About Fire

Fire is fast!

A small flame can become big quickly. It only takes a few minutes for smoke to fill your house.

Fire is hot!

The temperature in a fire can be very hot.

Fire is dark!

When a fire starts, it is bright. But the smoke will make a room very dark. You may not be able to see.

Fire is deadly!

Smoke is poisonous and can hurt you.

I Spy the Smoke Alarm

Can you find the smoke alarm?

Smoke alarms should be inside each bedroom and outside sleeping areas. Put them on the ceiling or up high on the wall.

What to do if You Hear a Smoke Alarm Sound

Follow these steps when you hear a smoke alarm sound:

- If there is smoke, get low and go to your exit.

- Go to your family's outside meeting place.

- Call the fire department.

- Stay outside. Once you are outside, do not go back inside unless a firefighter says it is okay.

Remember to follow these same steps when you are sleeping over at a friend's house or staying with your grandparents.

Find Two Ways Out

You should know two ways out of every room and two ways out of your house. Can you find two ways out of these rooms?

Choose an Outside Meeting Place

Your meeting place should be outside your home where firefighters can see you.

A good outside meeting place is far enough from your home to be safe, and it stays in one location. Circle the good choices for an outside meeting place below, and put an "X" over the bad choices.
