...nking, etc., are much the same as those of
the natives of the South Sea Islands."
Cook then proceeded to New Holland (Australia) to part
of which he mentions that he gave the name of New South
WALES.

"We left this country on the 1st of April, 1770,
and steered for New Holland, all the east part
of which remained undiscovered, my design being to
land.....
I explored the coast.....
NEW SOUTH WALES, to the northern extremity, in the
doing of which we were many times in great danger
of losing the ship. Once we lay 28 hours upon a
ledge of rocks, were obliged to throw our guns,
and many of our stores overboard.....
Great part of this coast is covered with islands
and shoals, which made the exploring it exceeding
dangerous, even to a very great degree. We sailed
upon this coast near 400 leagues by the lead, with
sometimes one, sometimes two and three boats ahead
were very often obliged to anchor with all sails
standing to prevent running ashore. We at last
surmounted all difficulties, and got into the Indian
sea by a passage entirely new.

The East Coast of New Holland, or what I call
New South Wales, extends from 35° to 108°. IF NEW
HOLLAND CAN BE CALLED AN ISLAND, IT IS BY FAR THE
GREATEST IN THE KNOWN WORLD.

Cook gives a most interesting account of the natives of
Australia whom he considered were in a pure state of nature
and far happier than Europeans.

"The natives of this country are not numerous;
they are of a very dark brown or chocolate colour,
with lank black hair; they are under the common size,
