

## PADDY SEPARATOR

The machine is designed for separation of paddy from the mixture of brown rice and paddy on the principle of density. It separates 3 types of materials, that are paddy, brown rice, mixture of paddy & brown rice.

### FEATURES

- High yielding and strong separating capacity.
- Compacted structure and smooth operation.
- Suitable for various kinds of rice and mixture.

## DUCK TYPE ASP. CHANNEL

Duck Type Aspiration Channel is designed with high tensile strength and offered in accurate dimension. The Aspiration Channel is available in a compact design that facilitates ease of usage.

### FEATURES

- High tensile strength and Compact design.
- Made using quality grade material.
- Optimum performance and Long lasting usage.

## DRUM SIEVE

The Drum Sieve cleaning process decreases the maintenance requirements of the machines in plant but also gives high quality of cleaning products. Drum sieve efficient at removing over and undersize impurities such as pieces of wood, stone etc from product.

### FEATURES

- Easy installation and minimum maintenance and easy to operate.
- It improves the operational dependability of the entire production plant.
- Serves to separate coarse impurities.

## FRK BLENDING MACHINE

FRK Rice Blending Machine is machine is Continuous/Inline system to integrate seamlessly with the existing production line. This machine is used for mixing fortified rice & normal rice in the 1:100 ratio.

### FEATURES

- Easy to change mixing percentage as per requirement.
- Rugged and aesthetic construction
- Less power consumption.
- High performance.

## PRE CLEANER

The Pre Cleaner is highly efficient machine specially designed for cleaning unwanted materials mixed into the raw grains.

### FEATURES

- Top mounted air extraction unit for best aspiration.
- Easily changeable sieves with large surface area.
- As the machine is dynamically balanced hence there is no vibration.
- Low noise, perfect dust collection & long life.

## DRUM SIEVE CLEANER

The Drum sieve machine can be used as pre-cleaner or main cleaning machine for grains and cereals to separate coarse impurities, such as straw particles, string, paper, pieces of wood, leaves etc.

### FEATURES

- Easy installation and Minimum maintenance and easy to operate.
- Uniform performance combined with high efficiency.
- Fitted with special roller to feed the material uniformly and cover full surface of the cleaning sieve.

## VIBRO CLASSIFIER (MTR)

The Vibro Cleaner is used in modern Pre-cleaning and Cleaning sections, this machine can accurately separate oversized impurities and part of the Immature grains from grains.

### FEATURES

- Adjustable deck angle which allows the material to flow flexibility.
- Vibro Cleaner comes with an expression channel.
- Vibro Motors make the operation noiseless and trouble free.
