

## VIBRO DE-STONER

The Vibro De-stoner separates stones, all impurities from grains on the basis of density difference by adjusting the aspiration systems.

### FEATURES

- Looking at stoner-Running Situation.
- Balanced / Stone Selection
- Adjustable Table-Inclination and air-Volume
- Perfect dust-Collection and low-noise.
- Automatic discharge of stones.

## MINI DE-STONER

The Mini De-stoner is used for the separation of heavy materials like stones, glass and metals in the grains. It is manufactured by utilizing supreme quality components and the high-end technology.

### FEATURES

- Fine separation of stones and other heavier material from grains.
- Automatic stone discharge system by timer unit.
- Saving of power, operating on a small electrical motor.

## MAGNETIC DE-STONER

The Magnetic de-stoner (Mud Stone Sep) is used to remove heavy foreign-particles like Black Stone, Metallic Impurities, Mud Balls, Para Magnetic and Impurities from Grain, Spices, Pulses, Rice & Nuts.

### FEATURES

- Long service life
- High performance
- Less power consumption
- Saving of power, operating on a small electrical motor.

## LENGTH GRADER

The length grader helps in grading the rice on the basis of grain. It is highly efficient for separating broken rice from head rice, separating broken rice of different lengths.

### FEATURES

- Various choice according to machine choice.
- Operation of each cylinder rotation speed control.
- Easy operation and maintenance.
- Variable speed control device.
- Improve the grading quality.

## PRECISION SIZER

The precision sizer is developed for size separation of various grains and beans. During the passage of materials through the revolving cylindrical screens.

### FEATURES

- Suitable for various grains.
- An extremely efficient system for separation of over size & under size grains.
- Similar setup for removal of over sized & under sized grains.

## ROUND SHIFTER

The Round Shifter is used to separate different kinds of rice. It is portable, occupy less space, consume less power and have high capacity. Our rice plan shifters are available in customized specifications and are provided with easy replaceable sieves.

### FEATURES

- Separation of tips from head rice.
- High yielding and strong separating capacity.
- Easy adjustment and result of separation can be checked at any cost.
