#### **Pulled Stem**

The crystalline stem is pulled out of the goblet, and melted together with the plate. These glasses have no joints between the stem and bowl nor seamlines. Therefore the crystalline stemware is seamless and smooth in the hand and has a high resistance to breakage.

## My **CHARM** *easy-drinking collection*

The glasses of the CHARM series with their extra short stems are particularly functional in terms of storage and cleaning. In addition, the low centre of gravity contributes to a high stability. This glass series is ideal for everyday use and for a relaxed get-together with friends. Due to their clear glass shapes and their fine crystal glass, they reflect the simple freshness of the wine particularly well. In addition to a red wine, white wine and sparkling wine glass, the CHARM series will also include a beer glass and a glass for gin and tonic.

## My **EXUBERANCE** *dining collection*

For even more luxuriant appeal, the EXUBERANCE range is finer with a longer stem. Ideal for a more refined approach or for a special occasion. The EXUBERANCE glasses are very durable due to the pulled stem technology which gives one complete piece with no seamlines. The stem glasses retain their clarity and brilliance even after being regularly cleaned in a dishwasher. This range also includes five different glassware shapes for red wine, white wine, fizz, beer as well as a gin balloon.
