

## Our Payment Gateway Provides a Flexible Processing Solution for your Practice

- **Wireless Credit Card Terminals with Super Secure P2Pe**
  - EMV chip & contactless payments
  - PIN based debit
- **Multiple Terminal Support**
  - control settlement times
    - manually or automatically
  - single batch
    - one daily batch that encompasses all transactions from the day in one place
  - combined reports
    - one detailed report reflecting all processing from all sources
  - gross deposits
    - what you process is what you get, fees are deducted once a month
- **Virtual Terminal**
  - securely store and tokenize payment details automatically for future use
  - recurring and installment billing
  - automatic card updater
    - stored payment details updated automatically by the card brands before expiration preventing any interruption with future payments
  - easily run full or partial refunds from your desktop browser
- **PCI Compliance has never been easier**
  - no network scans required just the annual questionnaire, which we gladly assist with
