Solid surface is manufactured with acrylic resins, fire-retardant fillers and uniform color throughout its thickness. Get in touch with your creative side and design an innovative surface that will last a lifetime! Solid surface comes in a wide array of colors and finishes that will fit many projects such as functional kitchen & bathroom spaces to 3-dimensional applications (thermoformable design concepts) in a myriad of shapes.

As a renewable surface and virtually seamless design, solid surface allows you to relish in the ease of day-to-day maintenance and the option of having an integral sink, which gives your countertop a one-piece look and feel.

Strength and Durability

- Solid surface is durable and will stand up to everyday wear and tear.
- Minor scratches, chips, gouges, cracks or burns can be repaired to its original surface.

Low Maintenance

- Solid surface's virtually seamless application makes cleaning almost effortless.
- Cleaning is as simple as wiping down with warm water, mild soap and a soft cloth.
- Minor scuffs can be removed with a mild abrasive cleaner (Soft Scrub®) on a damp sponge (using small, circular motions).
- Scratches can be easily repaired (matte finish) by buffing it with a Scotch-Brite® pad 7447 A VFN (maroon) pad in a circular motion; semi-gloss and gloss finishes are a little trickier to resurface.

Stain Resistant & Hygienic

- Solid surface is highly stain resistant; it has a solid, nonporous surface so sealing is not required.
- Its smooth surface does not allow liquids to penetrate so bacteria, mildew and mold <u>CANNOT</u> grow.

Heat Resistant

- Solid surface is heat resistant <u>HOWEVER</u>, hot pots/pans/coffee pots/slow cookers should <u>NEVER</u> be placed directly on a solid surface, the <u>USE OF TRIVETS OR HOT PADS ARE STRONGLY RECOMMENDED</u> to maintain your surface.
