Monthly Newsletter

May 2021

April was a great month! Our children had so many interesting explorations. We learnt about Earth Day and being a responsible social citizen and as a center we pulled together to cope with our first classroom shut down due to a covid scare. Thank you to everyone for your positive attitudes and cooperation in dealing with the situation. We are so happy that there was no spread and that everyone, including the family who was ill, are doing well! That is the most important part!

In Infant class we explored Flowers, Insects and April Showers! We told stories with our felt board, painted insects with a variety of materials, and engaged in many interesting sensory and fine motor experiences. They loved it and there was so much to learn.

Our Toddler classroom dove into learning all about Weather last month. It is such a fun topic and so much context to apply it to with April being a month where we definitely experienced all four seasons, sometimes even in the same day! The children are so excited now to talk about and identify clouds, rain, snow, etc. and the various ways they experience them. Pictured to the right is an obstacle course our kids did on a day it was too cold to go outside. Our teachers love to get creative and find ways to incorporate all important aspects of children's learning and development; Even on the cold days it doesn't mean we can't get some exercise and move our bodies!

Our mixed Preschool/Kindergarten classroom learned all about Pond Life and Dental Health. The children loved learning about the germs in our mouths, how to take care of their teeth, and the practical application activities that our Teachers carefully planned for them. They also dove right into the pond exploration and all aspects of learning about the creatures that live in them.
