

Effects of CIMR® Technology on reducing common contaminants on surfaces* in 24-hour testing

Effects of CIMR® Technology on reducing common contaminants on surfaces* in 24-hour testing

Field results may vary based on environmental conditions.

* Published scientific studies conducted by Dr. James L. Marsden at Kansas State University demonstrated that CIMR technology substantially reduces microbial populations on surfaces. The study's results are being provided solely for informational purposes. The study's results have not been reviewed by the FDA, EPA or any other governmental agency. CIMR products are not medical devices and are not intended to diagnose, treat, or cure any disease.
