

DESIGNING YOUR KITCHEN AROUND YOUR SINK

Reasons For Making This Decision Priority #1

1. Over 75% of our time in the kitchen is spent at the sink.
2. The customer gets the sink they really want and it fits the needs of their family life.
3. Sink cabinet is designed to fit the sink. It could require a larger base/bump out or cabinet modifications if an apron front sink is chosen.
4. The customer can consider accessories... soap dispenser, water filtration, hot/cold water dispenser, matching strainer baskets/disposal flange.
5. They can pick a sink that will be the correct depth to line up with existing plumbing and assure drain holes match up.
6. Regarding depth, if your customer has to do a lot of bending when using the sink, they may need a shallower bowl, or accessorize with an elevated bottom grid, raising their work area.
7. Often sink choices are based on the faucet and number of holes required...not all sinks have a variety of hole selections... limiting the number of sinks to choose from.
8. When sink choices wait to the very end, there is a greater chance of the customer not getting what fits their lifestyle, their budget or the cabinet design.

Reasons To Source Your New Sink Through Us

1. For 25 years, we have worked with solid, name brand vendors, who stand behind their product.
2. Our depth of inventory is great, extensive variety, wide price range and high quality.
3. Our engineering department has easy access to all the specifications on our sinks. Sinks ordered on line can create downtime if the fabricator needs to source the correct dimensions, radiuses, install applications, or if needed, resort to templating it.
4. If there are sink issues/damage during install with on-line purchase...project stops, until another sink is sourced. If there were issues with our sink, we have a high success rate of having stock and getting a new one to the install so it can be completed.
5. If Fabricators Unlimited is handling the project, the sink rides along with the countertop. We coordinate bundling the top and sink and they arrive at install together.
6. On occasion, when the sink was to be provided by the plumber/homeowner, and this does not happen, the completion of install does not happen.

3 EASY STEPS FOR SELECTING YOUR SINK

1

Stainless Steel or Color

- Granite Composite
- Fireclay - China
- Acrylic - Porcelain

2

Undermount Top Mount / Drop-in Apron Front / Farm Sink

3

Style

- Single bowl
- Equal Double Bowl
- Combination
