

Our volunteers are working very hard to make as many items as possible. Since the start of the crazy crisp packet journey we have made and sent out over 5,000 items around the Uk, Ireland and Ukraine and this year Calais.

We thank you for your support as with out this we could not help as many less fortunate communities.

Giving new life to one use plastics and saving lives this winter Just Magic.

This project has helped so many people in our less fortunate communities. Helping them to stay a little bit warmer and in some cases saving lives. Its also brought so many people together given us all a boost of self worth and a purpose. Also showing us the shocking reality of the waste that we consume of one use plastics.

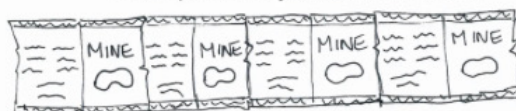

1 Put your iron on a medium heat setting to start. If you notice its too cool & not fusing turn it up, or down if it melts the packet.

2 Place your crisp packets side by side, overlap by 1cm. Take greaseproof paper & iron for 1 second not too long! Keep them as straight as possible in a line,repeat until you have 4 in a row.

3 Repeat this process until you have 11 rows of 4 crisp packets.
