APPENDIX A

BOARDING STANDARD

The provisions contained in this appendix are not mandatory unless specifically referenced in the adopting ordinance.

User note:

About this appendix: Appendix A provides minimum specifications for boarding a structure. This can be utilized by a jurisdiction as a set of minimum requirements in order to result in consistent boarding quality. These requirements also provide a reasonable means to eliminate having to approve numerous methods or materials for the boarding and securing of a structure. It is important to note that the provisions of Appendix A are not mandatory unless specifically referenced in the adopting ordinance of the authority having jurisdiction.

A101 GENERAL

A101.1 General. Windows and doors shall be boarded in an *approved* manner to prevent entry by unauthorized persons and shall be painted to correspond to the color of the existing structure.

A102 MATERIALS

A102.1 Boarding sheet material. Boarding sheet material shall be minimum $\frac{1}{2}$ -inch-thick (12.7 mm) wood structural panels complying with the *International Building Code*.

A102.2 Boarding framing material. Boarding framing material shall be minimum nominal 2-inch by 4-inch (51 mm by 102 mm) solid sawn lumber complying with the *International Building Code*.

A102.3 Boarding fasteners. Boarding fasteners shall be minimum $\frac{3}{8}$ -inch-diameter (9.5 mm) carriage bolts of such a length as required to penetrate the assembly and as required to adequately attach the washers and nuts. Washers and nuts shall comply with the *International Building Code*.

A103 INSTALLATION

A103.1 Boarding installation. The boarding installation shall be in accordance with Figures A103.1(1) and A103.1(2) and Sections A103.2 through A103.5.

A103.2 Boarding sheet material. The boarding sheet material shall be cut to fit the door or window opening neatly or shall be cut to provide an equal overlap at the perimeter of the door or window.

A103.3 Windows. The window shall be opened to allow the carriage bolt to pass through or the window sash shall be removed and stored. The 2-inch by 4-inch (51 mm by 102 mm) strong back framing material shall be cut minimum 2 inches (51 mm) wider than the window opening and shall be placed on the inside of the window opening 6 inches (152 mm) minimum above the bottom and below the top of the window opening. The framing and boarding shall be predrilled. The assembly shall be aligned and the bolts, washers and nuts shall be installed and secured.

A103.4 Door walls. The door opening shall be framed with minimum 2-inch by 4-inch (51 mm by 102 mm) framing material secured at the entire perimeter and vertical members at a maximum of 24 inches (610 mm) on center. Blocking shall also be secured at a maximum of 48 inches (1219 mm) on center vertically. Boarding sheet material shall be secured with screws and nails alternating every 6 inches (152 mm) on center.

A103.5 Doors. Doors shall be secured by the same method as for windows or door openings. One door to the structure shall be available for authorized entry and shall be secured and locked in an *approved* manner.

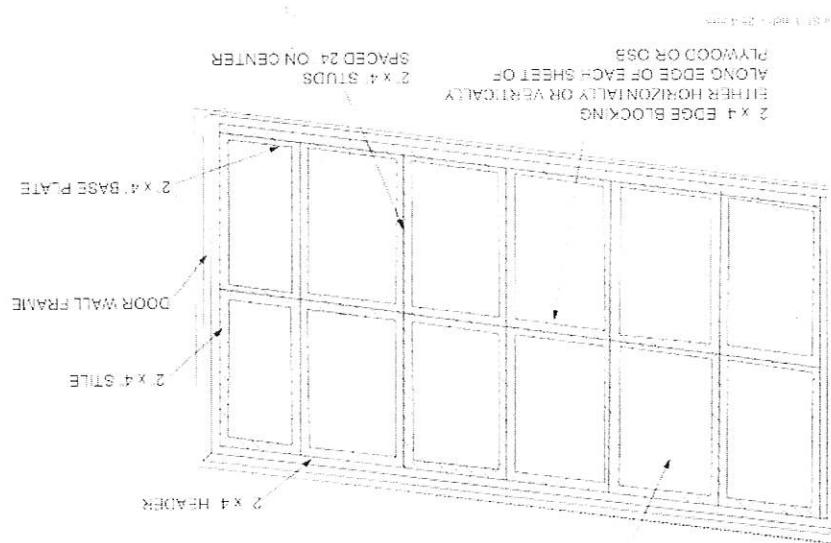

A104 REFERENCED STANDARD

A104.1 Referenced standards. Table A104.1 lists the standard that is referenced in various sections of this appendix. The standard is listed herein by the standard identification, the effective date and title and the section or sections of this document that reference the standard. The application of the referenced standards shall be as specified in Section 102.8.

**TABLE A104.1

For SI: 1 inch = 25.4 mm.

Bolts shall be long enough to extend from the exterior plywood through the interior plywood and strong backs and fastened from the interior with a nut.

Bolts shall be long enough to extend from the exterior plywood through the interior plywood and strong backs and fastened from the interior with a nut.

APPENDIX B

BOARD OF APPEALS

The provisions contained in this appendix are not mandatory unless specifically referenced in the adopting ordinance.

User note:

About this appendix: Appendix B provides criteria for Board of Appeals members. Also provided are procedures by which the Board of Appeals should conduct its business.

Code development reminder: Code change proposals to this appendix will be considered by the Administrative Code Development Committee during the 2022 (Group B) Code Development Cycle.

SECTION B101 GENERAL

B101.1 Scope. A board of appeals shall be established within the jurisdiction for the purpose of hearing applications for modification of the requirements of this code pursuant to the provisions of Section 107 (Means of Appeals). The board shall be established and operated in accordance with this section, and shall be authorized to hear evidence from appellants and the code official pertaining to the application and intent of this code for the purpose of issuing orders pursuant to these provisions.

B101.2 Application for appeal. Any person shall have the right to appeal a decision of the *code official* to the board. An application for appeal shall be based on a claim that the intent of this code or the rules legally adopted hereunder have been incorrectly interpreted, the provisions of this code do not fully apply or an equally good or better form of construction is proposed. The application shall be filed on a form obtained from the *code official* within 20 days after the notice was served.

B101.2.1 Limitation of authority. The board shall not have authority to waive requirements of this code or interpret the administration of this code.

B101.2.2 Stays of enforcement. Appeals of notice and orders, other than *Imminent Danger* notices, shall stay the enforcement of the notice and order until the appeal is heard by the board.

B101.3 Membership of the board. The board shall consist of five voting members appointed by the chief appointing authority of the jurisdiction. Each member shall serve for [INSERT NUMBER OF YEARS] years or until a successor has been appointed. The board member's terms shall be staggered at intervals, so as to provide continuity. The *code official* shall be an ex officio member of said board but shall not vote on any matter before the board.

B101.3.1 Qualifications. The board shall consist of five individuals, who are qualified by experience and training to pass on matters pertaining to building construction and are not employees of the jurisdiction.

B101.3.2 Alternate members. The chief appointing authority is authorized to appoint two alternate members who shall be called by the board chairperson to hear appeals during the absence or disqualification of a

member. Alternate members shall possess the qualifications required for board membership, and shall be appointed for the same term or until a successor has been appointed.

B101.3.3 Vacancies. Vacancies shall be filled for an unexpired term in the same manner in which original appointments are required to be made.

B101.3.4 Chairperson. The board shall annually select one of its members to serve as chairperson.

B101.3.5 Secretary. The chief appointing authority shall designate a qualified clerk to serve as secretary to the board. The secretary shall file a detailed record of all proceedings which shall set forth the reasons for the board's decision, the vote of each member, the absence of a member and any failure of a member to vote.

B101.3.6 Conflict of interest. A member with any personal, professional or financial interest in a matter before the board shall declare such interest and refrain from participating in discussions, deliberations and voting on such matters.

B101.3.7 Compensation of members. Compensation of members shall be determined by law.

B101.3.8 Removal from the board. A member shall be removed from the board prior to the end of their terms only for cause. Any member with continued absence from regular meeting of the board may be removed at the discretion of the chief appointing authority.

B101.4 Rules and procedures. The board shall establish policies and procedures necessary to carry out its duties consistent with the provisions of this code and applicable state law. The procedures shall not require compliance with strict rules of evidence, but shall mandate that only relevant information be presented.

B101.5 Notice of meeting. The board shall meet upon notice from the chairperson, within 10 days of the filing of an appeal or at stated periodic intervals.

B101.5.1 Open hearing. All hearings before the board shall be open to the public. The appellant, the appellant's representative, the *code official* and any person whose interests are affected shall be given an opportunity to be heard.

B101.8 Court review. Any person, whether or not a previous party of the appeal, shall have the right to apply to the appropriate court for a writ of certiorari to correct errors of law. Application for review shall be made in the manner and time required by law following the filing of the decision in the office of the chief administrative officer.

B101.7.2 Administration. The code official shall take immediate action in accordance with the decision of the board.

B101.7.1 Resolution. The decision of the board shall be written in the office of the code official within three days and shall be open to the public for inspection. A certified copy shall be furnished to the appellant or the applicant's representative and to the code official.

B101.7 Board decision. The board shall only modify or reverse the decision of the code official by a concurring vote of three or more members.

B101.6 Legal counsel. The jurisdiction shall furnish legal counsel to the board to provide members with general legal advice concerning matters before them for consideration.

B101.5.3 Postponed hearing. When five members are not present to hear an appeal, either the appellant or the appelleant's representative shall have the right to request a postponement of the hearing.

B101.5.2 Quorum. Three members of the board shall constitute a quorum.

B101.5.3 Postponed hearing. When five members are not present to hear an appeal, either the appellant or the appelleant's representative shall have the right to request a postponement of the hearing.

CHAPTER 3

GENERAL REQUIREMENTS

User note:

About this chapter: Chapter 3 is broad in scope and includes a variety of requirements for the maintenance of exterior property areas, as well as the interior and exterior elements of the structure, that are intended to maintain a minimum level of safety and sanitation for both the general public and the occupants of a structure, and to maintain a building's structural and weather-resistance performance. Specifically, Chapter 3 contains criteria for the maintenance of building components; vacant structures and land; the safety, sanitation and appearance of the interior and exterior of structures and all exterior property areas; accessory structures; extermination of insects and rodents; access barriers to swimming pools, spas and hot tubs; vehicle storage and owner/occupant responsibilities.

SECTION 301

GENERAL

301.1 Scope. The provisions of this chapter shall govern the minimum conditions and the responsibilities of persons for maintenance of structures, equipment and *exterior property*.

301.2 Responsibility. The *owner* of the *premises* shall maintain the structures and *exterior property* in compliance with these requirements, except as otherwise provided for in this code. A person shall not occupy as *owner-occupant* or permit another person to occupy *premises* that are not in a sanitary and safe condition and that do not comply with the requirements of this chapter. *Occupants of a dwelling unit, rooming unit or housekeeping unit* are responsible for keeping in a clean, sanitary and safe condition that part of the *dwelling unit, rooming unit, housekeeping unit or premises* they occupy and control.

301.3 Vacant structures and land. Vacant structures and *premises* thereof or vacant land shall be maintained in a clean, safe, secure and sanitary condition as provided herein so as not to cause a blighting problem or adversely affect the public health or safety.

SECTION 302

EXTERIOR PROPERTY AREAS

302.1 Sanitation. *Exterior property* and *premises* shall be maintained in a clean, safe and sanitary condition. The *occupant* shall keep that part of the *exterior property* that such *occupant* occupies or controls in a clean and sanitary condition.

302.2 Grading and drainage. *Premises* shall be graded and maintained to prevent the erosion of soil and to prevent the accumulation of stagnant water thereon, or within any *structure* located thereon.

Exception: Approved retention areas and reservoirs.

302.3 Sidewalks and driveways. Sidewalks, walkways, stairs, driveways, parking spaces and similar areas shall be kept in a proper state of repair, and maintained free from hazardous conditions.

302.4 Weeds. *Premises* and *exterior property* shall be maintained free from weeds or plant growth in excess of [JURISDICTION TO INSERT HEIGHT IN INCHES]. Noxious

weeds shall be prohibited. Weeds shall be defined as all grasses, annual plants and vegetation, other than trees or shrubs provided; however, this term shall not include cultivated flowers and gardens.

Upon failure of the *owner* or agent having charge of a property to cut and destroy weeds after service of a notice of violation, they shall be subject to prosecution in accordance with Section 108.3 and as prescribed by the authority having jurisdiction. Upon failure to comply with the notice of violation, any duly authorized employee of the jurisdiction or contractor hired by the jurisdiction shall be authorized to enter upon the property in violation and cut and destroy the weeds growing thereon, and the costs of such removal shall be paid by the *owner* or agent responsible for the property.

302.5 Rodent harborage. Structures and *exterior property* shall be kept free from rodent harborage and *infestation*. Where rodents are found, they shall be promptly exterminated by *approved* processes that will not be injurious to human health. After *pest elimination*, proper precautions shall be taken to eliminate rodent harborage and prevent reinestation.

302.6 Exhaust vents. Pipes, ducts, conductors, fans or blowers shall not discharge gases, steam, vapor, hot air, grease, smoke, odors or other gaseous or particulate wastes directly on abutting or adjacent public or private property or that of another *tenant*.

302.7 Accessory structures. Accessory structures, including detached garages, fences and walls, shall be maintained structurally sound and in good repair.

302.8 Motor vehicles. Except as provided for in other regulations, inoperative or unlicensed motor vehicles shall not be parked, kept or stored on any *premises*, and vehicles shall not at any time be in a state of major disassembly, disrepair, or in the process of being stripped or dismantled. Painting of vehicles is prohibited unless conducted inside an *approved* spray booth.

Exception: A vehicle of any type is permitted to undergo major overhaul, including body work, provided that such work is performed inside a *structure* or similarly enclosed area designed and *approved* for such purposes.

302.9 Defacement of property. A person shall not willfully or wantonly damage, mutilate or deface any exterior surface

304.2 Protective treatment. Exterior surfaces, including but not limited to, doors, door and window frames, cornices, trim, balustrades, decks and fences, shall be maintained in good condition. Exterior wood surfaces, other than porches, trim, balustrades, decks and fences, shall be minimum-preserved to protect them from water damage.

2. Demolition of unsafe conditions shall be permitted where approved by the code official.

1. Where substantiated otherwise by an approved method.

Exceptions:

13. Chimneys, cooling towers, smokestacks and similar structures and resist all load effects.

12. Exterior stairs, decks, porches, balconies and all similar appurtenances attached thereto, including railings, guards and handrails, are not structurally sound, not properly anchored or that are anchored with similar connections not capable of supporting all nominal loads and resist all load effects.

11. Overhanging extensions or projections including, but not limited to, trash chutes, canopies, marqueses, signs, awnings, fire escapes, stairs and ducts not properly anchored or that are anchored with connections not capable of supporting all nominal loads and resist all load effects.

10. Veneer, cornices, belt courses, corbels, trim, wall facings and similar decorative features not properly anchored or that are anchored with connections not capable of supporting all nominal loads and resist all load effects.

9. Flooring and flooring components with defects that affect serviceability or flooring components that show signs of deterioration or fatigue, are not properly anchored or are incapable of supporting all nominal loads and resist all load effects.

8. Roofing or roofing components that have defects that admit rain, roof surfaces with inadequate drainage, or any portion of the roof framing that is not in good repair with signs of deterioration, not properly anchored or that have defects that have effects of all nominal loads and resist all load effects.

7. Exterior walls that are not properly anchored to supporting materials, cracks or breaks and loose or free of holes, cracks or breaks and loose or rotting and supported elements or are not firmly supported by footings, are not properly anchored or are not capable of supporting all nominal loads and resist-

6. Foundation systems that are not firmly supported by footings, are not properly anchored or are not capable of supporting all nominal loads and resist all load effects.

5. Structural members that have evidence of deterioration, weather resistant or water tight.

4. Sliding and masonry joints including joints between the building envelope and the perimeter of windows, doors and skylights are not main-

tained, weather resistant or water tight.

3. Structures or components thereof that have

reached their limit state.

2. The anchorage of the floor or roof to walls or columns, and of walls and columns to foundations is not capable of resisting all nominal loads or

1. Exceeded by nominal loads, the load effects of the exceeded strength.

for existing buildings:

304.1.1 Unsafe conditions. The following conditions shall be determined as unsafe and shall be repaired or replaced to comply with the International Building Code as required

not to pose a threat to the public health, safety or welfare. Tained in good repair, structurally sound and sanitary so as to pose a threat to the public health, safety or welfare.

EXTERIOR STRUCTURE

SECTION 304

provisions of this section.

Exception: Spas or hot tubs with ASTM F1346 shall be exempt from the

effectiveness as a safety barrier.

removed, replaced or changed in a manner that reduces its effectiveness. An existing pool enclosure shall not be from the gatepost. A gatepost an open position of 6 inches (152 mm) when released from the gate will positively close and latch maintained such that the gate will latching gates shall be of the gate. Self-closing and self-latching gates shall be located on the pool side is less than 54 inches (1372 mm) above the bottom of the spa, containing water more than 24 inches (610 mm) in depth shall be completely surrounded by a fence or barrier not less than 48 inches (1219 mm) in height above the finished ground level measured on the side of the barrier away from the pool. Gates and doors in such barriers shall be self-closing and self-latching. Where the self-latching device is less than 48 inches (1219 mm) in height above the ground level measured on the side of the barrier not less than 24 inches (610 mm) in height above the finished ground level measured on the side of the barrier shall be clean and sanitary condition, and in good repair.

303.1 Swimming Pools, Spas and Hot Tubs

It shall be the responsibility of the owner to restore said surface to an approved state of maintenance and repair.

by placing thereon any marking, carving or graffiti.

of any structure or building on any private or public property

ment. Peeling, flaking and chipped paint shall be eliminated and surfaces repainted. Siding and masonry joints, as well as those between the building envelope and the perimeter of windows, doors and skylights, shall be maintained weather resistant and water tight. Metal surfaces subject to rust or corrosion shall be coated to inhibit such rust and corrosion, and surfaces with rust or corrosion shall be stabilized and coated to inhibit future rust and corrosion. Oxidation stains shall be removed from exterior surfaces. Surfaces designed for stabilization by oxidation are exempt from this requirement.

[F] 304.3 Premises identification. Buildings shall have *approved* address numbers placed in a position to be plainly legible and visible from the street or road fronting the property. These numbers shall contrast with their background. Address numbers shall be Arabic numerals or alphabet letters. Numbers shall be not less than 4 inches (102 mm) in height with a minimum stroke width of 0.5 inch (12.7 mm).

304.4 Structural members. Structural members shall be maintained free from *deterioration*, and shall be capable of safely supporting the imposed dead and live loads.

304.5 Foundation walls. Foundation walls shall be maintained plumb and free from open cracks and breaks and shall be kept in such condition so as to prevent the entry of rodents and other pests.

304.6 Exterior walls. Exterior walls shall be free from holes, breaks, and loose or rotting materials; and maintained weatherproof and properly surface coated where required to prevent *deterioration*.

304.7 Roofs and drainage. The roof and flashing shall be sound, tight and not have defects that admit rain. Roof drainage shall be adequate to prevent dampness or *deterioration* in the walls or interior portion of the *structure*. Roof drains, gutters and downspouts shall be maintained in good repair and free from obstructions. Roof water shall not be discharged in a manner that creates a public nuisance.

304.8 Decorative features. Cornices, belt courses, corbels, terra cotta trim, wall facings and similar decorative features shall be maintained in good repair with proper *anchorage* and in a safe condition.

304.9 Overhang extensions. Overhang extensions including, but not limited to, canopies, marquees, signs, metal awnings, fire escapes, standpipes and exhaust ducts shall be maintained in good repair and be properly *anchored* so as to be kept in a sound condition. Where required, all exposed surfaces of metal or wood shall be protected from the elements and against decay or rust by periodic application of weather-coating materials, such as paint or similar surface treatment.

304.10 Stairways, decks, porches and balconies. Every exterior stairway, deck, porch and balcony, and all appurtenances attached thereto, shall be maintained structurally sound, in good repair, with proper *anchorage* and capable of supporting the imposed loads.

304.11 Chimneys and towers. Chimneys, cooling towers, smoke stacks, and similar appurtenances shall be maintained structurally safe and sound, and in good repair. Exposed

surfaces of metal or wood shall be protected from the elements and against decay or rust by periodic application of weather-coating materials, such as paint or similar surface treatment.

304.12 Handrails and guards. Every handrail and *guard* shall be firmly fastened and capable of supporting normally imposed loads and shall be maintained in good condition.

304.13 Window, skylight and door frames. Every window, skylight, door and frame shall be kept in sound condition, good repair and weather tight.

304.13.1 Glazing. Glazing materials shall be maintained free from cracks and holes.

304.13.2 Openable windows. Every window, other than a fixed window, shall be easily openable and capable of being held in position by window hardware.

304.14 Insect screens. During the period from **[DATE]** to **[DATE]**, every door, window and other outside opening required for *ventilation* of habitable rooms, food preparation areas, food service areas or any areas where products to be included or utilized in food for human consumption are processed, manufactured, packaged or stored shall be supplied with *approved* tightly fitting screens of minimum 16 mesh per inch (16 mesh per 25 mm), and every screen door used for insect control shall have a self-closing device in good working condition.

Exception: Screens shall not be required where other *approved* means, such as air curtains or insect repellent fans, are employed.

304.15 Doors. Exterior doors, door assemblies, operator systems if provided, and hardware shall be maintained in good condition. Locks at all entrances to *dwelling units* and sleeping units shall tightly secure the door. Locks on means of egress doors shall be in accordance with Section 702.3.

304.16 Basement hatchways. Every *basement* hatchway shall be maintained to prevent the entrance of rodents, rain and surface drainage water.

304.17 Guards for basement windows. Every *basement* window that is openable shall be supplied with rodent shields, storm windows or other *approved* protection against the entry of rodents.

304.18 Building security. Doors, windows or hatchways for *dwelling units*, room units or *housekeeping units* shall be provided with devices designed to provide security for the *occupants* and property within.

304.18.1 Doors. Doors providing access to a *dwelling unit*, *rooming unit* or *housekeeping unit* that is rented, leased or let shall be equipped with a deadbolt lock designed to be readily openable from the side from which egress is to be made without the need for keys, special knowledge or effort and shall have a minimum lock throw of 1 inch (25 mm). Such deadbolt locks shall be installed according to the manufacturer's specifications and maintained in good working order. For the purpose of this section, a sliding bolt shall not be considered an acceptable deadbolt lock.

- 1.6. Adverse effects to the footing, foundation, concrete or other structural element due to the ground water table.
2. Concrete that has been subjected to any of the following conditions:
 - 2.1. *Deterioration*.
 - 2.2. *Ultimate deformation*.
 - 2.3. Fractures.
 - 2.4. Fissures.
 - 2.5. Spalling.
 - 2.6. Exposed reinforcement.
 - 2.7. *Detached*, dislodged or failing connections.
3. Aluminum that has been subjected to any of the following conditions:
 - 3.1. *Deterioration*.
 - 3.2. Corrosion.
 - 3.3. Elastic deformation.
 - 3.4. *Ultimate deformation*.
 - 3.5. Stress or strain cracks.
 - 3.6. Joint fatigue.
 - 3.7. *Detached*, dislodged or failing connections.
4. Masonry that has been subjected to any of the following conditions:
 - 4.1. *Deterioration*.
 - 4.2. *Ultimate deformation*.
 - 4.3. Fractures in masonry or mortar joints.
 - 4.4. Fissures in masonry or mortar joints.
 - 4.5. Spalling.
 - 4.6. Exposed reinforcement.
 - 4.7. *Detached*, dislodged or failing connections.
5. Steel that has been subjected to any of the following conditions:
 - 5.1. *Deterioration*.
 - 5.2. Elastic deformation.
 - 5.3. *Ultimate deformation*.
 - 5.4. Metal fatigue.
 - 5.5. *Detached*, dislodged or failing connections.
6. Wood that has been subjected to any of the following conditions:
 - 6.1. Ultimate deformation.
 - 6.2. Deterioration.
 - 6.3. Damage from insects, rodents and other vermin.
 - 6.4. Fire damage beyond charring.
 - 6.5. Significant splits and checks.
 - 6.6. Horizontal shear cracks.
 - 6.7. Vertical shear cracks.
 - 6.8. Inadequate support.
 - 6.9. *Detached*, dislodged or failing connections.

6.10. Excessive cutting and notching.

Exceptions:

1. Where substantiated otherwise by an *approved* method.
2. Demolition of unsafe conditions shall be permitted where *approved* by the *code official*.

SECTION 307 HANDRAILS AND GUARDRAILS

307.1 General. Every exterior and interior flight of stairs having more than four risers shall have a handrail on one side of the stair and every open portion of a stair, landing, balcony, porch, deck, ramp or other walking surface that is more than 30 inches (762 mm) above the floor or grade below shall have *guards*. Handrails shall be not less than 30 inches (762 mm) in height or more than 42 inches (1067 mm) in height measured vertically above the nosing of the tread or above the finished floor of the landing or walking surfaces. *Guards* shall be not less than 30 inches (762 mm) in height above the floor of the landing, balcony, porch, deck, or ramp or other walking surface.

Exception: *Guards* shall not be required where exempted by the adopted building code.

SECTION 308 RUBBISH AND GARBAGE

308.1 Accumulation of rubbish or garbage. *Exterior property* and *premises*, and the interior of every *structure*, shall be free from any accumulation of *rubbish* or *garbage*.

308.2 Disposal of rubbish. Every *occupant* of a *structure* shall dispose of all *rubbish* in a clean and sanitary manner by placing such *rubbish* in *approved* containers.

308.2.1 Rubbish storage facilities. The *owner* of every occupied *premises* shall supply *approved* covered containers for *rubbish*, and the *owner* of the *premises* shall be responsible for the removal of *rubbish*.

308.2.2 Refrigerators. Refrigerators and similar equipment not in operation shall not be discarded, abandoned or stored on *premises* without first removing the doors.

308.3 Disposal of garbage. Every *occupant* of a *structure* shall dispose of *garbage* in a clean and sanitary manner by placing such *garbage* in an *approved* *garbage disposal facility* or *approved* *garbage containers*.

308.3.1 Garbage facilities. The *owner* of every *dwelling* shall supply one of the following: an *approved* mechanical food waste grinder in each *dwelling unit*; an *approved* incinerator unit in the *structure* available to the *occupants* in each *dwelling unit*; or an *approved* leakproof, covered, outside *garbage container*.

308.3.2 Containers. The *operator* of every establishment producing *garbage* shall provide, and at all times cause to be utilized, *approved* leakproof containers provided with close-fitting covers for the storage of such materials until removed from the *premises* for disposal.

PEST ELIMINATION
SECTION 309

- 309.1 Infestation.** Structures shall be kept free from insects and rodent infestation. Structures in which insects or rodents are found shall be promptly eliminated by approved processes that will not be injurious to human health. After pest elimination, proper precautions shall be taken to prevent reinfestation.
- 309.2 Owner.** The owner of any structure shall be responsible for pest elimination within the structure prior to renting or leasing the structure.
- 309.3 Single occupant.** The occupant of a one-family dwelling or of a single-tenant nonresidential structure shall be responsible for pest elimination on the premises.
- 309.4 Multiple occupancy.** The owner of a structure containing two or more dwelling units, a multiple occupancy, a rooming house or a nonresidential structure shall be responsible for pest elimination in the public or shared areas of the structure and exterior property. If infestation is caused by failure of an occupant to prevent such infestation in the area occupied, the occupant and owner shall be responsible for pest elimination.
- 309.5 Occupant.** The occupant of any structure shall be responsible for the continued rodent and pest-free condition of the structure.
- Exception:** Where the infestations are caused by defects in the structure, the owner shall be responsible for pest elimination.

CHAPTER 4

LIGHT, VENTILATION AND OCCUPANCY LIMITATIONS

User note:

About this chapter: Chapter 4 sets forth requirements to establish the minimum environment for occupiable and habitable buildings by establishing the minimum criteria for light and ventilation and identifying occupancy limitations including minimum room width and area, minimum ceiling height and restrictions to prevent overcrowding.

SECTION 401 GENERAL

401.1 Scope. The provisions of this chapter shall govern the minimum conditions and standards for light, *ventilation* and space for occupying a *structure*.

401.2 Responsibility. The *owner* of the *structure* shall provide and maintain light, *ventilation* and space conditions in compliance with these requirements. A person shall not occupy as *owner-occupant*, or permit another person to occupy, any *premises* that do not comply with the requirements of this chapter.

401.3 Alternative devices. In lieu of the means for natural light and *ventilation* herein prescribed, artificial light or mechanical *ventilation* complying with the *International Building Code* shall be permitted.

SECTION 402 LIGHT

402.1 Habitable spaces. Every *habitable space* shall have not less than one window of *approved* size facing directly to the outdoors or to a court. The minimum total glazed area for every *habitable space* shall be 8 percent of the floor area of such room. Wherever walls or other portions of a *structure* face a window of any room and such obstructions are located less than 3 feet (914 mm) from the window and extend to a level above that of the ceiling of the room, such window shall not be deemed to face directly to the outdoors nor to a court and shall not be included as contributing to the required minimum total window area for the room.

Exception: Where natural light for rooms or spaces without exterior glazing areas is provided through an adjoining room, the unobstructed opening to the adjoining room shall be not less than 8 percent of the floor area of the interior room or space, or not less than 25 square feet (2.33 m^2), whichever is greater. The exterior glazing area shall be based on the total floor area being served.

402.2 Common halls and stairways. Every common hall and stairway in residential *occupancies*, other than in one- and two-family dwellings, shall be lighted at all times with not less than a 60-watt standard incandescent light bulb for each 200 square feet (19 m^2) of floor area or equivalent illumination, provided that the spacing between lights shall not be greater than 30 feet (9144 mm). In other than residential occupancies, interior and exterior means of egress, stairways shall be illuminated at all times the building space served by

the means of egress is occupied with not less than 1 footcandle (11 lux) at floors, landings and treads.

402.3 Other spaces. Other spaces shall be provided with natural or artificial light sufficient to permit the maintenance of sanitary conditions, and the safe *occupancy* of the space and utilization of the appliances, equipment and fixtures.

SECTION 403 VENTILATION

403.1 Habitable spaces. Every *habitable space* shall have not less than one openable window. The total openable area of the window in every room shall be equal to not less than 45 percent of the minimum glazed area required in Section 402.1.

Exception: Where rooms and spaces without openings to the outdoors are ventilated through an adjoining room, the unobstructed opening to the adjoining room shall be not less than 8 percent of the floor area of the interior room or space, but not less than 25 square feet (2.33 m^2). The *ventilation* openings to the outdoors shall be based on a total floor area being ventilated.

403.2 Bathrooms and toilet rooms. Every *bathroom* and *toilet room* shall comply with the *ventilation* requirements for *habitable spaces* as required by Section 403.1, except that a window shall not be required in such spaces equipped with a mechanical *ventilation* system. Air exhausted by a mechanical *ventilation* system from a *bathroom* or *toilet room* shall discharge to the outdoors and shall not be recirculated.

403.3 Cooking facilities. Unless *approved* through the certificate of *occupancy*, cooking shall not be permitted in any *rooming unit* or dormitory unit, and a cooking facility or appliance shall not be permitted to be present in the *rooming unit* or dormitory unit.

Exceptions:

1. Where specifically *approved* in writing by the *code official*.
2. Devices such as coffee pots and microwave ovens shall not be considered cooking appliances.

403.4 Process ventilation. Where injurious, toxic, irritating or noxious fumes, gases, dusts or mists are generated, a local exhaust *ventilation* system shall be provided to remove the contaminating agent at the source. Air shall be exhausted to the exterior and not be recirculated to any space.

2021 INTERNATIONAL PROPERTY MAINTENANCE CODE

- 404.4.3 **Water accessibility.** Every bedroom shall have access to not less than one water closet and one lavatory located in the same story as the bedroom or an adjacent story.
- 404.4.4 **Prohibited occupancy.** Kitchens and nonhabitable spaces shall not be used for sleeping purposes.
- 404.4.5 **Other requirements.** Bedrooms shall comply with the applicable provisions of this code including, but not limited to, the light, ventilation, room area, ceiling height and room width requirements of this chapter.
- 404.5 **Overcrowding.** Dwelling units shall not be overcrowded by more occupants than permitted by the minimum area requirements of Table 404.5.

TABLE 404.5
MINIMUM AREA REQUIREMENTS

SPACE			MINIMUM AREA REQUIREMENTS		
1-2 occupants	3-5 occupants	6 or more occupants	Living room ^{a,b}	No. bedrooms	Bedrooms
120	120	150	120	80	100

a. See Section 404.5.1 for combined living room/dining room spaces.
 b. See Section 404.5.1 for limiting the minimum area occupied by a family area for sleeping purposes.

- 404.5.1 **Sleeping areas.** The minimum occupancy area required by Table 404.5 shall not be included as a sleeping area in determining the minimum occupancy area for combined room spaces. Combined living room and dining room spaces shall comply with the requirements of Table 404.5 if the total area is equal to that required for separate rooms and if the space is located so as to function as a combination living room/dining room.

- 404.6 **Efficiency unit.** Nothing in this section shall prohibit an efficiency living unit from meeting the following requirements:

2. The unit shall be provided with a kitchen sink, cooktop, range apppliance and refrigerator facilities, each having a minimum clear working space of 30 inches.

1. A unit occupied by not more than one occupant shall have a minimum clear floor area of 120 square feet (11.2 m²). A unit occupied by not more than two occupants shall have a minimum clear floor area of 220 square feet (20.4 m²). A unit occupied by three occupants shall have a minimum clear floor area of 320 square feet (29.7 m²). These required areas shall be exclusive of the areas required by Items 2 and 3.

Exceptions: Units that contain fewer than two bedrooms.

bedrooms. Bedrooms shall not serve as the only means of access from other habitable spaces.

constitute the only means of access to other bedrooms for each occupant thereof.

404.4.1 **Room area.** Every living room shall contain not less than 120 square feet (11.2 m²) and every bedroom shall contain not less than 70 square feet (6.5 m²) and every person shall contain not less than 50 square feet (4.6 m²) of floor area for each occupant thereof.

404.4.2 **Access from bedrooms.** Bedrooms shall not be accessible from other habitable spaces.

404.4.3 **Minimum ceiling height.** Every bedroom and living room shall comply with the requirements of Section 404.4.1 through 404.4.5.

404.4.4 **Bedroom and living room requirements.** Every

bedroom and living room shall contain not less than the requirements of Section 404.4.1 through 404.4.5.

404.4.5 **Combined spaces.** Combined living room and

dining room spaces shall comply with the requirements of

404.4.6 **Occupancy limit.** Nothing in this section shall prohibit an efficiency living unit from meeting the following requirements:

3. Rooms occupied exclusively for sleeping, study or

similar purposes and having a sloped ceiling over

all or part of the room, with a minimum clear ceil-

ing height of 7 feet (214 mm) over not less than

one-third of the required minimum floor area. In

similar ceiling height of 5 feet (1524 mm) shall be

clear portions of the floor area with a minimum

clear height of 6 feet 8 inches (2033 mm) with a minimum

ceiling height of 6 feet 8 inches (1932 mm) under

those portions of the floor area of such rooms, only

calculating the floor area of the room, with a minimum clear ceiling height of 5 feet (1524 mm) shall be

clear portions of the required minimum floor area. In

similar ceiling height of 5 feet (1524 mm) below the

required minimum ceiling height of 6 feet (1829 mm)

and above the required minimum ceiling height of 6 feet (1829 mm) below the required minimum ceiling height of 5 feet (1524 mm).

404.3 **Minimum ceiling heights.** Habitability spaces, hallways, closets and walls shall have a minimum clear ceiling height of 7 feet (2134 mm).

404.2 **Minimum room widths.** A habitable room, other

providing privacy and be separate from other adjoining

units, rooming units and dormitory units shall be arranged to

provide privacy and be separate from other adjoining

units, habitable rooms, bathrooms, laundry areas, bath-rooms, toilet rooms, shower stalls and other

apartments or counterfronts and walls.

404.1 **Privacy.** Dwelling units, hotel units, housekeeping

units, rooming units and dormitory units shall have a minimum clear ceiling height of 7 feet (2134 mm).

403.5 **Clothes dryer exhaust.** Clothes dryer exhaust

systems shall be independent of all other systems and shall

be exhausted outside the structure in accordance with the

manufacturer's instructions.

403.6 **Ventilation and occupancy limitations**

(762 mm) in front. Light and *ventilation* conforming to this code shall be provided.

3. The unit shall be provided with a separate *bathroom* containing a water closet, lavatory and bathtub or shower.
4. The maximum number of *occupants* shall be three.

404.7 Food preparation. Spaces to be occupied for food preparation purposes shall contain suitable space and equipment to store, prepare and serve foods in a sanitary manner. There shall be adequate facilities and services for the sanitary disposal of food wastes and refuse, including facilities for temporary storage.

CHAPTER 5

PLUMBING FACILITIES AND FIXTURE REQUIREMENTS

User note:

About this chapter: Chapter 5 establishes minimum sanitary and clean conditions in occupied buildings by containing requirements for the installation, maintenance and location of plumbing systems and facilities, including the water supply system, water heating appliances, sewage disposal systems and related plumbing fixtures. Chapter 5 includes requirements for providing potable water to a building and the basic fixtures to effectively utilize and dispose of that water.

SECTION 501 GENERAL

501.1 Scope. The provisions of this chapter shall govern the minimum plumbing systems, facilities and plumbing fixtures to be provided.

501.2 Responsibility. The *owner* of the *structure* shall provide and maintain such plumbing facilities and plumbing fixtures in compliance with these requirements. A person shall not occupy as *owner-occupant* or permit another person to occupy any *structure* or *premises* that does not comply with the requirements of this chapter.

SECTION 502 REQUIRED FACILITIES

[P] **502.1 Dwelling units.** Every *dwelling unit* shall contain its own bathtub or shower, lavatory, water closet and kitchen sink that shall be maintained in a sanitary, safe working condition. The lavatory shall be placed in the same room as the water closet or located in close proximity to the door leading directly into the room in which such water closet is located. A kitchen sink shall not be used as a substitute for the required lavatory.

[P] **502.2 Rooming houses.** Not less than one water closet, lavatory and bathtub or shower shall be supplied for each four *rooming units*.

[P] **502.3 Hotels.** Where private water closets, lavatories and baths are not provided, one water closet, one lavatory and one bathtub or shower having access from a public hallway shall be provided for each 10 *occupants*.

[P] **502.4 Employees' facilities.** Not less than one water closet, one lavatory and one drinking facility shall be available to employees.

[P] **502.4.1 Drinking facilities.** Drinking facilities shall be a drinking fountain, water cooler, bottled water cooler or disposable cups next to a sink or water dispenser. Drinking facilities shall not be located in *toilet rooms* or *bathrooms*.

[P] **502.5 Public toilet facilities.** Public toilet facilities shall be maintained in a safe, sanitary and working condition in accordance with the *International Plumbing Code*. Except for periodic maintenance or cleaning, public access and use shall be provided to the toilet facilities at all times during *occupancy* of the *premises*.

SECTION 503 TOILET ROOMS

[P] **503.1 Privacy.** *Toilet rooms* and *bathrooms* shall provide privacy and shall not constitute the only passageway to a hall or other space, or to the exterior. A door and interior locking device shall be provided for all common or shared *bathrooms* and *toilet rooms* in a multiple dwelling.

[P] **503.2 Location.** *Toilet rooms* and *bathrooms* serving hotel units, *rooming units* or dormitory units or *housekeeping units*, shall have access by traversing not more than one flight of stairs and shall have access from a common hall or passageway.

[P] **503.3 Location of employee toilet facilities.** Toilet facilities shall have access from within the employees' working area. The required toilet facilities shall be located not more than one story above or below the employees' working area and the path of travel to such facilities shall not exceed a distance of 500 feet (152 m). Employee facilities shall either be separate facilities or combined employee and public facilities.

Exception: Facilities that are required for employees in storage structures or kiosks, which are located in adjacent structures under the same ownership, lease or control, shall not exceed a travel distance of 500 feet (152 m) from the employees' regular working area to the facilities.

[P] **503.4 Floor surface.** In other than *dwelling units*, every *toilet room* floor shall be maintained to be a smooth, hard, nonabsorbent surface to permit such floor to be easily kept in a clean and sanitary condition.

SECTION 504 PLUMBING SYSTEMS AND FIXTURES

[P] **504.1 General.** Plumbing fixtures shall be properly installed and maintained in working order, and shall be kept free from obstructions, leaks and defects and be capable of performing the function for which such plumbing fixtures are designed. Plumbing fixtures shall be maintained in a safe, sanitary and functional condition.

[P] **504.2 Fixture clearances.** Plumbing fixtures shall have adequate clearances for usage and cleaning.

[P] **504.3 Plumbing system hazards.** Where it is found that a plumbing system in a *structure* constitutes a hazard to the *occupants* or the *structure* by reason of inadequate service,

SANITARY DRAINAGE SYSTEM

SECTION 506

[P] 506.1 General. Plumbing fixtures shall be properly connected to either a public sewer system or to an approved private sewage disposal system.

[P] 506.2 Maintenance. Every plumbing stack, vent, waste and sewer line shall be kept free from obstructions, leaks and defects.

[P] 506.3 Grease interceptors. Grease interceptors and automatic grease removal devices shall be maintained in accordance with this code and the manufacturer's instructions.

[P] 506.4 Drains. Drains of roofs and paved areas, yards and courts, and other open areas on the premises shall not be discharaged in a manner that creates a public nuisance.

STORM DRAINAGE

SECTION 507

[P] 507.1 General. Drainage of roofs and paved areas, yards and courts, and other open areas on the premises shall not be discharaged in a manner that creates a public nuisance.

[P] 507.2 Storm drainage. Storm drainage shall be available for inspection by the code official.

[P] 507.3 Storm drainage. Storm drainage shall be available for inspection by the code official.

Inadequate venting, cross connection, backflow prevention, improper installation, deterioration or damage or for similar reasons, the code official shall require the defects to be corrected to eliminate the hazard.

WATER SYSTEM

SECTION 505

[P] 505.1 General. Every sink, lavatory, bathtub, or shower, drinking fountain, water closet or other plumbing fixture

shall be properly connected to either a public water system

or to an approved private water system. Kitchen sinks, lava-

tubs, laundry facilities, bathtubs and showers shall be

supplied with hot or temperate and cold running water in

spherical-type vacuum breaker or an approved atmospheric

and leak in place, shall be protected by an approved atmo-

tic pressure device and appropriate fixtures in sufficient volume and

fixtures and devices and apparatuses in plumbing

and maintained to provide a supply of water to be drawn at every

providing an adequate amount of water to be drawn at every

reduced sink, lavatory, bathtub, shower and laundry facility

at a temperature not less than 110°F (43°C). A gas-burning

water heater not be located in any bathroom, toilet

room, bedroom or other occupied room normally kept

closed, unless adequate combustion air is provided. An

approved combination temperate and pressure-relief valve

and relief valve discharge pipe shall be properly installed

and maintained on water heaters.

[P] 505.2 Contamination. The water supply system shall be installed

at a height free from contamination.

[P] 505.3 Supply. The water supply system shall be installed

at pressures adequate to enable the fixtures to function prop-

erly, safely, and free from defects and leaks.

[P] 505.4 Water heating facilities. Water heating facilities

shall be properly installed, maintained and capable of

providing an adequate amount of water to be drawn at every

reduced sink, lavatory, bathtub, shower and laundry facility

at a temperature not less than 110°F (43°C). A gas-burning

water heater not be located in any bathroom, toilet

room, bedroom or other occupied room normally kept

closed, unless adequate combustion air is provided. An

approved combination temperate and pressure-relief valve

and relief valve discharge pipe shall be properly installed

and maintained on water heaters.

[P] 505.5 Nonpotable water reuse systems. Nonpotable

water reuse systems and rainwater collection and convey-

ance systems shall be maintained in a safe and sanitary

condition. Where such systems are not properly main-

tained, the reuse system shall be abandoned or the owner ceases

use of the system, the system shall be abandoned in accor-

dance with Section 1301.10 of the International

Plumbing Code.

[P] 505.5.1 Abandonment of systems. Where a nonpotable

water reuse system or a rainwater collection and conve-

ance system is not maintained or the owner ceases

use of the system, the system shall be abandoned in accor-

dance with Section 1301.10 of the International

Plumbing Code.

CHAPTER 6

MECHANICAL AND ELECTRICAL REQUIREMENTS

User note:

About this chapter: Chapter 6 establishes minimum performance requirements for heating, electrical and mechanical facilities serving existing structures, such as heating and air-conditioning equipment, appliances and their supporting systems; water heating equipment, appliances and systems; cooking equipment and appliances; ventilation and exhaust equipment; gas and liquid fuel distribution piping and components; fireplaces and solid fuel-burning appliances; chimneys and vents; electrical services; lighting fixtures; electrical receptacle outlets; electrical distribution system equipment, devices and wiring; and elevators, escalators and dumbwaiters.

SECTION 601 GENERAL

601.1 Scope. The provisions of this chapter shall govern the minimum mechanical and electrical facilities and equipment to be provided.

601.2 Responsibility. The *owner* of the *structure* shall provide and maintain mechanical and electrical facilities and equipment in compliance with these requirements. A person shall not occupy as *owner-occupant* or permit another person to occupy any *premises* that does not comply with the requirements of this chapter.

SECTION 602 HEATING FACILITIES

602.1 Facilities required. Heating facilities shall be provided in structures as required by this section.

602.2 Residential occupancies. Dwellings shall be provided with heating facilities capable of maintaining a room temperature of 68°F (20°C) in all habitable rooms, *bathrooms* and *toilet rooms* based on the winter outdoor design temperature for the locality indicated in Appendix D of the *International Plumbing Code*. Cooking appliances shall not be used, nor shall portable unvented fuel-burning space heaters be used, as a means to provide required heating. The installation of one or more portable space heaters shall not be used to achieve compliance with this section.

Exception: In areas where the average monthly temperature is above 30°F (-1°C), a minimum temperature of 65°F (18°C) shall be maintained.

602.3 Heat supply. Every *owner* and *operator* of any building who rents, leases or lets one or more *dwelling units* or *sleeping units* on terms, either expressed or implied, to furnish heat to the *occupants* thereof shall supply heat during the period from [DATE] to [DATE] to maintain a minimum temperature of 68°F (20°C) in all habitable rooms, *bathrooms* and *toilet rooms*.

Exceptions:

- When the outdoor temperature is below the winter outdoor design temperature for the locality, maintenance of the minimum room temperature shall not be required provided that the heating system is operating at its full design capacity. The winter

outdoor design temperature for the locality shall be as indicated in Appendix D of the *International Plumbing Code*.

- In areas where the average monthly temperature is above 30°F (-1°C), a minimum temperature of 65°F (18°C) shall be maintained.

602.4 Occupiable work spaces. Indoor occupiable work spaces shall be supplied with heat during the period from [DATE] to [DATE] to maintain a minimum temperature of 65°F (18°C) during the period the spaces are occupied.

Exceptions:

- Processing, storage and operation areas that require cooling or special temperature conditions.
- Areas in which persons are primarily engaged in vigorous physical activities.

602.5 Room temperature measurement. The required room temperatures shall be measured 3 feet (914 mm) above the floor near the center of the room and 2 feet (610 mm) inward from the center of each exterior wall.

SECTION 603 MECHANICAL EQUIPMENT

603.1 Mechanical equipment and appliances. Mechanical equipment, appliances, fireplaces, solid fuel-burning appliances, cooking appliances and water heating appliances shall be properly installed and maintained in a safe working condition, and shall be capable of performing the intended function.

603.2 Removal of combustion products. Fuel-burning equipment and appliances shall be connected to an *approved chimney* or vent.

Exception: Fuel-burning equipment and appliances that are *labeled* for unvented operation.

603.3 Clearances. Required clearances to combustible materials shall be maintained.

603.4 Safety controls. Safety controls for fuel-burning equipment shall be maintained in effective operation.

603.5 Combustion air. A supply of air for complete combustion of the fuel and for *ventilation* of the space containing the fuel-burning equipment shall be provided for the fuel-burning equipment.

605.3 **Luminaires.** Every public hall, interior staircase, toilet room, kitchen, bathroom, laundry room, boiler room and flurace room shall contain not less than one electric luminaire. Pool and spa luminaires over 15 V shall have ground fault circuit interrupter protection.

605.2 **Receptacles.** Every habitable space in a dwelling shall contain not less than two separate and remote receptacles. Every laundry area shall contain not less than one receptacle. Every bathroom shall contain not less than one receptacle or a receptacle with a ground fault circuit interrupter. Every receptacle shall be properly installed and maintained in a safe and approved manner.

605.1 **Installation.** Electrical equipment, wiring and access shall be properly installed and maintained in a safe and approved manner.

ELECTRICAL EQUIPMENT

SECTION 605

Exception: Electrical switches, receptacles and fixtures that shall be allowed to be replaced where an inspection report from the equipment manufacturer or approved manufacturer's representative indicates that the equipment has not sustained damage that requires replacement.

604.3.2.1 **Electrical equipment.** Electrical switches, receptacles and fixtures, including flumes, water heat-ing, security systems and power distribution circuits, shall have been exposed to fire, shall be replaced in accordance with the provisions of the *International Building Code*.

604.3.2 **Abatement of electrical hazards associated with fire exposure.** The provisions of this section shall govern the repair and replacement of electrical systems that have been exposed to fire.

604.3.2 **Abatement of electrical hazards associated with water.** The provisions of this section shall apply to electrical equipment that have been exposed to water, including control, signaling and communica-tions and electronic components.

604.3.2 **Abatement of electrical hazards associated with water.** The provisions of this section shall apply to electrical equipment that have been exposed to water, including control, signaling and communications and electronic components.

604.3.2 **Abatement of electrical hazards associated with water.** The provisions of this section shall apply to electrical equipment that have been exposed to water, including control, signaling and communications and electronic components.

603.6 **Energy conservation devices.** Devices intended to reduce fuel consumption by attachment to a fuel-burning appliance, to the fuel supply line thereto, or to the vent outlet or vent piping therewith, shall not be installed unless labeled for such purpose and the installation is specifically provided with an electrical system in compliance with the requirements of this section and Section 605.

1. Enclosed switches, rated not more than 600 volts or less.
 2. Busway, rated not more than 600 volts.
 3. Panelboards, rated not more than 600 volts.
 4. Switchboards, rated not more than 600 volts.
 5. Fine pump controllers, rated not more than 600 volts.
 6. Manual and magnetic motor controllers.
 7. Motor control centers.
- Exception:** The following equipment shall be allowed to be repaired where an inspection report from the manufacturer's representative indicates that the equipment has not sustained damage that requires replacement:

604.3.1.1 **Electrical equipment.** Electrical distribution equipment that have been exposed to water, governed the repair and replacement of electrical systems with water exposure by reasons of this section shall occupyants of the structure by reason of inadequate service, equipment within, insufficient receptacle and lighting outlets, improper fusing, incompatible cords, wiring devices, ground fault circuit interrupters, surge protective devices, molded case circuit breakers, low-voltage fuses, transformers, wire, cable, flexible cords, power equipment, fixtures, motor circuits, power equipment, and equipment that have been exposed to water.

604.3 **Electrical system hazards.** Where it is found that the electrical system in a structure constitutes a hazard to the occupants of the structure by reason of inadequate service, equipment within, insufficient receptacle and lighting outlets, improper fusing, incompatible cords, wiring devices, ground fault circuit interrupters, surge protective devices, molded case circuit breakers, low-voltage fuses, transformers, wire, cable, flexible cords, power equipment, and equipment that have been exposed to water.

604.1 **Facilities required.** Every occupied building shall be provided with an electrical system in compliance with the requirements of this section and Section 605.

ELECTRICAL FACILITIES

SECTION 604

603.6 **Energy conservation devices.** Devices intended to reduce fuel consumption by attachment to a fuel-burning appliance, to the fuel supply line thereto, or to the vent outlet or vent piping therewith, shall not be installed unless labeled for such purpose and the installation is specifically provided with an electrical system in compliance with the requirements of this section and Section 605.

605.4 Wiring. Flexible cords shall not be used for permanent wiring, or for running through doors, windows, or cabinets, or concealed within walls, floors, or ceilings.

SECTION 606 ELEVATORS, ESCALATORS AND DUMBWAITERS

606.1 General. Elevators, dumbwaiters and escalators shall be maintained in compliance with ASME A17.1. The most current certificate of inspection shall be on display at all times within the elevator or attached to the escalator or dumbwaiter, be available for public inspection in the office of the building *operator* or be posted in a publicly conspicuous location *approved* by the *code official*. The inspection and tests shall be performed at not less than the periodic intervals listed in ASME A17.1, Appendix N, except where otherwise specified by the authority having jurisdiction.

606.2 Elevators. In buildings equipped with passenger elevators, not less than one elevator shall be maintained in operation at all times when the building is occupied.

Exception: Buildings equipped with only one elevator shall be permitted to have the elevator temporarily out of service for testing or servicing.

SECTION 607 DUCT SYSTEMS

607.1 General. Duct systems shall be maintained free of obstructions and shall be capable of performing the required function.

CHAPTER 7

FIRE SAFETY REQUIREMENTS

User note:

About this chapter: Chapter 7 establishes fire safety requirements for existing structures by providing requirements for means of egress, including path of travel, required egress width, means of egress doors and emergency escape openings, and for the maintenance of fire-resistance-rated assemblies, fire protection systems, and carbon monoxide alarm and detection systems.

SECTION 701 GENERAL

701.1 Scope. The provisions of this chapter shall govern the minimum conditions and standards for fire safety relating to structures and exterior *premises*, including fire safety facilities and equipment to be provided.

701.2 Responsibility. The *owner* of the *premises* shall provide and maintain such fire safety facilities and equipment in compliance with these requirements. A person shall not occupy as *owner-occupant* or permit another person to occupy any *premises* that do not comply with the requirements of this chapter.

SECTION 702 MEANS OF EGRESS

[BE] 702.1 General. A safe, continuous and unobstructed path of travel shall be provided from any point in a building or *structure* to the *public way*. Means of egress shall comply with the *International Fire Code*.

[BE] 702.2 Aisles. The required width of aisles in accordance with the *International Fire Code* shall be unobstructed.

[BE] 702.3 Locked doors. Means of egress doors shall be readily openable from the side from which egress is to be made without the need for keys, special knowledge or effort, except where the door hardware conforms to that permitted by the *International Building Code*.

[BE] 702.4 Emergency escape and rescue openings. Required emergency escape and rescue openings shall be maintained in accordance with the code in effect at the time of construction, and both of the following:

1. Required emergency escape and rescue openings shall be operational from the inside of the room without the use of keys or tools.
2. Bars, grilles, grates or similar devices are permitted to be placed over emergency escape and rescue openings provided that the minimum net clear opening size complies with the code that was in effect at the time of construction and the unit is equipped with smoke alarms installed in accordance with Section 907.2.10 of the *International Building Code*. Such devices shall be releasable or removable from the inside without the use of a key, tool or force greater

than that which is required for normal operation of the escape and rescue opening.

SECTION 703 FIRE-RESISTANCE RATINGS

[BF] 703.1 Fire-resistance-rated assemblies. The provisions of this chapter shall govern maintenance of the materials, systems and assemblies used for structural fire resistance and fire-resistance-rated construction separation of adjacent spaces to safeguard against the spread of fire and smoke within a building and the spread of fire to or from buildings.

[BF] 703.2 Unsafe conditions. Where any components are not maintained and do not function as intended or do not have the fire resistance required by the code under which the building was constructed or altered, such components or portions thereof shall be deemed unsafe conditions in accordance with Section 114.1.1 of the *International Fire Code*. Components or portions thereof determined to be unsafe shall be repaired or replaced to conform to that code under which the building was constructed or altered. Where the condition of components is such that any building, *structure* or portion thereof presents an *imminent danger* to the *occupants* of the building, *structure* or portion thereof, the *fire code official* shall act in accordance with Section 114.2 of the *International Fire Code*.

[BF] 703.3 Maintenance. The required fire-resistance rating of fire-resistance-rated construction, including walls, firestops, shaft enclosures, partitions, smoke barriers, floors, fire-resistive coatings and sprayed fire-resistant materials applied to structural members and joint systems, shall be maintained. Such elements shall be visually inspected annually by the *owner* and repaired, restored or replaced where damaged, altered, breached or penetrated. Records of inspections and repairs shall be maintained. Where concealed, such elements shall not be required to be visually inspected by the *owner* unless the concealed space is accessible by the removal or movement of a panel, access door, ceiling tile or entry to the space. Openings made therein for the passage of pipes, electrical conduit, wires, ducts, air transfer and any other reason shall be protected with *approved* methods capable of resisting the passage of smoke and fire. Openings through fire-resistance-rated assemblies shall be protected by self- or automatic-closing doors of *approved* construction meeting the fire protection requirements for the assembly.

- [F] 704.1.1 **Fire protection and life safety systems.** Fire protection and life safety systems shall be maintained in accordance with the International Fire Code or the International Building Code at all times, and shall be replaced or repaired to be effective.
- [F] 704.1.2 **Required fire protection and life safety systems.** Building Code has been granted shall be considered to be a required system.
- [F] 704.1.3 **Fire protection systems.** Fire protection systems shall be installed, maintained and tested in accordance with the following:
1. Automatic sprinkler systems, see Section 903.5.
 2. Automatic fire-extinguishing systems, see Section 904.1.3.5.
 3. Automatic water mist extinguishing systems, see Section 904.1.1.
 4. Carbon dioxide extinguishing systems, see Section 904.6.
 5. Carbon monoxide alarms and carbon monoxide detection systems, see Section 915.6.
 6. Clean-agent extinguishing systems, see Section 904.10.
 7. Dry-chemical extinguishing systems, see Section 912.4 and 912.7.
 8. Fire alarm and fire detection systems, see Section 907.8.
 9. Fire pumps, see Section 913.5.
 10. Fire department connections, see Sections 912.4 and 912.7.
 11. Foam extinguishing systems, see Section 904.7.
 12. Halon extinguishing systems, see Section 904.9.

- FIRE PROTECTION SYSTEMS SECTION 704**
- [F] 703.1 **Inspection, testing and maintenance.** Fire protection and life safety systems shall be maintained in accordance with the International Fire Code in an approved manner in accordance with this code.
- [F] 703.2 **Opening protective closers.** Where openings are required to be protected, opening protective closers, where applicable, shall be replaced if the fusible link rating exceeds 135°F (57°C).
- [F] 703.3 **Fire walls, fire barriers, and fire partitions.** Required fire blocking and draft stopping in combustible concealed spaces shall be maintained to provide continuity and integrity of the construction.
- [F] 703.3.1 **Fire blocking and draft stopping.** Required fire blocking and draft stopping in combustible buildings shall be maintained to prevent the passage of fire. Openings shall be maintained to provide barriers and smoke partitions shall be maintained to prevent the passage of smoke. Openings protected with approved smoke barrier doors or smoke partitions shall be maintained to provide barriers and smoke partitions shall be maintained in accordance with NFPA 80. The application of field-applied labels associated with the maintenance of opening protective devices shall follow the requirements of the approved third-party certification organization or organization accredited for listing the openning protective device.
- [F] 703.3.2 **Smoke barriers and smoke partitions.** Required smoke barriers and smoke partitions shall be maintained in accordance with NFPA 80. The application of field-applied labels associated with the maintenance of opening protective devices shall follow the requirements of the approved third-party certification organization or organization accredited for listing the openning protective device.
- [F] 703.4 **Opening protective devices.** Openings protected with approved doors or fire dampers shall be maintained in accordance with NFPA 80.
- [F] 703.4.1 **SigNS.** Where required by the code official, a sign shall be permanently displayed on or near each fire door in letters not less than 1 inch (25 mm) high to read as follows:
- 1. For doors designed to be kept normally open: FIRE DOOR - DO NOT BLOCK.
 - 2. For doors designed to be kept normally closed: FIRE DOOR - KEEP CLOSED.

[F] 703.5 **Ceilings.** The hanging and displaying of salable goods and other decorative materials from acoustic-rated horizontal assemblies shall be prohibited.

[F] 703.6 **Testing.** Horizontal and vertical sliding and rolling door assemblies shall be maintained.

[F] 703.7 **Vertical shafts.** Interior vertical shafts, including stairways, elevator hoistways and service and utility shafts, which connect two or more stories of a building shall be enclosed or protected as required in Chapter 11 of the International Fire Code. New floor openings in existing buildings shall be connected to two or more stories of a building by fire doors shall be inspecting and tested annually to insure their operation and full closure. Records of inspections and testing shall be maintained.

[F] 703.8 **Opening protective closers.** Internal sliding and rolling door parts that are part of a fire-resistance-rated horizontal systems shall be part of a door from any partially open position. The door closer shall exert enough force to close and latch the door from the full-open position and latch doors shall close from the full-open position and latch automatically. Goods from the full-open position and latch doors shall remain in the closed position.

[F] 703.9 **Door operation.** Swinging fire doors shall remain in the closed position, the door it operates shall remain in the closed position, the period that such a device is out of service for devices and automatic door closers shall be maintained during the period that such a device is out of service for devices and automatic door closers shall be maintained.

[F] 703.10 **Hold-open devices and closers.** Hold-open devices shall be kept normally closed as required by the code official.

[F] 703.11 **Signs.** Where required by the code official, a sign shall be permanently displayed on or near each fire door in letters not less than 1 inch (25 mm) high to read as follows:

[F] 703.12 **Vertical shafts.** Internal vertical shafts, including stairways, elevator hoistways and service and utility shafts, which connect two or more stories of a building by fire doors shall remain in the closed position and latch doors shall remain in the closed position.

[F] 703.13 **Fire protection systems.** Fire protection systems shall be installed, maintained and tested in accordance with the International Fire Code or the International Building Code at all times, and shall be replaced or repaired to be effective.

[F] 704.1 **Fire protection and life safety systems.** Fire protection and life safety systems shall be maintained in accordance with the International Fire Code or the International Building Code at all times, and shall be replaced or repaired to be effective.

[F] 704.2 **Hold-open devices and closers.** Hold-open devices shall be kept normally closed to be kept normally open: FIRE DOOR - DO NOT BLOCK.

[F] 704.3 **Door operation.** Swinging fire doors shall remain in the closed position, the door it operates shall remain in the closed position, the period that such a device is out of service for devices and automatic door closers shall be maintained.

[F] 704.4 **Vertical shafts.** Internal vertical shafts, including stairways, elevator hoistways and service and utility shafts, which connect two or more stories of a building by fire doors shall remain in the closed position and latch doors shall remain in the closed position.

13. Single- and multiple-station smoke alarms, see Section 907.10.
14. Smoke and heat vents and mechanical smoke removal systems, see Section 910.5.
15. Smoke control systems, see Section 909.22.
16. Wet-chemical extinguishing systems, see Section 904.5.

[F] 704.2 Standards. Fire protection systems shall be inspected, tested and maintained in accordance with the referenced standards listed in Table 704.2 and as required in this section.

TABLE 704.2
FIRE PROTECTION SYSTEM MAINTENANCE STANDARDS

SYSTEM	STANDARD
Portable fire extinguishers	NFPA 10
Carbon dioxide fire-extinguishing system	NFPA 12
Halon 1301 fire-extinguishing systems	NFPA 12A
Dry-chemical extinguishing systems	NFPA 17
Wet-chemical extinguishing systems	NFPA 17A
Water-based fire protection systems	NFPA 25
Fire alarm systems	NFPA 72
Smoke and heat vents	NFPA 204
Water-mist systems	NFPA 750
Clean-agent extinguishing systems	NFPA 2001

[F] 704.2.1 Records. Records shall be maintained of all system inspections, tests and maintenance required by the referenced standards.

[F] 704.2.2 Records information. Initial records shall include the: name of the installation contractor; type of components installed; manufacturer of the components; location and number of components installed per floor; and manufacturers' operation and maintenance instruction manuals. Such records shall be maintained for the life of the installation.

[F] 704.3 Systems out of service. Where a required fire protection system is out of service, the fire department and the fire *code official* shall be notified immediately and, where required by the fire *code official*, either the building shall be evacuated or an *approved* fire watch shall be provided for all *occupants* left unprotected by the shutdown until the fire protection system has been returned to service. Where utilized, fire watches shall be provided with not less than one *approved* means for notification of the fire department and shall not have duties beyond performing constant patrols of the protected *premises* and keeping watch for fires. Actions shall be taken in accordance with Section 901 of the *International Fire Code* to bring the systems back in service.

Exception: Facilities with an approved notification and impairment management program. The notification and impairment program for water-based fire protection systems shall comply with NFPA 25.

[F] 704.3.1 Emergency impairments. Where unplanned impairments of fire protection systems occur, appropriate emergency action shall be taken to minimize potential

injury and damage. The impairment coordinator shall implement the steps outlined in Section 901.7.4 of the *International Fire Code*.

[F] 704.4 Removal of or tampering with equipment. It shall be unlawful for any person to remove, tamper with or otherwise disturb any fire protection or life safety system required by this code except for the purposes of extinguishing fire, training, recharging or making necessary repairs.

[F] 704.4.1 Removal of or tampering with appurtenances. Locks, gates, doors, barricades, chains, enclosures, signs, tags and seals that have been installed by or at the direction of the fire *code official* shall not be removed, unlocked, destroyed or tampered with in any manner.

[F] 704.4.2 Removal of existing occupant-use hose lines. The fire *code official* is authorized to permit the removal of existing *occupant*-use hose lines where all of the following apply:

1. The installation is not required by the *International Fire Code* or the *International Building Code*.
2. The hose line would not be utilized by trained personnel or the fire department.
3. The remaining outlets are compatible with local fire department fittings.

[F] 704.4.3 Termination of monitoring service. For fire alarm systems required to be monitored by the *International Fire Code*, notice shall be made to the fire *code official* whenever alarm monitoring services are terminated. Notice shall be made in writing by the provider of the monitoring service being terminated.

[F] 704.5 Fire department connection. Where the fire department connection is not visible to approaching fire apparatus, the fire department connection shall be indicated by an *approved* sign mounted on the street front or on the side of the building. Such sign shall have the letters "FDC" not less than 6 inches (152 mm) high and words in letters not less than 2 inches (51 mm) high or an arrow to indicate the location. Such signs shall be subject to the approval of the fire *code official*.

[F] 704.5.1 Fire department connection access. Ready access to fire department connections shall be maintained at all times and without obstruction by fences, bushes, trees, walls or any other fixed or movable object. Access to fire department connections shall be *approved* by the fire chief.

Exception: Fences, where provided with an access gate equipped with a sign complying with the legend requirements of Section 912.5 of the *International Fire Code* and a means of emergency operation. The gate and the means of emergency operation shall be *approved* by the fire chief and maintained operational at all times.

[F] 704.5.2 Clear space around connections. A working space of not less than 36 inches (914 mm) in width, 36 inches (914 mm) in depth and 78 inches (1981 mm) in

[F] 704.6.3 **Power source.** Single-station smoke alarms shall receive their primary power from the building equipment with battery backup that are not connected to an emergency electrical system. Smoke alarms shall emit a continuous alarm with battery backup unless they are not connected to an emergency electrical system with battery backup. Smoke alarms with integral strobes that are not connected to an emergency electrical source and shall be equipped with a battery uniting provided that such wiring is served from a commercial power source that shall be removed from a building receiving power from the building.

2. Smoke alarms in existing areas are not required to be interconnected where alterations or repairs do not result in the removal of interior walls or ceiling finishes that are not undergirding alterations, repairs or construction of any kind.
1. Interconnection is not required in buildings that are not interconnected in sleeping areas.

Exceptions:

[F] 704.6.2 **Interconnection.** Where more than one smoke alarm is required to be installed within an individual dwelling or sleeping unit, the smoke alarms shall be interconnected in such a manner that the activation of one alarm will activate all of the alarms in the individual unit. Physical interconnection of smoke alarms shall not be required where listed wireless alarms are installed and all alarms sound upon activation of one alarm. The alarm shall be clearly audible in all bedrooms over background noise levels with all intervening doors closed.

- Section 704.6.1.1 or 704.6.1.2.
3. Prevent placement of a smoke alarm required by that contains a bathtub or shower unless this would horizontally from the door or opening of a bathroom alarms shall be installed not less than 3 feet (914 mm) apart.

[F] 704.6.1.1 **Installation near bathrooms.** Smoke alarms shall not be installed less than 6 feet (1829 mm) horizontally from a permanent cooking appliance.

3. Photoelectric smoke alarms shall not be installed less than 6 feet (1829 mm) horizontally from a permanent cooking appliance.

2. Ionization smoke alarms with an alarm-silence feature shall not be installed less than 6 feet (1829 mm) horizontally from a permanent cooking appliance.

1. Ionization smoke alarms shall not be installed less than 20 feet (6096 m) horizontally from a permanent cooking appliance.

[F] 704.6.1.3 **Installation near cooking appliances.** Smoke alarms shall not be installed in locations unless this would prevent placement of a smoke alarm in a location required by Section 704.6.1.1 or 704.6.1.2.

[F] 704.6.1.4 **Where required.** Existing Group I-1 and R occupancies shall be provided with single-station smoke alarms in accordance with Sections 704.6.1 through 704.6.3.

Smoke alarms shall not be installed in the following door between the adjacent levels, a smoke alarm level is less than one full story below the upper level for the adjacent lower level provided that the alarm is installed on the upper level shall suffice for the adjacent lower level provided that the alarm level is less than one full story below the upper level.

3. In each room used for sleeping purposes.
2. In each room with split levels and without an intervening unhabitable attics, in dwellings or dwellings basements but not including crawl spaces and units with split levels and without an intervening

1. On the ceiling or wall outside of each separate sleeping area in the immediate vicinity of bedrooms.

[F] 704.6.1.2 **Groups R-2, R-3, R-4 and I-1.** Single or multiple-station smoke alarms shall be installed and maintained in Groups R-2, R-3, R-4 and I-1 regardless of occupant load at all of the following locations:

the upper level shall suffice for the adjacent lower level provided that the lower level is less than one full story below the upper level.

3. In each story within the sleeping unit, including basements. For sleeping units with split levels and without an intervening door between adjacent levels, a smoke alarm installed on the upper level shall suffice for the adjacent lower level, unless the alarm is installed on the upper level.

2. In every room in the path of the means of egress from the sleeping area to the door leading from the sleeping area.

1. In sleeping areas.

[F] 704.6.1.1 **Group R-1.** Single- or multiple-station smoke alarms shall be installed in all of the following locations in Group R-1:

smoke alarms have been installed as a substitute for smoke alarms.

3. Where smoke detectors connected to a fire alarm system have been installed as a fire alarm detector at the time of installation.

2. Where smoke alarms have been installed in occupancies and dwellings that were not required to have them at the time of construction, additional smoke alarms shall not be required provided that the existing smoke alarms comply with requirements that were in effect at the time of installation.

1. Where the code that was in effect at the time of construction required smoke alarms shall not be installed in dwellings already provided.

1. Where the code that was in effect at the time of construction required smoke alarms and smoke alarms complying with those requirements are already provided.

1. Where the code that was in effect at the time of construction required smoke alarms shall not be installed in dwellings already provided.

[F] 704.6.1 **Where required.** Existing Group I-1 and R occupancies shall be provided with single-station smoke alarms in accordance with Sections 704.6.1.1 through 704.6.3.

Smoke alarms shall be mounted fire department connections in existing Group I-1 and R occupancies in accordance with Sections 704.6.1 through 704.6.3.

[F] 704.6 **Single- and multiple-station smoke alarms.** Single- and multiple-station smoke alarms shall be installed in existing Group I-1 and R occupancies in accordance with Sections 704.6.1 through 704.6.3.

the sides of wall-mounted fire department connections shall be maintained clear of fire department connections.

height shall be provided and maintained in front of and to the sides of wall-mounted fire department connections.

signal when the batteries are low. Wiring shall be permanent and without a disconnecting switch other than as required for overcurrent protection.

Exceptions:

1. Smoke alarms are permitted to be solely battery operated in existing buildings where construction is not taking place.
2. Smoke alarms are permitted to be solely battery operated in buildings that are not served from a commercial power source.
3. Smoke alarms are permitted to be solely battery operated in existing areas of buildings undergoing *alterations* or repairs that do not result in the removal of interior walls or ceiling finishes exposing the structure, unless there is an attic, crawl space or *basement* available that could provide access for building wiring without the removal of interior finishes.

[F] 704.6.4 Smoke detection system. Smoke detectors listed in accordance with UL 268 and provided as part of the building's fire alarm system shall be an acceptable alternative to single- and multiple-station smoke alarms and shall comply with the following:

1. The fire alarm system shall comply with all applicable requirements in Section 907 of the *International Fire Code*.
2. Activation of a smoke detector in a dwelling or sleeping unit shall initiate alarm notification in the *dwelling* or *sleeping unit* in accordance with Section 907.5.2 of the *International Fire Code*.
3. Activation of a smoke detector in a *dwelling* or *sleeping unit* shall not activate alarm notification appliances outside of the *dwelling* or *sleeping unit*, provided that a supervisory signal is generated and monitored in accordance with Section 907.6.6 of the *International Fire Code*.

[F] 704.7 Single- and multiple-station smoke alarms. Single- and multiple-station smoke alarms shall be tested and maintained in accordance with the manufacturer's instructions. Smoke alarms that do not function shall be replaced. Smoke alarms installed in one- and two-family dwellings shall be replaced not more than 10 years from the date of manufacture marked on the unit, or shall be replaced if the date of manufacture cannot be determined.

become inoperable or begin producing end-of-life signals shall be replaced.

SECTION 705

CARBON MONOXIDE ALARMS AND DETECTION

[F] 705.1 General. Carbon monoxide alarms shall be installed in dwellings in accordance with Section 1103.9 of the *International Fire Code*, except that alarms in dwellings covered by the *International Residential Code* shall be installed in accordance with Section R315 of that code.

[F] 705.2 Carbon monoxide alarms and detectors. Carbon monoxide alarms and carbon monoxide detection systems shall be maintained in accordance with NFPA 720. Carbon monoxide alarms and carbon monoxide detectors that

CHAPTER 8

REFERENCED STANDARDS

User note:

About this chapter: This code contains numerous references to standards promulgated by other organizations that are used to provide requirements for materials and methods of construction. Chapter 8 contains a comprehensive list of all standards that are referenced in this code. These standards, in essence, are part of this code to the extent of the reference to the standard.

This chapter lists the standards that are referenced in various sections of this document. The standards are listed herein by the promulgating agency of the standard, the standard identification, the effective date and title and the section or sections of this document that reference the standard. The application of the referenced standards shall be as specified in Section 102.8.

CHAPTER 1

SCOPE AND ADMINISTRATION

User note:

About this chapter: Chapter 1 establishes the limits of applicability of the code and describes how the code is to be applied and enforced. Chapter 1 is in two parts: Part 1—Scope and Application (Sections 101 and 102) and Part 2—Administration and Enforcement (Sections 103 – 110). Section 101 identifies which buildings and structures come under its purview and references other I-Codes as applicable.

This code is intended to be adopted as a legally enforceable document and it cannot be effective without adequate provisions for its administration and enforcement. The provisions of Chapter 1 establish the authority and duties of the code official appointed by the authority having jurisdiction and also establish the rights and privileges of the property owner and building occupants.

This Chapter was extensively reorganized for the 2021 edition. For clarity, the relocation marginal markings have not been included. For complete information, see the relocations table in the Preface information of this code.

PART 1 — SCOPE AND APPLICATION

SECTION 101 SCOPE AND GENERAL REQUIREMENTS

[A] 101.1 Title. These regulations shall be known as the *International Property Maintenance Code* of [NAME OF JURISDICTION], hereinafter referred to as “this code.”

[A] 101.2 Scope. The provisions of this code shall apply to all existing residential and nonresidential structures and all existing *premises* and constitute minimum requirements and standards for *premises*, structures, equipment and facilities for light, *ventilation*, space, heating, sanitation, protection from the elements, a reasonable level of safety from fire and other hazards, and for a reasonable level of sanitary maintenance; the responsibility of *owners*, an *owner's* authorized agent, *operators* and *occupants*; the *occupancy* of existing structures and *premises*, and for administration, enforcement and penalties.

[A] 101.3 Purpose. The purpose of this code is to establish minimum requirements to provide a reasonable level of health, safety, property protection and general welfare insofar as they are affected by the continued *occupancy* and maintenance of structures and *premises*. Existing structures and *premises* that do not comply with these provisions shall be altered or repaired to provide a reasonable minimum level of health, safety and general welfare as required herein.

[A] 101.4 Severability. If a section, subsection, sentence, clause or phrase of this code is, for any reason, held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this code.

SECTION 102 APPLICABILITY

[A] 102.1 General. Where there is a conflict between a general requirement and a specific requirement, the specific requirement shall govern. Where differences occur between provisions of this code and the referenced standards, the provisions of this code shall apply. Where, in a specific case,

different sections of this code specify different requirements, the most restrictive shall govern.

102.2 Maintenance. Equipment, systems, devices and safeguards required by this code or a previous regulation or code under which the *structure* or *premises* was constructed, altered or repaired shall be maintained in good working order. An *owner*, *owner's* authorized agent, *operator* or *occupant* shall not cause any service, facility, equipment or utility that is required under this section to be removed from, shut off from or discontinued for any occupied dwelling, except for such temporary interruption as necessary while repairs or alterations are in progress. The requirements of this code are not intended to provide the basis for removal or abrogation of fire protection and safety systems and devices in existing structures. Except as otherwise specified herein, the *owner* or the *owner's* authorized agent shall be responsible for the maintenance of buildings, structures and *premises*.

[A] 102.3 Application of other codes. Repairs, additions or alterations to a *structure*, or changes of *occupancy*, shall be done in accordance with the procedures and provisions of the *International Building Code*, *International Existing Building Code*, *International Energy Conservation Code*, *International Fire Code*, *International Fuel Gas Code*, *International Mechanical Code*, *International Residential Code*, *International Plumbing Code* and NFPA 70. Nothing in this code shall be construed to cancel, modify or set aside any provision of the *International Zoning Code*.

[A] 102.4 Existing remedies. The provisions in this code shall not be construed to abolish or impair existing remedies of the jurisdiction or its officers or agencies relating to the removal or demolition of any *structure* that is dangerous, unsafe and insanitary.

[A] 102.5 Workmanship. Repairs, maintenance work, alterations or installations that are caused directly or indirectly by the enforcement of this code shall be executed and installed in a *workmanlike* manner and installed in accordance with the manufacturer's instructions.

102.6 Structural analysis. Where structural analysis is used to determine if an unsafe structural condition exists, the analysis shall be permitted to use nominal strengths, nominal

[A] 105.6 Department records. The *code official* shall keep official records of all business and activities of the department specified in the provisions of this code. Such records shall be retained in the official records for the period required for retention of public records.

[A] 105.7 Liability. The *code official*, member of the board of appeals or employee charged with the enforcement of this code, while acting for the jurisdiction, in good faith and without malice in the discharge of the duties required by this code or other pertinent law or ordinance, shall not thereby be rendered civilly or criminally liable personally, and is hereby relieved from all personal liability for any damage accruing to persons or property as a result of an act or by reason of an act or omission in the discharge of official duties.

[A] 105.7.1 Legal defense. Any suit or criminal complaint instituted against any officer or employee because of an act performed by that officer or employee in the lawful discharge of duties and under the provisions of this code shall be defended by the legal representative of the jurisdiction until the final termination of the proceedings. The *code official* or any subordinate shall not be liable for costs in an action, suit or proceeding that is instituted in pursuance of the provisions of this code.

SECTION 106 APPROVAL

[A] 106.1 Modifications. Whenever there are practical difficulties involved in carrying out the provisions of this code, the *code official* shall have the authority to grant modifications for individual cases upon application of the *owner* or *owner's* authorized agent, provided that the *code official* shall first find that special individual reason makes the strict letter of this code impractical, the modification is in compliance with the intent and purpose of this code and that such modification does not lessen health, life and fire safety requirements. The details of action granting modifications shall be recorded and entered in the department files.

[A] 106.2 Alternative materials, design and methods of construction and equipment. The provisions of this code are not intended to prevent the installation of any material or to prohibit any design or method of construction not specifically prescribed by this code, provided that any such alternative has been *approved*. An alternative material, design or method of construction shall be *approved* where the *code official* finds that the proposed design is satisfactory and complies with the intent of the provisions of this code, and that the material, method or work offered is, for the purpose intended, not less than the equivalent of that prescribed in this code in quality, strength, effectiveness, fire resistance, durability and safety. Where the alternative material, design or method of construction is not *approved*, the *code official* shall respond in writing, stating the reasons why the alternative was not *approved*.

[A] 106.3 Required testing. Whenever there is insufficient evidence of compliance with the provisions of this code or evidence that a material or method does not conform to the requirements of this code, or in order to substantiate claims

for alternative materials or methods, the *code official* shall have the authority to require tests to be made as evidence of compliance without expense to the jurisdiction.

[A] 106.3.1 Test methods. Test methods shall be as specified in this code or by other recognized test standards. In the absence of recognized and accepted test methods, the *code official* shall be permitted to approve appropriate testing procedures performed by an *approved* agency.

[A] 106.3.2 Test reports. Reports of tests shall be retained by the *code official* for the period required for retention of public records.

[A] 106.4 Used material and equipment. Materials that are reused shall comply with the requirements of this code for new materials. Materials, equipment and devices shall not be reused unless such elements are in good repair or have been reconditioned and tested where necessary, placed in good and proper working condition and *approved* by the *code official*.

[A] 106.5 Approved materials and equipment. Materials, equipment and devices *approved* by the *code official* shall be constructed and installed in accordance with such approval.

[A] 106.6 Research reports. Supporting data, where necessary to assist in the approval of materials or assemblies not specifically provided for in this code, shall consist of valid research reports from *approved* sources.

SECTION 107 MEANS OF APPEAL

107.1 General. In order to hear and decide appeals of orders, decisions or determinations made by the *code official* relative to the application and interpretation of this code, there shall be and is hereby created a board of appeals. The board of appeals shall be appointed by the applicable governing authority and shall hold office at its pleasure. The board shall adopt rules of procedure for conducting its business and shall render all decisions and findings in writing to the appellant with a duplicate copy to the *code official*.

[A] 107.2 Limitations of authority. An application for appeal shall be based on a claim that the true intent of this code or the rules legally adopted thereunder have been incorrectly interpreted, the provisions of this code do not fully apply or an equivalent or better form of construction is proposed. The board shall not have authority to waive requirements of this code or interpret the administration of this code.

107.3 Qualifications. The board of appeals shall consist of members who are qualified by experience and training and are not employees of the jurisdiction.

107.4 Administration. The *code official* shall take immediate action in accordance with the decision of the board.

SECTION 108 BOARD OF APPEALS

[A] 108.1 Membership of board. The board of appeals shall consist of not less than three members who are qualified by

[A] 110.3 Emergencies. Where an emergency exists, the code official shall not be required to give a written notice prior to stopping the work.

[A] 110.4 Failure to comply. Any person who shall continue any work after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to fines established by the authority having jurisdiction.

UNSAFE STRUCTURES AND EQUIPMENT

SECTION 111

[A] 111.1 Unsafe conditions. When a structure or equipment is found by the code official to be unsafe, or when a structure is found unfit for human occupancy, or is found unlawful, found by the code official to be unsafe, or when a structure is found by the code official to be dangerous to resume.

[A] 111.2 Unsafe structures. An unsafe structure is one that is found to be dangerous to the life, health, property or safety of the public due to the nature of the structure or equipment.

[A] 111.3 Unsafe equipment. Unsafe equipment includes any boiler, heating equipment, elevator, moving staircase, electrical wiring or device, flammable liquid containers or other equipment on which the structure or equipment is a hazard to life, health, property or safety of the public due to the nature of the equipment or occupancy.

[A] 111.1.1 Unsafe structures. An unsafe structure is one that is found to be dangerous to the life, health, property or safety of the public due to the nature of the structure or equipment or occupancy in the event of fire, or because such structure contains unsafe equipment that is so damaged, decayed, dilapidated, structurally unsafe or of such faulty construction or collapse is possible.

[A] 111.1.2 Unsafe equipment. Unsafe equipment includes any boiler, heating equipment, elevator, moving staircase, electrical wiring or device, flammable liquid containers or other equipment on which the structure or equipment is a hazard to life, health, property or safety of the public due to the nature of the equipment or occupancy.

[A] 111.1.3 Structure unfit for human occupancy. A structure is unfit for human occupancy whenever the code parts of the structure or to the public.

[A] 111.1.4 Unlawful structure. An unlawful structure is one found in whole or in part to be occupied by more persons than permitted under this code, or was erected, altered or occupied contrary to law.

[A] 111.1.5 Dangerous structure or premises. For the purpose of this code, any structure or premises that has any of the conditions or defects described as follows:

1. Any door, aisle, passageway, stairway, exit or other means of egress that does not conform to the requirements of this code.

[A] 110.2 Insurance. The stop work order shall state the manner, if given to the owner of the property, to the person performing the work, upon issuance of a stop work order, the cited owner's authorized agent, or to the person performing the work, and shall be given to the owner of the property, to the person performing the work, upon issuance of a stop work order.

[A] 110.1 Authority. Where the code official finds any work to the provisions of this code being performed in a manner contrary to this code being performed in a manner contrary to the provisions of this code, or in a dangerous manner, the code official shall issue a stop work order.

STOP WORK ORDER

SECTION 110

[A] 109.5 Abatement of violation. The imposition of the penalties hereinafter prescribed shall not preclude the legal officer from instituting appropriate action to restrain, correct or abate a violation, or to prevent illegal occupation of a building, structure or premises, or to stop an illegal act, conduct, business or utilization of the building.

[A] 109.4 Violation penalties. Any person who shall violate a provision of this code, or fail to comply therewith, or with any of the requirements thereof, shall be prosecuted within the limits provided by state or local laws. Each day that a violation continues after notice has been served shall be deemed a separate offense.

[A] 109.3 Prosecution of violation. Any person failing to serve upon such real estate a notice which the structure is located and shall be charged against having committed the offense. Any action taken by the authority having jurisdiction therefor. Any action taken by the authority having jurisdiction of this code or of the structure in violation of the structure in the event of removal or termination of the violation, or to require the removal, correct or abate such violation at law or in equity to restrain, correct or proceed with the code official shall institute the appropriate procedure with the multiplicity, and the violation shall be deemed a strict liability offense. If the notice of violation is not complied with, the code official shall serve a notice of violation to be determined by the local corporation or order served in accordance with Section 111.4, shall be deemed guilty of a crime with a notice of violation or order served in accordance with Section 111.4, shall be deemed guilty of a crime with a notice of violation or order served in accordance with Section 111.4.

[A] 109.2 Notice of violation. The code official shall serve a notice of violations of this code.

[A] 109.1 Unlawful acts. It shall be unlawful for a person, firm or corporation to be in conflict with or in violation of any of the provisions of this code.

VIOLATIONS

SECTION 109

[A] 110.4 Failure to comply. Any person who shall serve a notice of violations of this code.

- as related to the requirements for existing buildings.
2. The walking surface of any aisle, passageway, stairway, exit or other means of egress is so warped, worn loose, torn or otherwise unsafe as to not provide safe and adequate means of egress.
 3. Any portion of a building, *structure* or appurtenance that has been damaged by fire, earthquake, wind, flood, *deterioration*, *neglect*, abandonment, vandalism or by any other cause to such an extent that it is likely to partially or completely collapse, or to become *detached* or dislodged.
 4. Any portion of a building, or any member, appurtenance or ornamentation on the exterior thereof that is not of sufficient strength or stability, or is not so *anchored*, attached or fastened in place so as to be capable of resisting natural or artificial loads of one and one-half the original designed value.
 5. The building or *structure*, or part of the building or *structure*, because of dilapidation, *deterioration*, decay, faulty construction, the removal or movement of some portion of the ground necessary for the support, or for any other reason, is likely to partially or completely collapse, or some portion of the foundation or underpinning of the building or *structure* is likely to fail or give way.
 6. The building or *structure*, or any portion thereof, is clearly unsafe for its use and *occupancy*.
 7. The building or *structure* is *neglected*, damaged, dilapidated, unsecured or abandoned so as to become an attractive nuisance to children who might play in the building or *structure* to their danger, becomes a harbor for vagrants, criminals or immoral persons, or enables persons to resort to the building or *structure* for committing a nuisance or an unlawful act.
 8. Any building or *structure* has been constructed, exists or is maintained in violation of any specific requirement or prohibition applicable to such building or *structure* provided by the *approved* building or fire code of the jurisdiction, or of any law or ordinance to such an extent as to present either a substantial risk of fire, building collapse or any other threat to life and safety.
 9. A building or *structure*, used or intended to be used for dwelling purposes, because of inadequate maintenance, dilapidation, decay, damage, faulty construction or arrangement, inadequate light, *ventilation*, mechanical or plumbing system, or otherwise, is determined by the *code official* to be unsanitary, unfit for human habitation or in such a condition that is likely to cause sickness or disease.
 10. Any building or *structure*, because of a lack of sufficient or proper fire-resistance-rated construction, fire protection systems, electrical system, fuel connections, mechanical system, plumbing system or other cause, is determined by the *code official* to be a threat to life or health.
 11. Any portion of a building remains on a site after the demolition or destruction of the building or *structure* or whenever any building or *structure* is abandoned so as to constitute such building or portion thereof as an attractive nuisance or hazard to the public.
- 111.2 Closing of vacant structures.** If the *structure* is vacant and unfit for human habitation and *occupancy*, and is not in danger of structural collapse, the *code official* is authorized to post a placard of condemnation on the *premises* and order the *structure* closed up so as not to be an attractive nuisance. Upon failure of the *owner* or *owner's* authorized agent to close up the *premises* within the time specified in the order, the *code official* shall cause the *premises* to be closed and secured through any available public agency or by contract or arrangement by private persons and the cost thereof shall be charged against the real estate upon which the *structure* is located and shall be a lien upon such real estate and shall be collected by any other legal resource.
- 111.2.1 Authority to disconnect service utilities.** The *code official* shall have the authority to authorize disconnection of utility service to the building, *structure* or system regulated by this code and the referenced codes and standards set forth in Section 102.8 in case of emergency where necessary to eliminate an immediate hazard to life or property or where such utility connection has been made without approval. The *code official* shall notify the serving utility and, whenever possible, the *owner* or *owner's* authorized agent and *occupant* of the building, *structure* or service system of the decision to disconnect prior to taking such action. If not notified prior to disconnection the *owner*, *owner's* authorized agent or *occupant* of the building *structure* or service system shall be notified in writing as soon as practical thereafter.
- 111.3 Record.** The *code official* shall cause a report to be filed on an unsafe condition. The report shall state the *occupancy* of the *structure* and the nature of the unsafe condition.
- 111.4 Notice.** Whenever the *code official* determines that there has been a violation of this code or has grounds to believe that a violation has occurred, notice shall be given in the manner prescribed in Sections 111.4.1 and 111.4.2 to the *owner* or the *owner's* authorized agent, for the violation as specified in this code. Notices for condemnation procedures shall comply with this section.
- 111.4.1 Form.** Such notice shall be in accordance with all of the following:
1. Be in writing.
 2. Include a description of the real estate sufficient for identification.
 3. Include a statement of the violation or violations and why the notice is being issued.
 4. Include a correction order allowing a reasonable time to make the repairs and improvements required to bring the *dwelling unit* or *structure* into compliance with the provisions of this code.

112.3 Closing streets. When necessary for public safety, the code official shall temporarily close structures and close, or order the authority having jurisdiction to close, sidewalks, streets, public ways and places adjacent to unsafe structures, and prohibit the same from being utilized.

112.4 Prohibited occupancy. Any occupied structure

condemned and placarded by the code official shall be

vacated as ordered by the code official. Any person who

shall occupy a placarded premises or shall operate placarded

equipment, and any owner or owner's authorized agent who

shall let anyone occupy a placarded agent shall be liable for the penalties

provided by this code.

112.5 Unauthorized tampering. Signs, tags or seals posted

or affixed by the code official shall not be removed without

authorization or tampering, or restored to a safe condition.

The owner, or other authorized agent, shall be liable for the

penalties provided for unauthorized tampering.

112.6 Transfer of ownership. It shall be unlawful for the

owner of any dwelling unit or structure who has received a

notice from the code official that it contains a violation of the

international property maintenance code, to sell, transfer, lease

or otherwise dispose of such dwelling unit or structure until

the violation has been corrected, repaired, or removed by the

owner or other authorized agent or until such notice is no longer

required.

112.7 Placarding. Upon failure of the owner, owner's

agent or authorized agent to correct the violation, the code

official shall issue a placard to the structure containing the

name and address of the person responsible for the violation,

and the name and address of the person responsible for the

correction of the violation.

112.8 Prohibited equipment. Any occupied structure

condemned and placarded by the code official shall be

vacated as ordered by the code official. Any person who

shall occupy a placarded premises or shall operate placarded

equipment, and any owner or owner's authorized agent who

shall let anyone occupy a placarded agent shall be liable for the

penalties provided by this code.

112.9 Restoration or abatement. The structure or equip-

ment determined to be unsafe by the code official is

permitted to be restored to a safe condition. The owner,

owner's authorized agent or operator of a struc-

ture, premises or equipment used in the conduct of a busi-

ness or profession, or the repair or maintenance of a struc-

ture or part of a structure has fallen and life is endangered by

the collapse of the structure, or when there is actual or

potential danger to the building occupants or those in the

immediate vicinity of any structure because of explosive

fumes or vapors or the presence of dangerous gases, bases, or

materials, or operation of defective equipment, explosives, or

proximity of any structure because of explosive

potentially dangerous materials or those in the imme-

diate vicinity of any structure because of explosive

potentially dangerous materials or those in the imme-

diate vicinity of any structure because of explosive

EMERGENCY MEASURES SECTION 112

112.1 Imminent danger. When, in the opinion of the code official, there is imminent danger of failure or collapse of a building or structure that endangers life, or when any struc-

tural condition, or equipment, either by repair, rehabilitation, or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

unsafe conditions either by repair, rehabilitation, demolition

or other approved corrective action. To the extent that

112.4 Emergency repairs. For the purposes of this section, the *code official* shall employ the necessary labor and materials to perform the required work as expeditiously as possible.

112.5 Costs of emergency repairs. Costs incurred in the performance of emergency work shall be paid by the jurisdiction. The legal counsel of the jurisdiction shall institute appropriate action against the *owner* of the *premises* or *owner's* authorized agent where the unsafe *structure* is or was located for the recovery of such costs.

112.6 Hearing. Any person ordered to take emergency measures shall comply with such order forthwith. Any affected person shall thereafter, upon petition directed to the appeals board, be afforded a hearing as described in this code.

SECTION 113 DEMOLITION

113.1 General. The *code official* shall order the *owner* or *owner's* authorized agent of any *premises* upon which is located any *structure*, which in the *code official's* or *owner's* authorized agent judgment after review is so deteriorated or dilapidated or has become so out of repair as to be dangerous, unsafe, insanitary or otherwise unfit for human habitation or *occupancy*, and such that it is unreasonable to repair the *structure*, to demolish and remove such *structure*; or if such *structure* is capable of being made safe by repairs, to repair and make safe and sanitary, or to board up and hold for future repair or to demolish and remove at the *owner's* option; or where there has been a cessation of normal construction of any *structure* for a period of more than two years, the *code official* shall order the *owner* or *owner's* authorized agent to demolish and remove such *structure*, or board up until future repair. Boarding the building up for future repair shall not extend beyond one year, unless *approved* by the building official.

113.2 Notices and orders. Notices and orders shall comply with Section 111.4.

113.3 Failure to comply. If the *owner* of a *premises* or *owner's* authorized agent fails to comply with a demolition order within the time prescribed, the *code official* shall cause the *structure* to be demolished and removed, either through an available public agency or by contract or arrangement with private persons, and the cost of such demolition and removal shall be charged against the real estate upon which the *structure* is located and shall be a lien upon such real estate.

113.4 Salvage materials. Where any *structure* has been ordered demolished and removed, the governing body or other designated officer under said contract or arrangement aforesaid shall have the right to sell the salvage and valuable materials. The net proceeds of such sale, after deducting the expenses of such demolition and removal, shall be promptly remitted with a report of such sale or transaction, including the items of expense and the amounts deducted, for the person who is entitled thereto, subject to any order of a court. If such a surplus does not remain to be turned over, the report shall so state.

CHAPTER 2

DEFINITIONS

User note:

About this chapter: Codes, by their very nature, are technical documents. Every word, term and punctuation mark can add to or change the meaning of a technical requirement. It is necessary to maintain a consensus on the specific meaning of each term contained in the code. Chapter 2 performs this function by stating clearly what specific terms mean for the purpose of the code.

SECTION 201 GENERAL

201.1 Scope. Unless otherwise expressly stated, the following terms shall, for the purposes of this code, have the meanings shown in this chapter.

201.2 Interchangeability. Words stated in the present tense include the future; words stated in the masculine gender include the feminine and neuter; the singular number includes the plural and the plural, the singular.

201.3 Terms defined in other codes. Where terms are not defined in this code and are defined in the *International Building Code*, *International Existing Building Code*, *International Fire Code*, *International Fuel Gas Code*, *International Mechanical Code*, *International Plumbing Code*, *International Residential Code*, *International Zoning Code* or *NFPA 70*, such terms shall have the meanings ascribed to them as stated in those codes.

Exception: When used within this code, the terms unsafe and dangerous shall have only the meanings ascribed to them in this code and shall not have the meanings ascribed to them by the International Existing Building Code.

201.4 Terms not defined. Where terms are not defined through the methods authorized by this section, such terms shall have ordinarily accepted meanings such as the context implies.

201.5 Parts. Whenever the words “dwelling unit,” “dwelling,” “premises,” “building,” “rooming house,” “rooming unit,” “housekeeping unit” or “story” are stated in this code, they shall be construed as though they were followed by the words “or any part thereof.”

SECTION 202 GENERAL DEFINITIONS

ANCHORED. Secured in a manner that provides positive connection.

[A] APPROVED. Acceptable to the *code official*.

BASEMENT. That portion of a building that is partly or completely below grade.

BATHROOM. A room containing plumbing fixtures including a bathtub or shower.

BEDROOM. Any room or space used or intended to be used for sleeping purposes in either a dwelling or *sleeping unit*.

[A] CODE OFFICIAL. The official who is charged with the administration and enforcement of this code, or any duly authorized representative.

CONDEMN. To adjudge unfit for *occupancy*.

COST OF SUCH DEMOLITION OR EMERGENCY REPAIRS. The costs shall include the actual costs of the demolition or repair of the *structure* less revenues obtained if salvage was conducted prior to demolition or repair. Costs shall include, but not be limited to, expenses incurred or necessitated related to demolition or emergency repairs, such as asbestos survey and abatement if necessary; costs of inspectors, testing agencies or experts retained relative to the demolition or emergency repairs; costs of testing; surveys for other materials that are controlled or regulated from being dumped in a landfill; title searches; mailing(s); postings; recording; and attorney fees expended for recovering of the cost of emergency repairs or to obtain or enforce an order of demolition made by a *code official*, the governing body or board of appeals.

DETACHED. When a structural element is physically disconnected from another and that connection is necessary to provide a positive connection.

DETERIORATION. To weaken, disintegrate, corrode, rust or decay and lose effectiveness.

[A] DWELLING UNIT. A single unit providing complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking and sanitation.

[Z] EASEMENT. That portion of land or property reserved for present or future use by a person or agency other than the legal fee *owner(s)* of the property. The *easement* shall be permitted to be for use under, on or above said lot or lots.

EMERGENCY ESCAPE AND RESCUE OPENING. An operable exterior window, door or other similar device that provides for a means of escape and access for rescue in the event of an emergency.

EQUIPMENT SUPPORT. Those structural members or assemblies of members or manufactured elements, including braces, frames, lugs, snuggers, hangers or saddles, that transmit gravity load, lateral load and operating load between the equipment and the *structure*.

EXTERIOR PROPERTY. The open space on the *premises* and on adjoining property under the control of *owners* or *operators* of such *premises*.

[A] STRUCTURE. That which is built or constructed.

to do an act which the defendant was legally required to do. the defendant either did an act which was prohibited, or failed to criminally intent as a part of its case. It is enough to prove that prosecution in a legal proceeding is not required to prove that [A] STRICT LIABILITY OFFENSE. An offense in which the portion thereof is utilized or occupied.

[A] SLEEPING UNIT. A room or space in which people sleep, which can also include permanent provisions for living, eating and either sanitation or kitchen facilities, but not both. Such rooms and spaces that are also part of a dwelling unit.

[A] SLEEPING UNIT. A room or space in which people

materials.

RUBBISH. Combustible and noncombustible waste materials, general matter, glass, crockery and dust and other similar leather, tree branches, yard trimmings, thin cans, metals, papers, rags, cartons, boxes, wood, exterior, rubber, rails, coke and other combustible materials, burning of wood, coal, coke and other combustible materials, except garbage; the term shall include the residue from

slipping or living, but not for cooking purposes.

ROOMING UNIT. Any room or group of rooms forming a single habitable unit occupied or intended to be occupied for occupying as a one- or two-family dwelling.

ROOMING HOUSE. A building arranged or occupied for lodging, with or without meals, for compensation and not occupying, with or without meals, for compensation and not

occupying as a one- or two-family dwelling.

[A] PUBLIC WAY. Any street, alley or other parcel of land that is open to the outside air; leads to a street; has been dedicated, dedicated or otherwise permanently appropriated to the public for public use; and has a clear width and height of

[A] PUBLIC WAY. Any street, alley or other parcel of land less than 10 feet (3048 mm).

[A] PROMISES. A lot, plot or parcel of land, easement or public way, including any structures thereon.

[A] PROMISES. A lot, plot or parcel of land, easement or

public way, including any structures thereon.

[A] PERSON. An individual, corporation, partnership or any other group acting as a unit.

[A] PROPERTY BY A COURT.

estate of such person if ordered to take possession of real and such person, and the executor or administrator of the state of the property, including the guardianship having ipally as holding title to the property; or otherwise having control of the property, including the records of the state, county or municipality having legal or equitable interest in the property; or recorded in the official records of the state, corporation having legal or equitable interest in the property; or corporation having legal or equitable interest in the property; or

[A] OWNER. Any person, agent, operator, firm or corpora-

a structure or promises that is let or offered for occupancy.

OPERATOR. Any person who has charge, care or control of

opens directly to the outdoors.

OPENABLE AREA. That part of a window, skylight or door which is available for unobstructed ventilation and which

is, or having possession of a space within a building.

OCCUPANT. Any individual living or sleeping in a build-

ing, or having possession of a space within a building.

[A] OCCUPANCY. The purpose for which a building or structure.

NEGLECT. The lack of proper maintenance for a building of land.

to a recorded or unrecorded agreement of contract for the sale written or unwritten leases, agreements, or pursuant to a record of record the owner of structure by a person who

offer is not the legal owner of structure, dwelling unit, possession or occupancy of a dwelling, dwelling unit,

LET FOR OCCUPANCY OR LET. To permit, provide or

purpose.
