

How To Read Your Meter

The meter is read from left to right while you are looking at the face of the meter. Three Oaks Water Supply Corp rates are calculated in 1000 gallon increments. Round your reading to the nearest 1000 gallons. The meter records usage in 10 gallon increments. The rate flow indicator will register 10 gallons with each rotation thus causing the 10's of gallons to roll by one number. The zero indicator does not move but is included in your reading. This is not a difficult process but if you need assistance we will be glad to help. Please call us at 830-391-2198.

Also please note that the leak detector determine if you have a leak in your suspect a higher than normal meter potential leak. Turn off all sources of wait about 10 minutes. Then look at the meter and if it is spinning you may It must be spinning complete water usage. The faster the spinning consumption. It is normal for the leak directions.

dial may help you service line. If you reading check for a water in your home and the leak detector dial on have a leak in your line. revolutions to register the greater the detector to move in both
