

Please be it further noted that Commissioner D. Joy would like the following included in the June 19 2023 minutes:

It is being noted that Commissioner Purzycki took EA48 out of service by removing its radios without consulting the board per procedure, after it was already voted on in a prior meeting that we would keep EA48 in service so we could get the body work done to ladder 49 so we would not be without a ladder truck during the body work.

Additionally, Commissioner Purzycki was spoken to AGAIN, as this is not the first time he has gone around the board and made decisions unlawfully, per our procedure, regarding purchasing, apparatus etc.
