, according to the twenty-fifth annual edition of "Trust Companies of the United States", just issued by the United States Mortgage & Trust Company of New York.

The following six states each have resources over one billion dollars, account for nearly 75 per cent of the country's total.

New York, Pennsylvania, Illinois, Ohio, California and New Jersey have a total of \$14,966,540,899.69.

The largest gains were: New York, \$852,020,000; Pennsylvania, \$270,000,000; New Jersey \$200,000,000; Ohio, \$155,000,000.

In reviewing the figures, President John W. Platten, of the United States Mortgage & Trust Company says:

"It is a cause of satisfaction that the resources of the trust companies of the country continue to seek new high levels year after year, the total at the present time being considerably more than double those of ten years ago. Yet it is none the less gratifying to note the unprecedented efforts being made by the trust companies to extend their service into new channels.

"The situation is most encouraging and warrants every confidence in the future of trust companies and their ability to render a most valuable and constantly broadening service to the public."

### Nobel Prize Awarded to Italian Author

The Nobel Prize was awarded to the author of "The Mother."

For the second time in its twenty-five years' history, the Nobel prize for literature has been awarded to a woman. It is an Italian writer who has just won the honor—Grazia Deledda, a native of Sardinia, whose greatest work in the opinion of many critics, is "The Mother, (La Madre), published in America in translation by the Macmillan Company.

Madame Deledda is admittedly one of the foremost women novelists of Italy. She is Sardinian by birth and parentage, and in the little inland town of Nuoro she spent her childhood among shepherds, peasants, and small landholders such as she has portrayed in her various stories of Sardinian life. After her marriage to a Lombard, he left Sardinia and went to live in Rome, where she has been writing for about thirty years.

The scene of her novel, "The Mother, (upon which the Nobel prize award is generally considered to be based), is laid in the remote and primitive island village of Aar, and the action takes place within the short space of two days. The events of the story are so dramatic, the mental conflict it describes is so intense, and the outcome so inevitable as to create an unforgettable impression. The tale has its lighter side, however, in the picturesque presentation of the people of that isolated mountain region—the old hunter who has turned solitary, the domineering keeper and his dog, the delightful boy sacristan and his friends. There is a touch of the supernatural in the story, and a touch of humor here and there, but the interest centers in the conflict in the heart of the son and the sacrificial devotion of the mother.

### Patience

Power doesn't mean bluster. Real power often has none of the marks of domination. The greatest power is sometimes indicated in patience. Patience wins victories that a show of force never could.—Mobile Register.

### Happy Dances

The great worry of a man who is even 30 per cent clever is that he always expected to prove it.—American Magazine.

### 861 Persons Killed by Autos in the Past Year

Vice-President Matthew R. Boylan, of Public Service Railway and Transportation companies, in a bulletin to trolley and bus operators, calls their attention to a communication sent out recently by the Safety Councils of New Jersey, which Mr. Boylan urges the operators to read and be guided by. A copy of the communication is enclosed with the bulletin.

The Safety Councils' statement cites that last year 861 persons were killed in this State as the result of motor accidents and goes on to say that while safety devices may help in cutting down this alarming death list, no real reduction can be made without co-operation among the individual drivers. And it asks each of the thousands of motor car drivers to pledge themselves to "take not a single chance."

"By way of emphasis I can do no more than remind you that as an operator of a street car or bus, you have an increased responsibility, because you are charged with the safety of the men, women and children who are your passengers, as well as with your share of the responsibility for the safety of pedestrians and the drivers and occupants of other vehicles," Mr. Boylan adds.

"I look for your full co-operation in the movement inaugurated by the Safety Councils of New Jersey to cut down motor vehicle accidents."

### P. A. Central Office Installing Equipment

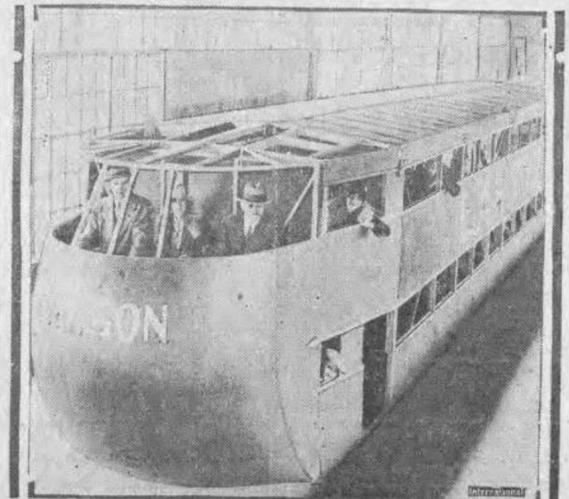

The work of installing switchboard equipment in the newly completed Perth Amboy Central Office building at 183-187 Jefferson Street is progressing rapidly, and according to D. H. Ford, local Commercial Manager of the New Jersey Bell Telephone Company, the installation will be completed and the new apparatus placed in service during December of this year.

The initial equipment of the office will be sufficient to serve 3,800 lines or about 7,000 telephones, making allowances for party lines, each of which serves two or more telephones. There now are 5,800 telephones in the Perth Amboy district. The switchboard and associated apparatus can be enlarged to have an ultimate capacity for serving 10,400 lines, or approximately 18,000 telephones.

The new building is a three story structure and is as fire and moisture proof as modern science can make, not only to safe-guard the lives of the workers, the delicate and costly apparatus, but also to insure the furnishing of continuous telephone service to the public.

The basement contains the store-rooms, heating plant and cable vault.

### Huge Air Liner Under Construction

View of the body of the double-tiered air liner designed by Alfred W. Lawson and under construction at Garwood, N. J. The plane will carry 100 passengers, is equipped with twelve motors and has a wing spread of 200 feet.

### Law Keeps Firemen Away From Blaze

Toronto, Can.—Firemen slept peacefully in Weston, near here, while flames damaged the residence of former Mayor R. J. Flynn and destroyed valued belongings. Had the Weston fire siren screamed the volunteer firemen would have awakened and battled the flames, but under an ordinance, passed when Flynn was mayor, sounding of whistles at night is forbidden in Weston.

### PLOTTER HIMSELF IS PLOT'S VICTIM

Thought Conspiracy Was to Collect Insurance.

New York.—Young Benjamin Goldstein, who was thrown into the water of Gravesend bay to drown, thought he was a conspirator, rather than a victim in a plot to collect \$140,000 insurance on his life, the police asserted.

When he set out from Coney Island in a rowboat with his two companions who confessed, said the police, to his murder, he thought he was taking part in a plot to circulate a report of his death while he went into hiding; he did not know the report would be true, detectives said they learned from members of the young man's family.

A middle-aged man—described by the police as the puppet-master who worked the wires in the tragedy of death in which three weak young men were actors—was grilled all day at police headquarters, but confessed nothing, and, arraigned on a charge of murder, pleaded not guilty.

Harry Greenberg, seventeen, and Irving Rabinowitz, twenty-two, both of whom have ambitions as pugilists, told the police they were the hirelings of Joseph Lefkowitz, forty-two, the beneficiary of the insurance policies, when they left their companion to drown. But each insisted the other actually pushed Goldstein from the boat. Both were arraigned for murder and pleaded not guilty.

Lefkowitz, a broad-shouldered, muscular man with active dark eyes, was calm throughout hours of questioning.

### Six Are Electrocuted by High Tension Wire

Timblin, Pa.—Six men were electrocuted near here when they came into contact with a high tension wire carrying 35,000 volts. The victims were linemen employed by the Penn Public Service corporation.

Five of the men were killed instantly, while one who attempted to rescue the others from the grip of the "hot" wire died later.

The men were stringing a telephone line across a valley. Five of them were pulling the line when it came into contact with the high tension and they were knocked down. Raymond Smith, working on a pole nearby, went to their aid, but was so badly shocked himself that he died later.

The dead, in addition to Smith, all of Punxsutawney, Pa., were Warren Barnett, Raymond Curry, David Dismire, Lloyd Shafter and Blair Joyner. The scene of the accident is a sparsely settled region. Two other linemen, Quay Grube and David McMillan, injured by the shock, were able to summon aid.

### Bear's Mutton Chase Ill-Fated, Mine Reveals

Saranac, N. Y.—Workmen sent to pump water from the pit of an old mine of the Witherbee Sherman company at Palmer Hall, near Ansonia, were amazed to find the body of a large bear that had fallen into the pit and drowned. Investigation disclosed bruin had met a tragic end while chasing sheep.

Tracks showed where the bear had come from woods into clearing and started after sheep. The latter knew about the mine-pit, and as the fleeing flock reached it the sheep divided and skirted the edges of the deep hole. The bear, knowing nothing of the pit and running at top speed, blundered straight into it. Trapped by the sheer rocky walls, the bear had no chance and soon probably sank.

### Cat Reverts to Wild, Rears Young in Tree

Camp Nelson, Calif.—Reverting to the primitive, a mother cat built a home in a hollow tree here 40 feet above the ground, and is rearing a family of four. The kittens, born in the lofty nest, never leave it, and the mother provides them with mice and birds for food. The kittens show signs of playfulness but are wary of strangers. The mother has become so wild and vicious it is considered dangerous to go near her.

### Boy Uses Finger Nail to Start Stolen Auto

St. Louis.—Stealing 26 Ford automobiles by picking the ignition locks with a long finger nail is the extraordinary record of Francis Tatham, fourteen years old, who made this confession to the police when he was caught stealing a neighbor's motorcycle.

"It was no trick at all," he said, showing an inch-and-a-half nail on the little finger of his left hand.

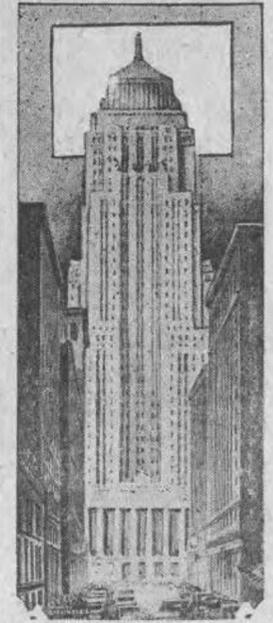

### Hence Jazz

Music, mystical: it is, deep and ineffable, is in some senses only the dilute reflex of blood pressure.—Woman's Home Companion.

### Real Diplomacy

Shoe Salesman—I can see that your regular size is three, madam. At the same time, you find yours so comfortable that I might almost recommend you to wear fives.—Pearson's.

### NEW BOARD OF TRADE

Sketch of the design for the building which the Chicago Board of Trade proposes to erect on Jackson boulevard at the foot of LaSalle street. This structure, which was designed by Holabird & Roche, will tower 40 stories and cost \$10,000,000.

### British Grant Beloit Permit for Research

Beloit, Wis.—Permission to do research work in British East Africa has been gained by Logan museum of Beloit college, according to an announcement by Dr. George L. Collie, curator, and the next few years may see the museum doing work there.

The territory is rich in remains of Aurignacian man which, Doctor Collie says, was the first real man. He existed 25,000 years ago and rapidly spread all over the world, he says. Aurignacian remains have been found in France, Czechoslovakia, Algeria and in southern Africa. In British East Africa 60 skeletons have been uncovered in two years, while Europe has spent 100 years in uncovering 40 such skeletons.

The college museum already has two skeletons, both from Algeria. One, the skeleton of a child, was found a year ago, while the other, of a mature man, was uncovered only a month ago and will soon be brought to the museum for permanent housing.

### Sacred Cat Keeps Eye Open for Four Months

Boston.—Dr. John A. O'Connell, Dorotheaster veterinarian, has a rajah's sacred cat which none of the doctor's family has seen lie down or close an eye in the four months the animal has been domiciled with the doctor. It is called Meesick, and a naval officer brought it from the interior of Siam.

The cat is friendly, and Dr. O'Connell says its constant restlessness and apparent watchfulness are due to desire to communicate with persons. The cat's fame has been constantly growing and one offer of \$300 was made and was promptly refused. Meesick has a yowl which is uncanny and his purr is like that of a tiger.

### Summing It Up

9 A. M.—6 P. M. MON., WED., FRI., till 8 P. M.

**Uncle Eben**  
"A monkey," said Uncle Eben, "has a heap o' sense, but never talks. A parrot ain't got no sense at all an' talks all de time. Draw your own conclusions."—Washington Star.

**Rejoicing Over Sinners**  
Members and friends are urged to attend the Sunday school and Bible class, which will continue as usual at 10 a. m.—Church Notice in a Montana Paper.

**The Wise Man**  
Often friendly argument leads to heat. When the argument grows too warm, remember that it is always the wiser man who quits first. He is the man who shows the more self-control and self-control is the master quality of man.

**Padding Orgies**  
One steamed pudding doesn't ruin a stomach any more than one haddock indicates spring. But a diet of steamed puddings would probably insure work for the doctor as sure as a succession of north-bound blizzards booms the millinery trade.—Women's Home Companion.

**That Moldy Smell**  
A few drops of oil of lavender sprinkled on the shelves of our book-cases and closets will dispel the moldy smell caused by damp weather.

**Varieties in Bird Flight**  
No two birds fly in exactly the same manner, the style of flight depending upon the form and texture of the wings, feathers and tail.

### To Make the Best Coffee Percolate It Electrically

IS the coffee you serve just as delicious as its tantalizing aroma suggests?

It can be, if you make it in an electric percolator, for percolation, which means dripping of hot water through the ground coffee held in metal or china containers, is the best method of making coffee. It brings out all the flavor and makes it amber clear. Percolated electrically, coffee is a wholesome beverage.

Public Service sells many styles of electric percolators, any one of which may be purchased on our easy payment plan.

The Public Service Special electric percolator illustrated sells for \$6.50.

**GIRL VICTIM OF JEWEL THIEVES PLAYS DETECTIVE**

**Helps to Capture Men Who Tricked Her Out of Valuables.**

New York.—After being chloroformed and after losing \$1,600 in money and jewelry in a Martinique hotel room, Miss Cordie Harvey, twenty-five-year old Charleston (W. Va.) society girl, has a new respect for the wickedness of strange young men in a great city.

In jail, after confessing to the robbery, two handsome city slickers, who Miss Harvey never dreamed were waiters, have a new respect for the resourcefulness of little out-of-town girls. Edward Kelley, twenty-two, and Paul Jeffries, twenty-three, hadn't the slightest idea the polite little girl would go out with detectives and search for them.

**How It All Began.**  
It all began when Miss Harvey asked a strange young man to direct her to the post office. Miss Harvey was wearing expensive jewelry and the young man spent several minutes describing methods of getting

Chloroformed and Robbed.

to the city hall post office from the Hotel Martinique. The girl had just come to New York for a vacation. A few days later the man identified as Jeffries accosted her in the hotel. "Don't you remember me?" he asked.

"No," Miss Harvey replied. "I'm the fellow that told you how to get to the post office," he said. She brushed by and went to her room. A few days later Miss Harvey was dining when Jeffries arose from a nearby table and invited her to go to a theater. She refused. Recently Miss Harvey was standing on the mezzanine of the Martinique when Jeffries entered and waved to her. She ignored the salutation, but he joined her a moment later.

**Finds No Woman in Room.**

The police said Kelley, although unaccompanied by a woman, had hired a room at the hotel, registering as "Mr. and Mrs. Bentley." Jeffries described this Mrs. Bentley as a charming woman whose companionship Miss Harvey would find agreeable, and Miss Harvey went up to her room. There was no Mrs. Bentley in the room and Miss Harvey had scarcely reassured herself by the sight of women's garments on the bed before she was chloroformed and stripped of the following:

One platinum ring set with 18 small diamonds and four sapphires, value \$1,125; one platinum ring, \$250; one white gold ring set with chip diamonds, \$100; one wrist watch, \$50; one string of pearls, \$50; cash, \$20.

Miss Harvey saw more of Broadway in company with detectives for several days than she ever had before. Then they saw Kelly. He was equipped with her watch and several pawn tickets. Later they got Jeffries.

**Flies 30 Miles Hanging to Tail of Mail Plane**

New Brunswick, N. J.—Hanging on the tail of an airplane 3,000 feet above ground held no terrors for Vincent Taylor, seventeen years old, of Hackensack, until a shooting star narrowly missed connections with the plane and himself. The youth said recently in describing his flight.

Taylor was an involuntary passenger on an air-mail plane piloted by L. Ponton D'Arce from Terboro airport to Hadley field, a distance of 30 miles. While attempting to help shove the plane into the wind as it was taking off he became entangled in the struts of the tail skid and was unable to free himself or to attract the attention of the pilot.

**Style Not Liked**

New York.—One form of caveman wowing is disapproved by Miss Mary Carolyn Davies—the action of Henry Harrison in sending word to the papers that he and she were to be married.

**Today's Daughter**

It is a good idea to have a girl give a party; she takes such an interest in getting the house cleaned up.—Atchison Globe.

**Unguarded**

A man in New York was fined \$15 for stealing a kiss. Oh, well, a lot of owners of kisses are awfully careless!—Albany Evening News.

**TOMB OF GENGHIS KHAN IS FOUND IN SECRET CAVE**

Seven Silent Lamas, Writes Explorer, Keep Watch at Coffin in Central Asia.

London.—The Russian explorer, Prof. Peter Kozloff, says the Sunday Express, has solved darkest Asia's greatest archeological mystery by the discovery of the tomb of Genghis Khan (Jenghiz Khan), Mongolian conqueror, 700 years after his death, near the ruins of the dead city of Kharakhoto, in the Gobi desert.

Professor Kozloff has devoted 20 years to the search. He found the great khan's remains in a silver coffin resting on the crowns of 78 princes and khans whom he had conquered.

The secret wonders of the conqueror's tomb, says the Express, vie with those of Tut-Ankh-Amen. Seven silent lamas guard the secret place and every seven hours one of them strikes seven times on a huge jade bell hanging above the sarcophagus.

For seven centuries the priests have preserved the mystery. Jewel-studded weapons of Genghis Khan and his own story of his reign, a life-size lion, tiger and horse in plaid and a copy of the Bible written by an English monk, also were in the tomb.

Professor Kozloff also visited the tomb of the Genghis' favored wife, the inscription on whose white marble coffin sets forth that "the great khan released her by placing his dagger in her breast."

The tomb lies beyond the labyrinth of passages cut into the mountain side. It is a spacious hall, about 40 feet square, the whole carefully preserved. Once each year certain privileged Mongols and the Khan's descendants repair thither to make sacrifice to his memory.

Once a year, Professor Kozloff was assured, on the anniversary of the Khan's death his ghost arises and blows out the lamps, leads the chief of the guardian lamas to the huge black slab at the rear of the shrine and writes with the accompanying priest's hand prophecies for the coming year.

**Obstacles Help Latins Build Their Aviation**

Washington.—Development of commercial aviation in Latin America is being accelerated rather than retarded, says a report to the committee department from Leighton W. Rogers, agent assigned to investigate the subject, by the very obstacles which it encounters. Great distances between cities, rugged intervening mountains and lack of railroad communication, he finds, are actually encouraging the new industry. One of the world's first commercial aviation services to prove profitable was that established several years ago along the Magdalena river in Colombia.

Now, in addition, regular passenger and freight service is maintained between Buenos Aires, Argentina, and Montevideo, Uruguay. On the west coast Chile operates an air-mail service between Santiago and Valparaiso, and Bolivia has had a commercial system in operation for two years, while in Mexico a number of oil companies maintain their own lines and various projects are under way in the West Indies. Most of the airplanes used are made in the United States or Europe.

**Carries Whip Along as Protection From Snakes**

Berlin, Wis.—Albert Ludwig, a farmer living two miles west of Berlin, is endeavoring to rid the Delaney farm, which he operates, of reptiles.

Some time ago while at work on the farm Mr. Ludwig encountered a poisonous copperhead which measured almost six feet. He killed it with a horse whip, snapping the reptile directly back of its head. He was aware that snakes were present on the property, but he didn't believe they could be that large. Recently, while working in the field, Mr. Ludwig plowed out 53 copperheads which measured between seven and ten inches long. He killed them with a stick. Investigating, he discovered that they had been in a pocket-like hole about four inches beneath the surface. A large number of snake eggs were also in the hollow.

"In all my experience with these snakes I've never been chased by any," Mr. Ludwig says. "They've risen up and stuck out their fangs when they heard or saw me near, but that didn't bother me. I always carry a whip or a stick for safety."

**Calls Antique Shop "Spirit of St. Louis"**

Paris.—Lindbergh's "Spirit of St. Louis" has its memory perpetuated in an old antique shop along the river. The enterprising owner really has a claim to the name, for his shop for years has been called "L'Esprit de Saint Louis," an exact French translation of the transatlantic airplane's name. His store is on the Quai Bourbon, on the Ile St. Louis, an island in the river Seine, and he deals largely in period furniture of the various King Louis.

His sense of humor, however, caused him to label one part of his showroom "Lecarno," probably because odds and ends are gathered together there.

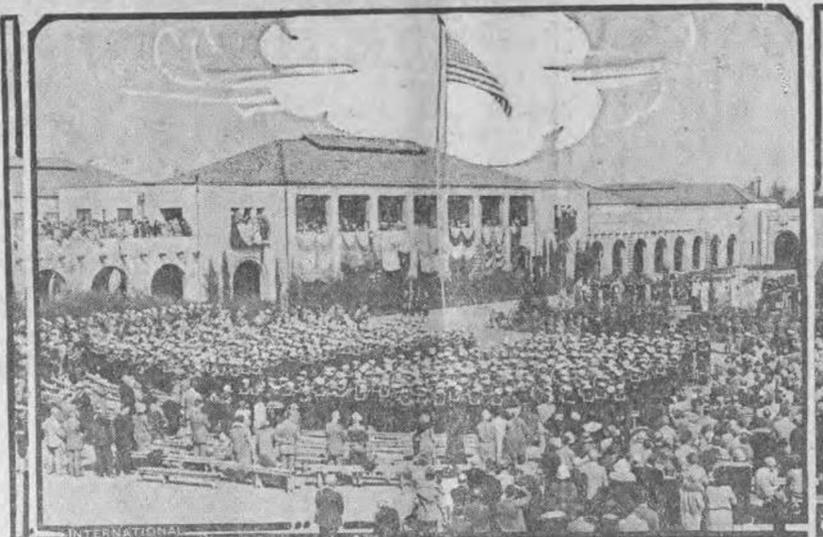

**Landscape Artists**

Doubtless the barber who calls himself a tonsorial artist does so because like other artists, he works with a brush.—Farm and Fireside.

**Favorite Sons**

Appreciation of what one has created is only natural. It's the paternal instinct that makes a man laugh at his own jokes.—Farm and Fireside.

**Armistice Day Mass for Sailors at San Diego**

Before thousands of sailors and laymen gathered for one of the greatest ceremonies ever held on the shores of San Diego bay, a solemn military field mass, offered as the navy's Armistice day religious service, was sung by Rt. Rev. John J. Cantwell, Catholic bishop of Los Angeles and San Diego. Above is a view of the services in the Paul Jones court of the naval training station.

**Motorists Warned to Have Control of Car**

Recent automobile crashes at street and road intersections lead the Keystone Automobile Club to warn against the increasing carelessness of motorists in the all-important matter of keeping their cars under control at crossings.

"In Philadelphia alone," says a statement by the Club, "ten deaths and numerous injuries have been caused in the last two weeks by the senseless habit of dashing across at street intersections. Throughout Pennsylvania and New Jersey the experience has been virtually the same. In fact, it can be said that this form of motor 'accidents' has almost become epidemic.

"Two souls with but a single thought" seems a particularly appropriate slogan for the crossing-crashers, but the rest of the poetical expression, unfortunately, is a misfit. Usually it happens that instead of the 'hearts beating as one' the hearts stop beating altogether and the Coroner marks up another fatality due to joint carelessness of the men at the wheel.

"It is the absolute height of folly for any motorist to assume he is the only user of the highway; yet that is, in effect, the assumption of the driver who approaches a street crossing or road intersection without having his car in such control he can stop at a second's notice.

"While the law recognizes the motorist approaching from the right has the right of way, it is utterly foolish for him to contest this right with another car. You can't jostle with weapons weighing a ton without somebody getting hurt. The only safe practice is to approach every intersection cautiously, stopping if necessary. It is far better to lose a few seconds at every crossing than to jeopardize your life and the lives of others by speeding over the intersection on the assumption the way is clear."

"The cemeteries are being filled with drivers who approach crossings with this 'single thought.'"

**Vacations Break**

A good many men break down because they don't take a needed vacation from their work, and a good many marriages break down because the husband and wife don't take a needed vacation from each other.—Inclunat Enquirer

**Famous Pipe Organ**

A pipe organ which has served three Trinity churches in as many cities, and is believed to be the oldest of its kind in this country, is now on use at St. John's Episcopal church at Clyde, N. Y.

**Izaak Walton League Develops Outdoor Life**

The Izaak Walton League of America, powerful nationwide conservation organization which has been called by Secretary of Commerce Herbert Hoover, "The greatest force in the country for the protection and development of opportunities for outdoor life", is planning to include this community in a comprehensive conservation survey and campaign to remedy outdoor conditions, it was learned here today.

A complete investigation through local sources is announced by the National Headquarters of the League at Chicago to determine what steps should be taken here in the interest of outdoor recreation, propagation of game and fish supply, and other matters relative to constructive conservation.

This investigation will be undertaken as a part of a nationwide conservation survey being made by the League under the direction of Seth E. Cordon, formerly executive officer of the Pennsylvania Game Commission and largely responsible for the nationally famous "Pennsylvania System" of game and fish administration, National Officers said.

A constructive organization aggressively active in promoting and providing for more fish and better fishing, more game and better hunting, more recreation areas and more opportunities for outdoor sports, is the basis of the League, which also is aggressively combating pollution of streams, commercialization of recreation areas, and advocating true sportsmanship and sportsmanlike method in shooting, fishing and camping.

In his endorsement of the activities of the league, Mr. Hoover added, "As our people increase in numbers and in leisure we must have stimulation to health, and above all the moral value that comes from association with nature. Every member of the League is a further soldier in our ranks fighting an organized battle for this vital thing in the nation.

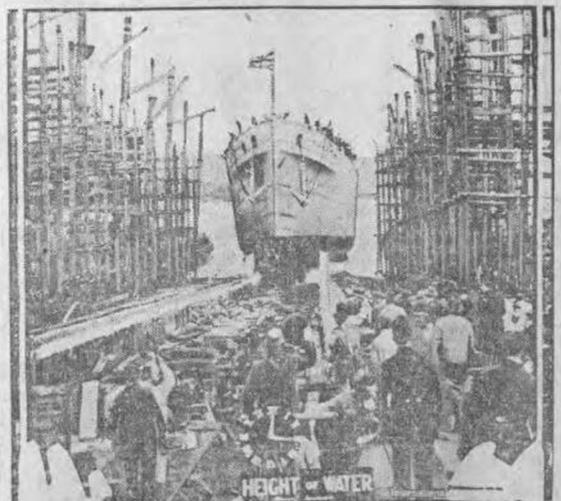

**Praise Not for Artist**

He had set up his easel and was working away when suddenly he realized that a young woman had come to a stop behind him. "A charming landscape," she remarked. "Ah, you flatter me," said the artist modestly. "Compared with the original it is very poor stuff indeed." "It was the original I referred to," said the young woman quietly.—Boston Transcript.

**Pessimism**

Another definition for a pessimist has been quoted recently as a man who puts out a light to see how dark it really is.

**Warship Is Christened With Cider**

British warship Devonshire, as she slid down the ways, Lady Midway of Fleet christened the cruiser with a bottle of special 1904 cider, this being the first time in the history of the British navy that cider was used for such a ceremony.

**Left Side of Road Best**

The American Automobile association says that it is best and proper for pedestrians to walk on the left-hand side of the road, so that they may be facing the oncoming traffic. Although there is no uniform regulation to this effect, this is the method the association is advocating.

**Only Makes Us Mad**

Being told things for our own good never does us any.—Ohio State Journal

**Real Cosmopolitan**

Lafucio Hearn, prolific and pleasing writer, was born of an Irish father and a Greek mother in the Ionian islands. He was educated in England and France, was a journalist in Cincinnati and New Orleans, and finally went to Japan, where he became a Japanese subject with the name Yukumo Kozzoni.

**There Is No Substitute**

Whatever the future has in store for us we have to take. We can't go to some other store.—Boston Transcript.

### THE MODE FEATURES FRINGE IN STRIKINGLY ORIGINAL WAYS

FRINGE flourishes in the realm of smart mode. It contributes its grace to both daytime and evening modes, always in ways most unique.

A testimony to the high regard with which fashionables view fringe was recently cited in that the wedding gown of a most distinguished bride was ornate with tiers of narrow silver fringe. The new beaded frocks, too, stress sparkling rows of crystal fringe. However, it is the wide colorful silk fringes which count most of all.

Illustrative of the novel treatment accorded fringe is this charming daytime gown to the right in the picture. This unusual model was designed for that favorite of favored film stars, Gertrude Olmstead. The wide ombre fringe, which shades from cocoa to chestnut brown, blends to the beige

tone of the silk crepe which it trims. Note that the fringe is caught in at the hemline and the wrists, which of course confirms the striking originality displayed in its styling.

As for evening frocks, many of them are a matter of one row of fringe upon another. If not in straight rows, then fringe travels along devious diagonal paths as it does on this lovely white crepe frock in the picture, which is so gracefully posed by Avonne Taylor whose recent good work on the screen is bespeaking for her a most brilliant future.

For daytime wear heavy black fringe generously trims many a black satin frock. Very new in the mode, is the method of suspending fringe from a yoke, catching it in at the bottom, perhaps under a plaiting of fabric, also belting it in at the waistline. Fringe arranged at the side of the skirt and the bodice in festooned rows, until it achieves a labor effect, is one of the new methods of handling.

JULIA BOTTOMLEY.

### Appreciates Service of Casualty Company

Woodbridge, Nov. 9, 1927  
The Commonwealth Casualty Co., 210-12 South 5th St. Philadelphia, Pa.

Gentlemen:— I herewith beg to acknowledge receipt of your check for \$125.00 One Hundred Twenty-five Dollars, for disability benefits—35 days.

This is the first time in my life that I received something for almost nothing.

Thanks to the Commonwealth Casualty Company and also thanks to Mr. Carl Laster, your General Agent who, through his continued persistence that I bought your Contract for health and accident.

Never before, having experienced any sickness or accident, I did not realize the necessity of carrying this policy nor did I stop to consider the obligation I owe to my wife and children as the supporter of my family.

Well when Mr. Laster proposed your policy to me as a protection for my family in case of my disability and presented its wonderful merits, I thought I would have to pay about \$100 a year for such protection and I immediately lost interest because I could not afford, as I thought, such a luxury but when he told me that for all that protection the cost would only be Ten Dollars a year I could hardly believe it less than 3 cents a day—to make a long story short I bought that policy and put it away together with my other papers and I really forgot about owning a health and accident policy.

I was enjoying the best of health and attending to my business in my regular routine way.

Then, out of a clear sky on August 25th, 1927 while delivering an order for a customer a car shot by and hit me.

That bump was only trivial as compared to some of the serious accidents which occur every day, yet I was disabled five weeks and during that time I was unable to attend my work.

Then I first realized how important it is for every man to carry protection.

I now say that any married man who does not carry insurance to protect his family in case of sickness or accident commits a neglect toward his family and shows that he is unfaithful toward his family's wants.

I have learned my lesson and am glad to give my experience to those men who do not carry protection.

For less than three cents a day I can never afford to be without such protection.

Again Gentlemen I want to thank you.

The enclosed application or a postal or phone call to Carl Laster will explain in detail this wonderful protection offer.

HARRY ZELMAN,  
Merchant 330 Fulton St.  
Woodbridge, N. J.

**CLASSIFIED ADVS.**

**FOR RENT**—five room flat, all improvements call at 19 Cooke Avenue, S. Srulowicz.

**Harry Morecraft**  
93 EMERSON STREET

**Interrupted at Play,**  
**Child Slays Snake**  
Pittsburgh, Pa.—Carl Ross is only two years old but, according to his father, Clarence Ross, the child is an accomplished hunter, and already has to his credit one garter snake, measuring 14 inches.

Carl and his four-year-old brother, James, were playing in the yard of the Ross home here when a snake glided into sight. James ran for help. Carl picked up a hammer and started after the enemy. When aid arrived, he had vanquished the snake and was amusing himself by grinding its head into the ground.

**Lightning Hits Crib;**  
**Leaves Child Unhurt**  
Binghamton, N. Y.—A peculiar freak of lightning occurred in Franklin, Delaware county, during a storm, when a bolt struck the home of Harry McKune, drove splinters into the bodies of Mr. and Mrs. McKune and twisted the iron frame of a crib, without injuring or awakening a child sleeping in it.

**Dogs Ate His Church**  
Nome, Alaska.—A missionary in the interior, Rev. Andrew Knox, has written to friends that dogs have eaten part of his church. When recently called into the interior, he left a supply of dried fish for his dogs. Returning, he found the dogs had exhausted their food and had chewed up the walrus and reindeer hides that formed the walls of the church.

**What Is This?**  
Doniphan, Neb.—Resembling a catfish in shape, but having four feet, with five toes on each foot, and six horns, three on each side of the head, an unusual creature was caught recently in a sandpit. Zoologists believe it is of the salamander family, but they have not seen a specimen like it.

**Evil Words Live On**  
A blemish may be removed from a diamond by careful polishing, but evil words once spoken cannot be effaced.—Confucius.

**As Good as Lemon**  
Fruit stains may be removed from the hands by rubbing them with the juice of a tomato.

**Unsigned Letters**  
Anonymous letters have the same value as the signature.

**Star Groups Studied**  
Four hundred spiral groupings of stars, immense universes far beyond our own, have been studied by Dr. Edwin Hubble at the Mount Wilson observatory. Their average diameter is placed at 5,700 light years, one light year being about 6,000,000,000,000 miles, and they are 200,000,000 times as bright as our sun, according to the astronomer.—Popular Mechanics Magazine.

**X-Rays Improve Seeds**  
By exposing seeds, bulbs and tubers to "soft" X-rays for a carefully measured period, a Russian botanist reports that he has stimulated their development, resulting in stronger roots and an increased yield, says Popular Mechanics Magazine. He explains that the soft rays are of longer wave length than the "hard" rays which have greater penetrating power.

**Far-Flung Empire**  
According to the most recent estimates, the British empire covers approximately one-quarter of the world's habitable land area. This excludes the Arctic region. The British empire comprises 13,406,103 square miles.

### DEATH BY TORIORS FATE OF TWO MEN IN BOOTLEG FEUD

Baltimore.—Torture similar to that committed by the savage Indian was employed in a supposedly bootleg feud.

Knocked unconscious and dragged to a deserted country cottage, where their clothing was saturated with kerosene and the house set afire, two pitilessly beaten men squirmed their scorched bodies to the outside.

Though not burned to death, they died from their burns and wounds a few hours later at a hospital. Death came before they could give a coherent story of their attack.

**Attacked and Beaten.**  
John C. Harraby, thirty-six, and Chester Pugh, thirty-three, each the father of several children, were the victims of the atrocious crime. They were motoring to a shore resort outside of the city, they were able to tell the police, when another machine blocked their path on a lonely road.

Three men, each holding a pistol, commanded them to "get out," and when they did they were struck on the head and body with butts of pistols.

Harraby said he remembered no more until he felt intense pain. He found his clothing afire and the room ablaze. Pugh lay beside him. He shook him, and, in their misery, they tore off their clothing.

The flames leaped about them, they said, and they managed to crawl to a

window and fall several feet to the lawn. Still suffering, they reached the road and called to men to extinguish the fire, and collapsed. A policeman found them.

**Seek Suspected Men.**  
"The Kid! The Kid!" whispered by Harraby in his agony before he died.

**Sequel to Kiss**  
Camden, N. J.—A kiss he stole 32 years ago had its sequel when James C. Angus, eighty-six, obtained a license to marry Mrs. Elizabeth Taylor, seventy-two.

**Hitting the Expert**  
New York.—Archibald C. Weeks, a sanitation expert, was cut off in the will of his wife because he failed to keep his promise to remove a pile of rubbish from their back yard.

**Venerable Student**  
Montreal, Quebec.—J. P. B. Casgrain, seventy-one, engineer and senator, is enrolled as a student at McGill university. He desires to brush up on his chemistry.

**Most of Them Fall**  
New York.—Pearl Doles Bell, novelist, frequently said she knew too much about love to succumb to it. Now she is on a honeymoon with Gilbert E. Rubens.

**A Sticky Wash**  
Watertown, N. Y.—Offices using glue and liquid soap that look alike take warning! An employee of a local newspaper poured glue into the soap containers, by mistake, of course. The first man to wash his hands discovered the error.

**Highest Character**  
The greatest man is he who chooses the right with invincible resolution, who resists the sorest temptations from within and without; who bears the heaviest burdens cheerfully; who is the calmest in storms and whose reliance on truth or virtue or God, is the most unflinching.—Canning.

**Real Help**  
Stobbs—"That girl does a lot of sitting about helping the poor. I don't suppose she really does any 'charitable work'?" Stobbs—"Well, once heard of a starving family and then a book called 'One Hundred Ways of Using a Chafing Dish.'"

**Fearful Instructions**  
The cook book which advertises "concrete rules for making blouses has sometimes been taken too literally.—Pathfinder Magazine.
