

Our Team

When your wind farm is falling behind on scheduled services, coming off a warranty period, short staffed or needing temporary support to complete additional work, give us a call.

We maintain a balanced staff of knowledgeable leaders and quality workers. Our focus is simple, we want to safely perform a quality service in a efficient manner. Our goal is to complete every project with zero accidents, zero rework, reduce your ALR and increase your turbine availability so you call us back for the next job.

Our Services

We perform a wide variety of 3rd party services on GE 1x and 2x platforms. Services include but not limited to:

- Annual / Semi Annual Maintenance
- Base bolt tensioning
- Generator Alignments
- Yaw puck replacements
- Yaw / Pitch gearbox oil changes
- Generator Collector Ring Replacements
- End of warranty inspections
- Variety of aftermarket installations (Auto lubricators, ultra capacitors, climb assists ect.)
