

UNDER DECK CEILINGS

Transform the area under your deck into a protected outdoor living space or storage area

iDeal Outdoor Living, Inc P: (508) 540-9989 E: Rob@idealoutdoorliving.com

DO YOU HAVE A WALK OUT BASEMENT?

- Would you like to be able to use the patio area under your existing deck as an outdoor living space, even when it is raining?
- Quickly, cost effectively and easily beautify and protect the area under your deck from debris that falls between deck planks, including rainwater and leaves.
- We will customize a solution for your unique space.
- Ceiling panels are installed, under your existing deck, with a pitch away from your home, diverting water into a gutter and down spout.
 - Panels can be easily removed, when needed, and provide access to electrical or plumbing fixtures.
 - The components are Class “A” fire rated and hurricane rated, as well as mold and mildew resistant.
- **The result is a finished ceiling and a clean, enjoyable patio living space!**
