

Notes
 1) This set is designed to use type 201A tubes with 5-volt 1/4-amp filaments and a type 200 detector with a 5-volt 1-amp filament.
 2) The type 200A detector could be used. It was released after this set was designed.

PRELIMINARY
 This information is based on review of actual sets. However, it is subject to revision at any time.

Additional info can be found in the articles at <http://www.atwaterkent.info/akArticles.html>
