

## BENEFITS of producing Ultra-Lyte Products

**Wiping the Air Clean** Dry fogging of Ultra-Lyte in barns aids in the control of dust, airborne pathogens and viruses. The subsequent improvement in lung health will be achieved. Inevitably, fogging also contributes to maintaining cooler birds throughout the summer months.

*The Result:* Bacteria and Virus control, in your own hands; improved bio-security.

**Hatchery Applications** Spray egg rooms with treated humidification water, replace Formalin in hatchers and in-transit spray for superior disinfection.

*The Result:* Decreased mortality rates, healthier chicks.

**Facility and Equipment Protection** Use Ultra-Lyte when disinfecting rooms, cages, equipment, and boots.

*The Result:* Enhanced Bio-security.

**Ultra-Lyte Degreaser** Ultra-Lyte Degreaser solution acts as a mild degreaser and remover of organic matter, with a pH of 11/12. Perfect for use within pressure washers to help remove bio-film, and reduce wash time! By committing to a better environment for your poultry, a more natural immunity is ensured, resulting in healthier livestock.

*The Result:* Reduced labour demands, and lower production costs.

**Sustained Water Purity** Dose drinking water and help remove bio-film build-up within waterlines and eliminate algae from drinking troughs. Water will have fewer bacteria, viruses, molds, spores and parasites.

*The Result:* Higher Gains, Decreased Mortality, Improved Feed Conversion seen by 5-7%

## Ultra-Lyte and Ultra-Lyte Degreaser

By committing to a better environment for your poultry, a more natural immunity is ensured, resulting in healthier flock.

**Can you afford not to use Ultra-Lyte and Ultra-Lyte Degreaser in your operation?**
