## ABOUT US

Built on a foundation of 20+ years experience across corporate and small to medium enterprise, using best of breed vendor technologies, Astrontech delivers a vast range of solutions. These solutions span from datacenter systems to end user computing including cybersecurity, on premises and hosted cloud, mobility, IT lifecycle management and flexible consumption (pay as you consume) solutions.

Astrontech provides a comprehensive portfolio of enterprise class services to help our customers deploy technology to reach their business goals. Our highly skilled service professionals and partnerships with years of experience in designing, implementing and supporting heterogeneous and multi-vendor IT infrastructure environments assist our customers with their journey into or between public, private or hybrid cloud.

Astrontech invests in its vendor partnerships at the highest levels, adhering to a high standard around product knowledge, technical certification and integration experience. These partnerships enable Astrontech to provide our customers with specialist technical expertise, highly competitive pricing, access to proof of concept or evaluation technology and knowledgeable integration personnel.

# Putting the customer first

We work side by side with our customers to solve complex challenges to transition and transform their IT systems. Our talent and experience form part of our customers teams, innovating with them and putting the right technology to work for their companies.

Our success derives from a deep understanding of our customers, and our commitment to delivering exceptional service and value.

## Datacentre Computing & Storage Systems

Including HP, Dell, Cisco, NetApp, Nimble, Nutanix, IBM, AWS, Veeam, Microsoft Azure

### Systems Integration & Implementation Services

- Server computing & virtualisation and consolidation
- Storage management services (backup, de-duplication, replication)
- Storage system installation and Migration/Systems Renewal
- DR systems implementation and replication
- Resource As A Service/Pre Paid Block Hours

### Consulting Services

- Computing infrastructure performance tuning and optimization
- Compute & Storage Capacity Planning Assessment
- Storage systems design and optimization
- Lab facility for proof of concept development and live demonstration
- Disaster Recovery BCP design
- Cloud Readiness Assessment and Capacity Planning

### Maintenance & Cloud Services

- Server and Storage Systems outsourced service desk
- 24x7 Critical Watch Monitoring
- Technology maintenance and technical support agreements
- IaaS and Backup as a service (Cloud)
- Leasing and Financial Services

## End User Computing & Mobility

Including HP, Lenovo, Dell, Apple, Asus, Citrix, Microsoft, VMWare

### Systems Integration & Implementation Services

- Imaging and Asset Tagging service
- Deskside deployment
- OS Migration
- Application packaging and image SOE image creation
- Citrix XenDesktop implementation
- Mobile Device Management
- Microsoft InTune
- Resource As A Service/Pre Paid Block Hours

### Consulting Services

- SOE design and optimisation
- Citrix Platform Optimisation
- MDM architecture design

### Maintenance & Cloud Services

- Desktop Support outsourced service desk
- SCCM as a Service
- Hardware & Software Asset Management
- Endpoint protection cloud
- Office 365
- Asset Recycle and re-deployment
- Endpoint as a Service

## Networking & Security

Including Cisco, HP, Aruba, Juniper, Fortinet, Symantec

### Systems Integration & Implementation Services

- Routing, Switching and Security technology deployment
- AntiVirus system
- Identity and Access management
- Resource As A Service/ Pre Paid Block Hours
- Threat detection
- Firewall and Threat Security technology

### Consulting Services

- Network design and traffic flow optimisation
- WLAN Assessment and design
- Security and Vulnerability Audit
- Vulnerability Audit
- Penetration Testing

### Maintenance & Cloud Services

- Network outsourced 24x7 Critical Watch Monitoring
- Network Technology maintenance and technical support
- Threat detection and incident response managed service
- Security Incident management retainer

## Core Infrastructure Applications

Microsoft Enterprise Apps include: Exchange, Active Directory, SQL, Systems Centre, Sharepoint Citrix include: XenApp/XenDesktop, Netscaler VMWare vSphere, NSX, Site Recovery, vSAN Oracle DB

### Systems Integration & Implementation Services

- Application implementation and migration
- Sharepoint/SQL/AD/Exchange
- Resource As A Service/ Pre Paid Block Hours

### Consulting Services

- Application Design and Proof of Concept
- Load Testing
- Cloud Application Readiness Assessment

### Maintenance & Cloud Services

- Core enterprise application outsourced service desk
- 24x7 Critical Watch Monitoring
