# AlSPORT

Sport personality! That's the new Tri-Sport. Jazz Die throttle and it takes off like a road misfitting with a mare in mind. Charges over the countryside — any countryside — rocks, lawns, dunes, ditches, swamps, swamps, mud, mountains — putting the smooth on everything it touches with those big, bumpy bubble side tires.

Now! Easy now. Soft back the Tri-Sport. Gentle it down. It purrs around your yard like tabby in the sunshine, mowing your lawn, raking your grass, hauling your trash. Gentle, gentle footsteps — wouldn't mash a marshmallow. Marshmallow prep, too!

TS-100 Deluxe Tri-Sport

MTS-30 Mini Tri-Sport

Sizes range from 3 HP to 12 HP. The Tri-Sport weighs less than your mother-in-law's suitcase (150 lbs.), hugs the ground like Astroturf, climbs like a Sherpa (45° grades) and stands knee high to Wilt (34 in.). And it gets you there with style and comfort. There's a Tri-Sport for everyone — the Mini Tri-Sport for the small touch, a super deluxe TS-100 and the 12 HP, TS-150 for the gutsy. They're all designed with you in mind.

TS-50 Tri-Sport with gang mower

World's Largest Manufacturer of 3-wheel Fun Machines

# Tri-Sport

VERSATILE, RUGGED, LIGHTWEIGHT, FUN... THE NEW TRI-SPORT 3-WHEEL OFF-ROAD VEHICLE BY ALSPORT, INC. IS BOTH WORKHORSE AND PLAYTHING.

With a gang mower attached, it eliminates the need of a lawn mower. Not only do you get the benefit of a reel-type mower, which professional gardeners will tell you is better and healthier for your grass, but also you cut a wider swath than even the biggest yard tractor mower. The Tri-Sport will make short work of a king sized lawn and leave it looking like a lush fairway.

The Tri-Sport can take all the struggle out of rolling or aerating a lawn. In this case you could rent the attachments, hook them up to the Tri-Sport and the job is done without effort. With an utility cart attached to the Tri-Sport, you have a handy hauler for trash or yard trimmings.

The Tri-Sport is always rearin' to go on a cross country fun junket. With its big, soft tires it will take any terrain, no matter how tough. Hills up to 45° it takes in stride. Hunting, fishing, exploring or just cruising the untracked countryside.
