About Us

Super Spice Foodstuff is a trusted name in the food trading industry, specializing in the import, export, and distribution of premium-quality spices, pulses, grains, and food products. With a commitment to freshness, authenticity, and excellence, the company caters to the diverse culinary needs of local and international markets. Super Spice Foodstuff is dedicated to delivering reliable service, competitive pricing, and products that meet the highest standards of quality and safety.

COFFEE BEANS

High-quality green coffee beans, Screen 16+ with a cupping score of 80+, are specialty-grade beans prized for their superior size, consistency, and exceptional flavor profile.

Coffee

Green coffee beans are the raw, unroasted seeds of the *Coffea* plant, carefully processed to preserve their natural aroma, taste, and quality. They are classified by screen size, with Screen 16+ and above representing larger, more uniform beans that are highly sought after in the specialty coffee industry. Processing methods such as washed (fully washed) and natural (dry) play a crucial role in defining the flavor profile of the beans—washed coffees typically deliver clean, bright, and crisp flavors, while natural coffees provide a fruity, sweet, and complex taste. Specialty-grade beans are further evaluated by professional cupping scores, where a score of 80+ denotes premium quality, ensuring consistency, traceability, and a superior coffee experience.

High-quality green coffee beans are cultivated and exported by some of the world's leading coffee-producing countries, each bringing unique characteristics to their beans. Nations such as Ethiopia, Kenya, Tanzania, Colombia, Brazil, Guatemala, and Costa Rica are renowned for their rich coffee-growing traditions and diverse flavor profiles shaped by altitude, soil, and climate. These beans are carefully harvested, processed, and exported to international markets, where roasters and traders value them for their reliability, traceability, and exceptional cup quality. As a global commodity, specialty green coffee beans continue to serve as the foundation of fine coffee production, supporting both consumer demand for excellence and the livelihoods of millions of farmers worldwide.

SAFFRON

Saffron is a rare and precious spice, derived from the dried stigmas of the *Crocus sativus* flower, prized for its vibrant color, rich aroma, and distinctive flavor.

Exporting Countries: Iran, India, Spain

CUMIN SEED

Cumin seeds are aromatic spices with a warm, earthy flavor, widely used in culinary traditions and valued for their distinctive taste and health benefits.

Exporting Countries: Iran, India, Egypt

Exporting Country: Madagascar, France, Uganda, Indonesia, and Papua New Guinea

BASMATI RICE

Basmati rice is a long-grain, aromatic rice known for its fluffy texture and distinct nutty flavor when cooked.

EXPORTING COUNTRIES: INDIA, PAKISTAN

BASAMTI RICE

Basmati rice is a premium variety of long-grain rice, primarily grown in the Indian subcontinent, especially in India and Pakistan. Renowned for its delicate aroma, slender grains, and nutty flavor, Basmati rice is a staple in many traditional cuisines, including Indian, Middle Eastern, and Persian dishes. When cooked, the grains remain separate, soft, and fluffy, making it ideal for pilafs, biryanis, and steamed rice dishes. Basmati rice is available in both white and brown varieties, with brown Basmati retaining more nutrients and fiber. Its unique fragrance comes from a naturally occurring compound called 2-acetyl-1-pyrroline, which gives it the signature aromatic quality. High-quality Basmati rice is aged for several months to enhance its texture and flavor. It is also considered a healthier option due to its lower glycemic index compared to regular white rice, making it suitable for people managing blood sugar levels. Overall, Basmati rice is valued for its taste, aroma, and versatility in global cuisine.

JASMINE RICE

Jasmine rice is a fragrant long-grain rice primarily grown in Thailand, known for its soft, slightly sticky texture when cooked. It has a subtle floral aroma and a naturally sweet flavor, making it perfect for Asian dishes like stir-fries and curries. Its light, fluffy grains absorb flavors well, enhancing the taste of any meal.

Exporting Countries: Vietnam, Thailand

WHEAT FLOUR

Whole wheat is a nutrient-rich grain that retains the bran, germ, and endosperm, providing fiber, vitamins, and minerals.

Exporting Countries: Nigeria, India

MILLET

Millet is a small, nutrient-dense cereal grain valued for its high fiber, protein, and mineral content, commonly used in porridge, bread, and gluten-free products.

Exporting Countries: India, Nigeria, Ethiopia

MAIZE

Maize, also known as corn, is a versatile cereal grain used for food, animal feed, and industrial products worldwide.

Exporting Countries: India, Türkiye

ALL-PURPOSE FLOUR

All-purpose flour is a versatile wheat flour suitable for baking, cooking, and frying, providing a balanced texture for a wide range of recipes.

Exporting Countries: China

COPRA

Copra is the dried kernel of a coconut, primarily used for extracting coconut oil and in various food and industrial products.

Exporting Countries: Worldwide

SUNFLOWER SEEDS

Sunflower seeds are nutrient-rich seeds harvested from sunflower heads, commonly eaten as snacks, added to salads, or used to produce sunflower oil.

Exporting Countries: Worldwide

CHESTNUT

Chestnuts are edible nuts with a sweet, starchy flavor, commonly roasted, boiled, or used in baking and savory dishes.

Exporting Countries: Worldwide

PISTACHIO

Pistachios are small, nutrient-rich nuts with a distinctive green color and slightly sweet, nutty flavor, often eaten as snacks or used in desserts and cooking.

EXPORTING COUNTRIES: WORLDWIDE

PISTACHIO

Pistachios are small, flavorful nuts that grow in clusters on the *Pistacia vera* tree, primarily cultivated in regions such as Iran, the United States, and the Mediterranean. Known for their distinctive green hue and slightly sweet, nutty taste, pistachios are enjoyed both shelled and unshelled, either raw or roasted. They are widely used in culinary applications, including desserts like ice cream and pastries, savory dishes, salads, and as a healthy snack on their own. Their unique flavor and crunchy texture make them a popular ingredient in both traditional and modern recipes around the world.

Nutritionally, pistachios are highly valued for their health benefits. They are rich in protein, healthy fats, fiber, vitamins such as B6, and minerals including potassium and magnesium. Regular consumption of pistachios has been associated with supporting heart health, improving digestion, and promoting weight management due to their nutrient density and satiating properties. Additionally, pistachios are considered a source of antioxidants, which help combat oxidative stress in the body. Overall, pistachios are a versatile, delicious, and healthful nut that appeals to a wide range of culinary and dietary preferences.

CASHEW NUTS

Cashew nuts are creamy, buttery-flavored nuts often eaten as snacks, roasted, or used in cooking, baking, and confectionery.

Exporting Countries: Worldwide

RAISINS

Raisins are dried grapes that are naturally sweet, chewy, and commonly used in baking, cooking, or eaten as a healthy snack.

Exporting Countries: India, Iran

ALMONDS

Almonds are nutrient-rich nuts with a crunchy texture and mild, sweet flavor, commonly eaten raw, roasted, or used in cooking and baking.

Exporting Countries: Worldwide

WALNUT

Walnuts are nutrient-dense nuts with a rich, slightly bitter flavor, commonly eaten raw, roasted, or used in baking, cooking, and salads.

Exporting Countries: Worldwide

DATES

Dates are sweet, nutrient-rich fruits from the date palm, commonly eaten fresh or dried. They are a good source of energy, fiber, and essential minerals.

Exporting Countries: Worldwide

DRIED APRICOTS

Dried apricots are sweet, chewy fruits preserved from fresh apricots, rich in fiber, vitamins, and minerals.

Exporting Country: Türkiye

DRIED FIG

Dried figs are naturally sweet, chewy fruits packed with fiber, vitamins, and minerals, often enjoyed as a snack or in desserts.

Exporting Country: Türkiye

SHISHA CHARCOAL

Shisha charcoal is specially made fuel used to heat flavored tobacco in hookahs, providing consistent and long-lasting heat for smoking.

EXPORTING COUNTRIES: INDONESIA & VIETNAM

SHISHA CHARCOAL – COCONUT SHELL

Coconut shell shisha charcoal represents a premium, eco-friendly alternative to traditional charcoal, crafted from sustainably sourced coconut shells. Renowned for its high density and slow-burning properties, it produces minimal ash and emits a clean, consistent heat, enhancing the flavor and longevity of the shisha experience. Unlike conventional charcoal, coconut shell charcoal is virtually odorless and free from chemical additives, ensuring a pure and natural smoking session. Its superior ignition and prolonged burn time make it highly efficient, reducing the frequency of charcoal replacement while maintaining optimal heat distribution. Favored by enthusiasts and commercial hookah lounges alike, coconut shell shisha charcoal combines environmental sustainability with superior performance, elevating both casual and professional hookah sessions.

HARDWOOD CHARCOAL

Hardwood charcoal restaurant grade from Ayin wood is high-quality, non-sparking charcoal, ideal for consistent, safe, and efficient cooking in professional kitchens.

Exporting Countries: Nigeria
