

Our Payment Technology Provides a Flexible Processing Solution for your Practice

Super Secure Wireless Credit Card Terminals

- EMV contact & contactless payments
- PIN based debit

Multiple Terminal Support

- **Control settlement times:** manually or automatically
- **Single batch:** one daily batch that encompasses all transactions from the day
- **Combined reports:** one detailed report reflecting processing from all sources
- **Gross deposits:** what you process is what you get, fees are deducted once a month

Virtual Terminal

- Securely store and tokenize payment details for future use
- Recurring and installment billing
- **Automatic card updater:** stored payment details updated automatically by the card brands before expiration preventing any interruption with future payments
- Easily run full or partial refunds from your desktop browser

PCI Compliance has never been easier

- No network scans required just the annual questionnaire with which we would gladly assist with

Sounds amazing right?
What is the catch you ask?
There is no catch.
