EXPERTISE

Process Leadership, Rough Cut Capacity Planning, Inventory Optimization, SAP implementation, Production Planning, Offshore Management, End to End Supply Chain, Raw Material Planning MRP.

MAJOR CAREER ACCOMPLISHMENTS

- Experienced in leading both domestic and offshore organizations accountable for business execution and process development in Master Scheduling, and Raw Material Planning (MRP) supporting 13 Plants and 30 contract manufacturers.
- Delivered inventory strategy for \$900 million in finished product, \$100 million in semi-finished product, and \$200 million in raw materials.
- Implemented DOS tracking across raw materials using \$\$ as the standard unit of measure. Tracked and reduced inventory by 20% over 3 years. Enabled \$20-\$30 million in sourcing cost savings thru effective use planning processes and tools.
- Led the business process side of SAP R/3 MRP and APO (SNP/PPDS) implementations across North America.
- Increased customers service from 93% to 99% for the Food Service Division while decreasing inventory by 30% across a 14 million case business. This was accomplished by optimizing inventory targets and implementing an ABC production cycling strategy.
- Practitioner: Production Scheduling, Master Scheduling, Capacity Planning, Raw Material Planning, Product Deployment.

TARGET OPPORTUNITIES

- Small to midsized companies with high growth
- Business process development in deployment planning, production planning, capacity planning, and raw material planning.
- Location: Remote with travel 25%.
