

INNOVATIVE ECO-FRIENDLY SOLUTIONS

BENEFITS of producing Ultra-Lyte Products

Facility and Equipment Protection Use Ultra-Lyte when disinfecting rooms, pens, boots, trailers and farm equipment.

The Result: Improved bio-security.

Treat Diarrhea Bactericidal action has been proven on field strains of E.coli, Pseudomonas, Staphylococcus, Cryptosporidiosis and Salmonella.

The Result: Improved bio-security.

Wound Care Spray Ultra-Lyte directly following castration, after tail docking and areas of concern to effectively disinfect and cleanse.

The Result: Accelerated healing.

Sustained Water Purity Dose drinking water and help remove bio-film build-up within waterlines and help eliminate algae from drinking troughs. Water will have fewer bacteria & viruses. Helps control bacterial action on field strains of E.coli.

The Result: Improved livestock health. Decreased medication costs.

Wiping the Air Clean Spraying of Ultra-Lyte in barns aids in the control of dust, airborne pathogens and viruses such as PRRS and Mycoplasma. A subsequent improvement in lung health will be achieved. Inevitably, Spraying also contributes to maintaining cooler swine throughout the summer months.

The Result: Infection control, in your own hands.

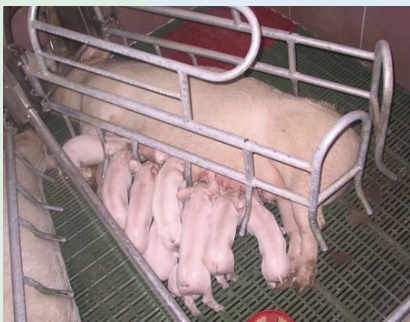

Ultra-Lyte degreaser Ultra-Lyte Degreaser solution acts as a mild degreaser and remover of organic matter. With a pH of 11-12, it's perfect for use within pressure washers to help remove bio-film, and reduce wash time! By committing to a better environment for your swine, a more natural immunity is ensured, resulting in healthier livestock.

The Result: Reduced labour demands and lower production costs.

Ultra-Lyte and Ultra-Lyte Degreaser

By committing to a better environment for your swine, a more natural immunity is ensured, resulting in healthier livestock.

Can you afford not to use Ultra-Lyte and Ultra-Lyte Degreaser in your operation?
