

Citizens Request for Public Transparency Regarding the World Health Organization's International Treaty for the Pandemic Preparedness Act

1. How much money will Canadians have to contribute to the World Health Organization annually?
2. Who decides where the funding of this organization is allocated?
3. What protocols are in place for decisions ensuring fair distribution of WHO contracts?
4. Are Canadians in favour of funding more Wuhan-style, institutes of virology labs, with the potential for security risks of deadly viruses and new pathogens escaping, that could become a new pandemic threat?
5. Isn't it true that they are studying the world's most dangerous viruses and pathogens; should Canadians trust that in building more of these labs there is no risk of potential gain of function to patent the next big virus outbreak?
6. Isn't true, that our "safe and effective" vaccine provider Pfizer one of the world's largest drug companies, paid out the largest criminal fine in US history (\$2.3 billion) for mis-promoting medicines and for paying kickbacks to compliant doctors?
7. Why haven't Canadian journalists been reporting that in May 2024 our government will be negotiating entering a legally binding act of international law, with the WHO, that will extinguish our fundamental human rights and liberties in Canada, leaving all pandemic decision making solely to the WHO?
8. Do you really think the WHO has Canadian's best interests in mind?
