PROFESSIONAL Profesional / Professional

T

Due to the tempering process, Opalglass presents a shock and thermal resistance higher than any other material. Furthermore, opalglass is a non-porous highly hygienic material, perfect for the horeca bussines.

Gracias al proceso de templado, el vidrio opal ofrece una resistencia térmica y mecánica superior a cualquier otro material. Además, se trata de un material muy higiénico debido a su baja porosidad, por lo que resulta muy adecuado para la hostelería.

L'Opal è un nuovo materiale che dà piatti e ciotole leggerezza e resistenza del vetro temperato. Grazie ad un trattamento speciale per il vetro, si realizzano prodotti con elevata resistenza meccanica e termica ineguagliabile altro materiale, diventando fino a 5 volte più durevoli rispetto allo stesso prodotto in vetro convenzionale.

H

This label is a guarantee for a product designed and manufactured for its professional use. The goals of this range of items are to increase the profit of the businesses and to facilitate the labour of the horeca professionals.

Este distintivo garantiza un producto diseñado y fabricado para uso profesional. El doble objetivo de esta gama de artículos consiste en incrementar el beneficio de los negocios y facilitar el trabajo de los profesionales de la hostelería.

Questa approvazione è un prodotto progettato per l'uso professionale e migliorati: più lavaggi con lo stesso aspetto, maggiore resistenza all'abrasione e allo strappo minore nel risultato di shock in un minor numero di sostituzioni e maggiore beneficio per il vostro business.

T

The tempering process through cold air streams builds up glass molecular structure and provides special features for the material. Tempered glass is up to 10 times more durable than standard glass.

El proceso de templado mediante chorros de aire frío fortalece la estructura molecular del vidrio y le proporciona características especiales. El vidrio templado es hasta 10 veces más duradero que el vidrio convencional.

Grazie ad un particolare trattamento al vetro, fabbricazione vetro con elevata resistenza meccanica e termica ineguagliabile altro materiale, diventando fino a 5 volte più durevoli rispetto allo stesso prodotto in vetro convenzionale.

STRECHED FOOT
Through this technique we achieve the ideal proportion between elegance and resistance, as well as the unique touch of one-piece glassware

LASER CUT
With this technique we get a perfect finish, so that our sense of taste focuses exclusively on the wine tasting experience.

IMPROVED DESIGN
Conical shapes contribute to an efficient table service, favor the correct oxygenation of the wine and direct the scents towards our sense of smell.

OPTIMIZED THICKNESS
In the blown process, the thickness of glass is distributed homogeneously around the walls and decreasing towards the edge. This is how we achieve the optimum hardness and the special sonority that seduces the expert hearing senses.

MAXIMUM BRIGHTNESS & TRANSPARENCY
This superior level of sharpness and luminosity, so attractive for the sight, is only possible with a completely free of impurities raw material and a meticulous manufacturing process.

Atenea glasses have been **specialy treated** in order to further improve their behavior and usability.

The thickness of the edge has been reduced to make it more pleasant in the mouth without losing resistance.

The foot is reinforced to increase the life of the cup.
