CABINETS FROM ADELPHI KITCHENS

 **ADELPHI**  
KITCHENS & CABINETS

MAKING *dreams*  
INTO *reality.*

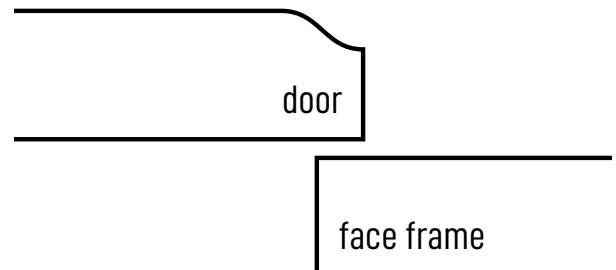

# FRAMED CABINET CONSTRUCTIONS

## STANDARD OFFSET

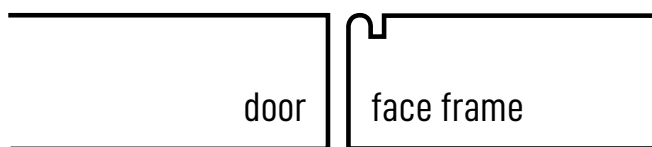

Sometimes called 3/8" offset by other manufacturers, this style uses a door with a lipped edge that has a "rabbet" on the rear of the profile. This results in half of the 3/4" door thickness being recessed into the cabinet frame, leaving 3/8" exposed. The door covers 1/4" all around the cabinet frame opening, meaning doors and drawers will be a total of 1/2" wider and higher than the frame opening. Cabinet uses 1 1/2" framing throughout.

## MARGINAL OVERLAY

Marginal overlay cabinetry has the doors and drawers lying completely on top of the face frame. The entire edge profile and 3/4" thickness is visible. The door covers 1/2" all around the cabinet frame opening, meaning doors will be a total of 1" wider and higher than the frame opening. Drawer fronts follow the same procedure. Marginal overlay utilizes 1 1/2" cabinet framing widths by default.

## INSET: BEADED OR FLUSH

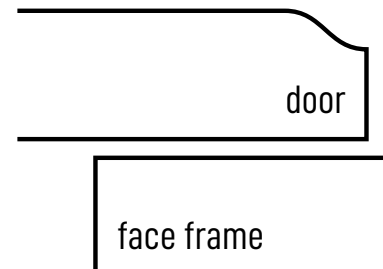

*illustration of beaded inset style*

In these styles, the doors and drawers are flush inside the face frame. None of the door's edge thickness is visible. We offer inset in two varieties: beaded inset or flush inset. Flush inset is simply flat edged cabinet frames like on our other styles.

Beaded inset uses a 1/4" bead applied to the inner edge of cabinet openings that have doors or drawers and uses 1 1/4" framing throughout. After construction, the 1/4" bead is applied to the openings. This makes outer pieces 1 1/2" and the center, cross pieces yield out to 1 3/4" wide.

## FULL OVERLAY

Framed full overlay cabinetry also has the doors and drawers lying completely on top of the frame. The entire edge profile and 3/4" thickness is visible. Door and drawer sizes are not based on cabinet openings, but rather on using "reveals" around all of the fronts. At the top of walls and base cabinets there is a reveal of 1/4". At the bottom of walls and bases there will be no reveals. At the left and right edges of all cabinets is an 1/8" reveal, so when cabinets are butted together, it will maintain the look of 1/4" reveals. Framing is 1 1/2" wide with the exception of outer stiles being 1 1/4" wide, and certain center stiles on multi-door cabinets are 2 1/2" wide.

# THE FIRST NAME IN CUSTOM CABINETRY.

For 75 years, Adelphi Kitchens has specialized in custom cabinetry in a wide range of styles and constructions. Of these, none is more bespoke than our full line of **face-frame cabinetry**. Each of the five construction types uses solid wood face frames that can be built from an almost endless selection of species.

Adelphi's cabinetry can be built to serve nearly any purpose, from kitchens and baths to offices and businesses. The selection of available finishes is plentiful; choose from **over 70 colors** in our standard stain or paint libraries, or pick any color from **Benjamin Moore** or **Sherwin-Williams**. We can also match your finish if you are trying to coordinate with an earlier purchase. In addition, finishes can be highlighted, glazed, distressed, or otherwise specially treated to make your cabinetry truly unique: your own, one-of-a-kind, custom product from Adelphi.

# PERSONALITY. CHARM. STYLE.

Adelphi's **Ridgewood cabinetry** is an all-wood European-style frameless line. Cabinet boxes are constructed entirely of 3/4" plywood and assembled with wood dowels and glue; drawer boxes are always dovetailed solid wood. When it comes to frameless cabinetry, the Ridgewood collection is top-of-the-line.

As a custom manufacturer, our capabilities are almost limitless, which makes the Ridgewood line a highly customizable choice. Select from six distinctive wood species or thermo-textured surfaces in the Strata line. Stained cabinets are available in more than **40 unique finishes**, or choose from **over 35 colors** in our paint library or any **Sherwin-Williams or Benjamin Moore paint**. Combined with **more than 70 available doors**, Ridgewood cabinetry is sure to have the perfect union of styles for even the most discerning customer.

# STRIKING QUALITY. EXCEPTIONAL VALUE.

For a fully-customizable engineered cabinet, Adelphi's **Woodbrier cabinetry** is an excellent choice. These European-style frameless cabinets are constructed with engineered wood sides and assembled with wood dowels and glue; drawer boxes are always dovetailed solid wood.

With **more than 70 styles** available, Woodbrier boxes are used not only with standard wooden doors, but also with RLV, Tekton, and Aluminate products. You can also choose from the Strata line of thermo-textured surfaces. The most popular wood species are available, with four to choose from, and you can select from **over 30 stained finishes** or **more than 35 different paint colors** in our library. In addition, any paint color from either **Sherwin-Williams** or **Benjamin Moore** is available on Woodbrier, making it an attractively affordable option.

# BRIER SELECT

CABINETS FROM ADELPHI KITCHENS

## SELECT STYLES. INFINITE POSSIBILITIES.

**Brier Select cabinetry** uses a mix of white hardwoods, such as birch and maple, to achieve unique character with special consideration to both price and quality. As you can see, Brier Select suits a variety of different styles. Crafted with the same care and attention to detail that is put into every Adelphi cabinet, the Brier Select cabinet uses hardwood particle board and is constructed with wood dowels and glue just like our other frameless lines. Fully customizable, the Brier Select line offers an attractive value option with nearly 350 different cabinet door, finish, and texture combinations.

# ADELPHI

## KITCHENS & CABINETRY

## STRATA DOORS

State of the art technology allows the combination of textiles and materials on panels and laminated surfaces that delivers appeal and dependability to the Kitchen and Bath Industry. Strata doors leverage an array of innovative and unique surface styles infused with a bold character and disposition to keep up with these latest trends.

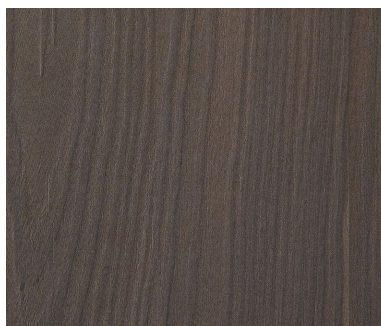

Strata doors are Thermo Structured Surfaced (TSS) panels that undergo a process of thermally fusing decorative, high-resolution woodgrains and abstract design prints.

Made with sustainable materials including wood chips, fiber and recycled wood results in the right density to achieve the unique texture while making it an environmentally friendly choice.

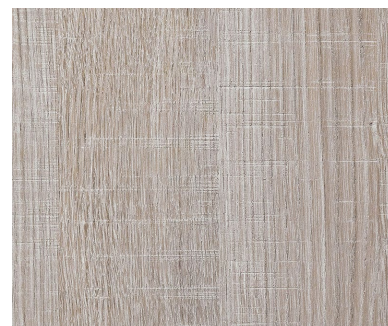

# FINISHES

Highly durable TSS materials are resistant to scratches, dents and fingerprints.

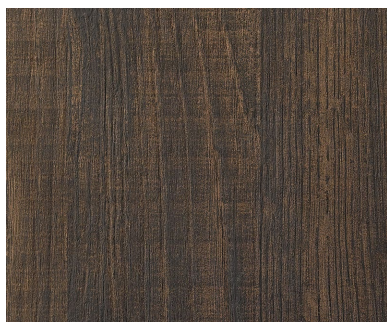

TSS products offer a high level of stability that withstand warping and bowing, even in high humidity or arid environments.

## BEAUTY COMBINED WITH CUSTOM DESIGN

Cover photo by Dream Kitchens in Nashua, NH

ADELPHI

KITCHENS & CABINETRY

# EURO-CONTEMPORARY

Dare to **make a statement** with this high-styled and modern look.

Bold colors, fun textures, trendy mattes, nanotechnology, high glosses — all the rage in our Euro-Contemporary line. Perfect for consumers seeking a sleek space with a fluid, modern design.

**European-inspired. American-made.**

# 3D LAMINATE

Our 3D Laminate (3DL) selection includes a range of mattes, wood grains, textures, and glosses. 3DL material is made from PVC and has consistent color, finish, and surface quality from edge to edge.

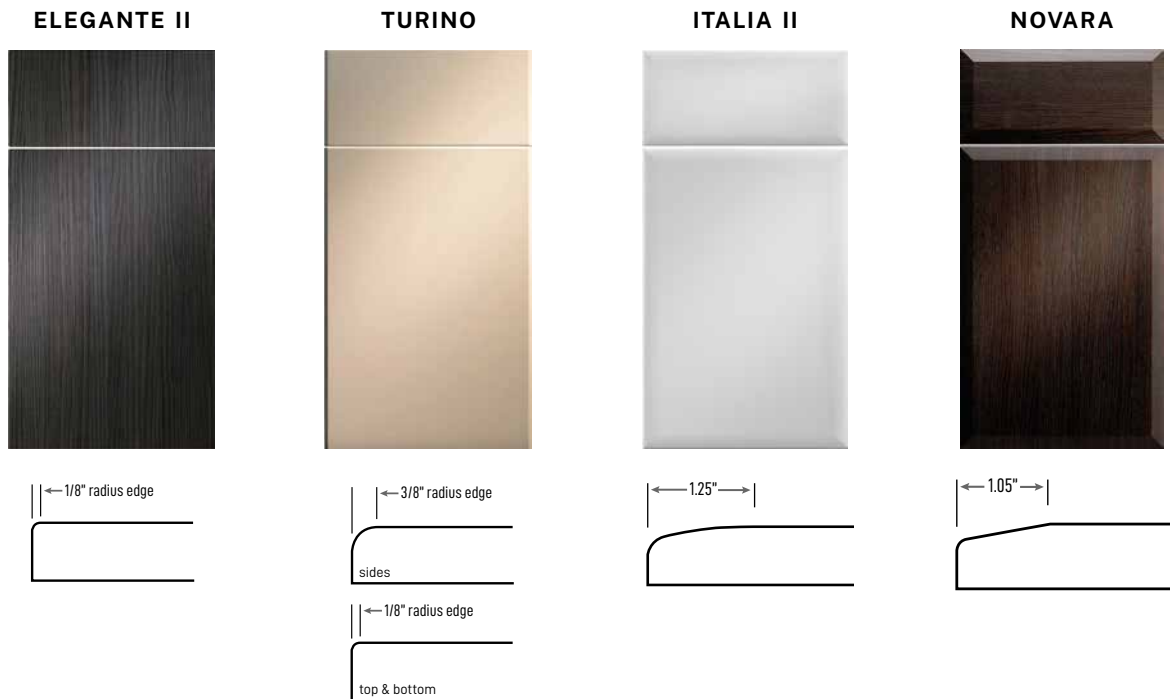

The high quality construction of the 3DL line—using a membrane-pressed front and sides over a 3/4" engineered CARB II compliant board core—gives it a clean and contemporary look.

## Comparison of Door Profiles

Four door styles in our 3DL line each have their own distinctive profile and shape.

Choose from the minimalist ELEGANTE II all the way through NOVARA with its bold, wide chamfer.

## Cabinet Construction

Our high-quality cabinets are eco-friendly and are designed and sustainably built to last for a lifetime of use. All cabinet boxes include the following features:

- 3/4" engineered wood boxes with laminate veneer
- European-style doweled frameless construction
- All dadoed backs: 1/4" on bases and tall; 5/8" on walls
- White laminate shelves and interiors
- Finished sides built with door-coordinating laminate

# LEVEL

For those seeking extremely crisp and bold lines, our Level selection presents colors and finishes that you won't find anywhere else.

The Acrylic, Wired, and FENIX lines are a perfect match for modern design with a minimalist aesthetic.

## Acrylic & Wired

High-gloss acrylic components feature a top colored layer made from ABS (acrylonitrile butadiene styrene), which is permanently fused with a clear, high-gloss acrylic top layer. ABS is a high-quality, ecologically responsible, impact-resistant, resilient thermoplastic.

Wired 2DL is a PVC material used for flat lamination only.

## FENIX NTM

FENIX NTM® features nanotechnology that is characterized by next-generation acrylic resins, hardened and fixed with an electron beam curing process. With low light reflectivity, the surface of FENIX is extremely opaque, anti-fingerprint, and features a soft touch.

## Level Edgebanding Options

- 2-Part
- Aluminum
- Brushed Steel
- Matching

*Not all edgeband options are available for all Level colors.*

# CARE & CLEANING

Keeping our Euro-Contemporary cabinetry clean and new-looking is quick and easy.

## 3D Laminates

Clean using mild soap and a damp cotton cloth, mild kitchen or glass cleaning products, or denatured alcohol. A 10% bleach and water mixture can be used as a disinfectant on most surfaces. Avoid any abrasive materials, solvent-based cleaners, harsh chemicals, or any brushes or scouring pads.

## FENIX

FENIX NTM® surfaces should be cleaned regularly with a Magic Eraser or a damp cloth with warm water and mild detergents. Most normal household cleaning products or disinfectants work well. Do not use products containing abrasive substances, abrasive sponges, or products such as sandpaper or steel wool.

## Acrylic & Wired

Clean with a damp microfiber cloth or wet chamois with mild soap if needed. *Never dry-wipe the acrylic finish.* Avoid any abrasive cleaners, solvent-based cleaners, or harsh chemicals, as well as paper towels, brushes, or scouring pads. Polish kits are available for purchase.

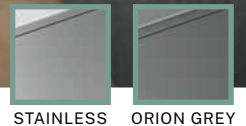

## HEAT SHIELDING

All doors and drawer fronts exceed KCMA standards for heat resistance. However, it is recommended whenever possible to place some distance between heat sources and these components. Heat shields are recommended in places where enough distance might not be possible, such as next to broilers, dishwashers, and so forth. These steel shields are easy to install and are powder-coated in your choice of Black, White, or Almond.

## DRAWER OPTIONS

By default, all of our Euro-Contemporary cabinetry comes with the same solid-wood dovetailed drawer boxes that are included with all Adelphi cabinets. However, you may also upgrade to BLUM LEGRABOX metal drawer boxes at an additional charge. Choose from brushed stainless steel or matte Orion Grey.

# TEKTON

LAMINATE CABINETRY

ADELPHI

KITCHENS & CABINETRY

# COMMERCIAL. INSTITUTIONAL. HOME.

The Tekton program is Adelphi's line of cabinets made with durable laminate slab doors and drawer fronts. Because of the resilience of the material, Tekton is a great choice for heavy-use areas, such as businesses or commercial construction projects, and for home use in garages, laundries, pantries, and more. A wide range of laminate colors and textures is available to suit any project, for a modern taste or a more conservative space.

Tekton is most commonly constructed using our fully customizable European-style frameless cabinets with engineered wood sides that are assembled with wood dowels and glue; drawer boxes are always dovetailed solid wood. For more flexibility, you can choose from natural wood or white interiors.

# RLV

RECYCLED  
LEATHER  
VENEER

## ADELPHI

KITCHENS & CABINETRY

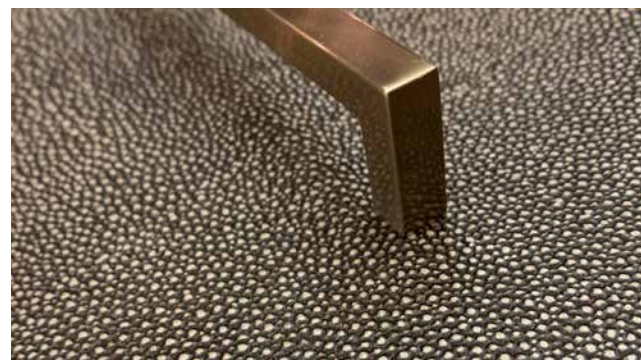

# THE BEAUTY OF LEATHER, NATURALLY.

Recycled leather veneers are fully manufactured from reclaimed leather fibers extracted from cast-off uses. The material is environmentally friendly and has protectants added to it to ensure a combination of durability, sustainability, and elegance.

With a wide range of colors and three distinctive textures—**Buffalo**, **Crocodile**, and **Shagreen**—leather veneers are applied similarly to a wood veneer and can be used on slab cabinet doors or as an accent on panels, valances, or other flat pieces. Additionally, RLV material can be applied to create insert panels, which can be used inside of open frames.

RLV is available on our Ridgewood or Woodbrier cabinet boxes; doors and drawers can be created with coordinating solid laminate interiors, matching leather interiors, or a 6-sided “infinity wrap”. Your choice of complementary or attractive metallic edgebandings are available on doors and drawers without the infinity wrap.

# DOORS

# Wood Cabinet Doors

Wood doors are either constructed entirely from solid wood stiles and rails, or they are made by applying veneers to heavy-duty particleboard cores. Solid wood doors are made with mortise-and-tenon construction or mitered construction, depending on the style, and are available in a range of different woods and finish colors. Many doors also come with your choice of different outside lip profiles, interior framing beads, and center panel raises. These truly custom choices give you literally tens of thousands of possibilities in designing your kitchen.

# Euro Contemporary

ELEGANTE II

ITALIA II

NOVARA

TURINO

LEVEL

Our Euro-Contemporary line is made of two distinct parts: three-dimensional laminate (3DL) and Level. The 3DL line offers a fully unique set of four 1-piece doors; each has a unique profile, from the minimal radius edge of the ELEGANTE II to the wide chamfered shape of NOVARA. Finishes on 3DL doors range from matte to glossy and are available in both textured and non-textured patterns. The Level door, a modern slab style, is available in four distinct finish collections: ten colors of glossy Acrylic, four finishes of eye-catching Metallic, six shades of visually textured Wired laminates, and four monochromatic tints incorporating FENIX nanotechnology. Every Level door comes with your choice of edgebanding, an accent that will create a showpiece of your cabinetry each time a door is opened. The Euro-Contemporary cabinet boxes are constructed using our Whitebrier line, as customizable and high-quality as all of our other cabinetry.

## Strata

Strata doors and drawer fronts are constructed from high-density fiberboard with textured veneers applied. These modern materials are sustainably manufactured using recycled wood and fibers to create a truly "green" option.

The textured prints that characterize Strata are heat-fused onto their core material, creating a "thermo-textured surface". This allows for a wide range of colors and textures while avoiding some of the natural variation of wood from trees. Strata TTS materials are highly resistant to warping, bowing, changes in humidity or environment, scratches, dents, and fingerprints, making them a truly durable option.

Doors and drawers made from Strata material are available in three styles: a modern slab, a three-piece door and drawer with contrasting grain direction, and a classic five-piece door with a Shaker look. Each offers unique characteristics that will lend your home a truly one-of-a-kind touch.

## STRAPPED DOOR PANELS & FACE FRAMES

ALUMINUM

BRASS

CHROME

OIL-RUBBED BRONZE

WROUGHT IRON BLACK

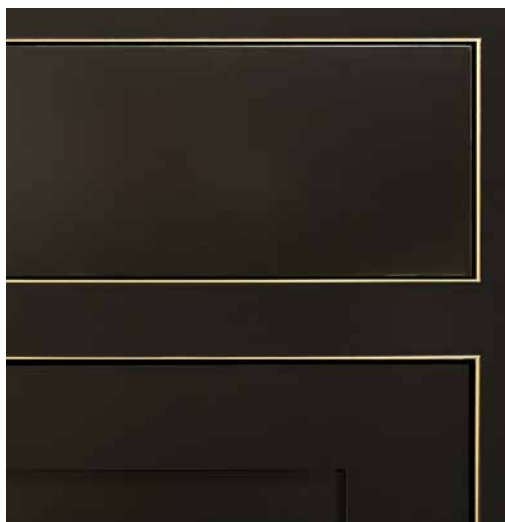

For an eye-catching metallic accent, metal strapping can be applied to the face of any 3/4" thick door with a square bead and flat center panel. Strapping can also be applied around the inside edge of the face frame on flush inset; this will create a thin line of metallic finish visibly outlining each door and drawer. When you open the cabinet, the full width of the strap will be visible on the frame's edge.

Both face frame straps and door panel straps are available in your choice of five finishes. Please note this may not be compatible with certain materials or textures, such as Strata or Euro-Contemporary.

## WIRE GRILLE INSERTS

Wire grille inserts are again available for open-frame doors, with reeded, round, and flat wire options, as well as three opening configurations and your choice of antique brass, oil-rubbed bronze, or stainless finishes.

DOOR & DRAWER IN STRAPPED FACE FRAME:  
BLACK FULL COVER & BRASS

# ALUMINATE: BASES

## ALUMINUM FRAME BASE SYSTEMS

For a modern twist, add an aluminum frame base to your cabinet by removing the toe kick. These unique and contemporary options are available in the same 11 finishes shown at left for the aluminum frame doors. Frames will be sized to correspond with the doors and drawers on your cabinet, and can be ordered in your choice of heights to match the toe with neighboring cabinets.

Two-tier frame systems are also available to be used as kitchen islands; shelves and tops can be made and finished to fit, as well as single-drawer cabinets to sit atop the frame.

## METAL CABINET LEGS

A new range of metal cabinet legs and feet have been added to our catalog. A variety of styles, shapes, and finishes are available.

# ALUMINATE: SHELVES

## FLOATING SHELF TRIM

Floating shelves made from solid wood can be trimmed with metal strips up to 1 inch wide. Eight popular colors are available, including stainless steel, brushed gold, and gunmetal.

## ALUMINUM FRAME SHELVES

Frames available in 11 metal finishes; Adelphi can make shelves for these frames from most materials.

## HANGING SHELF TRUSSES

Turn a 3/4" thick shelf into a floating wall shelf by hanging with these trusses. Shelves just slide right in. Available in six finishes and either 8" or 12" depth.

## BRASS GALLERY RAIL

Use gallery rail to trim out floating shelves, or mount to the side of a cabinet to use as a towel bar.

# ALUMINATE: ACCENTS

## WROUGHT-IRON ACCENTED TRIM

Metal inlays and attachments can greatly enhance the look of natural wood products. In this collection, brackets and corbels, crown moldings, square posts, light rail, and panel molding can be overlaid with this attractive and timeless design. Wood parts are available in maple, cherry, alder, or paint grade. Metal overlays for these items are only available in wrought-iron black.

WROUGHT IRON BLACK

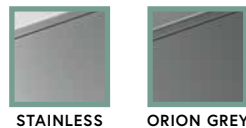

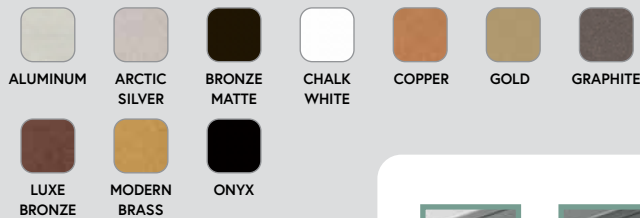

## SQUARE METAL POST SLEEVES

These sleeves add an attractive ferrule-style end to square posts in 2", 3", or 4" square sizes. Each sleeve is available in the five finishes shown at left. While our standard turned post designs are 3½" square, we can also supply posts in some of these sizes by special request, or you may supply your own. Sleeves should be dadoed on to the bottom of the post.

## J-CHANNEL & C-CHANNEL HARDWARE

Channel hardware is available in the finishes shown below to coordinate with many different looks. Since it mounts to the cabinet, rather than to the door, this channel hardware can be used with nearly any style of door or drawer, and with most of our material and texture options.

## LEGRABOX DRAWERS

You can upgrade any solid wood drawer box to a BLUM LEGRABOX metal drawer box at an additional charge. Choose from brushed stainless steel or matte Orion grey.

Creating infinite design possibilities, from inspiration to installation.
