

**THE-MACHINE-SHOP**

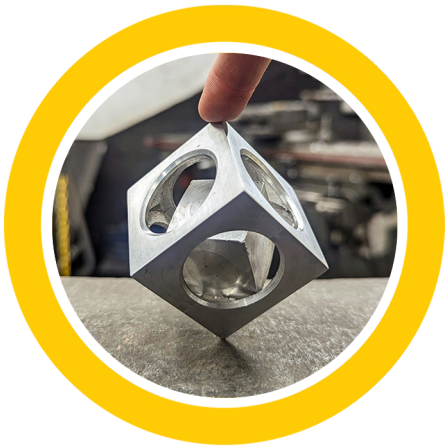

## Is love in the air everywhere around you?

Worry not - at THE-MACHINE-SHOP we have a great air extractor and loads of PPE that can fix that!

Indulge yourself in our brand new MACHINING SKILLS class where you can learn how to use the milling machine and metal lathe while creating a complicated puzzle cube that can't be solved, much like your long lasting quest to happiness.

For the romantics out there, remember: the sparks are always flying in our WELDING ROOM! Book a lesson and submerge yourself into the magic of glueing metal together in the hope that your new talent will be enough to impress someone one day.

And if you're feeling a bit sad and lonely - well, we can't do anything about that. But you can come and get stuck into our exciting MACHINE-SHOP EXPERIENCE stand at MCN London ExCel from the 16th till the 18th of February and forget about your miserable ways for a day or two!

**Because... not all relationships last forever.  
But skills do!**

P.S. All our classes and lessons can be booked as a couple activities.

Yours mechanically,  
**THE-MACHINE-SHOP**
