I'm sharing this because there was & is no other basis than this unsuitable technique to diagnose covid19.

Symptoms of covid19 are officially not different from the acute respiratory disorders collectively known as "influenza-like illnesses" (ILI).

Did you know that, in the vast majority of cases of ILI, the cause is unknown?

### **[The Mysterious Death of Dr Fauci's Most Notable Critic, Just Before COVID-19: Dr. Kary Mullis, the Inventor of the PCR Technique](#)**

Those who believe in viruses in general, and Influenza viruses in particular, will tell you that in 7-14% of ILI cases, one or other Influenza viruses are detected (by PCR). In the other 86-93% of ILI, we don't know the cause. It's assumed they're due to one or other of the large number of viruses that it is asserted can infect the human respiratory tract.

I used to accept this without question. Now that I'm questioning, I find there's no convincing evidence for this assertion.

It's not axiomatic that an acute illness must be caused by an infection. I don't understand why people do seem to think that, when they don't about heart disease, renal failure, inflammatory bowel diseases, asthma etc etc. The burden of proof sits with those asserting that "ILI is due to infection with respiratory viruses, which were transmitted from a person already sick with the same pathogen".

I no longer believe that at all.

Did you know that nobody has ever demonstrated transmission of illness from a person sick with an ILI & a healthy person?

Transmission is claimed on the basis purely of the epidemiological evidence. For example, if 1 in 1000 people had clinical ILI in a sample taken last week & next week, the number had risen to 1 in 100 people, it is assumed that they had all caught it from those sick earlier. Fancy concepts like reproduction number is derived from such datasets,

again, based on the unproven assumption that person to person transmission is responsible.

Anyway, there was no pandemic and of course, the authorities knew. They can count the dead and know their age and sex.

Despite there never having been a pandemic, with remarkable fluidity, almost the same absurd policies were imposed around the world over a short space of time. These policies, such as lockdown, masking, business closures, border restrictions, etc were known, prior to covid19, to be without effect in the apparent spreading of ILI. The Wayback Machine holds a late 2019 document, written by WHO technical staff, which says exactly this.

So they knew there was no pandemic. They relied in part for the success of the PsyOp on the unsuitable PCR test.

Remember all the TikTok videos of dancing medical staff in hospitals? That's not consistent with the idea that the country is under such an assault that the hospitals are at risk of being overwhelmed. It is consistent with evidence I was getting weekly from a new friend who was responsible for scheduling utilisation of intensive care beds in NHS England. He worked with me on one publication and also Fed information to Prod Carl Heneghan in 2020 until he was out on report, watched often, and warned if he made any unauthorised disclosures again, he'd immediately be dismissed for cause.

They knew there was no pandemic, and they imposed useless but destructive restrictions and lies about the state of healthcare.

Then they lied some more in relation to the "vaccines" & they're still doing it today. These injections contain several definitely injurious motifs which are blindingly obvious to those of us who've spent careers in "rational drug design". I'm not a vaccine expert but I am where it comes to design and testing molecules.

In any case, how the dickens could an injection give rise to local immunity in the lungs? It cannot & does not. Even if influenza viruses existed, you'd not expect flu vaccines to be effective for this reason. They cannot generate "mucosal immunity" in the lining of your lungs. They don't reduce hospitalisation or death from influenza, either.

It would definitely be impossible to design, make, test, improve, choose, run toxicology tests, run a series of clinical trials with a suitable (& routine) extension to act as a longer term safety database. It's out of the question that this could be done in 9-10 months.

I've not even mentioned the process of researching how to manufacture a billion doses of these unprecedented mass market products. Career experts like Hedley Rees have explained why several years minimum is unavoidable and irreducible.

The only conclusion is they lied about this, too. Six billion people were injected to date. Those of you reading this know what I think about that.

Further absurdities included having to prove you had been injected by these useless, unnecessary and dangerous products, so called vaccine passports. Here you know for sure that the only possible argument for this turns on at least two things, both of which are lies.

The injections prevent you giving the alleged infection to others. Funnily enough, we know this doesn't happen anyway. Furthermore, the manufacturers admitted they'd not even studied the impact on transmission.

Nobody in officialdom has mentioned these things. The reasonable conclusion is this is all a puff to get you to accept a vaccine, nothing more than digital ID.

If most people take up & use digital ID and it becomes normal, I'm afraid that's the end of human freedoms, never to return.

Oh, the proof there's not been a pandemic?

Numerous authors have arrived at this conclusion through independent study. My preferred go-to person is Dr. Denis Rancourt. I posted a link to a short statement he recently issued, which you can use in repeated attempts to waken & warn people. He gave a solid interview to Reiner Fuellmich's new team, ICIC.

If you do nothing else PLEASE read Denis' short (2000 word) summary and allow that interview to play in the background. If you get the first point, no pandemic, I put it to you that you must conclude that the authorities knew & the smoothly installed measures

tells you this has been rehearsed repeatedly. Which it has. These monologues don't have an end, but I'll stop here. [Link to Rancourt's work](#) and interview. Plus, once again the [proof of 25 years of rehearsals](#).

Best wishes,

Mike

Thank you!! No TV No programming. Pandemic of a fraudulent test; PCR. Yes No pandemic. No street people dying enmasse, no Hospitals overwhelmed. 6 Billion walking scientific test tubes, now learning 4 various toxicity levels of products which is simply a shell game. Pandemic of Deception. Grifting. Suffering.

Traumatized the world by yes unnecessary, unscientific, underhanded collusion of state and private enterprise. How dare you question "our" science! After all I am science. Seems to me there are plenty of timed videos of our "Experts" that just scream out to be documented for use to prosecute those who sold this scam. They knew. We are going to hide our trial data for 75 years? And they are still lying. Walensky during her congressional hearing said " the vaxxines saved millions of lives" also she asked for more money so they could track people who did get shots to shore their internal tracking gaps.

She had no remorse. No reflection. " The CDC reputation is better". No Truth. Only lies. No pandemic. Only a trail of tears of a strange twisted 3 years. And they are still mocking and gaslighting and threatening their new pandemic.

yes, but even the amish had 3 major excess mortality peaks in the covid-time (out of 5 since 2015). So something was going on, not exactly, but pretty much in the Ballpark of
