4 pc Mixing Bowls

Milk Warmers

Round Grill Pan

Meat Cleaver

Coffee Maker

## The Perfect Cookware System

- The perfect combination of materials makes cooking easy and quick: meals that are more delicious and nutritious can be prepared in less than 30 minutes the waterless and greaseless way.
- The cookware works equally well on gas or electric stoves. The bottom of each piece is specially designed for smooth top stoves and is the best choice for the newest induction cooktops.
- Lock in flavor and nutrients with our Vapor-Sealed covers.
- No guesswork: the Redi-Temp™ valves in the covers tell you when the temperature has reached 180°F/82°C - perfect cooking temperature.
- SureGrip™ handles and knobs have a core of steel - not plastic - to last a lifetime. They are more ergonomic, don't overheat, and are easy to clean.
- Never misplace a cover again - all covers store inside the pan - even if the pan is hanging from the integrated steel loop.
- The covers have self-basting rings built right in - as vapors rise from the food during cooking, they collect on the inside of the cover and fall back on the food when the moisture contacts the rings.
- The pans and covers are oven-safe up to 400°F/204°C.
- The cookware is dishwasher-safe.
- The cookware has a 50-Year Limited Warranty - not just a lifetime warranty. In fact the manufacture date is stamped in the bottom of each piece - the warranty travels with the pan!

We offer health and wellness products to enhance your life. For over half a century, our exclusive products have been offered through what is now the world's largest network of professional distributors in the cookware industry.
