BENEFITS of producing Ultra-Lyte Products

Equipping the Food Processing Industry to meet, and ultimately exceed industry standards when it comes to food safety, is our commitment. Effective, efficient, environmentally friendly and affordable cleaning and sanitizing solutions are achievable! Embrace a new era... eliminate contamination from bacteria & viruses.

Clean in Place Ensure fixed equipment is clean and disinfected. Using Ultra-Lyte and Ultra-Lyte Degreaser within CIP results directly in time and cost savings! Omit chemical cleaners, reduce water consumption and increase energy savings, by sanitizing at ambient temperatures (24 C).

Process Water Disinfection Eliminate the introduction of microorganisms into your facility! The simplicity of continuously decontaminating of your process water offers an invaluable assurance. Ultra-Lyte treated water safely and effectively kills E-Coli & coliform.

Biofilm Damp, wet environments, such as drains and waterlines, host the ideal breeding ground for that familiar sticky slime of pathogens and bacteria. Use Ultra-Lyte solution at chlorine levels for the treatment of biofilm contamination within your processing plant.

Bottle Cleaning and Sanitation Ultra-Lyte and Ultra-Lyte Degreaser cleaning protocols boast reduced cleaning and sanitizing times, eliminate in-between rinsing and requires only ambient temperatures (24 C)

Washing and Rinsing Reduce spoilage and increased shelf-life. Ultra-Lyte offers the assurance of chemical-free washing in the preparation of fruits, vegetables, eggs, fish (through bacteria-free ice), poultry and meat carcasses, all without leaving a residue.

Facility Cleaning and Disinfecting Clean floors, walls and equipment with Ultra-Lyte Degreaser, following with Ultra-Lyte for disinfection.

Ultra-Lyte and Ultra-Lyte Degreaser

Aquacharge provides the Food Processing Industry with a safer, more cost-effective alternative to current cleaning and sanitation protocols.

Can you afford not to use Ultra-Lyte and Ultra-Lyte Degreaser in your operation?
