## About Me

*“There’s a thin line between clever and stupid.”*

As a designer with over 20 years of experience in the graphic design, advertising, and printing industry, I have gained valuable experience in the areas of design, photography, production, file prep, and printing. Those clients consisted of such companies as: The Home Depot, K-Mart, Murray’s Discount Auto Stores, Borders Group, and ACO Hardware. Working with these different companies has allowed me an opportunity to utilize creative skills and produce a quality product for my employer.

For several years I have been contracting as a freelance designer. During that time I have designed logos, brochures, and various collateral projects for clients. Additionally, I shoot product photography and retouch images with Adobe Lightroom and Photoshop.

## Just a suggestion

### Preparing for the Home Inspection!

Use everything you can suggest the house in good condition before you arrange to sell it, but don't be discouraged if the inspection report contains a few negative statements. Home inspectors make sense of everything they see.

Remember that the home inspection report is not a wish-list for buyers. Read your contract carefully; it dictates which systems should be in good working order at closing. If the roof is older, but doesn't leak, it's in good working condition. The same is true for older appliances.

Your contract may also state that you are under no obligation to make any repairs at all although the buyers can then likely withdraw from the contract. Don't feel you must comply with unreasonable demands for repairs.

## My Promise

### To You

Choosing the right home inspector can be difficult. Unlike most professionals, you probably will not get to meet me until after you hire me. Furthermore, different inspectors have varying qualifications, equipment, experience, reporting methods, and yes, different pricing. One thing for sure is that a home inspection requires work, a lot of work. Ultimately a thorough inspection depends heavily on the individual inspector's own effort. If you honor me by permitting me to inspect your new home, I guarantee that I will give you my very best effort. This I promise you.

## About Daley's

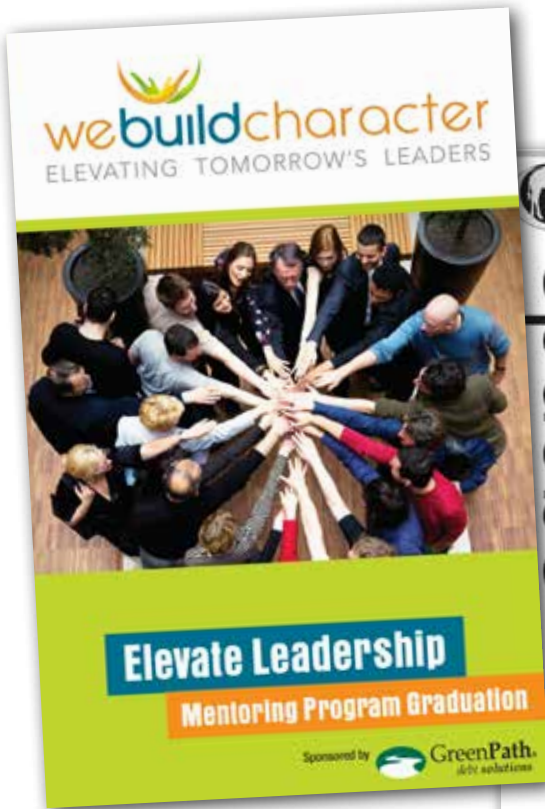

"Low and Slow" is the best way to barbecue for maximum flavor. I have always had a passion for backyard cooking, and it all began by testing out the many homemade ribs and sauces on my friends and family. We have developed our recipes over years of serving our Hickory BBQ & GRILL customers with our mobile on site catering business. You can check us out at [www.hickorybbq.net](http://www.hickorybbq.net).

After years at the catering I tried a competition and in 2008 at the Ribs 'n' Soul Festival held annually at Hart Plaza in Detroit, my greatest achievement was reached when my recipes were voted "Best Sauce" and "best Ribs" by a panel of Detroit's finest judges. Now I hope with this unique Detroit Style BBQ, along with this special fundraising approach, we will have the formula for us all to raise funds and create awareness for your fundraiser.

Enjoy and please contact us at [www.daleys.com](http://www.daleys.com) with any questions or recipe ideas.

The background of the image is a light gray, pixelated pattern. A large, faint number '10' is visible, with the '1' on the left and the '0' on the right, both rendered in a blocky, digital font style. The '0' has a thick, dark gray outline. The overall aesthetic is reminiscent of early computer graphics or digital art.
