

# 8MP ePoE Starlight+ Network Bullet Camera

True Wide Dynamic Range Fixed-lens Network Camera with Analytics+

WizMind Series devices offer Dahua Analytics+ functions for comprehensive, human-oriented analytic solutions. WizMind Series products are ideal for complex applications with demanding requirements that need advanced analytic capabilities.

#### **System Overview**

The Dahua 8 MP Starlight+ ePoE camera offers Analytics+ functions at the edge – performing complex real-time perimeter protection surveillance, people counting, and face capture. The Dahua Analytics+ algorithms significantly improve accuracy and reliability as compared to standard intelligent features. The camera is ideal for a host of diverse applications — Starlight+, True Wide Dynamic Range, and Smart IR technologies allow the camera to operate in any lighting condition and the IP67 rating makes the camera suitable for the harshest environments.

## **Functions**

## Perimeter Protection

Dahua Analytics+ includes Tripwire and Intrusion functions that offer custom tripwires based on object type for automation in limited access areas. Perimeter Protection requires less pixels to detect an object to deliver improved accuracy and decreased false alarms due to lights, weather, trees, or animals.

## **People Counting**

The camera uses complex real-time people counting algorithms to deliver accurate flow statistics from two distinct people counting functions, Line Crossing and Regional. The line crossing function counts the number of people crossing a defined line, and the regional function counts the number of people in a distinct, user-defined area. People counting is ideal for measuring the number of customers entering or exiting a location and to monitor groups of people in a distinct location.

- 1/1.8-in. 8 MP Progressive-scan CMOS Sensor
- · Triple-stream Encoding
- Al Coding, Smart H.265+, and Smart H.264+ Video Compression
- 8 MP (3840 x 2160) at 30 fps, 2.8 mm Fixed Lens
- Enhanced Power and Data Transmission Distances (ePoE)
- Starlight+ Technology for Low-light Applications
- Analytics+ Functions Perimeter Protection, People Counting,
   Queue Management, Smart Motion Detection+, and Face Detection
- Built-in Microphone
- ArcticPro Series Camera Operational down to -40° C (-40° F)
- IP67 Ingress Protection and IK10 Vandal Resistance
- Maximum IR LED Distance 30 m (98.43 ft)
- Five-year Warranty\*

#### Smart Motion Detection+

Smart Motion Detection+, a component of Dahua's Analytics+ technology, improves alarm accuracy and decreases the number of false alarms. The advanced SMD+ algorithm analyzes a scene for human or vehicle motion, while filtering out other motion due to trees, leaves, animals, weather, and triggers an alarm when detected. SMD+ also saves time when searching recorded video by filtering false alarms and allowing quick retrieval of an alarm due to a person or vehicle.

#### Enhanced Power over Ethernet (ePoE) Technology

Dahua's innovative ePoE technology offers a plug-and-play solution to transmit power and data over long distances via Ethernet or coaxial cables, reducing installation time and saving money. ePoE technology is a viable, cost-effective solution for extending transmission distances and for converting existing, coax-based analog systems into IP systems.

#### ArcticPro

The Dahua ArcticPro Series of extreme-environment cameras combine temperature-tolerant components with a waterproof enclosure to ensure flawless operation in temperatures as low as –40° C (–40° F) without the need for an internal heater. The lack of a heater reduces the camera's power consumption and saves operating costs. For applications that demand high-resolution video with advanced features in extremely cold environments, the Dahua ArcticPro Series offers a camera to satisfy the most demanding requirements.

## Cybersecurity

Dahua network cameras are equipped with a series of key cybersecurity technologies including: security authentication and authorization, access control, trusted protection, encrypted transmission, and encrypted storage. These technologies improve the camera's ability to prevent malicious access and to protect data.

#### Environmental

The camera complies with an IK10 impact rating making it capable of withstanding the equivalent of 5 kg (11.02 lbs) of force dropped from a height of 40 cm (15.75 in.). Subjected to rigorous dust and water immersion tests and certified to the IP67 Ingress Protection rating makes it suitable for demanding outdoor applications.

#### Construction

Casing	Metal
Dimensions	241.10 mm x 79.0 mm x 75.90 (9.61 in. x 3.11 in. x 2.99 in.)
Net Weight	0.82 kg (1.80 lb)
Gross Weight	1.08 kg (2.38 lb)

0		
Analytics+ Fu	nctions	
Smart Plan Schedule		Enable Analytics+ functions depending on a user-define schedule. Allows the camera to switch analytic function based on time.
Perimeter Protection		Detects human or vehicle violations using the following methods:     Tripwire: a target crosses a defined line.     Intrusion: a target enters or exits a defined perimeter.     Monitors a combination of detection methods.     Search and retrieve video based on target type.
People Counting		Delivers accurate flow statistics from the following methods:  Line Crossing: counts a person as they cross a threshold in a defined direction.  Region: counts the number of people in a defined area. Counts people simultaneously from four (4) threshold lines and four (4) defined regions <sup>3</sup> .
Face Detection		Detects and captures a snapshot of a human face within a scene.
Smart Motion Detection+ <sup>3</sup>		<ul> <li>Differentiates between and classifies human and vehicle objects.</li> <li>Filters false alarms due to leaves, lights, animals, and other inconsequential objects.</li> <li>Extracts human or vehicle objects from recorded video for quick target search and retrieval.</li> </ul>
Recommended Detection	Human	Up to 10.0 m (32.81 ft)
Distance	Vehicle	Up to 15.0 m (49.21 ft)

## Intelligent Video System Functions

IVS triggers an alarm and takes a defined action for the following events:

Standard Features	<ul> <li>Tampering with the camera.</li> <li>Error writing to an onboard Micro SD card.</li> <li>Error sending or receiving data over the network.</li> <li>Unauthorized access to the camera.</li> <li>IP Address Conflict</li> </ul>
Premium Features	
Missing Object	An object is missing from a designated area.
Abandoned Object	An object is placed in a designated area where no object should be.
Scene Change	A person or object moves the camera to change the scene or covers the camera to obscure the scene.
Fast Moving	Target exceeds a set speed when exiting a defined area
Parking Detection	Vehicle remains in a defined area without motion for a set period of time.
Crowd Gathering	Specified number of people remain inside a defined area for a set time.
Loitering Detection	Target is in motion inside a defined area longer than a specified amount of time.

## **ePoE Transmission Distances**

## Via CAT5E/CAT6 Ethernet Cable

ePoE supply voltage 48 V

Maximum DC resistance < 10  $\Omega/100$  m

Cable Length, m (ft)	Bandwidth, Mbps	PoE Load Capacity, W	Hi-PoE Load Capacity, W	Working Mode
100 (328)	100	25.5	53	IEEE/E100

<sup>1.</sup> The DORI distance is a measure of the general proximity for a specific classification to help pinpoint the right camera for your needs. The DORI distance is calculated based on sensor specifications and lab test results according to EN 62676-4 , the standard that defines the criteria for the Detect, Observe,

Recognize and Identify classifications.

2. The video frame rates listed are the maximum rates for each stream. The actual video rates are subjected to the total encoding capacity.

<sup>3.</sup> Pair a Smart Motion Detection camera with a Dahua recording device that also offers SMD functionality to take advantage of SMD alarm filtering and object classification when searching and playing back  $\,$ recorded video.
