

The "BIG EIGHT"**By****CESTAD**

Ride the "Bulldog Eight" and you'll recognize the combination of power, comfort and WOW! what a ride. The big foam padded seat, husky tubular frame and BIG 21x12-8" tires, front and rear, give you that real pleasure while rollin' through the fields, trails and snow-covered woods. A slight twist of the handle sends you off to a new experience on every ride. The peppy 8 HP Tecumseh engine produces good speed through the torque converter which automatically seeks the right position for gearing down and up.

**CS-9081A**

A 12-volt alternator produces power for the head and tail lights, all of which are standard on the "Bulldog Eight." All controls are at your fingertips, literally; twist-grip throttle and individual hand levers control the speed and dual external band type brake on each wheel. If you want the "Bulldog Eight" and beauty, too, get the deluxe fiberglass body and seat.

**CS-123
ROLL BAR**

Black roll bar, afford protection for engine and passenger.
