Medically Designed Massage

Your AMERICAN WHIRLPOOL® hot tub features the worlds first Medically designed jetting systems for the ultimate massage. Whether it's diminishing the stresses of everyday life, relieving stiff muscles or simply helping you get a good night's sleep - medically designed Zone Therapy® utilizes correctly positioned jets to target pain zone trigger points. Precisely locating the correct size jet and massaging action where they are most effective is key to relieving pain and stiffness throughout the entire body.

AeroMAAX®

AeroMAAX® strategically places air injectors throughout the spa. This gentler massage promotes blood flow and "vacillation," the awakening of smaller blood vessels through the body. The effect is mild vibration in the spa, to soothe, refresh and heat.

TheraMAAX® Jets

The exclusive TheraMAAX® Jets utilize a scientifically designed grill surrounding the nozzle of the jet to reduce drag and cohesion of the jet stream. The three spoke stainless steel escutcheon makes it easy to adjust the power of the jet.

Shoulder Relief Zone™

The NEW American Whirlpool® Shoulder Relief Zone is designed to massage your shoulders from all angles. The two center jets massage around the spine while the outer two jets focus on the back and side of the shoulder. Differing from the Comfort Collar®, the Shoulder Relief Zone relieves tension in the upper back and shoulders, ideal for those of us sitting at a desk all day.

Comfort Collar®

A neck massage therapy system is one of the most relaxing features in a spa. The molded Comfort Collar's unique cushion supports your neck, while the jets massage neck and shoulder muscles. The Comfort Collar® is like having your neck massaged by a loved one. This hallmark feature is one of the reasons many have already chosen an AMERICAN WHIRLPOOL® hot tub.

X-Series Collar

The convenient X-series option replaces the Comfort Collar® and increases the seat size in the deep corner seat for physical freedom of movement and enhanced comfort for those who need it.

Touch Screen Top Side Control

The user-friendly spa controller allows you to change the temperature from the easy-to-read home screen and use the Mode Selection Wheel or Direct Function Selection Wheel to access any other spa features. Messages and reminders will display at the bottom of the screen to keep you up to date on its' operating condition.

AMERICAN WHIRLPOOL® hot tubs utilize Direct Drive 56 frame pumps in all of their 240 volt models. These are larger, and more powerful motors that eliminates mechanical switches allowing the pumps to run cooler for a longer and more energy efficient life.

Bluetooth Music

State of the art bluetooth technology puts the music at your fingertips. Enjoy your favorite artists and playlists anytime with this easy to use stereo system. Simply sync any bluetooth compatible device and as you slip in to the soothing waters enjoy your favorite artists.

Two fully integrated speakers provide crisp clear fidelity for your listening enjoyment.

When you choose the AMERICAN WHIRLPOOL® Sound System, sound will resonate through the water from the powerful subwoofer, which is integrated directly into your spa's structure. The technology allows you to not only hear, but also feel your music.

Subwoofer

Crystal Clear Water

Perfect moments deserve perfect, crystal clear water. The water maintenance of your spa is made easy by the exclusive features of AMERICAN WHIRLPOOL's complete 4 step cleaning system and dual sanitization.

4 Step Filtration System

- 1. Weir Door** - Breaks the water surface tension and traps debris.
- 2. First Filter** - Removes oil and ultra fine particulates up to 10 microns.
- 3. Basket** - Captures debris before filtering for easy removal.
- 4. Spa Filter** - Oversized filter permits the high flow 1000gpm intake of water to be cleaned and returned into the spa.

CleanZone®

The CleanZone® water purification system will automatically maintain healthy, crystal clear water while greatly reducing chemical maintenance. CleanZone® is a cartridge oxidizer that generates oxygen and cleans your spa water.

CleanZone® Ultra

The CleanZone® Ultra system uses the power of UVC light, the same technology utilized in many communities around the world to purify drinking water. CleanZone® Ultra kills 99.9% of micro-organisms, bacteria, viruses and parasites. This system is the perfect blend of hygiene, purity and technology.

Steel Frame Appliance Grade Structure

AMERICAN WHIRLPOOL® hot tubs are the worlds first steel frame Appliance Grade® hot tubs. The steel frame provides greater structural integrity than wood, as well as superior corrosion protection for a much longer life. Unlike wood It will never rot, warp, or crack. Stronger, more durable, and ideal for the environment - it's the reason AMERICAN WHIRLPOOL® is the ultimate hot tub. The steel frame and Northern Exposure® Insulation allow for complete service of the entire structure and all mechanical parts. Essentially the spa can be serviced to factory specifications right in your backyard, for the lifetime you own it. The hot tub is built to the same service and safety standards as other home appliances.

Lifetime Steel Structure Warranty

The steel frame is the backbone and support for the entire spa. The steel structure of your AMERICAN WHIRLPOOL® hot tub carries a lifetime warranty.

ABS Sealed Base

The ABS Sealed Base is an integral part of the support structure in an AMERICAN WHIRLPOOL® hot tub. Its one-piece construction provides a rugged foundation that seals the bottom of the spa, locking in heat and sealing out moisture.

Service

Conventional foam-filled hot tubs are extremely hard to service and are often damaged in the process. It is very costly to bring these back to factory specifications.

Northern Exposure® is the ultimate hot tub insulation system. This patent pending thermal barrier technology recycles the free heat energy for more efficient heating and lower energy costs. All four sides of the spa, plus the floor and cover are lined with reflective copper material to reflect radiant heat energy generated from the pumps back into the spa. Heat is absorbed back into the plumbing helping raise and maintain water temperature. Finally the entire exterior of the hot tub is wrapped in 3M Thinsulate® Insulation, the same incredible material utilized in winter clothing. This three layer patent pending system ensures energy created by the spa stays in the spa.

BlueMAAX®

The Northern Exposure® Insulation System features our eco-friendly BlueMAAX® insulation. Made from recycled natural fiber, it is approved by the U.S. Green Building Council. The insulation contains no chemical irritants, is treated with a borate based solution to prevent mold/mildew growth, pest infestation, and acts as a fire retardant. BlueMAAX® replaces the urethane foam in "foam filled" hot tubs. (Foam filling produces volatile organic compounds (VOC's) which are harmful to the environment.)

Ultra Quiet

The same insulation that makes an AMERICAN WHIRLPOOL® hot tub energy efficient also aids in it's ultra quiet operation. Sound energy is trapped and deadened inside the hot tub by the insulation sound barrier. Quiet operation is essential to ensure a peaceful relaxing experience throughout the entire backyard.

Weather Shield Insulating Cover

AMERICAN WHIRLPOOL's premium grade insulating covers contain a unique copper lining, removable heat sealing pillows to vent excess heat off in the summer and a tailored fit to keep the heat in when cooler. The cover also acts as an important safety barrier to the spa.

Lifetime Insulation Warranty

The insulation system in your new AMERICAN WHIRLPOOL® hot tub is warranted to maintain the same insulation value as it had at the time it was manufactured. The high R value, Appliance Grade® construction will allow a technician to service the entire spa and bring it back to factory specifications at home.

Set The Mood

Your American whirlpool hot tub is available with a beautiful variety of water and light features. From the laminar water fountains to the Chromotherapy underwater lighting system, everything you need for the perfect scene is available with the touch of a button. Set the color for the perfect mood or turn on the soothing water cascade to help you drift off and forget the stress of the day.

Illuminated Ergonomic Massage Controller

The Ergonomic Massage Controller is illuminated to work in harmony with the other lighting options. It provides an ergonomic grip for easy adjustment of the jet pressure.

Illuminated Drink Holders

The illuminated drink holders turn even water into a visual piece of art that makes any evening special.

Continuous Cast Acrylic

Every AMERICAN WHIRLPOOL® hot tub has an attractive interior finish made from continuous cast acrylic. This is superior to Ethylene "soft plastic" surfaces. The hard, non-porous surface resists stains, fading, scratches and chemical abuse. With the look of pearl or metalescence, the extremely rugged and durable finish offers beauty and peace of mind.

DuraMAAX® Siding

DuraMAAX® is a state of the art wood-alternative material that has the look and feel of natural wood, without the maintenance. The material is impact resistant, impervious to weather or insect damage and will never splinter, crack or rot. The attractive exterior locks in heat and seals out cold air providing a beautiful look and feel

Ultimate Comfort

For over 40 years we have designed the worlds most comfortable hot tubs thanks to patented features like the zero gravity Performance Seat[®]. Seats are specifically molded to fit a variety of shapes and sizes so you can find the one that's right for you. Deep immersion seating provides ultimate comfort, while armrests and Foot Relief Zones[®] seem to mold to your body.

Performance Seating[®]

Performance Seating[®] means AMERICAN WHIRLPOOL[®] has the most comfortable spas in the industry. Each seat is designed to provide full body immersion and proper posture, in harmony with their respective jetting pattern, for comfort, superior jet performance and reducing stress on your lower back.
