A Star Witness of the Criminal Pandemic Response

Nurse Gail McCrae provides devastating testimony of mass homicide.

Documentary filmmaker James Patrick recently shot **an excellent interview with Nurse Gail McCrae**, who was working in a Bay Area hospital in the years 2020-2021.

The corporate headquarters of Gilead Sciences, which produces Remdesivir, is located just south of San Francisco. As Nurse McCrae has pointed out, during the pandemic, the Bay Area had one of the most compliant populations on the planet. Though the city's administrators do not enforce the most rudimentary public sanitation laws that prohibit homeless people from using streets and sidewalks as latrines, they were eager to enforce draconian lockdowns; they required employees of the state and healthcare workers to receive COVID-19 injections, and they allowed private business owners to fire employees who refused the shots.

Nurse Gail McCrae provides devastating witness testimony of the following acts of malfeasance.

- 1). The deliberate and fraudulent misrepresentation in the spring of 2020 that Bay Area hospitals were overflowing with critical COVID-19 patients in order to terrify the population.
- 2). The deliberate and criminal denial of Corticosteroids to COVID-19 patients afflicted with massive inflammation, even after Dr. Pierre Kory testified to a U.S. Senate hearing that **this standard of care** for treating pulmonary inflammation was highly effective in treating COVID-19.

3). The deliberate and criminal administration of Remdesivir to critically ill COVID-19 patients, long past the well-established standard window of time for administering an antiviral medication. The strong financial motive for committing this crime was self-evident from the 20% add-on bonus that hospitals received on the patient's entire bill, paid out by the Centers for Medicare and Medicaid Services.

4). The deliberate and criminal concealment from the public of patients suffering COVID-19 vaccine injuries in 2021.

I highly recommend watching nurse McCrae's full interview with Patrick Henry, in which she goes into great detail.

She also recently gave a succinct account of the key elements of her testimony in an interview conducted by Children's Health Defense:

VIDEO - California COVID Nurse exposes deadly COVID-19 Hospital Protocols (Remdesivir), and flood of COVID-19 Vaccine Injuries (posted Dec.10, 2023 by Children Health's makismd.substack.com

Brava, Gail MacCrae, for having the discernment and the courage to do the right thing, to resist the terrible pressure to conform, and to speak truth to corrupt power.

I believe this appalling episode is the greatest organized crime in U.S. history, with ranking federal and state actors among the key perpetrators. This is why I conceived our book—*The Courage to Face COVID-19: Preventing Hospitalization and Death While Battling the Bio-Pharmaceutical Complex*—to be a work within the **true crime** genre of literature.

Starting this Friday (December 15) morning, we are offering free shipping for 48 hours for customers within the United States who purchase the book on our website. A shocking story, it's also a page-turner with elements of hope and redemption offered by brave men and women who demonstrated the same spirit as Gail McCrae, and therefore a suitable Christmas gift.
