

Case Study Summary - DALI Emergency for Prestigious Office

Lighting-Power-Control

- The scope of the project was to provide emergency lighting using high end materials and of a colour required by the architect whilst also being able to integrate with the DALI lighting control system for the required emergency lighting testing and reporting
- Recessed ONTEC C downlights in black with DALI emergency control and with corridor optics for escape routes and anti-panic optics for the open areas
- Surface mount ONTEC D downlights in black with DALI emergency control, also with corridor optics for escape routes and anti-panic optics for the open areas
- Primo G exit signs with metal black powder-coated paint with DALI emergency control with wall, ceiling and recessed mount ability
- With the use of environmentally friendly Lithium-Ion batteries and dimmable LEDs in all emergency fittings, this contributed to the final office building, Holbein Gardens in Belgravia, London achieving a BREEAM Outstanding rating for sustainability.
