
About Us

Mediterranean Imports provides the highest quality distilled botanicals. Owning and operating farms and a distillery in the country of Albania has allowed Mediterranean Imports (MI) an opportunity to be 100 percent transparent and accessible to our customer base.

With generations of distilling experience coupled with some of the most fertile lands in the Mediterranean region, MI produces only the purest of essential oils. Partnering with the local villagers in and around our acres of certified organic lands, we work hard to assure the utmost in sustainability farming techniques are continually employed, just as they have been for centuries. Growing, harvesting, and supplying MI with high quality herbs allows locals the opportunity to have a prosperous existence, and we are pleased to have strong relationships throughout our operations.

Until recently, MI has been focused on the European market only; however, with recent advances in capacity, we now have the opportunity to produce the highest quality oils for the American consumer. With a base of operations in Edmond, OK, Mediterranean Imports provides our products direct without the hassle of having long shipping periods or customs holds. Working directly with consumers, distributors, and manufacturers, our mission is to continue to partner with our clients in order to continue to educate the American consumer on the benefits of essential oils.

We invite you to experience our products, to engage with us in the process, and to partner with us in the overall mission. We look forward to continued and strong relationships with our clients and partners, and honor all of the opportunities ahead.
