

Case Study Summary - Exit Signs at Dorset NHS Trust Multi-Story Car Park

- The scope of the project was to provide white painted metal exit signs for a multi-story car park for the Dorset NHS Trust
- Another supplier failed to provide their 4-sided exit sign products due to component lead time problems
- We worked with the TM Technologie factory to have the new products manufactured as a priority to meet the required customer project timescales.
- We supplied ahead of time, suspended metal Primo-Q 4-sided exit signs with 30-metre viewing distance and standard test
