

Petitioned Warrant Article for Inclusion in the 2021 Town Warrant

Town of Littleton, New Hampshire

We, the undersigned registered voters of the Town of Littleton, NH, hereby present by petition the following resolution for inclusion on the 2021 Town Meeting Ballot.

Warrant Article: To see if the Town of Littleton will vote to support the following resolution:

Whereas the North Country has been host to one of the State's largest solid waste landfills for more than three and a half decades and

Whereas the North Country has become the repository for hundreds of thousands of tons of municipal solid waste generated in towns and cities outside our region and state and

Whereas the by-products of that solid waste have for years adversely affected the water, air, and life quality for our neighbors and ourselves and

Whereas there are other legal, affordable and available options for waste disposal for our locally generated solid waste and

Whereas the communities that currently send their solid waste to be landfilled in the North Country can take responsibility for the reduction and disposal of their own waste in their own regions and

Whereas the people of the Town of Littleton over these past decades have made substantial investments in our community's health and sustainability, including recognizing and supporting the economic importance of the Ammonoosuc River, which runs right through our center, therefore

The Town of Littleton resolves that the new landfill proposed to be located in neighboring Dalton is not compatible with our vision for the protection of the Ammonoosuc River and its watershed, our shared groundwater, our shared roadways, our regional environment, or the tourism businesses we depend on for our economic future.

We, the voters of the Town of Littleton, hereby **resolve to oppose** New Hampshire Department of Environmental Services' approval of any application for another commercial landfill to be built in the North Country.
